# Civil Service Supply Association, Ltd.

**Established 1866.**

The leading principle of this Association is to study :: the interests of the consumer by supplying ::

## THE BEST GOODS AT THE LOWEST POSSIBLE PRICES.

The Association was the pioneer of "Stores Prices," and in quality, measure and price its goods cannot be surpassed. Although the "tied price" system compels the Association to sell certain proprietary articles at fixed prices, there are many articles of the Association's own brands which can only be obtained at their Stores and which fully equal rival proprietary articles in quality, whilst the C.S.S.A. brands are incomparably lower in price.

*Members of the Civil Service may obtain Tickets on application. For particulars apply to Secretary—*

136, QUEEN VICTORIA STREET, E.C.
4, BEDFORD STREET, STRAND, W.C.

**N.B.—*Special Arrangements are made to meet the requirements of Members residing in British Colonies.***

# PREFACE.

THE present Edition of the Colonial Office List has been carefully revised throughout, and the Editors desire to express their thanks for the ready co-operation and assistance which the Dominion and Colonial Governments and their colleagues in the Office have accorded to them. They will be glad to receive information of any errors or omissions which may be discovered, and to have notified to them any alterations or additions to be made in the biographical portion of the work. All communications should be addressed to "The Editors, Colonial Office List, Downing Street, London, S.W."

Some account will be found in the work of every Dependency of the British Empire, except those administered by the Secretary of State for India,* and a number of small isolated islands.

The Editors are greatly obliged to the different Dominion and Colonial Governments and to the British North Borneo Company for the assistance afforded to them in regard to maps. It must, however, be distinctly understood that the maps in this publication are supplied for the purpose of illustrating the Handbook, and are (like the book itself) *not official.*

Special efforts have continued to be made to increase in number and bring up to date the biographies in the Appendix, and the Editors wish to express their acknowledgments to the Governments and Officers who have supplied them with information on the point. They are specially indebted to Mr. Thomas Mulvey, K.C., Under-Secretary of State of Canada, to the Government of the Union of South Africa, and to Mr. Fred. Johns, of Adelaide, author of "Johns's Notable Australians," and of "Who's Who in the Commonwealth."

The Editors much regret the delay in the appearance of the list this year, due to inevitable delays in the receipt of corrected sheets from the Dominions and Colonies and to the pressure of war work.

DOWNING STREET,
*March*, 1918.

* For information as to these, see "The India Office List," published by Messrs. HARRISON AND SONS.

The Corporation has been established with the object of developing the Trade of the British Empire in every part of the world, and brings to the notice of all interested that it is prepared to grant financial facilities to British Manufacturers and Merchants for the increase of their import and export trade.

It will be prepared to assist in opening up new channels for enterprise and will afford financial facilities for the enlargement of works and the extension of plant.

The Corporation is appointing representatives in the chief cities of the world and will open credits at home and abroad.

It invites enquiries and will endeavour where necessary to put expert advice at the disposal of correspondents regarding the financing of their foreign and overseas business.

Moneys received on fixed deposit. Terms on application.

# THE COLONIAL OFFICE.

The first separate organisation in this country for the central administration of Colonial affairs was a Committee of the Privy Council appointed by Order in Council of 4th July, 1660, "for the Plantaçons." On the 1st December, 1660, a separate "Council of Foreign Plantations" was created by Letters Patent.

It may be interesting to state that on the 28th of February, 1671, Evelyn's Diary records the author's appointment as a member of this Council, with "a salary of £500 per annum to encourage me."

In September, 1672, the Council was united, by Letters Patent, to the Council for Trade, and was henceforward known as the "Council of Trade and Plantations." It was suppressed on 21st December, 1677, and its functions, which had been much neglected, were transferred to the Privy Council. It was re-constituted in 1695, and continued to exist until 1782, at which date it consisted of eight Members of Parliament, who received a salary of £1,000 per annum each.

The affairs of India were placed under its charge in 1748, and remained so until the establishment of the Board of Control in 1784. From 1768 Colonial affairs have been dealt with by a Secretary of State.

The office of Secretary to the Sovereign dates at least from the reign of Henry III. There was one principal Secretary only (who was already called Secretary of State) down to 1539, when a second was appointed. From 1708 to 1746 a third Secretaryship existed, dealing exclusively with Scotland.

In 1768, a Secretary of State for the American, or Colonial Department, was appointed, in addition to the two principal Secretaries of State then existing; but the commissions to the Council of Trade and Plantations continued to run as before. Both the Council and the New Secretary of State's Department were abolished in 1782 by Burke's Act, 22 Geo. III., cap. 82, on the loss of the United States.

By this Act power was given to delegate to a Committee of the Privy Council all the functions hitherto exercised by the Council of Trade and Plantations, and by Order in Council of 11th September, 1782, circular instructions were sent to the Governors of the Plantations to transmit their returns and accounts to the Privy Council. Pending the appointment of a Committee, Colonial affairs were dealt with by a subordinate branch of the Home Department, styled the Plantations Branch.

At this time the duties of the two principal Secretaries of State were divided into "Home" and "Foreign," the affairs of Ireland devolving on the Home Department, which now undertook also those of the Colonies.

Digitized by Google

In 1784, by Order in Council of 5th March, a "Committee for Trade and Foreign Plantations" was appointed in pursuance of Burke's Act, and the new body was reorganised and placed upon a definite footing by the subsequent Orders of 22nd August and 25th August, 1786. The business hitherto dealt with by the Plantations Branch of the Home Office was transferred to this Committee.

At its commencement in 1793, the affairs of the French War were managed by the Home Department, but in 1794 Mr. Dundas (afterwards Lord Melville), who was then the Secretary of State dealing with the Home affairs of the Department, was appointed "Secretary for War," and also nominally Secretary of State for the Colonies; but the Departments of War and the Colonies were not actually united until 1801, when Lord Hobart was created Secretary of State for the War and Colonial Department. From 1794 the "Committee for Trade and Foreign Plantations" (now known as the Board of Trade) gradually ceased to have any connection with Colonial affairs.

From the conclusion of the French War the attention of the Secretary of State was chiefly occupied with the Colonies, and he was usually designated as Secretary of State for the Colonies. In 1854 a fourth principal Secretaryship of State was created, the Secretaryship for War; the affairs of the Colonies have since constituted the entire charge of a principal Secretary of State. When the third Secretaryship of State was created in 1794 he had only one Under Secretary assigned to his Department. In 1806 an additional Under Secretary was appointed, thus bringing his establishment to the level of the Home and Foreign Departments. This appointment was discontinued after the end of the French War, but was re-established in 1825. This second Under Secretaryship is held by an officer changing with the Government. An Assistant Under Secretary was appointed in 1847, and a Legal Adviser was added in 1867, and made an Assistant Under Secretary in 1870. A third Assistant Under Secretary was appointed in 1874, and a fourth in 1898. A new post, that of Assistant to the Legal Assistant Under Secretary, was created in 1897. In 1907 the office was divided into the Dominions, Crown Colonies, and General Divisions, and a new post, that of Secretary to the Imperial Conference, was created. In 1911 a Legal Adviser was appointed in place of the Legal Assistant Under Secretary and the number of Assistant Under Secretaries was reduced to two. The number was again raised to three in 1916. The present offices in Downing Street were occupied in 1875.

The Staff of the Colonial Office is shown on pages xv to xviii. The Under Secretaries, Assistant Under Secretaries, Legal Adviser and Legal Assistant are Staff Officers selected by the Secretary of State. The Clerical Staff is recruited after competitive examinations (Class I., and Second Division) held by the Civil Service Commissioners, from whom particulars can be obtained.

1887. Earl of Onslow, K.C.M.G.
1888. Right Hon. Baron Henry de Worms, M.P. (created Baron Pirbright, 1895).
1892. Sidney Charles Buxton, M.P. (now Viscount Buxton, P.C., G.C.M.G.)
1895. Earl of Selborne.
1900. Earl of Onslow, G.C.M.G.
1903. Duke of Marlborough, K.G.
1905. Right Hon. Winston S. Churchill, M.P.
1908. Col. the Right Hon. J. E. B. Seely, D.S.O., M.P.
1911. Lord Lucas.
1911. Lord Emmott, P.C., G.C.M.G.
1914. Lord Islington, P.C., G.C.M.G., D.S.O.
1915. A. D. Steel-Maitland, M.P.
1917. W. A. S. Hewins, M.P.

*Assistant.*

1849-68. Sir T. Frederick Elliot, K.C.M.G.
1868-70. Right Hon. Sir F. R. Sandford, K.C.B. (afterwards Lord Sandford).
1870-1. Hon. R. G. W. Herbert (afterwards Sir R. G. W. Herbert, G.C.B.).
1870-4. H. T. Holland (afterwards Sir H. Holland, Bart., and Viscount Knutsford, G.C.M.G.).
1871-92. Hon. R. H. Meade, C.B. (afterwards Sir R. H. Meade, G.C.B.).
1874-8. W. R. Malcolm.
1874-6. Sir Julian Pauncefote, Kt. Bach. (afterwards Lord Pauncefote, G.C.B., G.C.M.G.).
1876-97. Sir John Bramston, G.C.M.G., C.B.
1878-97. Edward Wingfield, C.B. (afterwards Sir Edward Wingfield, K.C.B.).
1892-97. Edward Fairfield, C.B., C.M.G.
1897-07. Frederick Graham, C.B. (now Sir Frederick Graham, K.C.B.).
1897-11. Sir Charles Prestwood Lucas, K.C.M.G., C.B. (now K.C.B.).
1897-11. Hugh Bertram Cox, C.B.
1898-09. Reginald Laurence Antrobus, C.B. (now Sir R. Antrobus, K.C.M.G., C.B.).
1907-16. Sir Hartmann W. Just, K.C.M.G., C.B.
1909-16. Sir George Vandeleur Fiddes, K.C.M.G., C.B.
1916. H. J. Read, C.B., C.M.G. (now Sir Herbert Read, K.C.M.G., C.B.).
H. C. M. Lambert, C.B.
G. E. A. Grindle, C.M.G.

The total estimated expenditure on the Colonial Office for the year 1917-18 was £59,750 (Civil Service Estimates, Class II., Vote 6).

Other expenditure in connection with the Colonies appears in Class V., Vote 2, Colonial services, £608,961, and in Class V., Vote 4, Cyprus, £50,000.

## THE CROWN AGENTS FOR THE COLONIES

The Crown Agents for the Colonies act as commercial and financial agents in this country for all the Crown Colonies, for the government of which the Secretary of State is, by the necessities of their constitution, ultimately responsible. [C. 3075, p. 8.] They receive instructions directly from the Colonial Governments, but are supervised by the Secretary of State in matters of importance, or when any question of principle has to be decided. The Colonial Regulations, 379-382, lay down the conditions under which the Crown Agents comply with requisitions from the Colonies.

Down to 1833 each Colony appointed its own agent in London, but in that year all the agencies were consolidated into one office, with the exception of six agents, who continued for a time to represent some of the West Indian Governments. A full account of the origin and functions of the Crown Agents will be found in a paper presented to Parliament in August, 1881. [C. 3075.] Further information is given in the Secretary of State's circular despatch of the 26th of February, 1904, and the memorandum on the position and duties of the Crown Agents enclosed therein. The Colonies which have received responsible Government cannot avail themselves of the services of the Crown Agents, and have established agencies of their own, the addresses of which will be found below. Newfoundland has, however, not established an agency.

The Crown Agents are paid by fixed salaries settled by the Secretary of State. These salaries and all the other expenses of their office, including pensions, are paid from a fund derived from the monies received from the Governments for which they act, in return for the services rendered; the scale of their charges for the different classes of business they transact being fixed by the Secretary of State. The office being thus self-supporting no vote for it comes before the Imperial Parliament, but the accounts are audited by the Audit Office and are rendered to the Secretary of State.

OFFICES:—Millbank, S.W.1; Stock Transfer Office, 1, Tokenhouse Buildings, E.C.2; Shipping Office, 13, Great St. Helen's, E.C.3.

*Crown Agents for the Colonies*,

The following are the Colonies and Protectorates for which the Crown Agents transact business in this country :—

Bahamas.
Barbados.
Basutoland.
Bechuanaland.
Bermuda.
British Guiana.
British Honduras.
Ceylon.
Cyprus.
East Africa Protectorate.
Falkland Islands.
Federated Malay States—
Perak.
Selangor.
Negri Sembilan.
Federated Malay States, *cont.*—
Pahang.
Johore, Kedah, Kelantan, Perlis — Not included in the Federation.
Fiji.
Gambia.
Gibraltar.
Gold Coast.
Hong Kong.
Jamaica.
Leeward Islands—
Antigua.
Dominica.
Montserrat.
Leeward Islands—*cont.*
St. Kitts-Nevis.
Virgin Islands.
Malta.
Mauritius.
Nigeria.
Nyasaland.
St. Helena.
Seychelles.
Sierra Leone.
Somaliland Protectorate.
Straits Settlements.
Swaziland.
Tobago.
Trinidad.
Turks Island.
Uganda Protectorate.
Weihaiwei.
Western Pacific (High Commission).
Windward Islands—
Grenada.
St. Lucia.
St. Vincent.
Zanzibar.

The Crown Agents also act as Agents for the West African Frontier Force, and the King's African Rifles; the Uganda Railway; the Gibraltar Sanitary Commissioners; the Singapore and Penang Harbour Boards; and as Managers of the West African Widows and Orphans Pension Scheme.

## HIGH COMMISSIONERS, AGENTS-GENERAL, ETC.

| — | Representatives in London. | Secretaries or Deputies. | Address. |
|---|---|---|---|
| Canada . . | *High Commissioner*, The Hon. Sir G. H. Perley, K.C.M.G. | W. L. Griffith, Esq. . | 19. Victoria Street, S.W.1. |
| Australia . | *High Commissioner*, The Right Hon. Andrew Fisher. | E. A. Box, Esq. . . | Australia House, Strand, W.C.2. |

| South Australia | The Hon. Sir Frederick W. Young | J. B. Whiting, Esq. . | 112, Strand, W.C.2. |
| Western Australia | The Hon. James Daniel Connolly | A. C. Kessell, Esq. . | Savoy House, 115 and 116, Strand, W.C.2. |
| Tasmania . | The Hon. Sir John McCall, M.D. | Herbert William Ely, Esq. | 24, Queen's Mansions, 56, Victoria Street, S.W.1. |

## THE IMPERIAL INSTITUTE OF THE UNITED KINGDOM, THE COLONIES, AND INDIA.

The Imperial Institute was erected at South Kensington as the National Memorial of the Jubilee of Queen Victoria, by whom it was opened in May, 1893.

The principal object of the Institute is to promote the utilisation of the commercial and industrial resources of the Empire by arranging comprehensive exhibitions of natural products, especially of the Dominions, India and the Colonies, and providing for their investigation and for the collection and dissemination of scientific, technical, and commercial information relating to raw materials.

Until the end of 1902 the Imperial Institute was managed by a Governing Body, of which H.R.H. the Prince of Wales (subsequently King Edward VII.) was President, and an Executive Council, including representatives of the Indian Empire and of all the British Colonies and Dependencies. In 1900 the building became the property of H.M. Government, by whom the western portion and galleries were leased to the Governing Body of the Imperial Institute, the greater part of the eastern and central portions being assigned, subject to rights of usage, for occupation by the University of London. In July, 1902, an Act of Parliament was passed transferring the management of the Imperial Institute to the Board of Trade, assisted by an Advisory Committee, including representatives of the Dominions, Colonies and India, and of the Colonial and India Offices, the Board of Agriculture, and the Board of Trade. This Act took effect on January 1st, 1903.

Digitized by Google

On the 1st October, 1907, in virtue of an arrangement between the Secretary of State for the Colonies and the Board of Trade, and with the approval of the Secretary of State for India, the management of the Imperial Institute was transferred to the Secretary of State for the Colonies, subject to the responsibility of the Board of Trade under the Act of 1902. By the Imperial Institute (Management) Act of 1916, this arrangement was given statutory effect and the management of the Institute was vested in the Secretary of State for the Colonies, and an Executive Council of 25 members appointed, composed of representatives of the Dominions, the Colonies, and India, with other members, of which, 14 are nominees of the Secretary of State. The present Executive Council is composed as follows :—The Right Hon. Lord Islington,† G.C.M.G., D.S.O. (*Chairman*), The Right Hon. Lord Burnham,† Sir Robert Carlyle,† K.C.S.I., C.I.E., Sir William Clark,† K.C.S.I., C.M.G., Professor Wyndham R. Dunstan,† C.M.G., F.R.S., The Right Hon. Lord Emmott, G.C.M.G., G.B.E., Sir Algernon Firth,† Bart., The Right Hon. Andrew Fisher,† H. Fountain, Esq., C.M.G., G. E. A. Grindle,† Esq., C.M.G., A. D. Hall, Esq., F.R.S., Sir John Hewett,† G.C.S.I., K.B.E., C.I.E., L. J. Kershaw, Esq., C.S.I., C.I.E., Sir Robert Kindersley,† K.B.E., The Hon. Sir Thomas MacKenzie,† K.C.M.G., T. C. Macnaghten, Esq., D. O. Malcolm, Esq., The Hon. Sir George Perley,† K.C.M.G., Sir Owen Philipps,† K.C.M.G., M.P., Sir Marshall Reid,† C.I.E., The Right Hon. The Earl of Scarbrough, K.C.B., The Right Hon. W. P. Schreiner,† K.C., C.M.G., Sir William Taylor, K.C.M.G., Sir Richard Threlfall, K.B.E., F.R.S.

In carrying on its work the Executive Council is assisted by certain Committees. Besides Committees of the Council for special purposes, there are Committees for the Dominions appointed by the High Commissioners and a Committee for India. In connection with the work of the Scientific and Technical Department and of the Technical Information Bureau a number of Advisory Technical Committees have been formed for each of the principal groups of raw materials. These Technical Committees are composed of commercial, technical and scientific experts in these subjects. At the instance of the Association of Chambers of Commerce a general Advisory Committee on Raw Materials has been appointed composed of representatives of the principal Chambers of Commerce in order to bring the commercial community into close touch with the work of the Institute. The following is a list of the principal Committees appointed :—

### Committees for the Dominions.

*Committee for Canada.*—The Hon. Sir G. H. Perley, K.C.M.G., High Commissioner for Canada (*Chairman*); J. G. Colmer, Esq., C.M.G., lately Secretary to the High Commissioner for Canada; Sir R. M. Kindersley, K.B.E., Governor, Hudson's Bay Co.; J. H. Plummer, Esq., Chairman, Dominion Steel Corporation; Sir Keith Price, Messrs. Price & Pierce.

*Committee for Australia.*—The Right Hon. Andrew Fisher, High Commissioner for Australia (*Chairman*); Captain R. Muirhead Collins, C.M.G., R.N.; John Cooke, Esq., of Messrs. Weddell & Co.; E. V. Reid, Esq., of Messrs. Dalgety & Co.; W. S. Robinson, Esq., Vice-Chairman, Australian Metal Exchange.

*Committee for the Union of South Africa and Rhodesia.*—The Right Hon. W. P. Schreiner, C.M.G., High Commissioner for the Union of South Africa (*Chairman*); Dr. Horace T. Brown, F.R.S.; Charles du Plessis Chiappini, Esq., Trades Commissioner for the Union of South Africa; Frederick Dyer, Esq., of Messrs. Dyer & Dyer; D. O. Malcolm, Esq., Director, British South Africa Co.; C. W. S. Maude, Esq., British South Africa Co.; William Soper, Esq., of Messrs. Davis & Soper.

*Committee for New Zealand.*—The Hon. Sir Thomas Mackenzie, K.C.M.G., High Commissioner for New Zealand (*Chairman*); James Coates, Esq.; J. C. N. Grigg, Esq.; R. D. D. McLean, Esq.; R. H. Nolan, Esq.

*Committee for India.*—Sir C. C. McLeod, Chairman, East India Section, London Chamber of Commerce (*Chairman*); A. Yusuf Ali, Esq., late Indian Civil Service; Sir Charles H. Armstrong, of Messrs. Lyon, Lord & Co.; Sir Ernest Cable, of Messrs. Bird & Co.; Sir R. W. Carlyle, K.C.S.I., C.I.E., lately Member of Governor-General's Council, India; D. T. Chadwick, Esq., Indian Trade Commissioner; Sir J. P. Hewett, G.C.S.I., C.I.E., lately Lieut.-Governor, United Provinces, India; L. J. Kershaw, Esq., C.S.I., C.I.E., India Office; Sir Marshall F. Reid, C.I.E., Member of the India Council; Sir James R. Dunlop Smith, K.C.S.I., K.C.V.O., C.I.E., India Office; Sir George Sutherland, of Messrs. Begg, Dunlop & Co.

A number of special Committees have been appointed by the Committee for India to enquire into the possibilities of extending trade within the Empire in the principal raw materials of India.

### Technical Committees.

*Raw Materials Committee (Nominated by the Association of Chambers of Commerce).*—Sir Algernon Firth, Bart. (*Chairman*), President, Association of Chambers of Commerce; Sir John Anderson, London Chamber of Commerce; F. W. Astbury, Esq., and Dr. Alfred Rée, Manchester Chamber of Commerce; Sir Cecil W. M. Graham, Glasgow Chamber of Commerce; G. A. Moore, Esq., and J. Pickering-Jones, Esq., Liverpool Chamber of Commerce; A. C. Powell, Esq., Bristol Chamber of Commerce; A. M. Samuel, Esq., Norwich Chamber of Commerce; H. H. Sissons, Esq., Hull Chamber of Commerce; Dr. J. E. Stead, F.R.S., Middlesbrough Chamber of Commerce; R. B. Dunwoody, Esq., Association of Chambers of Commerce, and H. Brown, Esq., Imperial Institute (*Secretaries*).

† These form the Finance and General Purposes Committee.

Digitized by Google

*Mineral Resources Committee.*—The Right Hon. Lord Rhondda, lately Managing Director, Cambrian Collieries, Ltd. (*Chairman*); Admiral Sir Edmond Slade, K.C.V.O., K.C.I.E. (nominated by Admiralty) (*Vice-Chairman*); Wyndham R. Dunstan, Esq., C.M.G., LL.D., F.R.S., Director, Imperial Institute; Brigadier-General G. K. Cockerill, C.B., Director of Special Intelligence, War Office (nominated by War Office); W. J. Glenny, Esq., Commercial Intelligence Department, Board of Trade (nominated by Board of Trade); Prof. J. W. Gregory, F.R.S., Prof. of Geology, University of Glasgow, formerly Director of Geological Survey, Victoria, Australia; Sir Robert Hadfield, Bart., F.R.S., formerly President, Iron and Steel Institute; Dr. F. H. Hatch, F.G.S., Consulting Mining Engineer, formerly President, Institution of Mining and Metallurgy; Sir Richard Redmayne, K.C.B., Chief Inspector of Mines, lately President, Institution of Mining and Metallurgy (nominated by Home Office); Dr. T. A. Henry (*Secretary*).

*Rubber Research Committee.*—Wyndham R. Dunstan, Esq., C.M.G., LL.D., F.R.S. (*Chairman*); Sir Stanley Bois, of Messrs. Bois Bros., Ceylon; Sir Edward Rosling, Chairman, Rubber Growers' Association; Percy Rosling, Esq., of Henley's Telegraph Works Co.; G. A. Talbot, Esq., Director, Ceylon Tea Plantations Co.; W. A. Williams, Esq., of North British Rubber Co.; J. V. Worthington, Esq., of Dunlop Rubber Co.; H. Brown, Esq. (*Secretary*).

*Silk Production Committee.*—Frank Warner,* Esq., of Messrs. Frank Warner and Sons (*Chairman*); Sir Henry Birchenough, K.C.M.G., Chairman, Board of Trade Committee on Textile Industries; Francis Durant,* Esq., President, Silk Association; William Frost,* Esq., of Messrs. W. Frost and Sons; Professor H. Maxwell Lefroy, Royal College of Science; J. Sugden Smith,* Esq., of Messrs. John Hind & Co.; Richard Snow,* Esq., Vice-President, Silk Association; A. John Solly,* Esq., Vice-President, Silk Association; William Stokes, Esq., of Messrs. Lewis Balfour & Co.; William Watson,* Esq., Vice-President, Silk Association; Dr. S. E. Chandler (*Secretary*).

*Timbers Committee.*—H. D. Searles-Wood, Esq., F.R.I.B.A. (*Chairman*); W. E. Vernon Crompton, Esq., F.R.I.B.A., and Digby L. Solomon, Esq., B.Sc., A.R.I.B.A. (nominated by the Royal Institute of British Architects); Walter Lawrence, Esq., of Messrs. Walter Lawrence and Son, and James S. Holliday, Esq., of Messrs. Holliday and Greenwood (nominated by the Institute of Builders); Walter Birch, Esq., of Messrs. Wm. Birch, and W. H. Sadgrove, Esq., of Messrs. Sadgrove and Co. (nominated by the National Federation of Furniture Manufacturers); C. J. Morgan, Esq., of Messrs. Foy, Morgan & Co., and James Richardson, Esq. (nominated by the Timber Trade Federation of the United Kingdom); Percy Preston, Esq. (nominated by the Carpenters' Company); Dr. S. E. Chandler (*Secretary*).

[The Chairman of the Executive Council (Lord Islington) and the Director of the Imperial Institute (Prof. Dunston) are *ex-officio* Members of all Committees.]

The following is a brief account of the principal Departments of the Institute.

*Public Exhibition Galleries.*—The collections of raw materials, etc., illustrative of the industrial and commercial resources of the Dominions, the Colonies and India, are arranged, together with other exhibits, on a geographical system in the Public Exhibition Galleries of the Imperial Institute.

The following British Dominions, Colonies and Dependencies are represented by Collections:—

Canada, Newfoundland, Jamaica, Turks and Caicos Islands, British Honduras, British Guiana, Bahama Islands, Trinidad and Tobago, Barbados, Windward Islands, Leeward Islands, Bermuda Islands, Falkland Islands, New South Wales, Victoria, Queensland, Tasmania, South Australia, Western Australia, Papua, New Zealand, Fiji, Western Pacific, the Union of South Africa, Rhodesia, Nyasaland, St. Helena, Gambia, Sierra Leone, Gold Coast, Nigeria, British East Africa, Zanzibar and Pemba, Uganda, Somaliland, the Anglo-Egyptian Sudan, Malta, Cyprus, Ceylon, Hong Kong, Mauritius, Seychelles, Straits Settlements and Federated Malay States, and India.

An Egyptian Collection is in course of formation.

A special reference collection of the standard raw materials of commerce is shown in the Upper East Gallery.

The Public Galleries are open free to the public daily (except on Sundays, Good Friday, and Christmas Day), from 10 a.m. to 5 p.m. (10 a.m. to 4 p.m. from the 1st November to the 31st January).

Special arrangements are made to conduct parties from schools and educational institutions through the collections and to explain the exhibits. Short lectures on the countries of the Empire and their resources are given periodically in connection with the exhibits of the various countries.

A stand has been opened in the centre of the Main Gallery to facilitate the supply of general information and the distribution of literature. Pamphlets, circulars, hand-books, etc., containing information relating to the commerce, agriculture, mining and other industries of the principal British Possessions, and also to emigration, are available for gratuitous distribution or for sale. The publications of the Emigrants' Information Office, established by the Colonial Office, may also be obtained. The principal Colonial and Indian newspapers may be seen on application.

---

* *Nominated by the Silk Association of Great Britain and Ireland.*

Digitized by Google

In 1917 the Public Galleries were visited by 99,555 persons, and 7,658 Colonial and Indian publications were distributed to enquirers.

At the request of the Government, The Public Exhibition Galleries have been occupied for the period of the war as offices for the War Office and the Ministry of Food.

*The Scientific and Technical Research Department.*—The technical laboratories and workrooms of this department were established in order to provide for the investigation of new or little-known raw materials from the Dominions, Colonies and India, and of known products from new sources, with a view to their utilisation in commerce. A large number of well-known firms and individuals act as expert referees to the Department on technical and commercial subjects, in addition to the Advisory Technical Committees.

The work of this department is chiefly initiated by the Home, Dominion and Colonial Governments and the Government of India. Arrangements have also been made by the Foreign Office, whereby British representatives abroad may transmit to the department for investigation such raw materials of the countries to which they are appointed as are likely to be of interest to British manufacturers and merchants. As a result of the appointment in 1916 of an inter-departmental Committee to arrange co-operation between the work of the Imperial Institute and the Board of Trade and the Commercial Intelligence Department, it has been decided that the Imperial Institute will deal with enquiries respecting the sources of supply and commercial utilisation of the raw materials of the Empire, whilst the Board of Trade and the Imperial Institute will co-operate in dealing with certain enquiries of this character.

Special analyses and investigations are also undertaken for firms or private persons in any part of the Empire on payment of appropriate charges. Application for such investigations should be made in writing to the Director.

Materials investigated in the laboratories of the department, are in promising cases submitted to further technical trials by manufacturers and other experts, and finally are commercially valued.

A reference sample room is maintained in this department, in which are arranged samples of the principal raw materials which have been investigated and commercially valued during recent years, and as to which full information is available.

The Scientific and Technical Research Department works in co-operation with the Agricultural, Mines and other technical Departments in the Dominions, Colonies and India, whose operations it supplements by undertaking such investigations and inquiries as are of a special scientific and technical character connected with agricultural or mineral development, as well as inquiries relating to the composition and commercial value of products (animal, vegetable or mineral) which can be more efficiently conducted at home in consultation with merchants and manufacturers, with a view to the local utilisation of the the products or to their export.

A very large number of reports on these subjects have been made to the Governments of the Dominions, Colonies and India, a first instalment of which was printed in a volume of "Technical Reports and Scientific Papers," published in 1903. Later reports are being issued in the Miscellaneous Series of Colonial Reports as "Selected Reports from the Scientific and Technical Department of the Imperial Institute." Those already issued are Part I. Fibres [Cd. 4588], Part II. Gums and Resins [Cd. 4971], Part III. Foodstuffs [Cd. 5137], Part IV. Rubber and Gutta Percha [Cd. 6022], and Part V. Oils and Oilseeds [Cd. 7260].

Mineral surveys are in progress in certain countries. All minerals found which are likely to be of commercial importance are forwarded to the Imperial Institute, where they are examined and their composition and commercial value ascertained. Reports by the Director on the results of the mineral exploration in Ceylon, Northern Nigeria, Southern Nigeria and Nyasaland have been printed in the Miscellaneous Series of Colonial Reports.

*The Technical Information Bureau* has been established as a branch of the Scientific and Technical Research Department in order to deal with enquiries for technical information respecting the origin, nature and uses of raw materials of all kinds. The Bureau has recently devoted special attention to industrial questions arising out of the war, particularly with regard to finding uses for Indian and Colonial products which had previously been sent to Germany. It has been also engaged in drawing attention to new sources of ores and other materials used in the manufacture of munitions, and has rendered technical assistance to a number of Government Departments on matters relating to the war. An enquiry into the trade in Indian raw materials within the Empire in connection with the Committee for India is at present being conducted by a number of special Committees in association with the Bureau.

*Tropical African Services Course.*—Courses of instruction in Accounting, Law, Tropical Hygiene, and in Tropical Economic Products are given at the Imperial Institute to candidates selected by the Colonial Office for administrative appointments in East and West Africa, and to Officers already holding such appointments when in England on leave. The instruction in the last-named subject is given by Dr. S. E. Chandler, of the Staff of the Imperial Institute. These courses have been temporarily discontinued during the war.

*Library and Reading Rooms.*—The library and reading rooms of the Imperial Institute contain a large collection of Colonial and Indian works of reference, including maps, and are regularly supplied with the more important official publications and with many of the principal newspapers and periodicals of the United Kingdom, the Dominions, the Colonies, and India.

The library and reading rooms are on the first floor, and admittance to them is obtained through the entrance at the west (Queen's Gate) end of the building. These rooms are available for

Digitized by Google

the use of Life Fellows of the Imperial Institute, and of other persons properly introduced. Books, maps and newspapers may be consulted for special purposes by permission.

*Colonial Conference Rooms.*—These large rooms, specially decorated and furnished, are reserved on the principal floor for use by representatives of the Dominions and Colonies and for meetings and receptions.

*The Cowasjee Jehanghier Hall.*—The Bhownaggree corridor and rooms in connection with this Hall are in the occupation of the Imperial Institute. The Hall is available for lectures, meetings, etc.

*Publications.*—The "Bulletin of the Imperial Institute" is published quarterly, price 2*s.* 6*d.* (annual subscription 11*s.*, including postage), by Mr. John Murray, 50a, Albemarle Street, London, W., and may be ordered through any bookseller. The Bulletin contains records of the principal investigations conducted for the Dominions, the Colonies and India at the Imperial Institute, and special articles, chiefly relating to progress in tropical agriculture and the industrial utilisation of raw materials (animal, vegetable and mineral).

The Secretary of State has authorised the preparation of a Series of Imperial Institute Handbooks, dealing with the Commercial Resources of the Tropics, with special reference to West Africa. The handbooks are edited by the Director of the Imperial Institute. The first four volumes are entitled: "The Agricultural and Forest Products of British West Africa," by G. C. Dudgeon, Director-General of Agriculture in Egypt, lately Inspector of Agriculture for British West Africa, "Cocoa: Its Cultivation and Preparation," by W. H. Johnson, Director of Agriculture in Southern Nigeria, "Rubber,' by Harold Brown, Scientific and Technical Department, Imperial Institute, and "Cotton and other Vegetable Fibres" by Dr. E. Goulding, D.Sc., Scientific and Technical Department, Imperial Institute. These Handbooks are published by Mr. John Murray, 50a, Albemarle Street, W. Price 5*s.* each net. for Vols. I and II, and 6*s.* net for Vols. III. and IV.

"Oil Seeds and Feeding Cakes" (The War and New British Industries: Imperial Institute Monographs). This volume gives an account of certain oil-seeds, which were formerly sent to Germany from British Possessions, and of the results of the outlets for these products in the industries of the United Kingdom. (London: John Murray. Price, 2*s.* 6*d.* net.)

"The World's Supply of Potash," containing an account of all the more important sources of potash in the world. (London: Imperial Institute. Price 1*s.*, post free.) "Zinc Ores." (Price 2*s.* 3*d.*, post free). Other publications in this series of publications on the Mineral Resources of the Empire are in preparation.

The following Societies have their headquarters at the Imperial Institute:—

*British Women's Emigration Association.*—The British Women's Emigration Association has been assigned offices on the mezzanine floor, which are open daily from 10 a.m. to 4 p.m., and advice and information respecting emigration and prospects for women in the Colonies may be obtained there, free of charge. This Association works in co-operation with the Emigrants' Information Office in Westminster.

*Colonial Nursing Association.*—An office on the mezzanine floor has been provided for this Association, whose principal object is the selection of trained hospital and private nurses for service in the Crown Colonies and other British Dependencies. Office hours, 10 a.m. to 5 p.m.

*International Association for Tropical Agriculture, British Section.*—The object of this Association, the Central Bureau of which is in Paris, is the promotion of the scientific and practical study of all questions connected with tropical agriculture and the development and utilisation of natural resources, especially of tropical countries.

*Tropical Diseases Bureau.*—Temporary office accommodation on the mezzanine floor has been provided for this Bureau, the main purpose of which is to collect information regarding tropical diseases, and to distribute it as widely as possible among those who are engaged in combating such diseases.

*Universities Bureau of the British Empire.*—An office on the mezzanine floor has been provided for this Bureau.

The following is a list of the principal members of the Staff of the Imperial Institute:—

*Director.*—Professor Wyndham R. Dunstan, C.M.G., M.A., LL.D., F.R.S.
*Assistant Secretary to the Director.*—A. J. Hedgeland, M.A. (Oxon).

SCIENTIFIC AND TECHNICAL RESEARCH DEPARTMENT.

*Superintendent of Laboratories.*—T. A. Henry, D.Sc. (Lond.), F.C.S.
*Assistant Superintendents.*—T. Crook, A.R.C.S., F.G.S.; R. G. Pelly, F.I.C.
*Principal Assistant.*—S. J. Johnstone, B.Sc. (Lond.)
*Special Assistants.*—A. E. Andrews, F.C.S.; B. E. Long, B.A. (Cantab.).
*Senior Assistants.*—J. R. Furlong, Ph.D. (Würzburg); W. S. Davey.
*Assistants.*—W. O. R. Wynn; G. M. Davies, M.Sc. (Lond.), F.G.S.; O. D. Roberts, F.I.C.; T. McLachlan; J. D. F. West; F. L. Elliott; J. H. Williams; F. Major, B.Sc. (Lond.); S. J. Rogers, B.Sc. (Lond.); B. S. Morgan, B.Sc. (Wales).
*Mineral Surveyor, Ceylon.*—J. S. Coates, B.A. (Cantab.).

## COLONIAL GOVERNMENT EMIGRATION AGENCIES AT CALCUTTA.

For the purpose of meeting the wants of planters and others in certain Colonies, Agencies have been established in India for over fifty years for the collection and despatch of natives of India to work as field labourers.

There is at present a Government Agency in Calcutta, and one at Madras, in the charge of an Assistant Agent, representing the Colonies of British Guiana, Trinidad, Jamaica, and Fiji. The officers in charge of the Agencies are members of the Colonial Civil Service, appointed by the Secretary of State. The staff of the Agencies is recruited locally and their appointments are non-pensionable.

All recruiting has been suspended for the period of the War.

COMBINED AGENCY FOR BRITISH GUIANA, TRINIDAD, JAMAICA AND FIJI.

*Government Emigration Agent*, at Calcutta, R. P. Gibbes, Esq.

---

## EMIGRANTS' INFORMATION OFFICE,

34, *Broadway, Westminster, S.W.*

Office hours, 10 a.m. to 5 p.m.; Saturdays, 10 a.m. to 1.30 p.m.

This Office was established by the Government in October, 1886, for the purpose of supplying intending emigrants with useful and trustworthy information respecting emigration to the British Colonies. The office was placed from the first, and has remained, under the general supervision of the Colonial Office. It was intended to give information only, and not either to encourage or to discourage emigration.

The Secretary of State for the Colonies is nominally the President of the Committee, but does not actually preside. He nominates all members of the Committee, and all points on which any serious doubt arises are referred for his decision, but the expenditure of the Parliamentary grant and the management and working of the office are left to the discretion of the Committee.

The Government at the outset allowed an annual sum of 650*l.* to cover rent of rooms, and all office expenses, in addition to free printing and postage. After the report of the Colonisation Committee in 1891, the sum was raised to 1,000*l.*, postage and printing being still supplied as before, the grant was in 1897 raised to 1,500*l.*, to 1,700*l.* in 1908, and to 2,000*l.* in 1911. The receipts from sales of books are taken by the Government and credited to His Majesty's Stationery Office.

Originally the scope of the office was confined to the British Colonies, and to those Colonies only which are outside the Tropics and are fields of emigration in the ordinary sense; but of late years it has been found necessary to widen the scope and to give information (though more limited in extent) not only as to certain Tropical Colonies but also from time to time as to various foreign countries, and especially it has been found necessary to issue warnings in certain cases.

In regard to foreign countries, the Committee derive their information almost entirely, through the Foreign Office, from His Majesty's representatives abroad. In regard to the British Colonies, they derive it partly from official, partly from unofficial sources.

Digitized by Google

The publications issued by the office are as follows :—

I. A Quarterly Poster, exhibited in all Post Offices - - - - - - - - - - - Free.

II. Quarterly Circulars on Canada and the Australasian and South African Colonies. An endeavour is now made to keep the information in the circulars up to date by the issue of a monthly supplement. The circulars and supplements will be sent regularly to any one desiring them - - - - - - - - - - - - - - - - Free.

III. Circular on the Emigration of Women - - - - - - - - - - - - Free

IV. The following Handbooks :—

VI. *On Foreign Countries*, occasional pamphlets.

United States Circular - - - - - - - - - - - - - - - - - Free.
Handbook on the United States - - - - - - - - - - - - - - - price 4*d.*
General Information relating to North, Central and South America - - - - - - ,, 4*d.*

It should be added that the office is in touch with the Labour Department of the Board of Trade, and supplies a column on labour in the Colonies to the monthly "Labour Gazette."

More than 1,500 free libraries, labour exchanges and institutions in all parts of the kingdom display posters and warnings on notice-boards supplied by the Committee, and are kept supplied with a stock of the free circulars for distribution.

There are collections of the products of the various Colonies at the Imperial Institute, South Kensington, and information is given with regard to them which may be of interest to intending emigrants.

The work of the office consists principally in answering the inquiries of the poorer classes of emigrant, but an attempt has been made to meet the needs of other classes. In 1914, 8,636 letters were received, and 106,102 communications were despatched.

The total number of circulars distributed in 1914, including not only those given to applicants in person or by letter, but those sent to libraries, labour exchanges, trade and other societies, and the press, was 458,417, in addition to 147,966 copies of the quarterly posters and 239,000 copies of the monthly supplement. No figures are available in respect of 1915, 1916 and 1917.

## MALAY STATES INFORMATION AGENCY.

The offices of the Agency are at 88, Cannon Street, London, E.C.

The Agency has been established by the Government of the Federated Malay States, with the approval of the Secretary of State for the Colonies. The primary object of the Agency is to advertise the productions and attractions of the States of the Malay Peninsula under British protection, to furnish to enquirers interested in those States, or desirous of becoming acquainted

Digitized by Google

with them, information as to the opportunities which they give for investment and the facility for travel and exploration which they have for the tourist or traveller, and to supply (on payment) publications and maps.

The great natural resources of the Malay States are but little known to the general public, and still less is known of their beautiful scenery. One of the objects for which the Agency has been created is to disseminate information on these points. Another reason for its existence is to bring into touch with one another persons desirous of obtaining employment in the Malay Peninsula and would-be employers, and to afford generally information regarding employment and prospects of employment to those desiring it.

The Agency undertakes for the Federated Malay States Government work that does not fall within the scope of the transactions of the Crown Agents for the Colonies, who are the recognized financial and commercial agents of the Federated Malay States. The Agency is essentially a business organization and is prepared to undertake work not only for the Malay States Government, but also for firms and individuals established or resident in the Malay Peninsula.

The Agency is under the direction of a Board, consisting of an Agent, a Deputy Agent, a representative of mining interests, a representative of planting interests, and a senior member of the Federated Malay States service on leave in this country.

The present Board consists of :—

| | |
|---|---|
| Sir William Taylor, K.C.M.G. | Mr. F. Douglas Osborne. |
| Mr. A. Hale. | Mr. R. W. Harrison. |

## ROYAL BOTANIC GARDENS, KEW.

Kew as a scientific establishment dates from 1759, when a Botanic, or as it was then called a Physic, Garden was established by the Princess Augusta of Saxe-Gotha, Dowager Princess of Wales.

It was energetically maintained by her son, George III., with the scientific assistance of Sir Joseph Banks, who was virtually, for the greater part of his life, director. Under his advice collectors were sent to all parts of the world. The first New Holland plants were introduced during Cook's voyages, 1768-1780. At Sir Joseph Banks's instance the system of inter-colonial exchange through Kew was commenced, which has been maintained ever since. The most memorable undertaking of this kind was the voyage of the *Bounty* (1787), for the purpose of introducing the bread-fruit tree from the South Seas into the W. Indies. Nelson, the Kew collector, was amongst those sent adrift by the mutineers, and eventually died of the exposure. Another Kew gardener, James Hooper, who had been attached to Lord Amherst's Embassy to China, remained in Java, and was from 1817-30 Hortulanus of the celebrated Dutch Colonial Botanic Garden at Buitenzorg, which he helped to create.

Both George III. and Sir Joseph Banks died in 1820, and the colonial and other work of Kew languished, though it was not absolutely abandoned during the reign of George IV. and William IV. In 1838 the abolition of the whole establishment was contemplated by the Government. Public opposition led to the appointment of a Treasury Committee, the report of which was presented to Parliament in 1840. The following paragraphs briefly defined the functions of the reorganised establishment:—"A national garden ought to be the centre round which all minor establishments of the same nature should be arranged. . . . From a garden of this kind Government would be able to obtain authentic and official information on points connected with the founding of new colonies; it would afford the plants there required, without its being necessary, as now, to apply to the officers of private establishments for advice and assistance."

These recommendations having been adopted by the Government, Sir W. J. Hooker, F.R.S., was appointed Director in 1841 to carry them out. A close connection between Kew and the Colonial and India Offices immediately sprang up. A scheme for a complete series of Colonial Floras was sanctioned in 1856, and has been steadily prosecuted. Kew serves to a large extent as an advanced horticultural school. Special attention is given to the preparation of gardeners for Colonial and Indian service, in which some 100 men, trained at Kew, are now in official employment.

Relations with the botanical institutions of the self-governing colonies are maintained by semi-official correspondence. With those of colonies more directly under the control of the Colonial Office the connection is closer. In 1902, the Director was given the title of "Botanical Adviser to the Secretary of State for the Colonies."

Colonial botanical institutions fall roughly into three classes. Those of the first class are usually, like Kew, administered by a scientific director; those of the second class by a skilled superintendent; the third class consists of "Botanic stations." These last are small and inexpensive gardens, devised in 1885, in order to afford practical instruction in the cultivation of tropical crops, and were intended to develop the agricultural resources at first of the smaller West Indian islands, and subsequently (1887) British possessions in Tropical Africa. These are now an integral part of the Agricultural Departments of the Colonies concerned and usually are in charge of a Curator, who, in most cases, is a gardener trained at Kew.

The principal members of the Kew staff are:—

*Director*, Lt.-Col. Sir D. Prain, C.M.G., C.I.E., M.A., M.B., LL.D., F.R.S.
*Assistant Director*, A. W. Hill, M.A., F.L.S.
*Keeper of the Herbarium and Library*, Dr. O. Stapf, F.R.S.
*Keeper of Museums*, J. M. Hillier.
*Curator*, W. Watson, A.L.S.

## THE IMPERIAL DEPARTMENT OF AGRICULTURE FOR THE WEST INDIES.

The Imperial Department of Agriculture was established on the 1st October, 1898, on the recommendation of the West India Royal Commission of 1896-7. The cost of the Department is provided from Imperial funds, and will be so provided for a period of ten years from the 1st of April, 1911.

The work entrusted to the department is to aid in the maintenance and the supervision of the botanic and experiment stations in the West Indies, devoted to the improvement of sugar and other industries, to establish agricultural schools, the teaching of agriculture in elementary and secondary schools, and the granting of agricultural scholarships.

The Head Office of the department, with its scientific and clerical staffs, is located at Barbados. Sir D. Morris, K.C.M.G., for twelve years assistant-director of the Royal Gardens at Kew, formerly director of the Botanical Department, Jamaica, and scientific adviser to the West India Royal Commission of 1896-7, was appointed Imperial Commissioner of Agriculture on September 1st, 1898, and held the office with the greatest success for ten years. On his retirement in 1908 his services were retained for some years for advising the Secretary of State in Tropical Agriculture. The present Commissioner is Sir Francis Watts, K.C.M.G. He corresponds directly upon all matters concerning the general work of the department with the Colonial Office; on matters affecting Colonial establishments and expenditure he corresponds with the several Governments concerned. The Imperial Commissioner is in administrative charge of the botanic and experiment stations, maintained for the distribution of economic plants, and the improvement of sugar, cacao, lime, fruit, cotton, and other crops, and of the agricultural schools and local experiment plots at Grenada, St. Vincent, St. Lucia, Dominica, Montserrat, Antigua, St. Kitts-Nevis, and the Virgin Islands. He visits these Colonies when required to afford assistance in regard to the administration of the local agricultural departments, the outbreak of diseases and the general development of planting industries. His services are also available as Consulting Officer in agricultural matters to the Governments of Jamaica, British Guiana, Trinidad, British Honduras, the Bahamas and Bermuda.

The publications issued by the Imperial Department of Agriculture in the West Indies number about 90,000 copies annually. The *Agricultural News* is a fortnightly popular review, with a wide circulation in the tropics of the old and new worlds. The *West Indian Bulletin* is a quarterly scientific journal dealing specially with research and experimental works in tropical countries. In addition are issued numerous pamphlets dealing with special subjects; also annual progress reports on sugar cane experiments, the work of the botanic stations, and efforts to extend agricultural education in elementary and secondary schools.

The following are the principal officers on the staff of the Department:—

*Imperial Commissioner of Agriculture for the West Indies*, The Hon. Sir Francis Watts, K.C.M.G., D.Sc., F.I.C., F.C.S.
*Scientific Assistant*, W. Ronald Dunlop.
*Entomologist*, Henry A. Ballou, M.Sc.
*Mycologist and Agricultural Lecturer*, William Nowell.
*Chief Clerk*, Alleyne Graham Howell.
*Senior Temporary Assistant*, A. B. Price.
*Assistant Clerk*, L. A. Corbin.
*Junior Clerk*, K. R. C. Foster.

---

## LONDON SCHOOL OF TROPICAL MEDICINE
(University of London),

CONNAUGHT ROAD, ALBERT DOCK, E.

This school was founded in 1899 and owes its origin to the Right Hon. J. Chamberlain, who, with the object of affording instruction in tropical medicine to medical officers in the Colonial Service, invited the committee of management of the Seamen's Hospital Society to establish a school in connection with their hospitals.

The invitation was accepted, and the school established in connection with the society's hospital near the Royal Victoria and Albert Docks. No more suitable spot in Great Britain could have been selected, as at these docks ships arrive from all parts of the tropics in large numbers, thus affording ready opportunity for the treatment of patients, and for the observation and study of tropical diseases in their acute stage.

In addition to medical officers in the Colonial Service the school is open to any qualified medical practitioners, and the facilities afforded for instruction in all classes of tropical disease have been largely taken advantage of by officers in the Indian Medical Service, Royal Army Medical Corps, Royal Navy, and private students. About two hundred students attend the courses every year.

The school premises, which have been three times enlarged during recent years, now provide a main laboratory for the ordinary course, with accommodation for 70 students, a laboratory to accommodate 20 students for the course in tropical sanitation and hygiene, as well as separate laboratories for the special departments, director's room, preparation rooms, insectorium, and lecture theatre. The whole of these laboratories, etc., are equipped with the latest scientific requirements. The constant attendance of the director ensures that all tropical diseases are demonstrated and investigated as opportunity occurs.

Digitized by Google

There are special departments for tropical sanitation and hygiene, entomology, helminthology, and protozoology.

The museum contains many objects of much interest in connection with tropical colonies, and is frequently being added to by past students of the school.

The library has assumed considerable size, and is replete with the most important works in regard to tropical medicine.

Resident accommodation is obtainable in the hostel within the school grounds. There are ample mess rooms, ante rooms, bedrooms, etc., and students can be provided wholly with board and residence, or those who desire to reside in the vicinity of the school or in London can have partial board at the school.

Tropical medicine has been admitted as a sixth alternative subject for the M.D. of London University, and the school curriculum is so adapted as to afford facilities to candidates desirous of taking the M.D. in this subject.

The school course is recognised by the University of Cambridge for the Diploma of Tropical Medicine and Hygiene (D.T.M. & H.), and by the conjoint Board of the Royal College of Physicians of London, and the Royal College of Surgeons of England for the Diploma in the Diseases and Hygiene of the Tropics (D.T.M. Eng.).

Arrangements are made for an interchange of demonstrations at the Royal Veterinary College and the London School of Tropical Medicine.

The Wandsworth Scholarship of £370 per annum and the Honourable Edward John Stanley Memorial Scholarship of fifty pounds, are in the gift of the School.

There are three sessions yearly of three months each, commencing 1st October, 15th January, and 1st May.

A prospectus is published by the school and may be had on application.

The following are the principal officers on the staff of the school :—

*Lecturers and Teachers*, Sir Patrick Manson, G.C.M.G., F.R.S., LL.D., M.D., F.R.C.P.; Professor R. Tanner Hewlett, M.D., F.R.C.P.; James Cantlie, M.B., F.R.C.S.; Col. J. J. Pratt, I.M.S.; Kenneth W. Goadby, D.P.H. (Camb.), M.R.C.S., L.R.C.P.; Professor W. J. Simpson, C.M.G., M.D., F.R.C.P.; Fleming M. Sandwith, C.M.G., M.D., F.R.C.P.; C. W. Daniels, M.B., F.R.C.P.; L. W. Sambon, M.D.; J. M. H. MacLeod, M.D., F.R.C.P.; E. Treacher Collins, F.R.C.S.; G. C. Low, M.D.; W. M. Willoughby, M.D., D.P.H.

*Entomologist and Lecturer in General Medical Zoology*, Col. A. Alcock, C.I.E., F.R.S., I.M.S.

*Helminthologist*, R. T. Leiper, D.Sc., M.D., Ch.B., F.Z.S.

*Protozoologist*, J. G. Thomson, M.B., Ch.B.

*Director*, H. B. G. Newham, M.D., M.R.C.P., D.P.H., D.T.M. & H.

*Dean*, Sir Havelock Charles, G.C.V.O.

*Secretary*, P. J. Michelli, C.M.G.

*Office*, Seamen's Hospital, Greenwich, S.E.

## THE INCORPORATED LIVERPOOL SCHOOL OF TROPICAL MEDICINE.

The Liverpool School of Tropical Medicine was founded in 1899 by the late Sir Alfred Jones, K.C.M.G., President of the Liverpool Chamber of Commerce.

*Objects of the School.*—(1) To give a practical training to medical men proceeding to the tropics, in the special subject of tropical diseases, or to enable them to familiarise themselves while on leave in a practical manner with the results of the most recent research in all branches of tropical medicine.

(2) To conduct original researches into tropical diseases.

(3) To organise prophylactic measures against tropical diseases.

Its foundation was the direct result of an appeal issued by Mr. Chamberlain, who was then Secretary of State for the Colonies, advocating the formation of a school, or schools, of tropical medicine.

The school has, from its foundation, been dependent on voluntary contributions for support, but it at once received valuable assistance from the Government, first in the form of official recognition of the curriculum, and later by a Government grant-in-aid.

The school from its start enjoyed special facilities for its work, primarily from the close connection between Liverpool and various tropical countries and also from the valuable co-operation of the University of Liverpool, with its well-equipped laboratories, and of the Royal Southern Hospital, where a special ward for tropical diseases has been set apart.

Those responsible for the direction of the school at once entered on the important work of investigating tropical diseases on the spot—*i.e.*, in the tropics—and the school has sent out so far thirty-three Research Expeditions.

An equally important branch of the work of the school has been the publication of a large number of very important reports and books on various subjects dealing with tropical medicine. These publications used to be issued singly, but are now merged in the official bulletin of the school entitled "The Annals of Tropical Medicine and Parasitology." It is expected that at least four issues a year of the annals will be published.

The school also gives a special course of instruction to medical officers and to nurses, and, in this connection the University of Liverpool now grants a diploma in tropical medicine to successful candidates.

Digitized by Google

The school has erected a new Tropical Ward, with a small research laboratory attached, at the Royal Infirmary, Liverpool, and in close proximity a large new laboratory, to accommodate the staff of the school and about 70 students, has just been finished.

The honorary president of the school is H.R.H. Princess Christian, honorary vice-presidents the Duke of Northumberland, K.G., the Earl of Derby, K.G., G.C.V.O., Earl Cromer, G.C.B., Viscount Milner, G.C.B., Lord Pirrie, K.P., Sir Owen Philipps, K.C.M.G., Lord Leverhulme, Sir Edward Merewether, K.C.V.O., and Mr. O. Harrison Williams. It is carried on by a committee of business and scientific men. The following is the staff :—

1.—At the University of Liverpool:

*Professors*, John William Watson Stephens, M.D. (Cantab.), D.P.H., Sir Alfred Jones Professor of Tropical Medicine ; Robert Newstead, M.Sc., A.L.S., F.E.S., Dutton Memorial Professor on Medical Entomology; Warrington Yorke, M.D., Walter Myers Professor of Parasitology.
*Lecturers*, William Thomas Prout, C.M.G., M.B., Lecturer on Tropical Sanitation ; Professor E. W. Hope, M.D., D.Sc., Lecturer on Municipal Sanitation ; Henry Francis Carter, S.E.A.C. Dipl., Lecturer on Entomology.
*Honorary Statistician*, Walter Stott.

2.—At the Royal Infirmary, Liverpool.

*Physician in Charge of the Tropical Wards*, John William Watson Stephens, M.D. (Cantab.).
*Assistant to the Physician in Charge*, William Thomas Prout, C.M.G., M.B.

3.—At the Research Laboratory.

B. Blacklock, M.D., D.P.H.

4.—At the Yellow Fever Research Laboratory, Manaos.

Harold Wolferstan Thomas, M.D., C.M.

5.—Editorial—Annals of Tropical Medicine and Parasitology.

*Editors*, Professors Stephens, R. Newstead and W. Yorke.

---

*Secretary's address*:—B10, Exchange Buildings, Liverpool.

---

The following is the estimated expenditure of the school from the commencement to December 31st, 1916 :—

| | £ | s. | d. | £ | s. | d |
|---|---|---|---|---|---|---|

## THE COLONIAL NURSING ASSOCIATION.

The Colonial Nursing Association was founded in 1896 for providing fully trained nurses for private and hospital work in the Colonies, and amongst other British communities abroad, and to facilitate in any other way the work of nursing.

At the request of the Colonial Office the Association recommends nurses for government service.

Since its foundation, in 1896, it has supplied over 1,000 nurses, of whom 638 have been recommended for government work, 294 have been sent out to private posts, 26 to the government

Digitized by Google

hospitals of Western Australia, 42 to hospitals not under government and 8 for work under the Government of the Union of South Africa.

*Patroness*, H.R.H. The Princess Beatrice.

*President*, The Rt. Hon. The Viscount Gladstone, G.C.B., G.C.M.G.

*Vice-President*, Sir Frederic Hodgson, K.C.M.G., V.D.

*Hon. Vice-President*, Lady Piggott.

*Executive Committee*, Mrs. Carnegie, The Lady Inverclyde, The Lady Sydenham, Lady MacDonald, Lady im Thurn, Lady Davson, Lady Wilson, Lady Antrobus, Lady Piggott, Mrs. Villiers Hawkins, Mrs. Latter, Mrs. du Maurier, Miss Anderson, Mrs. H. A. Walker, Miss C. Bovill, Miss Bramwell, Miss Mowbray, Miss Price, Sir Frederic Hodgson, K.C.M.G., V.D., Sir Harry Wilson, K.C.M.G., Captain Hartley Maud, C.M.G., Major D. K. McDowell, C.M.G., R.A.M.C., Fred Dutton, Esq., Geo. B. Leechman, Esq., H. R. Cowell, Esq., B.A., C. S. Parker, Esq., Oliver Williams, Esq.

*Secretary*, Miss A. M. Middleton, Imperial Institute, S.W.

*Scottish Branch—President*, The Lady Inverclyde.
*Hon. Secretary*, Miss F. Thorburn, 8, Rosebery Crescent, Edinburgh.

---

## TROPICAL DISEASES BUREAU.

His Majesty's Government have established in London a Bureau for the collection and general distribution of information with regard to tropical diseases, including the diseases of animals. Accommodation for the Bureau has been provided at the Imperial Institute, the cost being defrayed from Imperial funds, and from funds provided by the Government of India, the Union of South Africa, the Sudan, and several Colonies and Protectorates.

The Bureau is under the general control and direction of an Honorary Managing Committee, appointed by and responsible to the Secretary of State for the Colonies. The Committee is composed of the following members:—

(Temporary) Colonel Sir J. Rose Bradford, K.C.M.G., C.B., M.D., F.R.S., A.M.S. (representing the Royal Society).
Surgeon-General Sir David Bruce, C.B., M.B., F.R.S., A.M.S.
Surgeon-General Sir R. Havelock Charles, G.C.V.O., M.D., I.M.S. (retired).
Colonel Sir William B. Leishman, C.B., M.B., F.R.S., K.H.P., A.M.S.
Sir John McFadyean, M.R.C.V.S.
Sir Patrick Manson, G.C.M.G., M.D., F.R.S.
Sir Stewart Stockman, M.R.C.V.S.
Mr. E. C. Bleck, C.M.G. (representing the Foreign Office and the Sudan Government).
Sir H. J. Read, K.C.M.G., C.B. (representing the Colonial Office), with
Mr. A. C. C. Parkinson (Mr. A. Fiddian, acting), of the Colonial Office, as *Secretary*.

The Bureau is administered by a salaried Director, who is assisted by a staff of sectional Editors. Its main function is to collect from all sources information regarding tropical diseases, to collate, condense, and, where necessary translate, this information, and to distribute it as widely and quickly as possible among those who are engaged in combating these diseases. The publications of the Bureau are divided into two categories viz., scientific publications intended for those who are engaged in research work or in carrying out medical administration in the tropics, and publications of a less technical character for the use of Government officials, missionaries, and others, whose duties involve residence in the tropics. The Bureau publishes twice a month a Tropical Diseases Bulletin and quarterly a Tropical Veterinary Bulletin.

The Director of the Bureau is Dr. A. G. Bagshawe, late of the Uganda Medical Staff.

---

## TROPICAL DISEASES RESEARCH FUND.

The Advisory Committee for the Tropical Diseases Research Fund was constituted by the Secretary of State for the Colonies in July, 1904, and is composed as follows:—

The Rt. Hon. Sir J. West Ridgeway, G.C.B., G.C.M.G., K.C.S.I., LL.D., P.C. (*Chairman*).
Sir Thomas Barlow, Bart., K.C.V.O., M.D., F.R.S.
Surgeon-General Sir David Bruce, C.B., M.B., F.R.S., A.M.S.
Sir Patrick Manson, G.C.M.G., M.D., F.R.S.
Surgeon-General Sir R. Havelock Charles, G.C.V.O., M.D., I.M.S. (retired),
(Temporary) Colonel Sir J. Rose Bradford, K.C.M.G., C.B., M.D., F.R.S., A.M.S.
Sir H. J. Read, K.C.M.G., C.B.
Mr. E. C. Bleck, C.M.G.
Mr. L. J. Kershaw, C.I.E.
Mr. A. C. C. Parkinson (Mr. A. Fiddian, acting), *Secretary*.

The duties of the Committee are to advise the Secretary of State as to the management of the Tropical Diseases Research Fund, which is formed by contributions from the Imperial Government, the Government of India and from the Dominion and Colonial Governments, the total income

Digitized by Google

amounting to about £1,870 a year; and as to any other matter which the Secretary of State may refer to it. The income of the Fund is directed to assisting investigation and research into the various diseases prevalent in the tropical colonies of the Empire.

Reports of the work done by the Fund from 1906-14 will be found in Parliamentary Papers Cd. 3306, Cd. 3992, Cd. 4476, Cd. 4999, Cd. 5514, Cd. 6024, Cd. 6669, Cd. 7261, and Cd. 7796.

## ADVISORY MEDICAL AND SANITARY COMMITTEE FOR TROPICAL AFRICA.

In October, 1909, the Secretary of State for the Colonies, on the recommendation of a Departmental Committee of Enquiry into the duties, organisation, emoluments and recruitment of the West African Medical Staff, appointed a Committee to advise him on medical and sanitary questions connected with Tropical Africa. The Committee is composed as follows:—

Sir H. J. Read, K.C.M.G., C.B. (*Chairman*).
Sir Patrick Manson, G.C.M.G., M.D., F.R.S.
Lieut.-Col. Sir James Kingston Fowler, K.C.V.O., M.D., D.Sc., F.R.C.P., R.A.M.C. (T.).
Colonel Sir William B. Leishman, C.B., M.B., F.R.S., K.H.P., A.M.S.
Mr. C. Strachey.
Mr. W. D. Ellis.
Mr. W. C. Bottomley.
(Temporary) Lieut.-Col. W. T. Prout, C.M.G., M.B., R.A.M.C.
Professor W. J. Simpson, C.M.G., M.D., F.R.C.P.
(Temporary) Lieut.-Col. Andrew Balfour, C.M.G., M.D., R.A.M.C.
Mr. J. E. W. Flood (*Secretary*).

A Sub-Committee, consisting of Sir James Kingston Fowler, (Temporary) Colonel Sir J. Rose Bradford, K.C.M.G., C.B., M.D., F.R.S., A.M.S., one of the Private Secretaries to the Secretary of State, and Mr. Flood, has been appointed to advise the Secretary of State in connection with the selection of candidates for medical appointments in the Colonies.

---

## IMPERIAL BUREAU OF ENTOMOLOGY.

The Bureau was founded at the beginning of 1913 for the purpose of encouraging and co-ordinating entomological work throughout the Empire in relation both to human and animal diseases and to agriculture. The Head Office is at the British Museum (Natural History), Cromwell Road, S.W., and the Publication Office at 89, Queen's Gate, South Kensington. Dr. Guy A. K. Marshall is the Director of the Bureau, and Mr. S. A. Neave the Assistant Director. There is an Honorary Committee of Management composed as follows:—

Viscount Harcourt (*Chairman*); Colonel A. W. Alcock, C.I.E., F.R.S., I.M.S.; (Temporary) Major E. E. Austen; Dr. A. G. Bagshawe; Mr. E. C. Bleck, C.M.G.; (Temporary) Colonel Sir J. Rose Bradford, K.C.M.G., C.B., F.R.S., A.M.S.; Surg.-Gen. Sir David Bruce, C.B., F.R.S., A.M.S.; Mr. J. C. F. Fryer; Dr. S. F. Harmer, F.R.S.; Professor H. Maxwell Lefroy; Sir John McCall; Dr. R. S. MacDougall; Sir John McFadyean; Sir Patrick Manson, G.C.M.G., M.D., F.R.S.; Sir Daniel Morris, K.C.M.G.; Professor R. Newstead, F.R.S.; Professor G. H. F. Nuttall, F.R.S.; Professor E. B. Poulton, F.R.S.; Lieut.-Col. Sir D. Prain, C.I.E., C.M.G., F.R.S.; Sir H. J. Read, K.C.M.G., C.B.; Hon. N. C. Rothschild; Mr. Hugh Scott; Dr. A. E. Shipley, F.R.S.; Sir S. Stockman; Mr. F. V. Theobald; Mr. C. Warburton; with Mr. A. C. C. Parkinson (Mr. A. Fiddian, acting) as *Secretary*.

The Bureau has absorbed the Entomological Research Committee (with which the present Managing Committee is practically identical) appointed in June, 1909, by the Marquess of Crewe, when Secretary of State for the Colonies, with the object of furthering the study of economic entomology particularly in the British Tropical African Colonies and Protectorates.

Reports of the general work of the Bureau from 1912 will be found in Parliamentary Papers Cd. 6429, Cd. 7050[22] and Cd. 7622[25].

The funds now at the disposal of the Bureau are as follows:—

(1) Annual grants from the Imperial Government amounting to £500.
(2) Contributions from the self-governing Dominions and from India amounting to £2,100.
(3) Contributions from the West African Colonies amounting to £1,000.
(4) Contributions from the West Indian Colonies amounting to £250.
(5) Contributions from the Eastern and Mediterranean Colonies, Zanzibar and Fiji amounting to £645.
(6) Contributions from Egypt and the Sudan amounting to £100.
(7) A donation of £1,000 a year from Mr. Andrew Carnegie to enable the Bureau to provide scholarships for entomologists to study economic entomology in the United States of America.

The Bureau publishes a quarterly journal entitled "The Bulletin of Entomological Research" which includes original papers on entomological subjects; and a monthly journal entitled "The Review of Applied Entomology" (in two parts "Medical and Veterinary" and "Agricultural") summarizing all current entomological literature.

## COLONIAL VETERINARY COMMITTEE.

The Committee was established by Lord Elgin in 1907, with the co-operation of the Board of Agriculture and Fisheries, with a view to the collection of information on the tropical diseases affecting live stock, and to advising as to the best method of investigation into the veterinary aspect of tropical diseases. The members of the Committee are:—

Mr. A. W. Anstruther, C.B. (Board of Agriculture); Sir H. J. Read, K.C.M.G., C.B. (Colonial Office); and Sir S. Stockman (Chief Veterinary Officer to the Board of Agriculture); with Mr. H. F. Downie (Colonial Office) as *Secretary*.

---

## COLONIAL SURVEY COMMITTEE.

The Colonial Survey Committee is an advisory Committee appointed by the Secretary of State for the Colonies to advise him in matters affecting the survey of British Colonies and Protectorates, more especially those in Tropical Africa, with a view to securing the rapid, economical, and methodical prosecution of accurate surveys where these are required, and rendering the results available as speedily as possible for use by the Home Government, the Colonial Governments, and the public.

The scope of the Committee was extended in 1912 to include geological surveys in British Colonies and Protectorates.

The Committee was constituted in August, 1905, and the present members are:—

Sir H. J. Read, K.C.M.G., C.B., Colonial Office (*Chairman*); Colonel C. F. Close, C.B., C.M.G., R.E., D.G.O.S.; Col. W. C. Hedley, C.B., R.E., General Staff; Dr. A. Strahan, F.R.S., Pres. G.S. (Director, Geological Survey of the United Kingdom); Dr. J. W. Evans, F.G.S. (Imperial College of Science and Technology); and Mr. J. F. N. Green (Colonial Office); with Mr. W. C. Bottomley (Colonial Office) and Bt. Lieut.-Col. E. W. Cox, D.S.O., R.E. (General Staff) as *Joint Secretaries*.

---

## VISUAL INSTRUCTION COMMITTEE.

The Committee was appointed by the Secretary of State for the Colonies in 1902, and is composed as follows:—

The Rt. Hon. The Earl of Meath, K.P. (*Chairman*), Sir John Struthers, K.C.B., LL.D., Sir Charles Holroyd, Sir Philip Hutchins, K.C.S.I., Sir Everard im Thurn, K.C.M.G., C.B., Sir Charles Lucas, K.C.B., K.C.M.G., Dr. H. Frank Heath, C.B., Mr. H. J. Mackinder, M.P., Sir W. H. Mercer, K.C.M.G., Professor Michael E. Sadler, C.B., LL.D., with Mr. W. E. Noall of the Colonial Office as *Secretary*.

The work of the Committee is to provide, through the medium of lectures illustrated by lantern slides and prepared with a special view to their use in Schools, the means of giving to the people of the United Kingdom and of the oversea Dominions and Colonies as vivid and accurate knowledge as possible of the geography, the social life and the economic possibilities of the component parts of the British Empire.

Lectures on the United Kingdom prepared at the charge of the local Governments have been issued in the following editions:—

1. Eastern Colonies, in use in Ceylon, the Strait Settlements and Hong Kong.
2. Mauritius.
3. West African, in use in Sierra Leone, the Gold Coast and Southern Nigeria.
4. West Indian, in use in Trinidad, British Guiana, and Jamaica.
5. Indian, in use in ten of the Provinces of India.

The Indian edition has been re-issued for use in the United Kingdom and generally.

In 1907 a fund was raised by a Committee of ladies under the patronage of Her Majesty the Queen, then Princess of Wales, and placed at the disposal of the Committee in order to enable them to provide similar lectures on the oversea Dominions and Colonies. Six sets of these lectures have now been issued, dealing with:—

1. India.
2. The Sea Road to the East, including the possessions in the Mediterranean, the Indian Ocean and in the East.
3. Australasia.
4. Canada and Newfoundland.
5. South Africa, and
6. West Indies and Guiana.

Lectures on Tropical Africa are in course of preparation.

## WEST AFRICAN CURRENCY BOARD.

The West African Currency Board was appointed by the Secretary of State for the Colonies in November, 1912, on the recommendation of the West African Currency Committee of 1911–1912, to provide for and to control the supply of currency to the British West African Colonies and Protectorates.

The Board is represented in West Africa by Currency Officers at Lagos, Accra, Freetown, and Bathurst, who supervise and control the work performed for the Board by the branches of the Bank of British West Africa Ltd., which acts as the Board's Agent. The present Currency Officers are the Treasurers of Nigeria, the Gold Coast, and Sierra Leone, and the Receiver-General of the Gambia.

The first Chairman of the Board was Sir G. V. Fiddes, K.C.M.G., C.B. The Board is at present constituted as follows:—Sir W. H. Mercer, K.C.M.G. (*Chairman*), Mr. L. Couper, and Mr. A. E. Collins, C.M.G.; *Acting Secretary*, Mr. W. A. F. Wickhart.

Reports on the transactions of the Board since their appointment will be found in Parliamentary Papers Cd. 7791, Cd. 8124, and Cd. 8372. The address of the Board is 4, Millbank, Westminster, S.W.

*The Objects of the Institute are defined by its Charter of Incorporation, which bears date the 26th September, 1882.*

"It aims to promote the preservation of a permanent union between the Mother Country and the various parts of the Empire. It provides a place of meeting for British subjects connected with the Dominions, the Colonies, and India; for residents in this country who are in sympathy with the objects of the Institute, and wish to promote the interests of the Empire beyond the seas; for British subjects and persons of direct British parentage resident in foreign countries. It provides a Library containing the best unofficial collection in existence of publications relating to the Empire; a comprehensive Law Library; and Reading, Smoking, and Reception Rooms. It publishes

Digitized by Google

a Monthly Journal, and offers opportunities for the reading of Papers and for holding discussions upon subjects of Imperial interest, and it undertakes literary, commercial, and statistical inquiries in connection with the Empire. Nothing in the Papers or discussions is permitted tending to give the Institute a party character." (Rule 1.)

The Institute consists of resident and non-resident fellows (who must be British subjects), elected by the Council on the nomination of two fellows, one of whom at least must sign on personal knowledge, and associates, who must also be British subjects, and of either sex, but for the present the associateship is restricted as regards men associates to the United Kingdom, elected by the Council on the nomination of one fellow or one associate. A resident fellow (who has a permanent home in the United Kingdom) pays an entrance fee of 3*l.* 3*s.* and an annual subscription of 2*l.* 2*s.*; or if residing over 50 miles from London pays an entrance fee of 1*l.* 1*s.* and an annual subscription of 2*l.* 2*s.*; a non-resident fellow (who has his permanent home outside the United Kingdom) pays an entrance fee of 1*l.* 1*s.* (which is increased to 3*l.* 3*s.* when taking up permanent residence in the United Kingdom) except after fifteen year's membership, and an annual subscription of 1*l.* 1*s.* (which is increased to 2*l.* 2*s.* when in the United Kingdom for more than twelve months). Associates pay an annual subscription of 1*l.* 1*s.* Resident fellows can compound for the annual subscription by the payment of 20*l.*, or after five years' annual subscriptions of 2*l.* 2*s.* on payment of 15*l.*; and non-resident fellows can compound for the non-resident annual subscription on payment of 10*l.*, or after the payment of fifteen or more annual subscriptions on the payment of 5*l.* An additional class of members who, not being British subjects, cannot be fellows, but known as affiliated members, includes such subjects of Foreign Powers only as are either British born or children of British parents on both sides. They are nominated and elected in the same manner as non-resident fellows, and pay the same fees, *i.e.*, entrance fee 1*l.* 1*s.* and subscription 1*l.* 1*s.*, or may compound for life at 11*l.* 1*s.*

The privileges of fellows, whose subscriptions are not in arrear, include the use of rooms, papers, and library. All fellows, whether residing in England or the Colonies, have a copy of the monthly journal, entitled *United Empire*, forwarded to them.

To be present at the evening meetings, and to introduce one visitor.

To be present at the annual conversazione, and to introduce a lady.

Affiliated members have the same privileges as associates, and in addition the use of the Institute building.

Associates are entitled to receive a copy of the monthly journal of the Institute, to attend any meeting held for the reading of papers or any annual provincial conference of the Institute, and to attend the annual conversazione.

The Institute occupies its own house, which is open on week-days from 9.30 a.m. to 8 p.m., and comprises general library, law library, reading, news rooms, writing rooms, smoking room, map room, offices, &c. The library contains over 115,000 volumes (including pamphlets), all of which relate to the Over-seas Dominions, Colonies and India. Books may be borrowed, the correspondence of fellows may be addressed to the care of the Institute, and visitors, introduced by a fellow, are admitted.

The annual meeting is held not later than the month of May; ordinary meetings are held at 8.30 p.m. on the second Wednesday (as a general rule) of the months from November to June, as well as occasional afternoon meetings, for the reading and discussion of papers. The number of members on 31st December, 1917, was 12,300.

Honorary Secretary, 3 (North), King's Bench Walk, Temple, E.C.

The Society of Comparative Legislation was founded to promote a knowledge of the course of legislation in different countries, more particularly in the several parts of His Majesty's Dominions, and in the United States. For twenty-one years the Society has been engaged in presenting year by year in its Journal in a concise and orderly form a summary of the legislation of the British Empire, the United States and the chief foreign countries of the world, together with a critical introduction and complete index. Ten years of the legislation of the British Empire—1898 to 1907—with a valuable introduction by Lord Rosebery have been collected in four large volumes under the title of "The Legislation of the Empire." Besides the review of legislation the Society publishes in its Journal articles upon a variety of topics. The subscription (payable to the Society's Bankers, Messrs. Child & Co., 1, Fleet Street, London), is one guinea, which entitles the subscriber to all Journals published during the year. Governments subscribing £5 5*s.* per annum are entitled to ten copies.

*Objects.*

The Over-Seas Club is a non-party society of British subjects residing in all parts of the world. Its underlying motive is to promote the unity of British subjects.

Its four chief objects are :—

(1) To help one another.
(2) To render individual service to our Empire.
(3) To maintain our Empire's supremacy upon the seas and in the air.
(4) To draw together in the bond of comradeship British people the world over.

*Members' Creed.*

Believing the British Empire to stand for justice, freedom, order and good government, we pledge ourselves, as citizens of the greatest Empire in the world, to maintain the heritage handed down to us by our fathers.

---

The Over-Seas Club, which was founded on August 27th, 1910, possesses commodious Club Premises, situated in General Buildings, Aldwych, London, W.C. 2. The accommodation provided includes bureaux of welcome and information, smoking room, reception rooms, ladies' room, billiard room, and other usual amenities.

The Over-Seas Club is open on week-days from 9.30 a.m. to 9 p.m.

The cost of Membership of the Over-Seas Club is as follows :—

| | | £ | s. | d. |
|---|---|---|---|---|
| Entrance fee : | Residents over-sea ... ... ... ... ... ... | | 2 | 6 |
| | Residents in the United Kingdom ... ... ... ... | | 5 | 0 |
| | Residents in the London area... ... ... ... ... | | 10 | 0 |
| Annual subscription : | Residents over-sea ... ... ... ... ... ... | | 7 | 6 |
| | Residents in the United Kingdom ... ... ... ... | | 10 | 0 |
| | Residents in London area ... ... ... ... ... | | 15 | 0 |
| Life membership subscription : | | | | |
| | Residents over-sea ... ... ... ... ... ... | 3 | 3 | 0 |
| | Residents in British Isles ... ... ... ... ... | 5 | 5 | 0 |

Since the outbreak of hostilities, and up to December 1st, 1917, the Over-Seas Club had collected the sum of over £540,000 for patriotic purposes, including the presentation of 108 Airplanes, contributed by various sections of the Empire, to the Royal Flying Corps; in response to the Club's appeal for Aircraft to form an Imperial Aircraft Flotilla.

£315,000 had also been collected to provide comforts and tobacco for men on active service.

On December 1st, 1917, the Club consisted of 152,000 associates, and 19,000 subscribers.

Telephone : City 9228-9.

All communications should be addressed to :—

The Honorary Organiser, Over-Seas Club, General Buildings, Aldwych, London, W.C. 2,

## THE CEYLON ASSOCIATION IN LONDON.

*President*—Sir Stanley Bois.

*Secretary*—A. O. Whiting, Esq.

The Association had its origin in the proposal of the Planters' Association of Ceylon to establish a branch in London, and was formed in 1888 for the purpose of acting, in correspondence with the public bodies in Ceylon, for the protection and furtherance of the general interests of that Colony.

All residents in the United Kingdom interested in Ceylon are invited to become members of the Association, the annual subscription being 1*l.* 1*s.*, and in the case of Firms and Companies, 3*l.* 3*s.*

Digitized by Google

The Offices at 61 and 62, Gracechurch Street, where the Ceylon newspapers and other publications connected with the Colony are taken in, is daily open to members.

The affairs of the Association are managed by the Committee.

The office-bearers and the Committee are elected annually in general meeting.

The Association receives financial support from the Planters' Association of Ceylon and the Ceylon Chamber of Commerce, each body voting 100*l.* annually in aid of the London funds. There are 402 subscribing members of the Association.

6, Laurence Pountney Hill, Cannon Street, E.C.

---

## THE STRAITS SETTLEMENTS ASSOCIATION.

*President*—W. H. Shelford, Esq., London House, Crutched Friars, E.C. 3.

*Hon. Treasurer*—A. G. Wright, London House, Crutched Friars, E.C. 3.

*Hon. Secretary*—J. Graham, 7, East India Avenue, E.C. 3.

The Straits Settlements Association is composed mainly of persons who have lived in the Straits, and who are intimately connected with the Colony by professional or commercial ties, but it embraces all who are in any way interested in it or in the Federated Malay States. Members must be British subjects.

The objects of the Association are to provide a centre for the discussion of questions affecting the Colony, and for enabling the members to take common action in support of its interests where such action is necessary or desirable.

It is in close alliance with a similar association at Singapore.

---

## THE WEST INDIA COMMITTEE.

*Established circa* 1750. *Incorporated by Royal Charter, August 4th*, 1904.

Telegrams: "Carib, London." Telephone: 6642 Central.

*President*—The Right Hon. The Earl of Harewood, K.C.V.O.

*Chairman*—Robert Rutherford, Esq.

*Deputy-Chairman*—Henry Alexander Trotter, Esq.

*Treasurers*—R. Rutherford, Esq., Cyril Gurney, Esq., and W. Gillespie, Esq.

*Bankers*—The Colonial Bank.

*Secretary*—Algernon E. Aspinall, Esq., C.M.G., B.A. (Barrister-at-Law).

The West India Committee is an association of Planters, Merchants, and others interested in the British West Indies, British Guiana and British Honduras. The object of the West India Committee is to promote the general welfare of those Colonies, and by united action to further their interests.

The annual subscription for membership is £1 1s. 0d. or $5, which entitles the subscriber to receive the *West India Committee Circular*. Subscription for Life Membership, £10 10s. 0d.

The West India Committee Rooms are conveniently situated upon the first floor at 15, Seething Lane, London, E.C., next to Mark Lane Station upon the Metropolitan and District Railways, and form a useful rendezvous for gentlemen from the West Indies when they visit their merchants in the City. Writing materials are provided, and in addition to all Official Gazettes, Parliamentary Papers, etc., all the West Indian newspapers are, through the courtesy of their editors, filed.

*Honorary Correspondents.*

## THE WEST INDIAN CONTINGENT COMMITTEE.

*Chairman*—Sir Everard im Thurn, K.C.M.G., C.B.

*Deputy-Chairman*—Sir Frederic Hodgson, K.C.M.G., V.D.

*Hon. Treasurers*—Colonel Sir Edward Ward, Bart., K.C.V.O., K.C.B.; Sir Sydney Olivier, K.C.M.G.; R. Rutherford, Esq.

*Hon. Secretary*—Algernon E. Aspinall, Esq., C.M.G., B.A., Barrister-at-Law.

This Committee was formed at the instance of Mr. Bonar Law, in August, 1915, to provide for the welfare and comforts of the men of the Bermudian and West Indian Contingents, as well as of those who have already come over independently, and of others who may come over to fight for their King and Country.

The Headquarters of the West Indian Contingent Committee are at the West India Committee Rooms, 15, Seething Lane, London, E.C.

A Ladies' Committee, formed under the patronage of H.H. Princess Marie Louise, with Lady Davson as Chairman and Miss Mary Moseley as Hon. Secretary, to assist the Contingent Committee, has its headquarters at the same address.

*The Objects of the West Indian Club are:—*

(1) To bring persons interested in the West Indies and British Guiana together, in order to promote the discussion and consideration of questions affecting those Colonies.

(2) To further the interests of the West Indies and British Guiana by providing headquarters for associated action, not political, but social.

(3) To afford facilities for organising, in connection with the West Indies and British Guiana, Cricket Matches and other kindred amusements recognised by our English Universities and Public Schools.

(4) The doing of all such other things as are incidental or conducive to the attainment of the above objects.

*Honorary Correspondents.*

Antigua, A. P. Cowley, Esq.
Bahamas, J. H. Brown, Esq.
Barbados, S. Browne, Esq.
Bermuda,
British Guiana,
British Honduras, W. H. Hoar, Esq.*
Dominica, Hon. H. A. Nicholls, M.D., C.M.G.
Grenada, P. J. Dean, Esq.
Jamaica (vacant).
St. Kitts (vacant).
St. Lucia (vacant).
St. Vincent (vacant).
Trinidad, G. Bruce Austin, Esq.
Turks Islands, B. C. Frith, Esq.

The Membership at the close of 1917 was 700.

# IMPERIAL CONFERENCE.

The Imperial Conference has been constituted under the terms of the first resolution of the Colonial Conference of 1907, which was as follows:—

"That it will be to the advantage of the Empire if a Conference, to be called the Imperial Conference, is held every four years, at which questions of common interest may be discussed and considered as between His Majesty's Government and His Governments of the self-governing Dominions beyond the seas. The Prime Minister of the United Kingdom will be *ex-officio* President, and the Prime Ministers of the self-governing Dominions *ex-officio* members, of the Conference. The Secretary of State for the Colonies will be an *ex-officio* member of the Conference and will take the chair in the absence of the President. He will arrange for such Imperial Conferences after communication with the Prime Ministers of the respective Dominions.

Such other Ministers as the respective Governments may appoint will also be members of the Conference—it being understood that, except by special permission of the Conference, each discussion will be conducted by not more than two representatives from each Government, and that each Government will have only one vote.

That it is desirable to establish a system by which the several Governments represented shall be kept informed during the periods between the Conferences in regard to matters which have been or may be subjects for discussion, by means of a permanent secretarial staff, charged, under the direction of the Secretary of State for the Colonies, with the duty of obtaining information for the use of the Conference, of attending to its resolutions, and of conducting correspondence on matters relating to its affairs.

That upon matters of importance requiring consultation between two or more Governments which cannot conveniently be postponed until the next Conference, or involving subjects of a minor character or such as call for detailed consideration, subsidiary Conferences should be held between representatives of the Governments concerned specially chosen for the purpose."

## MEMBERS OF THE IMPERIAL CONFERENCE.

*President*—The Prime Minister of the United Kingdom.

*Chairman (in the absence of the President)*—The Secretary of State for the Colonies.

The Prime Minister of the Dominion of Canada.
The Prime Minister of the Commonwealth of Australia.
The Prime Minister of the Dominion of New Zealand.
The Prime Minister of the Union of South Africa.
The Prime Minister of Newfoundland.

*Secretarial Staff.*

*Secretary*—H. C. M. Lambert, C.B.

*Assistant Secretary*—C. T. Davis, C.M.G.

Prior to the Conference of 1907 there were four Colonial Conferences (three in London and one in Ottawa). A brief account of these five Conferences follows:

**Conference of 1887.**
(*See* Cd. 5091.)

The invitations to the Conference of 1887, despatched by Mr. Stanhope in November, 1886, met with a prompt response in all quarters; they were addressed to the Governors of all the Colonies in view of the celebration of the Jubilee of the reign of Her Majesty Queen Victoria. All the then self-governing Colonies sent delegates, as well as Natal and Western Australia, and representative gentlemen from some of the larger Crown Colonies attended meetings at which matters of interest to these dependencies were discussed. The proceedings were opened on the 4th of April with an address from the President, Sir Henry Holland, afterwards Viscount Knutsford, in which he reviewed the progress of the Empire during Her Majesty's reign and indicated the object for which the Conference had been summoned. The most prominent question discussed was the organisation of Colonial Defence, and an important agreement was arrived at for the increase of the Australasian Squadron. Five fast cruisers and two torpedo gunboats were to be added to the squadron, the Colonies paying, for maintenance and depreciation of these vessels, 126,000*l.* per annum for ten years. All the Colonial Legislatures passed the necessary legislation for giving effect to this arrangement, and vessels for service on the Australasian Station reached Australia in September, 1891. The defence of the important stations of King George's Sound and Thursday Island were also fully discussed, but no final decision was arrived at. It was also agreed that an Imperial Officer should be selected to inspect the Colonial forces and military defences. Among the other questions which came before the Conference were the provision for the Government of British New Guinea, and it was agreed that Queensland, acting with New South Wales and Victoria, should contribute 15,000*l.* a year for ten years for this purpose, the Imperial Government undertaking to provide a suitable steamer and maintain it for three years at an estimated cost of 29,000*l.* Queensland passed the necessary legislation in 1887, and the proclamation of sovereignty over the territory took place on the 4th September, 1887. Dr. (now Sir William) MacGregor was selected as the first administrator of the new colony.

A full interchange of views on the relations of the Australasian Colonies with the Islands in the Pacific took place between Her Majesty's Government and the Colonial delegates, and the Conference unanimously approved the position taken up with regard to Samoa, and also the proposal for a joint Anglo-French Naval Commission for the preservation of the neutrality of the New Hebrides.

Among other questions discussed were the Australian and Pacific Mail services, telegraphic communication with Australia, the proposal for an Imperial Penny Post, the adoption of similar legislation with regard to merchandise marks and patents, and the enforcement of Colonial judgments and Orders in Bankruptcy.

In pursuance of the arrangement as to the inspection of the local forces of Australasia referred to above, Major-Gen. Sir Bevan Edwards, K.C.M.G., C.B., visited all the principal Colonies during 1890, and inspected their forces and defences. One important result of his report was that it showed the importance of a closer union of the Australasian Colonies, and at the instance of Sir H. Parkes, the Premier of New South Wales, an Inter-colonial Conference was held in Melbourne during 1890, to consider the question of Federation. The result of its proceedings and also of the proceedings of the Federation Convention which followed will be found in the account of Australia. A Conference of Australasian Prime Ministers was held at Hobart in 1895 to discuss the question, and measures were passed by all the Colonies except Queensland for the election of delegates (ten from each Colony) to draft a Constitution Act. The delegates were elected in February, 1897, and prepared the basis of a constitution. The later developments are described under the heading "Australia."

**Conference of 1894.** (*See* Cd. 7553.)

During 1894 a Colonial Conference was held at Ottawa, on the invitation of the Dominion Government, to consider the question of trade and communications between the Colonies, and between the Colonies and the Mother Country. Delegates attended from New South Wales, Victoria, Queensland, South Australia, Tasmania and New Zealand and from the Cape Colony, and important resolutions were passed urging the removal of legislative or treaty obstacles to preferential tariff treatment within the Empire, the establishment of a mail service between Great Britain and Australasia, *via* Canada, and the connection of Canada and Australasia by a cable under British control. A Committee of representatives of the Imperial and Colonial Governments was appointed in 1896 to consider the question of this cable, and eventually the execution of the project was decided on and a Board constituted to manage the undertaking. The work of laying was commenced in 1902.

**Conference of 1897.** (*See* Cd. 8596.)

The distinguishing event of the year 1897 was the celebration of the completion of the sixtieth year of the reign of Queen Victoria. Early in the year invitations were addressed to the Prime Ministers of all the self-governing Colonies to attend the celebration in London as guests of the Queen. The Prime Ministers, eleven in number, accepted and attended. Advantage was taken of their presence to hold a conference between them and the Secretary of State for the discussion of various questions of common interest. The proceedings were private, but a summary was presented to Parliament (C. 8596, July, 1897), in which were published the opening address by Mr. Chamberlain, setting forth the subjects of discussion, a short statement by Mr. Goschen on the question of naval defence, with special reference to the Australian naval agreement, and the resolutions arrived at by the Conference. It was generally agreed that the meeting had been most conducive to the interests of the Empire, and that it would be well to hold similar meetings in the future when occasion offered. As a result of a resolution passed at the Conference the commercial treaties of this country with Germany and Belgium were denounced on the 30th of July, in order that the fiscal relations between the Mother Country and the Colonies might be completely independent of fiscal relations with foreign countries. This question had been brought prominently to the front by a Tariff Act passed in Canada, giving preferential treatment to the Mother Country, and the resolution was passed unanimously by the Conference largely in consequence of the urgent request of the Dominion Government. The matter of Imperial defence received much attention, and an offer was made by Sir J. Gordon Sprigg, on behalf of Cape Colony, to present a first-class battleship as a contribution to the British navy—for which a contribution in money was afterwards substituted.

**Conference of 1902.** (*See* Cd. 1299.)

Advantage was taken of the presence in London of the Prime Ministers of the self-governing Colonies in connection with the Coronation of King Edward VII, in 1902, to discuss with them various important questions of general interest, especially the political and commercial relations of the Empire and its naval and military defence. In the result a very considerable improvement was arranged, subject to the approval of the Parliaments concerned, in the terms of the Australasian Naval Agreement, by which the effectiveness of the squadron to which it related, as part of the naval force of the Empire, was to be greatly increased, and the amount of the Colonial contribution towards the maintenance of the squadron raised from 126,000*l.* a year to 240,000*l.* The Premiers of Cape Colony and Natal intimated their desire to increase their unconditional contributions to the Navy from 30,000*l.* and 12,000*l.* to 50,000*l.* and 35,000*l.* respectively. Newfoundland agreed to contribute 3,000*l.* a year towards the expense

Digitized by Google

of a branch of the Royal Navy Reserve established in the Colony, on the condition that the number should be raised to 600 men. Various important resolutions were passed respecting commercial relations.

**Conference of 1907.**
(*See* Cd. 3523.)

The last Colonial Conference (thereafter to be designated the Imperial Conference) was held in 1907, in which the Prime Ministers of all the self-governing Colonies took part, including the Transvaal, where the first elections under responsible government had just taken place. At the opening meeting, on April 15th, Sir Henry Campbell-Bannerman welcomed the Colonial representatives on behalf of His Majesty's Government. The primary subject for consideration was that of the future Constitution of the Conference, raised by Mr. Lyttelton's despatch of 20th April, 1905, proposing the establishment of an Imperial Council. The resolution adopted (which is quoted above) provided for the meeting of an Imperial Conference every four years between His Majesty's Government and the Governments of the self-governing Dominions beyond the Seas, with the Prime Minister of the United Kingdom as *ex-officio* President, the Secretary of State for the Colonies taking the chair in his absence; and also provided that a permanent secretarial staff should attend to the business of the Conference during the period between its meetings. In the course of discussion Lord Elgin undertook so to alter the organisation of the Colonial Office that there should be a separate division dealing with the self-governing Dominions. The manner in which this undertaking was carried out by him is explained in his despatch of 21st Sept., 1907 (Cd. 3795).

The Conference affirmed the need of developing a General Staff, selected from the forces of the Empire as a whole, to study military science in all its branches. With regard to naval defence, Australia indicated a desire to make provision for a local force, diverting to its service the subsidy paid to the Admiralty under the Naval Agreement.

The members of the Conference, with exception of His Majesty's Government, reaffirmed the resolutions of the Conference of 1902 on the subject of Preferential Trade within the Empire, His Majesty's Government being unable to admit that it was necessary or expedient to alter the fiscal system of the United Kingdom.

Among other subjects brought before the Conference were the improvement of mail communication with Australia, *viâ* Canada, the promotion of emigration to British Colonies, the adoption of uniform conditions of naturalisation throughout the Empire, uniformity in Company law, in trade statistics and in trade marks and patents, and the codification of the rules governing appeals to the Judicial Committee of the Privy Council.

**Defence Conference, 1909.**
(*See* Cd. 4948.)

In consequence of the Parliamentary discussions concerning the naval position which took place in March, 1909, the offers of "Dreadnoughts" from New Zealand and Australia, and the Resolution passed by the Canadian House of Commons on the 29th March, His Majesty's Government decided to convene a special conference to discuss Naval and Military Defence, under the terms of Resolution I. of the Imperial Conference of 1907. The Conference, at which all the self-governing Dominions were represented, met for the first time on the 28th July, and for the last on the 19th August. The main results of the Conference were as follows:—

(1.) The offers of New Zealand and of Australia to contribute a battleship each were accepted, with the substitution of cruisers of the new "Indomitable" type for battleships. The two ships were to be kept one on the China and the other on the Australian Station.

Digitized by Google

(2.) Australia was to provide and maintain, with some temporary assistance from Imperial funds, an Australian unit of a general Pacific Fleet. The unit was to consist of a cruiser of the "Indomitable" type, three second-class cruisers of the "Bristol" type, six destroyers of the "River" class, and three submarines of "C" class.

(3.) Canada was to make a start with cruisers of the "Bristol" class and destroyers of an improved "River" class.

(4.) New Zealand was to continue her policy of a money contribution to be spent on the China unit of the Pacific Fleet. The cruiser of the "Indomitable" type given by New Zealand was to be the flagship of this unit.

(5.) In regard to military defence, a plan was drawn up in outline for so organizing the forces of the Crown, wherever they might be, that they might be capable of being rapidly combined into one homogeneous Imperial army.

The South African delegates were not, of course, in a position to submit or approve any definite proposals as the Union of South Africa was then in process of establishment.

In accordance with the agreement arrived at at the Defence Conference, the Commonwealth of Australia placed orders through the Admiralty for the Second Class Cruisers required; Canada purchased the "Rainbow" and "Niobe"; orders were placed for the cruiser to be given by New Zealand, and in Canada and Australia Naval Defence Acts were passed, under which the Naval Defence Forces are governed by principles similar to those in force in the Imperial Navy.

**Copyright Conference, 1910.**
(*See* Cd. 5272.)

In 1910 a Subsidiary Imperial Conference was convened to consider the subject of Imperial copyright. The Conference was held in May and June, and discussed fully the questions of the maintenance of the unity of copyright legislation throughout the Empire, and the desirability of the Empire accepting the Revised Copyright Convention of Berlin (1908). The Governments of all the Dominions were represented, and important resolutions were passed in favour of the adoption of a uniform copyright law for the Empire, and in favour of the acceptance of the Revised Copyright Convention, subject to certain reservations and, in particular, to the right of any self-governing Dominion to limit the obligation imposed by the Convention to works, the authors of which are subjects or citizens of a country of the union or *bona fide* residents in such a country. In accordance with the resolutions of the Conference an Imperial Copyright Act was passed in 1911. Legislation adopting its provisions was passed by the Commonwealth of Australia and Newfoundland in 1912, and an Act based on the Imperial Act, was passed in New Zealand in 1913.

Steps were taken in accordance with the fifth resolution of the Conference of 1907 to pass new Orders in Council respecting appeals from the Supreme Courts of New Zealand, the six Australian States, the provinces of Nova Scotia, New Brunswick, Prince Edward Island, Manitoba, British Columbia, Alberta and Saskatchewan, while Orders in Council respecting procedure were passed in respect of the Commonwealth of Australia and the Union of South Africa.

**Action on Resolutions of 1907 Conference.**

In accordance with the wishes of the Conference of 1907, steps were taken for the appointment of Trade Commissioners in the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, and a paid correspondent of the Board of Trade was appointed in Newfoundland. These officers perform with regard to matters of trade much the same functions as are performed by His Majesty's consuls in foreign countries.

Digitized by Google

Steps were taken to secure greater uniformity in the laws of the Dominions with regard to trade marks and patents. Moreover, the trade statistics of the Dominions were modified with a view to showing more clearly the trade with the United Kingdom, British possessions, and foreign countries.

Uniformity in company law was, in part, effected by legislation in the Transvaal in 1909, in Victoria in 1910, and in British Columbia. Moreover, the Imperial legislation was consolidated in 1908, and the Dominion Governments have under consideration the question of assimilating their legislation to that Act. Arrangements were made to hold in April, 1911, a subsidiary conference with regard to reciprocity in the examination and authorization of surveyors throughout the Empire, at which the Dominion of Canada, the Commonwealth of Australia, all the Australian States (except South Australia) and New Zealand were represented.

The question of naturalization was considered by an Inter-departmental Committee in 1908. Its report was forwarded for the consideration of the Dominions, and the question received further discussion at the Imperial Conference of 1911.

Steps were taken for the introduction of a silver currency in the Commonwealth of Australia, and, by an Order in Council of the 23rd January, 1911, the operation of the Imperial Act of 1870 was revoked so far as the Commonwealth is concerned. The coinage is being manufactured at the Royal Mint.

The Radiotelegraphic Convention of 1906 was adhered to by the Dominion of Canada, the Union of South Africa, the Commonwealth of Australia, and the Dominion of New Zealand. A Bill was prepared for introduction into the Imperial Parliament, with a view to facilitating marriages in this country of persons coming from British Dominions and Colonies.

Steps were taken to secure a reduction in the Suez Canal dues.

Correspondence relating to Conference Work from May, 1907 to July, 1910, was published in Cd. 5273.

**Conference of 1911.**
(*See* Cd. 5745.)

In accordance with the Resolution of the Conference of 1907, the first Conference which was officially styled "Imperial" was held in May and June, 1911. The Prime Minister of the United Kingdom presided, the chair being taken in his absence by the Secretary of State for the Colonies, and, on one occasion, by the Prime Minister of Canada. The Prime Ministers of all the Dominions were present, besides two other Ministers from Canada, Australia and the Union of South Africa, one other Minister from New Zealand and one from Newfoundland. The question of the constitution of the Conference and the reconstruction of the Colonial Office was considered at length, but a majority of the representatives were of opinion that no fundamental change was necessary.

The Conference also considered the question how far the Dominion Governments could be consulted with regard to Treaties, with special reference to the fact that the Declaration of London of 1908 was not submitted to the Dominions for approval before it was concluded. The Imperial Government proposed, and the representatives of the Dominions agreed, that in future the Dominions should be afforded an opportunity of consultation, when the instructions to be given to British delegates at meetings at the Hague Conference were being framed, that Conventions affecting the Dominions provisionally assented to at that Conference should be circulated to the Dominion Governments before they were officially signed, and that a similar procedure, where time and opportunity and subject matter permitted, should, as far as possible, be used when preparing instructions for the negotiation of other international agreements affecting the Dominions. It was also agreed that, with a view to relieving the Dominions of obligations under "most favoured nation" clauses in Treaties concluded years ago and binding on the Dominions. His Majesty's Government should open negotiations with several foreign Governments

Digitized by Google

having such Treaties with a view to securing liberty of any Dominion to withdraw from the operation of the Treaty without impairing the Treaty as respecting the rest of the Empire.

The question of an Imperial Court of Appeal was discussed at length, and the Imperial Government proposed, and the Dominions accepted the proposal, that two Lords of Appeal should be added to the number of four already existing so that their services might be available both for service in the House of Lords and for service on the Judicial Committee.

The question of emigration to the Dominions was discussed at full length. The President of the Local Government Board showed that the numbers then emigrating were fully as large as could safely be spared by the United Kingdom. It was agreed that the present policy of encouraging British emigrants to proceed to British Dominions rather than to foreign countries should be continued and that full co-operation should be accorded to any Dominion desiring immigrants.

The discussion of the question of Naturalisation resulted in an Agreement on the main principles on which Naturalisation in one of the Dominions should be recognised in other parts of the Empire.

The question of improved Cable communications was considered and the Postmaster General was able to announce the prospect, of important reductions from January 1st, 1912, in rates for deferred messages and in Press Cables. It was also agreed that a chain of Wireless Telegraph Stations should be constructed from the United Kingdom, *via* Cyprus, Aden, Bombay and Singapore, to some point in Australia from which there would be communication over the land lines and thence both by cable and by wireless telegraphy to New Zealand. It was also agreed that the Pacific Cable Board should be authorised to lay a cable between Australia and New Zealand. The Governments of Canada and Australia undertook to consider favourably the extension of the Imperial Postal Order system and a resolution in favour of the lowering of the postal rates generally was agreed to.

In order to render possible further co-operation in commercial relations it was agreed that a Royal Commission should be appointed representing the Imperial and Dominion Governments with a view to investigating and reporting upon the natural resources of each part of the Empire represented at the Conference, the development attained and attainable, the facilities for production, manufacture and distribution, the trade of each part with the others and with the outside world, the food and raw material requirements of each and the sources thereof available, the extent, if any, to which the trade between each of the different parts had been affected by existing legislation in each either beneficially or otherwise, and the methods by which consistently with the existing fiscal policy of each part the trade of each part with the others might be improved and extended.

It was agreed that all practical steps should be taken to secure uniformity of treatment of British shipping, to prevent unfair competition with British ships by foreign subsidized ships, to secure to British ships equal trading advantages with foreign ships, to promote the employment of British seamen on British ships, and to raise the status and improve the conditions of seamen employed on such ships. Proposals were made by the Dominion of New Zealand with the support of the Dominion of Canada for the grant of wider legislative powers in respect of shipping to the Over-seas Dominions, but the Resolution was not accepted by the Government of the United Kingdom, the Commonwealth of Australia, the Union of South Africa and Newfoundland.

In connection with the question of Merchant Shipping a discussion took place as to the treatment of British Indians in the Self-Governing Dominions. Lord Crewe made a statement in which he pointed out that, while it was the undoubted right of the Self-Governing Dominions to determine in what manner their com-

Digitized by Google

munities should be composed, and therefore to restrict in such way as they thought fit Indian immigration, it was important that this should be done in a way compatible with the comity due to the Indian people, and that in all cases in which Indians were permitted to enter the Dominions or were domiciled therein due respect should be paid to their rights.

The principles laid down by Lord Crewe were accepted by the representatives of the Dominion Governments.

It was agreed to consider how far it was possible to make arrangements with a view to the enforcement in one part of the Empire of Judgments and Orders of the Courts of Justice in another part. Resolutions were also passed in favour of uniformity in the law of copyright, patents, trade-marks, companies and workmen's compensation. The questions of provision for deserted wives and children, the celebration of His Majesty's Birthday, and the Suez Canal Dues were discussed, and it was agreed that concerted action should be taken by all the Governments of the Empire to promote better trade and postal communications between Great Britain and the Over-seas Dominions, and in particular to discourage shipping conferences or combines in so far as the operations of such conferences were prejudicial to trade.

Before separating the Conference agreed that it was desirable that between Conferences there should be interchange of visits between Ministers of the United Kindom and Ministers of the Dominions and that the Government of the United Kingdom should take into consideration the possibility of holding a meeting of the Conference or a subsidiary Conference, in one of the Over-seas Dominions.

**Action on Resolutions of 1911 Conference.**

Since the date of the Conference steps have been taken to carry out the several recommendations made. Agreements have been made with the Governments of Sweden, Norway, Denmark, France, Costa Rica, and Colombia, authorising His Majesty's Government to terminate on twelve months' notice the application of the Commercial Treaties with those Powers with regard to all or any of the self-governing Dominions. Similar power has also been obtained in the case of the Commercial Treaty with Switzerland. An Act has been passed by the Imperial Parliament to add two Lords of Appeal, available for service in the House of Lords and on the Judicial Committee, and to increase to seven the number of Judges of the Courts of the Oversea Dominions who may be members of the Judicial Committee. In accordance with this provision, the Hon. Sir Joshua Williams, senior Puisne Judge of the Supreme Court of New Zealand, became a member of the Judicial Committee. The Bill on Naturalization which it was proposed to introduce into the Imperial Parliament, was re-drafted in accordance with the views of the Imperial Conference, and has since been passed into law under the title of the "British Nationality and Status of Aliens Act, 1914." Legislation has also been passed in Canada and Newfoundland. Legislation has been passed providing for the laying of the cable by the Pacific Cable Board between Australia and New Zealand, and the work has been successfully carried out. Reductions have been made in cable rates between the United Kingdom and the Oversea Dominions (including the establishment of week-end telegrams in addition to deferred rates).

A Royal Commission was appointed to investigate and report upon the natural resources and trade of the Empire. The Commission was composed as follows :—

Lord D'Abernon, G.C.M.G., *Chairman*
Sir Alfred Bateman, K.C.M.G.
Sir H. Rider Haggard
Mr. T. Garnett
Sir W. Lorimer
Mr. J. Tatlow
} Representing the United Kingdom;

Digitized by Google

The Hon. Sir George E. Foster, K.C.M.G., LL.D., Minister of Trade and Commerce, representing the Dominion of Canada;
Mr. Donald Campbell, LL.B., representing the Commonwealth of Australia;
Mr. J. R. Sinclair, representing the Dominion of New Zealand;
Sir J. W. S. Langerman, representing the Union of South Africa;
The Hon. Sir E. R. Bowring, representing Newfoundland.

The Commissioners took evidence in London on several occasions, and also visited New Zealand, Australia, the Union of South Africa, Newfoundland, the Maritime Provinces of Canada, and Central and Western Canada. They submitted, in all, 15 volumes of minutes of evidence, three statistical volumes (dealing respectively with the Food and Raw Material Requirements of the United Kingdom, the Trade Statistics and Trade of the Dominions, and the Chief Harbours of the British Empire and Foreign Countries), five Interim Reports, and a Final Report [Cd. 8462]. The enquiry was delayed by the outbreak of war and was only completed in the early part of 1917. The Reports deal mainly with the following subjects:—Conservation and development of Natural Resources, Scientific Research, Migration, Oversea Communications (including Harbour Development and Telegraph and Wireless Services) Unification of Legislation, and the creation of an Imperial Development Board.

Representatives of Canada, the Commonwealth, New Zealand, and the Union of South Africa took part, in 1912, in the International Radiotelegraphy Conference held in London and signed the Convention arrived at, which has been ratified.

The Right Hon. Herbert Samuel, M.P., then Postmaster General of the United Kingdom, visited Canada in the autumn of 1913, in accordance with the suggestion of the Conference for interchange of visits by Ministers, and several visits have been paid to the United Kingdom by Ministers from the Dominions.

**Defence.**

Contemporaneously with the meetings of the Imperial Conference in 1911, conferences took place between the British Admiralty and representatives of the Dominion of Canada and the Commonwealth of Australia. The result of these conferences was laid before, and approved by, the Imperial Conference. An agreement was made as to the control of the naval services and forces of the Dominions of Canada and Australia, the limits of the naval stations to be allotted to them, and the mode of procedure to be adopted when vessels of the Dominion navies proceeded beyond the limits of their respective stations, whether to parts of the British Empire or to foreign ports. Military defence was discussed at a Committee of the Imperial Conference on the 14th and 17th of June, and the proceedings of that Committee were laid before, and approved by, the Imperial Conference (Cd. 5746-2). The two battle cruisers of the "Indomitable" type, H.M.A.S. "Australia" and H.M.S. "New Zealand," and also two cruisers of the "Bristol" type, H.M.A.S. "Melbourne" and H.M.A.S. "Sydney," constructed as a result of the Conference of 1909, have been completed and are in commission, doing duty in the present war. The "Brisbane" was constructed in the Government Dock, Sydney, and launched on 30th September, 1915.

On the 10th December, 1912, the Secretary of State for the Colonies addressed a despatch to the Governors-General of Australia and the Union of South Africa and to the Governors of New Zealand and Newfoundland, on the subject of the representation of the Dominions on the Committee of Imperial Defence. This despatch communicated the text of resolutions which had been adopted on May 30th, 1911, at a meeting of the Committee of Imperial Defence and which were to the effect that one or more representatives appointed by the respective governments of the Dominions, should be invited to attend meetings of the Committee of Imperial Defence when questions of naval and military defence affecting the oversea

Digitized by Google

Dominions were under consideration, and that the proposal that a Defence Committee should be established in each Dominion was accepted in principle. It was stated that the Canadian Government having changed in the Autumn of 1911, it was necessary to put the proposals before Mr. (now Sir R.) Borden and his colleagues when they visited London in 1912, and that Mr. Borden had provisionally accepted the resolutions and had stated that he saw no difficulty in a Minister of the Dominion Government spending some months of every year in London in order to carry out the intention. Mr. Borden had also expressed the desire that the Canadian and other Dominions Ministers who might be in London as members of the Committee of Imperial Defence should receive in confidence knowledge of the policy and proceedings of the Imperial Government in foreign and other affairs. It had been pointed out to Mr. Borden that the Committee of Imperial Defence was a purely advisory body and could not become a body deciding on policy which must remain the sole prerogative of the Cabinet, subject to the support of the House of Commons. But any Dominion Minister resident in the United Kingdom would at all times have free and full access to the Prime Minister and the Secretaries of State for Foreign and Colonial Affairs for information on all questions of Imperial policy. From Mr. Borden's speech in introducing the Canadian Naval Bill, it appeared that he accepted the proposals and the same offer was open to all the other self-governing Dominions if they wished to adopt it, but it could be varied in the case of each or any Dominion to suit their wishes or the special circumstances of their case. This despatch and subsequent correspondence are contained in Parliamentary Paper Cd. 7347, published in April, 1914.

In June, 1914, the Hon. G. H. Perley (now Sir George Perley), a Minister without portfolio of the Canadian Government, came to reside in London as the representative of that Government, and was from time to time summoned to meetings of the Committee of Imperial Defence.

**1914-16.**

After the war had broken out, it was assumed by His Majesty's Government that it would not be convenient that the normal Imperial Conference should meet on its due date in May, 1915, and after communications had taken place with the Prime Ministers of the Dominions in the course of December, 1914, it was definitely decided by general agreement to postpone the Conference. In intimating its postponement to the Dominions, the Secretary of State for the Colonies at the same time informed the Prime Ministers that it was the intention of His Majesty's Government to consult them most fully, and if possible personally when the time arrive to discuss possible terms of peace.

Up to the end of 1916 every opportunity was taken of confidential consultation and discussion with the Prime Ministers and other Ministers of the self-governing Dominions on matters connected with the progress of the war. Thus Sir R. Borden in 1915, and Mr. Hughes, Mr. Massey and Sir J. Ward in 1916, attended meetings of the British Cabinet during their stay in the United Kingdom, and Mr. Hughes and Sir G. E. Foster were two of the delegates of His Majesty's Government at the Paris Economic Conference in June, 1916.

When Mr. Lloyd George assumed office as Prime Minister in December, 1916, he announced, in the course of his speech in the House of Commons on December 19th, that it was proposed to summon an Imperial Conference at an early date in order to place the whole position before the Dominions and to take counsel with them as to the best means of securing an early and complete triumph. To this Conference representatives of India as well as of all the self-governing Dominions were invited. All were able to attend with the exception of representatives of Australia, who were prevented from being present by the approach of a general election.

Digitized by Google

It was arranged that the meetings should take two forms. In the first place the oversea representatives were made temporarily members of the British War Cabinet, which thus became, for the time being, an Imperial War Cabinet, an event subsequently described by the Prime Minister as a "memorable landmark in the constitutional history of the British Empire." Whilst the Imperial War Cabinet was in session the oversea members had access to all the information which was at the disposal of His Majesty's Government and occupied a status of absolute equality with that of the members of the British War Cabinet. It had prolonged discussions on all the most vital aspects of Imperial Policy. Its conclusions were necessarily secret, but it was announced that important decisions were reached which would be of the greatest value not only in the prosecution of the war but also when the time came for negotiations for peace.

**Imperial War Cabinet.**

At the conclusion of its sittings the Prime Minister announced that the Imperial War Cabinet was unanimous that the new procedure had been of such service not only to its members but to the Empire, that it ought not to be allowed to fall into desuetude. Accordingly he proposed, on behalf of His Majesty's Government, that meetings of an Imperial Cabinet should be held annually, or at any intermediate time when matters of urgent Imperial concern required to be settled, and that the Imperial Cabinet should consist of the Prime Minister of the United Kingdom, and such of his colleagues as deal specially with Imperial Affairs, of the Prime Ministers of each of the Dominions or some specially accredited alternate possessed of equal authority, and of a representative of the Indian people to be appointed by the Government of India. He hoped that the holding of an Annual Imperial Cabinet would become an accepted Convention of the British Constitution.

Concurrently with the sittings of the Imperial War Cabinet, there was held an Imperial War Conference presided over by the Secretary of State for the Colonies, the special work of which was, to use the terms of an address which it presented to His Majesty the King, "to consider the steps that may be required to ensure that the fruits of victory may not be lost by unpreparedness in times of peace, and so to develop the resources of the Empire that it may not be possible hereafter for an unscrupulous enemy to repeat his outrages upon liberty and civilization." Much of the business of the Conference was necessarily of a highly confidential character, but it was found possible to publish, soon after it terminated, the majority of the Resolutions passed, and a part of the discussions.

**Imperial War Conference, 1917.**
(*See* Cd. 8566.)

Reference can only be made here of one or two of the most important of the Resolutions.

One (No. XXI) asserted the principle "that each part of the Empire, having due regard to the interests of our Allies, shall give specially favourable treatment and facilities to the produce and manufactures of other parts of the Empire."

Another Resolution (No. IX) dealt with the future constitution of the Empire, and placed on record the view of the Conference that "any readjustment of constitutional relations while thoroughly preserving all existing powers of self-government and complete control of domestic affairs, should be based upon a full recognition of the Dominions as autonomous nations of an Imperial Commonwealth, and of India as an important portion of the same, should recognise the right of the Dominions and India to an adequate voice in foreign policy and in foreign relations, and should provide effective arrangements for continuous consultation in all important matters of common Imperial concern, and for such necessary concerted action, founded on consultation, as the several Governments may determine"

Digitized by Google

It was felt, however, that the subject was too intricate and important a one to be dealt with during the war, and the Resolution accordingly laid down that it should be a subject of a special Imperial Conference to be summoned as soon as possible after the cessation of hostilities.

Other of the published Resolutions dealt with the development of the material Resources of the Empire and their utilization for Imperial purposes. Of these one in particular (No. XIII) deserves notice. This advocated the establishment in London of an Imperial Mineral Resources Bureau to be specially concerned with the Mineral Resources and metal requirements of the Empire.

Of the Resolutions affecting India one (No. VII) dealt with its status as a partner State in the Empire, and recommended the full representation of India at all future Imperial Conferences, and another (No. XXII) accepted the principle of reciprocity of treatment between India and the self-governing Dominions.

Mention may be made lastly of two Resolutions (Nos. VIII and XII) which have resulted in the establishment of a permanent Imperial War Graves Commission, under the presidency of His Royal Highness the Prince of Wales, on which all parts of the Empire are represented. The object of this Commission is to care in perpetuity for the graves of those who have fallen in the common cause of the Empire.

# PART II.—INTRODUCTION.

A classification of the British Colonies and Protectorates will be found on p. 719.

The greater portion of the Colonial Empire has accrued within comparatively recent times, though the first attempt at Colonial settlement, that of Sir Humphrey Gilbert in Newfoundland, was made as early as 1583. The end of the seventeenth century saw us in possession, in addition to the New England States, only of St. Helena, two slave-trading stations at the Gambia and the Gold Coast, the Bermudas, Jamaica, Barbados, and several of the minor West Indian Islands, and of New Brunswick, Nova Scotia, and Prince Edward Island on the continent of America. Until the great wars which marked the second half of the eighteenth century, we made but little progress in territorial acquisition. The States of New England, and the steadily increasing business of the East India Company, afforded sufficient outlet for our colonising energy; but when the progress of the Seven Years' War brought us into collision with France in North America and India, we were fairly launched on our definite career of colonial extension. The peace of 1815 left us with most of the West Indies, South Africa, and a free hand in India, North America, and the Pacific. During the reign of Victoria we occupied Natal, British Bechuanaland, Basutoland and the Transkei, Zululand, British Columbia and the wide North-West Territories of the Canadian Dominion, as well as Australia, New Zealand and Tasmania, British New Guinea and North Borneo. We also secured by cession Hong Kong, Labuan, Lagos, the greater portion of the Gold Coast, and Fiji, and we acquired by arrangement Cyprus and the basin of the Niger, besides countless smaller possessions. During 1890 enormous additions were made to the Empire in Africa, as a result of the arrangements with Germany, France, and Portugal for the delimitations of their respective possessions and spheres of influence in that continent, and we now have indisputable rights over nearly 2½ million square miles out of the total 11,700,000 square miles which Africa contains. A Protectorate was proclaimed over Amatongaland, now part of Natal, in 1895. Between 1895 and 1898 large tracts of territory within the British sphere in Africa were occupied. In 1898 Weihaiwei was obtained on lease from China, as well as an extension of British Kowloon. In 1899, by an arrangement with Germany, certain of the Solomon Islands were transferred to the British sphere of interest. The Orange Free State and the Transvaal were annexed in 1900. In the same year Tonga, in the Western Pacific, came under British protection, and the Cook Islands, Savage Island, and other small islands were annexed.

British protection has been extended to all that part of the Malay Peninsula which is not in the possession of Siam, and the government of the various States is carried on in accordance with the advice of British Residents or Advisers.

Including India the Empire now extends over 11 millions of square miles, or 91 times the area of the Mother Country. The area of the Colonial Empire alone is more than 80 times that of the United Kingdom, and the estimated population is over 55 millions.

Of the total Colonial area of nearly 10 million sq. miles, the self-governing Colonies cover about 7 million sq. miles, inhabited by a population of 15 millions, so that the area more or less under the direct authority of the Home Government amounts to 3 million sq. miles, with a population of about 12 millions, excluding unascertained population in Africa. All but about 360,000 sq. miles of this is in Africa.

With a population so small in proportion to the vast area, and the facilities that now exist for the interchange of produce, there are naturally but few towns of considerable size in the Colonies, and though in Canada and Australia and the Cape there are some considerable manufactures, the products consist mainly of raw materials. The aggregation of the population of Australia in the four large towns, Melbourne, Sydney, Adelaide, and Brisbane, is very remarkable, more than one-third of the population of the Australian continent being crowded into them. This appears to be mainly due to the development of the external trade of Australasia, which is concentrated in these towns.

In the self-governing Colonies complete provision has been made not only for elementary education, but also for secondary and higher instruction. In all of them primary instruction is compulsory, and generally also free. Extensive provision has also been made for secondary and technical education and higher education provided for by the establishment of the following chartered and amply endowed Universities empowered to grant degrees, McGill College and King's College, Montreal, Trinity College, Toronto, and Bishop's College, Quebec, Laval University, Quebec, Sydney, Melbourne, Adelaide, and New Zealand Universities, and the University of the Cape of Good Hope; besides many other endowed Colleges in Canada and Australia.

Digitized by Google

In the other Colonies, as will be seen from the following pages, education has not been neglected, though, with inferior resources and in most cases a mixed population, the provision for this purpose falls short of the standard in the more favoured Colonies.

Regular and efficient steam mail services now exist with all Colonies. Mauritius and Seychelles were connected with the world's cable system in November, 1893, Labuan and North Borneo in 1894, and St. Helena in 1899, and the Pacific cable, which was opened for traffic on 8th December, 1902, connected Fiji with Canada and Australia, so that all are in connection with the world's telegraph system, except Falkland Islands and Papua.

The following are the total values of imports and exports during the last ten years :—

| | United Kingdom. | | Colonies. |
|---|---|---|---|
| | | £ | £ |
| 1907 | ... | 1,163,785,109 | ... 706,946,509 |
| 1908 | ... | 1,049,681,008 | ... 646,964,683 |
| 1909 | ... | 1,094,230,123 | ... 693,690,170 |
| 1910 | ... | 1,212,402,841 | ... 626,403,658 |

The exports to and imports from British Possessions, including India, represent between one-fifth and one-fourth of the whole trade of the United Kingdom.

Since 1870 the Imperial troops have been gradually withdrawn from all the self-governing Colonies, and now, with the exception of the garrisons of the naval stations at Halifax (Nova Scotia) and Cape Town, the land defence of these Colonies rests entirely on their local forces. Of the other Colonies, Gibraltar, Malta, Mauritius, Sierra Leone, Ceylon, Straits Settlements, Hong Kong, Jamaica and Bermuda possess Imperial garrisons, and Cyprus has one company of a British regiment stationed in the island. The naval defence of the Empire still rests mainly on the Imperial Navy, though, as will be seen from the pages relating to the Imperial Conference, most of the self-governing dominions now give substantial assistance. There are Imperial naval stations at Simon's Bay, Bermuda, Halifax, Malta, Gibraltar, Hong Kong, and Ascension.

An account of the Colonial Conferences of 1887, 1894, 1897 and 1902, of the Imperial Conferences of 1907 & 1911, and of the Defence Conference of 1909, is given under the heading "Imperial Conference."

The consolidation of the Empire was advanced during 1898 by the institution of a penny postage rate between most of the countries included in the Empire, which came into operation on Christmas Day. This reduction was decided on as a result of a Postal Conference held in London in June and July, 1898, and chiefly at the instance of Canada. At the same conference a reduced rate for parcel post was agreed on between the United Kingdom and many of the Colonies, and was adopted from the 1st of January, 1899.

In 1899 war broke out in South Africa. Large contingents were dispatched from Australasia and Canada to take part in the campaign. The course of the war is summarised in the account of the "Transvaal." Peace was concluded in 1902.

In 1900, the Australian Commonwealth Constitution Act was passed in the Imperial Parliament, and on the 1st January, 1901, the union of all the colonies on the continent, with Tasmania, was established. T.R.H. the Duke and Duchess of York visited the States of the Commonwealth in 1901, and the Duke opened the first Session of the Parliament amid the greatest enthusiasm. The royal tour was subsequently extended to South Africa and North America.

Mr. Chamberlain held the office of Secretary of State for over eight years, a longer period than any of his predecessors except Lord Bathurst (1812-1827). His attention was closely engaged from first to last by South African affairs, from the difficult and delicate negotiations arising out of the Jameson Raid to the numerous problems involved in the creation of the new Colonies. In West Africa his administration was signalised by the acquisition of the territories of the Royal Niger Company, and the construction of railways in Sierra Leone, Gold Coast, and Lagos, the effect of which will be to increase largely the range of British commercial activity in these countries. In the West Indies much depression and misfortune had to be met, but urgent wants were relieved by Imperial grants, and the conclusion of the Sugar Bounties Convention, and the efforts to make more scientific use of the land and its products, with the assistance of an Imperial Commissioner of Agriculture (Sir D. Morris, K.C.M.G.), have brought about a great improvement. In the Eastern Colonies there was a great increase of important public works, and a harbour on the coast of China was acquired at Weihaiwei. In Cyprus, where since the British occupation in 1878 no important public work had been undertaken, the construction of a harbour at Famagusta and of a railway from that place to Nicosia was taken in hand. Side by side with these undertakings should be mentioned the institution of the London and Liverpool Schools of Tropical Medicine—which have already combated malarial and other diseases so successfully as to make a very marked difference in the security of life in the tropical colonies, especially in West Africa.

Digitized by Google

When Mr. A. Lyttelton succeeded to the office of Secretary of State, the new South African Colonies were experiencing the full measure of the difficulties attendant on the task of repairing the waste of war. The loan funds were being rapidly expended in meeting various claims and re-settling the country. In February, 1904, the Transvaal Legislative Council passed a Labour Importation Ordinance to regulate the introduction of Chinese labourers on the gold mines. The scheme, however, particularly the provisions as to the compounds, aroused considerable opposition in this country. A convention to give effect to it was concluded with China in May, and the shipment of labourers commenced immediately. But on various grounds it was ultimately decided to discontinue the experiment and further recruiting was stopped in 1906. All the labourers recruited have now been repatriated to China.

A difficulty which had caused almost continual controversy for more than a century was settled by the arrangement contained in the Anglo-French Convention with regard to Newfoundland. Under this, in consideration of concessions elsewhere, the French gave up their claim to the treaty shore, and admitted the concurrent and equal rights of the Newfoundlanders to the fishery.

A movement came prominently forward in 1902 which will it is hoped add to the production of the tropical Colonies and greatly increase their value to the Mother Country. The United States at present export cotton to the extent of about 200,000*l.* in value daily. The increasing magnitude of the demand, coupled with the fluctuating prices which have prevailed, render it highly desirable for this country to possess Colonial sources of production, and an association (British Cotton Growers' Association) was formed in 1902 to encourage the production of cotton in various parts of the Empire, and obtained a Royal Charter in 1904. It is not unreasonable to hope that in time this staple, in which some three millions of the population of the United Kingdom are directly, and almost the whole indirectly, interested, will be largely produced in our own Colonies.

The Earl of Elgin became Secretary of State on the formation of the Liberal administration at the end of 1905. On December 20th His Majesty's Government decided to prohibit the issue of further licenses for the importation of Chinese into the Transvaal, pending a decision as to the grant of responsible government to that colony. In December, 1906, Letters Patent were issued granting responsible government to the Transvaal, and the first session of the new Parliament was opened in March, 1907. Later on in the year responsible government was granted to the Orange Free State, and the first elections were held in November.

The Earl of Crewe became Secretary of State in April, 1908.

In February, 1909, the draft constitution prepared by the National Convention for the Union of South Africa was published. It provided for the Union of the Colonies or any two of them within a year of the Union Act passing the Imperial Parliament. The Act was passed by the Imperial Parliament and received His Majesty's assent on the 20th of September, 1909.

The first Union Parliament met in November, 1910. It had been intended that it should be formally opened by the present King, as Prince of Wales, but owing to the decease of His late Majesty King Edward VII. this became impossible, and H.R.H. the Duke of Connaught, by command of His Majesty, proceeded to South Africa and performed this duty in his place.

On March 10th, 1909, a Treaty was signed at Bangkok by which the Government of Siam transferred to His Majesty's Government all their rights in respect of the States of Kedah, Perlis, Kelantan, and Trengganu, an area of some 15,000 square miles thus being added to the British sphere in the Malay Peninsula. An account of these states is given below (pp. 384 et seq.).

In May, 1909, a Royal Commission was sent to Mauritius to enquire into the condition and resources of that Colony. The Commission, which was presided over by Sir F. A. Swettenham, G.C.M.G., reported in June, 1910 (*see* Cd. 5186).

At the suggestion of the Canadian Government a Royal Commission was appointed in August, 1909, to consider the question of trade relations between Canada and the British West Indies, with a view to the extension of commerce between those parts of the Empire and the improvement of communication and shipping. The Commission, of which Lord Balfour of Burleigh was Chairman, included two Dominion Ministers, the Hon. W. S. Fielding, Minister of Finance, and the Hon. W. Paterson, Minister of Customs. The Commission took evidence in Canada in the autumn of 1909, and, after an interval, proceeded to the West Indies in January, 1910. Their report was issued in August, 1910 (Cd. 5369).

Mr. Harcourt became Secretary of State in November, 1910.

In November, 1911, a Royal Commission visited Malta to enquire into the finances, economic position and judicial procedure of the Colony.

In 1913 a party of Members of Parliament, amongst whom was Lord Emmott, G.C.M.G., Parliamentary Under Secretary of State for the Colonies, paid a visit to the self-governing Dominions.

On the 4th of August, 1914, war broke out with Germany, and subsequently extended to war with Austria-Hungary, Turkey and Bulgaria.

Mr. Bonar Law became Secretary of State in May, 1915, on the formation of a Coalition Government, and was succeeded, on the reorganisation of the Government, by Mr. W. H. Long, who assumed office on the 11th December, 1916.

All countries within the Empire have adopted the Imperial Penny Postage Agreement (letters 1*d.* per half-ounce, postcards 1*d.*, newspapers ½*d.* per 2 ounces).

Digitized by Google

At the International Postal Union Congress, held at Rome in 1906, Postal Union countries agreed to raise the unit of weight for letter postage from half an ounce to one ounce. The higher unit has been adopted by His Majesty's Government and by all the British Colonies and Protectorates except the Commonwealth of Australia and the South African Colonies. Australia and the Colonies in South Africa have, however, agreed to accept without surcharge letters from the United Kingdom or any portion of the Empire on which postage has been paid at the rate of 1*d.* per ounce.

By an arrangement made in 1906, the postage rate on British newspapers, magazines and trade journals intended for despatch to Canada by direct Canadian packet was reduced to 1*d.* per pound, packets not exceeding 2 ounces in weight being transmissible for ½*d.* as formerly. This arrangement has been modified as from 1st January, 1915. Whilst the ½d. rate remains, the cost is now 1d. for each packet between 2oz. and 6oz., and 1½d. for each packet between 6oz. and 1½lbs. ; ½d. extra is charged for each additional ½lb. above the latter weight.

A list is appended of Colonies and Protectorates accepting the reduced rate of parcel post (for parcels not over 3 lbs. 1*s.*, not over 7 lbs. 2*s.*, not over 11 lbs. 3*s.*), viz. :—

Antigua, Ascension, Bahamas, Barbados, Bermuda, British Guiana, British Honduras, Brunei (by all-sea route to Singapore), Canada, Ceylon (by direct steamer), Cyprus, Dominica, East Africa Protectorate (by all-sea route *viâ* Aden), Falkland Islands, Federated Malay States (by all-sea route *viâ* Singapore), Gambia, Gibraltar, Gold Coast Colony, Grenada, Hong Kong, Jamaica, Johore (by all-sea route *viâ* Singapore), Malta (by direct steamer), Mauritius (by all-sea route *viâ* Colombo), Montserrat, Nevis, Newfoundland, New Zealand, Nigeria (Northern and Southern), North Borneo, St. Helena, St. Kitts, St. Lucia, St. Vincent, Sarawak, Sierra Leone, Somaliland (by all-sea route *viâ* Aden), Straits Settlements (by direct steamer), Tobago, Tortola, Trinidad, Turks and Caicos Islands, Uganda (by all-sea route *viâ* Aden), Virgin Islands, Weihaiwei (by all-sea route), Zanzibar.

The Government of Fiji has imposed a war tax of one penny on all letters and parcels posted within the Colony to other parts of the Empire. The Government of the Dominion of Canada has similarly placed a tax of one cent on each letter posted in Canada for delivery anywhere in the Empire and the New Zealand Government levies a war tax of one half-penny on postal packets of every kind (except newspapers) for all places within the Empire.

Other Colonial Governments have imposed similar war taxation.

# AUSTRALIA.

## THE COMMONWEALTH.

The Commonwealth of Australia is constituted under an Act passed by the Parliament of the United Kingdom in 1900—63 & 64 Vict., cap. 12. By this Act it was made lawful for the Queen, with the advice of the Privy Council, to proclaim that, on and after a day appointed in the proclamation, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also if Her Majesty were satisfied that the people of Western Australia had agreed thereto, of Western Australia, should be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

A proclamation was accordingly issued by Her Majesty on the 17th of September, 1900, appointing the 1st of January, 1901, as the day on which the Commonwealth should be established—Western Australia being included in accordance with the result of a referendum taken before that date in the Colony and with Addresses passed by both Houses of the Legislature.

A short history of the events leading up to the establishment of the Commonwealth, and of the provisions of the Constitution, as fixed by the Act of Parliament above quoted, is given below. The account of the different States of the Commonwealth is arranged alphabetically, and a description of territories dependent on the Commonwealth follows.

The Earl of Hopetoun (afterwards Marquis of Linlithgow) was selected as the first Governor-General of the Commonwealth, and a Commission was issued to him on the 29th of October, 1900.

It was announced in September that the Queen would issue a special Commission to H.R.H. the Duke of York, for opening in Her Majesty's name the first session of the Commonwealth Parliament in the spring of 1901, and that H.R.H., accompanied by the Duchess of York, would pay visits to the different States of the Commonwealth. At the invitation of the Government of New South Wales, a representative body of troops, about 1,000 strong, sailed from England in November, to attend the inauguration of the Commonwealth at Sydney on the 1st of January, 1901. A small detachment of officers and non-commissioned officers of the Indian Army also proceeded to Sydney on the same occasion. The Commission issued by the Queen to the Duke of York was renewed on the accession of King Edward VII. The Duke and Duchess landed at Melbourne on the 6th of May, and on the 9th the Duke opened the first session in the Exhibition Building at Melbourne. The Duke and Duchess subsequently visited Brisbane, Sydney, New Zealand, Hobart, Adelaide and Perth, leaving Australia on the 26th of July to continue their tour to Mauritius, South Africa and North America.

### *Australian Federation.*

Until the passing of the Commonwealth of Australia Constitution Act the only means of joint legislative action in Australia was provided by the "Federal Council of Australasia Act, 1885" (48 & 49 Vict., cap. 60). This Act created a Council of two members from each Colony which adopted the Act, except in the case of Crown Colonies, which had only one member each, with power to Her Majesty at the request of the Legislatures of the Colonies to increase the number of representatives for each Colony by Order in Council. Such an increase was upon the request of the Legislatures made by Her Majesty on 3rd March, 1894, when an Order in Council was passed, providing that each Colony which was or should be represented on the Federal Council, except any Crown Colony, be represented by five members. This Council had power to legislate with regard to the relations of the Colonies with the Islands in the Pacific, prevention of the influx of criminals, fisheries in Australasian waters beyond territorial limits, service and enforcement respectively of civil and criminal process out of the jurisdiction of the issuing Court, the enforcement of judgments beyond the limits of the Colony where they had been passed, the extradition of offenders, and the custody of offenders on ships belonging to Colonial Governments beyond territorial limits, and generally on any matters referred to it by Order of Her Majesty in Council on the request of the Colonial Legislatures. The Legislatures of any two or more Colonies might also refer to it for legislation questions of defence, quarantine, patents, copyright, bills of exchange, recognition of marriage and divorce, naturalisation, status of corporations, and joint stock companies, and other matters of general Australasian interest; but legislation of the Council on such matters was to extend only to the Colonies by whose Legislatures the matters should have been so referred, and such Colonies as might afterwards adopt the same. It had also power to decide on any questions affecting the mutual relations of any two Colonies referred to it by consent. The Council was to meet at least once in every two years.

The first meeting took place on 25th January, 1886, when representatives were present from Victoria, Queensland, Tasmania, Fiji, and Western Australia. Measures were passed authorising the service of the civil powers and the enforcement of the judgments of the Courts of the different Colonies throughout the territories of all those represented, and various important questions were discussed, including the defence of King George's Sound and Torres Straits. The second session opened on 16th January, 1888. An address was adopted to Her Majesty respecting the deportation of French criminals to the Pacific. An Act was also passed to regulate the Pearl Shell and Bêche-de-mer Fisheries in Australasian waters adjacent to Queensland. The Council met for its third session on 29th January, 1889, when representatives from South Australia were present for the first time. An Act was passed to regulate the Pearl Shell and Bêche-de-mer Fisheries in Australasian waters adjacent to Western Australia.

Digitized by Google

The amendment of the basis of representation in the Council was discussed at the session, and communications on the subject subsequently passed with the Imperial Government. The fourth session opened 20th January, and closed 24th January, 1891. South Australia was not represented, the Act (a temporary measure for two years only) under which that province joined the Council having expired. The only Bill passed was one to facilitate the recognition in other Colonies of Orders and Declarations of the Supreme Court of any Colony in matters of lunacy. An address to Her Majesty was also adopted referring to the desirability of British subjects being placed on an equal footing with subjects of other countries in regard to the acquisition of land in, and trading with, natives of the New Hebrides.

The fifth session was commenced on 26th January, 1893, when the Colonies of Victoria, Queensland, Tasmania, and Western Australia were represented. An Act was passed providing for the discipline and government of the garrisons established at King George's Sound and Thursday Island; and a resolution was adopted in favour of an increase in the number of representatives for each Colony, except any Crown Colony, to five. The Standing Committee was instructed to take steps for giving effect to this resolution, and also for securing the adhesion of the Colonies not represented in the Council. As the result of action taken by the Standing Committee, the Legislatures of all the Colonies in the Council addressed Her Majesty, requesting that the proposed increase in the number of representatives might be made; and, on 3rd March, 1894, Her Majesty was pleased to make an Order in Council providing "that each Colony which is or shall be represented in the said Council, except any Crown Colony, shall be represented by five members."

The sixth session opened on the 30th January, 1895, when the same four Colonies were represented as at the preceding session. There were present, for the first time, five delegates from each Colony. At this session no Bills were brought forward, but resolutions were adopted affirming the desirability of defining the status, and of granting facilities for the winding up of companies carrying on business in different Colonies; of rendering uniform the laws relating to banking; of establishing an effectual system of quarantine; of adopting a more economic method of raising public loans; and of taking steps with a view to the holding of a second Federation Convention. An address to the Queen was also adopted praying for the appointment of an Australasian representative on the Privy Council Bench, in view of the special features often presented by Australasian appeals.

The seventh session was commenced on 26th January, 1897, when the Colonies of Queensland, Tasmania, Victoria, and Western Australia, were represented. An Act was passed, upon a reference of the matter to the Council by the Legislatures of Victoria and Queensland, to provide for the naturalisation within the Australian Colonies, or some of them, of persons of European descent naturalised in any of such Colonies, also upon a reference of the subject by the Legislatures of Tasmania, Western Australia, Victoria, Queensland, an Act was passed to make provision for the enforcement in certain cases within the Australasian Colonies, or some of them, of Orders of the Supreme Court of such Colonies for the production of testamentary instruments. The Council adopted an Address to Her Majesty, referring to the Address adopted in 1891 with regard to restrictions in the way of trade with the natives of the New Hebrides, urging that negotiations may be entered into with the other Powers concerned with a view to imposing on their subjects equal restrictions in that trade. This and all the previous sessions were held at Hobart. The Council resolved that the place of its next meeting should be Melbourne.

*The Commonwealth Act.*

Notwithstanding the existence of the Federal Council, however, a movement was made for the establishment of a more effective Federation, to embrace a Federal Executive, as well as Legislature, somewhat upon the model of Canada. Towards the end of 1889 negotiations were opened between the various Australasian Colonies, the result being that a Conference of the seven principal Australasian Colonies met in Melbourne, on the 6th February, 1890. At this Conference it was unanimously agreed that the best interests of the Australian Colonies would be promoted by their "early union under the Crown," and that the Legislatures of the various Colonies should be invited to appoint to a National Australasian Convention during the year 1890 delegates empowered to report upon the scheme for a Federal Constitution.

In accordance with these resolutions, delegates were appointed, and the Convention commenced its deliberations in Sydney on the 2nd March, 1891. After an animated discussion, which lasted more than five weeks, a "Bill to constitute a Commonwealth of Australia" was drawn up and adopted. This Bill the Convention recommended should be submitted by the Parliaments for the approval of the people of the several Colonies. It provided for the union of the Australasian Colonies in a Federal Commonwealth under the Crown, for a Governor-General to be appointed by the Crown, who should be aided and advised by an Executive Council, the constitution of a Senate and House of Representatives, with certain definite powers, the latter to have the initiation of money bills, which the former might pass or reject, but not amend, and for the establishment of a Federal Judicature; the revenue of the Commonwealth to be derived from the Customs and Excise duties, and other taxation, which should be collected by Federal officers, and expended as required for Federal purposes, any surplus to be returned to the respective Colonies. It also provided for absolute Free Trade internally throughout the Commonwealth, so soon as the Parliament should have imposed uniform Customs duties. The draft Bill of 1891, though it crystallised the idea of Federation, failed to command the serious attention of the Legislatures, and Federalists began a popular agitation to place the movement on a new footing.

A meeting of the Premiers of all the Australasian Colonies took place in Hobart in January, 1895, and agreed to a scheme for framing a Federal Constitution to be submitted for the approval of their respective Parliaments. The enabling Bill, adopted at this Conference providing for the election by each Colony of 10 delegates to prepare a scheme of Federation, was adopted by the Parliaments of N. S. Wales, Victoria, S. Australia, and Tasmania, and in a modified form by Western Australia.

Delegates were accordingly duly elected and assembled in Convention at Adelaide on 22nd March, 1897, for the purpose of drafting a constitution. Having prepared a "Bill to constitute a Commonwealth of Australia," the Convention was on the 23rd April adjourned to reassemble at

Digitized by Google

Sydney on 2nd September. The draft Bill was in the meantime submitted to the local Legislatures, and various amendments were suggested by those bodies. The Bill, together with those amendments, was further considered by the Delegates at the Sydney Session of the Convention, and a long discussion took place on various proposals submitted for settling questions of difference between the two Houses of the new Federal Legislature. Considerable progress was made with the rest of the measure, but the work of revision was not completed, and the Convention adjourned until 20th January, 1898, partly in the hope of seeing Delegates from Queensland join in the final discussion. This hope was not realised, as the Queensland Legislature, for the second time, shelved the Enabling Bill.

The Convention met again at Melbourne on the 20th of January, 1898, and remained in session till the 17th of March, and a Bill was adopted which in accordance with the Federation Enabling Acts of the different Colonies was submitted to the popular vote for acceptance or rejection. In Victoria the polling was—For acceptance, 100,520; against, 22,099. The Bill was also accepted by the vote of the people in South Australia and Tasmania. But in New South Wales the statutory minimum number of 80,000 affirmative votes required by the Enabling Act of that Colony was not obtained, and the matter fell through for the time.

A further Conference of Premiers was held at Melbourne in January, 1899, to consider the objections of New South Wales; and this time Queensland was represented. The Premiers met in a spirit of compromise, and on the 2nd of February an agreement was come to which all the Premiers agreed to submit to their Parliaments for reference to the electors, it being understood that New South Wales should lead the way. South Australia, however, for purposes of local convenience, took a referendum vote upon the Bill on the occasion of the General Election, without waiting for New South Wales. This vote was taken on the 29th of April, when 65,990 votes were given for Federation and 17,053 against.

In New South Wales the Bill providing for the reference to the people of the amended draft constitution was passed by the Lower House on the 2nd of March, but in the Upper House amendments were made. One of these required that one-third of the electors on the register should vote for the Bill in order to secure its acceptance. The Bill as amended passed the Legislative Council on the 21st of March. On March the 22nd the Lower House rejected the amendments of the Upper House. The latter body refused to give way. A conference between the two Houses was held without result on the 28th of March. Mr. Reid, Premier of New South Wales, prorogued Parliament for a few days, and on his advice the Governor added twelve new members to the Council. The Bill was re-introduced in the Lower House, and passed on the 13th of April. It was accepted by the Legislative Council with an unimportant amendment (providing that a period of eight weeks should elapse before the referendum was taken) on the 20th of April, and on the 25th of April it was announced that the question would be submitted to the electors on the 20th of June. It was accepted by a majority of about 25,000.

On the 27th July, the amended Commonwealth Bill was accepted by overwhelming majorities in Victoria and Tasmania, and on the 2nd September by a majority of about 7,500 in Queensland. The delay in taking action in Western Australia led to some correspondence between Sir John Forrest, Premier of Western Australia, and Mr. Reid. Mr. Reid declared on behalf of the Federating Colonies that no amendments to meet the views entertained in Western Australia could now be considered; and the same assurance was repeated by Sir G. Turner, Premier of Victoria. Sir J. Forrest, in fulfilment of his undertaking at the Premiers' conference, brought the draft Constitution before the Legislature, which referred it to a Select Committee, who reported that it should not be accepted without considerable amendment. The Legislative Council finally refused to allow a referendum to be taken.

Addresses to the Queen from the five Colonies which had accepted the Constitution praying for the enactment of the Commonwealth Bill were received in the autumn of 1899.

As it appeared that some alterations in the Bill might be required by the Imperial Government, Mr. Chamberlain telegraphed to the Governor of New South Wales, expressing the hope that Delegates were coming home to advise and assist during the passage of the Bill through Parliament.

Delegates were appointed, and reached England in March. Western Australia also sent a Delegate to represent the views of that Colony, and the Agent-General for New Zealand was appointed to watch the interests of New Zealand.

The discussion between Her Majesty's Government and the Delegates turned chiefly on the clauses of the Bill relating to the Appeals to the Privy Council. Under the Bill, in Section 74, appeals were allowed both from the Supreme Courts of the States and from the Federal High Court, but there was a limitation in cases affecting the interpretation of the Constitution of the Commonwealth or of a State "unless the public interests of some part of Her Majesty's dominions other than the Commonwealth or a State are involved." Various memoranda passed on this subject of Clause 74, the Delegates demurring to any alteration in the Bill, whilst Her Majesty's Government pointed out the difficulty of interpreting the Clause, and the danger that it might unduly restrict the right of appeal in cases where the interests of foreigners or British subjects outside Australia were affected.

The Bill was introduced into Parliament with amendments to secure Her Majesty's prerogative to grant special leave of appeal from the High Court of the Commonwealth or the Supreme Court of any State to the Privy Council. But the discussion with the Delegates continued, and two successive compromises were arrived at. First, the appeal on Constitutional questions was made dependent on the consent of the Executive Government or Governments concerned, and finally was made dependent on a certificate to be granted at the discretion of the High Court.

No other amendments of any consequence were made by Parliament in the Bill as received from Australia, except that provision was made for the inclusion of Western Australia as an original State, provided that Her Majesty was satisfied that the people of that Colony had agreed thereto prior to the issue of the Proclamation.

The Queen caused to be sent to Australia, for presentation to the Commonwealth Parliament, a duplicate of the Commission issued for the formal declaration of Her assent to the Act, together with the pen, inkstand, and table used on the occasion of its signature. She subsequently presented a duplicate of the Proclamation bringing the Act into force, duly signed and passed under the Great Seal.

*Constitution of the Commonwealth.*

The Constitution of the Commonwealth of Australia is contained in the Act of Parliament 63 & 64 Vict., cap. 12. The opening part of the Act recites that the union is to be indissoluble and provides for the admission of other Australasian Colonies and possessions of the Queen. It makes provision for the proclamation and date of establishment of the Commonwealth, declares the binding force of Commonwealth laws, and makes definitions. The Federal Council of Australasia Act, 1885, is repealed, and the Commonwealth is declared to be a single self-governing Colony for the purposes of the Colonial Boundaries Act.

The leading features of the Constitution proper are as follows:—

The Parliament consists of the King, a Senate and a House of Representatives. The Governor-General acts for the King.

The Senate consists of six members from each State. The number may be increased or diminished, but so that the equal representation of the original States is maintained, and no original State has less than six Senators. Qualifications for Senators are the same as those for Members of the House of Representatives, as given below. Senators are chosen for six years. The qualifications of electors for the first Parliament were those for the more numerous House of the Parliament of the State in which the elector was competent to vote. In the first Parliament of the Commonwealth the *Franchise Act*, 1902, unified the franchise for both Houses, on the basis of universal adult suffrage.

The House of Representatives has approximately twice as many members as the Senate, and the number of members for each State is in proportion to the population, but not less than five for any State. The qualifications of electors are as stated in the preceding paragraph. Each elector is to vote only once. Qualification of a Member to be (*a*) 21 years of age; (*b*) to be an elector or entitled to be; (*c*) resident 3 years; (*d*) natural born or naturalised 5 years.

House may continue to exist for 3 years from first meeting, but may be dissolved sooner; number of members may be increased or diminished by Parliament, subject to the Constitution.

The general powers of the Parliament are grouped under 39 headings, the principal of which are to make laws for trade, taxation, bounties, borrowing, postal services, naval and military, census and statistics, currency, banking, insolvency, corporations, divorce, marriage, old age pensions, immigration and emigration, railways, &c. Exclusive powers in regard to the seat of Government, State departments transferred, and other matters declared by the Constitution to be within the exclusive power of the Parliament.

Money Bills not to originate in, nor to be amended by the Senate, which House may, however, return the Bill requesting any omission or amendment. Equal power in all other matters. Tacking Bills prohibited.

Provision for Dead-locks.—Joint dissolution, and if again passed in Lower House and rejected in Senate a joint sitting to be held, and if passed by an absolute majority of total number of both Houses disputed Bill to become law.

A Bill having passed both Houses the Governor-General shall either assent, withhold assent, reserve the Bill or return it, and recommend amendments.

Executive power vested in King and exercisable by Governor-General in Council, who may appoint Ministers of State.

State departments of Customs and Excise transferred to Commonwealth on its establishment. Departments of posts, naval and military, defence, light-houses, &c., and quarantine, on a date or dates to be proclaimed.

High Court of Australia established; appellate and original jurisdiction.

Collection of Customs to pass to Commonwealth. Customs and Excise duties to be uniform, and intercolonial free-trade established within two years after the establishment of the Commonwealth, after which period the Federal Government shall have exclusive power to levy such duties and to grant bounties on the production or export of goods. Western Australia may continue duties in force on intercolonial goods at the establishment of uniform tariff for five years, subject to reduction of one-fifth each year.

Of the net revenue from Customs and Excise not more than one-fourth to be applied by Commonwealth towards its expenditure. This holds good for the first 10 years and thereafter until the Parliament provides otherwise (Braddon clause).

Right of States to reasonable use of river waters for conservation or irrigation reserved.

Inter-State Commission provided for to regulate trade and commerce, and prevent discriminations being made by any State which may be deemed unreasonable or unjust to any other State.

Constitutions, powers, and laws of States protected. State Debts may be taken over.

Admission of new States provided for. Commonwealth to protect States against invasion or domestic violence.

Seat of Government to be in New South Wales, not less than 100 miles from Sydney, and to be within Federal territory. Parliament to meet at Melbourne until it meets at the new capital.

An alteration diminishing the proportionate representation of any State, or the minimum number of representatives of a State, or altering its limits, or in any way affecting the provisions of the Constitution in relation to it, shall not become law without the approval of a majority of the electors of such State.

The financial portion of the Act is too intricate to be briefly summarised. *See* Sections 81-105 of the Act.

Constitution may be altered by an absolute majority of each House; then to be submitted to electors, and if in a majority of States a majority of electors voting approve, also majority of all electors approve, then the change may be made. In case of a dead-lock between the two Houses, renewed after three months' interval, the Governor-General may submit the question to the electors in each State qualified to vote for the Lower House.

Two questions, both dealing with finance, were submitted to a referendum concurrently with the Federal elections of April 13th, 1910. The first provided that the Commonwealth should take the whole of the revenue from Customs and Excise, and pay to the States a sum equal to one pound five shillings per annum per head of their population, to be determined according to the latest available Commonwealth statistics. A special payment was to be made to Western Australia, in view of the large contribution per capita made by that State to the Customs revenue. It was intended that this arrangement should take the place of the Braddon clause but it was rejected by the electorate. The second proposal related to the conversion of the State debts. The

Digitized by Google

Constitution provided for the conversion of all the debts existing at the time of Federation, and it was the object of the second proposal to amend the Constitution so as to give the Commonwealth unlimited power to assume all State debts existing at any time. This was passed but the Commonwealth has not yet taken advantage of the powers thus conferred upon it.

Two more "proposed laws" for the alteration of the Constitution were submitted to a referendum on 26th April, 1911. They were:—

*A* Constitution Alteration (Legislate Powers) 1910, and

*B* Constitution Alteration (Monopolies) 1910.

The object of *A* was to extend the legislative powers of the Commonwealth Parliament in four directions (*a*) Trades and Commerce (*b*) Corporations (*c*) Industrial Matters and (*d*) Trusts and Monopolies. The result would have been a great change in section 51 of the Constitution. The object of *B* was to give the Commonwealth the power of making laws for, or assuming control of, any business or industry which was declared by resolution of both Houses to be the subject of any monopoly. Both resolutions were rejected by a large majority. At the general election of 1913 (May 31st), six questions were submitted to referendum; each question representing a proposed alteration of the Constitution, on which the electors were asked to decide. Of these, five were the old questions of 1911 re-submitted, and the sixth dealt with railway disputes. All the proposals were again rejected but by much smaller majorities than in 1911.

It will be observed from the summary given above that the Constitution follows that of the United States rather than that of Canada so far as the distribution of Federal and State powers is concerned. The matters belonging to the Commonwealth are limited to those expressly specified, and in other respects State powers are maintained. But its general political scheme rests on the doctrine of the constant responsibility to Parliament of an Administration formed with the approval of the Representative of the Crown.

The Governorships of the States are still filled by the Crown, and the Governors correspond on State business directly with the Secretary of State. The Governor-General is, however, kept informed of the correspondence passing between the Governors of the different States and the Colonial Office.

*Legislation, &c.*

Up to the present time the Parliament of the Commonwealth has sat in Melbourne, the State Parliamentary buildings being assigned to them, and the State Parliament occupying the Exhibition building in that city. The selection of a site for the capital of the Commonwealth (which under the Constitution Act must be in N.S.W. but not less than 100 miles from Sydney) has been under active consideration, and in 1908 it was decided in both Houses that the Seat of Government of the Commonwealth should be at Canberra, N.S.W.

The subjects engaging the attention of the Federal Parliament have been numerous and important. In 1901 among other measures the following Acts were passed: the Customs Act, the Post and Telegraph Act, the Immigration Restriction Act, and the Pacific Island Labourers' Act, the last having the effect of putting an end within a definite time to the employment of Kanaka labour in Queensland.

The Tariff was provisionally brought into effect, and inter-state free trade established in October, 1901, but the discussion extended over the greater part of the following year, when the Act was finally passed, uniform customs duties being imposed by the Customs Tariff Act, 1902. The Public Service and Electoral Acts and other measures were also passed into law in 1902; and further provision was made for the Governor-General's establishment. The Commonwealth Franchise Act, providing for a uniform federal franchise on the basis of adult suffrage, was also passed.

Sir E. Barton, then Prime Minister, visited England in 1902, and attended the King's Coronation as Representative of Australia. He took part in the Colonial Conference held in London at that time, as also did Sir John Forrest, then Commonwealth Minister of State for Defence.

In 1903 the Judiciary Act was passed organising the High Court of Australia as provided for in the Constitution. It provides for a Chief Justice and two other Justices. (The Judiciary Act of 1906 provides for two additional Justices, and a similar Act of 1912 for a further two.) It confers upon the High Court certain original jurisdiction in addition to that conferred by the Constitution, and makes the original jurisdiction of the Court exclusive in certain cases. It also regulates and defines the appellate jurisdiction of the Court, and provides that in matters of Federal jurisdiction there shall be no appeal from the State Courts to the Privy Council except through the High Court. The High Court Procedure Act, 1903, establishes a system of procedure for the Court.

The Naval Agreement Act, 1903, ratifies the agreement entered into between the Admiralty and the Governments of the Commonwealth and of New Zealand, providing for an increased Naval Force on the Australian Station. In 1909, the establishment of an Australian Fleet Unit was decided upon. Part of this Unit has now taken the place of the squadron previously maintained under the agreement. There were also passed in 1903 a Naturalisation Act, an Extradition Act, a Patents Act, a Defence Act and other measures.

In 1904 a comprehensive measure relating to Navigation and Shipping was introduced into the Federal Parliament, and was referred to a Royal Commission. The Conciliation and Arbitration Bill, applying to labour disputes, was the subject of much discussion. An amendment applying the Bill to State employés was carried against the Government, and Mr. Deakin, who had succeeded Sir E. Barton as Prime Minister, resigned. Mr. Watson, who then formed a Government, was in turn defeated in connection with the same Bill, and Mr. Reid became Prime Minister in August. The Conciliation and Arbitration Act was passed in December, 1904. There was also passed an Act relating to the sea-carriage of goods—somewhat on the lines of the "Harter Act" in the United States—which prevents shipowners from contracting themselves out of liability for negligence. The Defence Act, 1904, instituted a Council of Defence and Boards of Naval and Military Administration. The offices of Inspector-General of the Military Forces and Director of Naval Forces were created. Other measures of minor importance were enacted in 1904.

In 1905 several important measures were passed. Amongst these were the Papua Act, granting a constitution to British New Guinea; the Trade Marks and Copyright Acts, making uniform laws throughout the Commonwealth in regard to trade marks and copyrights; the

Digitized by Google

Commerce (Trade Descriptions) Act, to prevent the application of false trade descriptions to imports and exports; the Secret Commissions Act, to prevent the receipt of secret commissions and rebates by agents; and the Census and Statistics Act.

In 1906, amongst other measures, was passed the Australian Industries Preservation Act, which is directed against injurious trusts and monopolies and unfair competition with intent to injure Australian industries, and which also contains provisions to prevent "dumping"; the Designs Act, which deals with copyright in industrial designs, and, in conjunction with the Patents and Trade Marks Acts, previously passed, completes the legislation for the protection of industrial property; an Act increasing the number of the Justices of the High Court of Australia from three to five; an Act granting a reciprocal customs preference to the Colonies and Protectorates forming the South African Union; special Customs and Excise Tariff Acts relating to Agricultural Machinery; a new Excise Tariff on Spirits; a Spirits Act, providing for the proper description and maturing of spirits for human consumption, and affording facilities for the use of spirits in the arts and manufactures, in scientific investigation, and for lighting, heating, and power purposes; and a Meteorology Act.

The principal enactments of 1907 provided for the taxation by States of salaries earned under the Commonwealth; the settlement of questions regarding Parliamentary qualifications and vacancies; the increase of salaries of members of Parliament from 400*l.* to 600*l.* per annum; the payment of bounties for the production of cotton, fibres (jute, flax and hemp), oil materials, rice, rubber, coffee, tobacco leaf, preserved fish, and dried fruits, and for the export of combed wool or tops. The survey of route for a transcontinental (Kalgoorlie, W.A., to Port Augusta, S.A.) railway was also authorised.

The more important measures of 1908 were Acts providing for the isolation, detention, protection, etc., of vessels, persons, goods, animals, and plants; and the prevention of the introduction or spread of diseases or pests affecting men, animals or plants; the authorisation of the publication of Parliamentary papers by either House of Parliament, and the exemption from legal proceedings of the publisher. The Customs and Excise Tariffs amended the duties of customs and excise as from 8th August, 1907, the former providing for British preference. The Surplus Revenue Act deleted the provision of the 93rd section of the Constitution, and substituted fresh provisions for the payment of surplus revenue by the Commonwealth to the States. Special appropriations were made, whereby an Invalid and Old Age Pensions Fund and a Harbour and Coast Defence (Naval) Account was created: and the payment of Invalid and Old Age Pensions as from 1st July, 1909, (or such earlier day as is fixed by Parliament) was enacted. By the Seat of Government Act, Canberra was determined as the site of the Commonwealth capital. Authority was given by the Manufacturers Encouragement Act to pay bounties for iron, steel and wire manufactures.

A very important measure of 1909 extended the provisions of the Defence Act, decreeing compulsory training, for defence, of male inhabitants of the Commonwealth, and the necessary registration and enrolment; the establishment of a Military College was also enacted. Other important measures were those extending the operation of the Old Age Pensions Act; repressing commercial monopolies; authorising the issue of silver and bronze coinage; constituting the office of High Commissioner of the Commonwealth in the United Kingdom; regulating marine insurance; providing for payment of compensation by employers to seamen injured while at work, etc. Industrial organisations are recognised, an employer being forbidden to dismiss an employé on account of his membership of an association, that is, or is applying to be, registered as an organisation; nor is an employé to cease work on account of a corresponding application by his employer. Amending Election and Patents Acts were also passed.

In 1910 provision was made for payment out of the Consolidated Revenue Fund for pensions and Naval Defence. The establishment and maintenance of an Australian navy was also provided for, and the period of service under the defence scheme lengthened. Authority for the administration of the Federal Capital Territory and for the Northern Territory was given. The elimination of the words "as existing at the establishment of the Commonwealth," altered the provisions of the Constitution relating to the taking over of the States' debts. Provision was made for the issue of Australian notes by the Commonwealth Treasurer, and for the issue of Treasury bills for the redemption of the notes, bank notes being taxed; postal rates were amended. Payment of bounties was authorised on the manufacture of kerosine and paraffin wax from Australian shale. Severe penalties were imposed, under the Immigration Restriction Act, upon persons concerned in bringing immigrants secretly to the Commonwealth, or guilty of deception in regard to naturalisation papers. Emigration of aboriginals, and of children under theatrical contracts was prohibited. Restrictions were placed upon the exportation of arms, military and naval stores, goods necessary for the preservation of the Australian fauna and flora, and articles not conforming to the prescribed conditions as to purity and soundness. A progressive land tax was imposed upon unimproved values. Jurisdiction was given to the High Court in constitutional matters referred to it by the Governor-General. The president of the arbitration court was given power to convene a compulsory conference, to direct that preference be given to Unionists, or to prescribe a minimum wage.

In 1911 provision was made for statutory declarations in connection with any Commonwealth Act, Ordinance or Statutory regulation or in connection with the administration of any Commonwealth Department. The Commonwealth also agreed to accept the Petherick Collection of books, pamphlets, etc., dealing with the geography and history of Australia, New Zealand and the Pacific Islands. The President of the Arbitration Court is given greater powers to deal with the prevention and settlement of industrial disputes. Provision is made for the building of a railway from Kalgoorlie in Western Australia to Port Augusta in South Australia. The rates of postage in favour of Australian books and magazines was altered, and power is given to the Postmaster-General to acquire private telephone lines. The public servants of the Commonwealth are given the power to resort to the Arbitration Court for the settlement of claims relating to salaries, wages, rates of pay, or terms or conditions of service or employment of members of public service associations. Compensation to seamen

Digitized by Google

in respect of injuries in the course of their employment is provided for. Power is given to the Commonwealth to acquire and control lighthouses. Minor amendments were made in the Defence and Naval Defence Acts. Under the amending Electoral Act postal voting is abolished and provision is made for signature of articles issued during an electoral campaign and for the return of wages expended by organisations in an electoral campaign. Provision is made for the establishment of a Commonwealth Bank and for the issue of inscribed Stock. Certain anomalies in the tariff are rectified. The gold reserve under the Australian Notes Act is altered to one-fourth of the amount of notes issued. The construction of the portion of the Pacific Cable between New Zealand and Australia is sanctioned. The Public Service Act is amended by making more liberal provisions in respect of payments in lieu of furlough on retirement or death.

The legislation of 1912 includes an amplification and extension of the powers of Royal Commissions. The number of justices of the High Court is increased by two, the Bench now consisting of the Chief Justice and six justices, all of whom must adjudicate upon questions affecting the constitutional powers of the Commonwealth. Under the provisions of the Commonwealth Constitution (*see* page 4, *supra*), an Inter-State Commission is instituted. The Commission consists of three members, and is a body corporate, with perpetual succession and common seal, &c. A Directorship of Quarantine is instituted, and the scope of quarantine considerably extended. Medical examination of intending immigrants as to physical and mental fitness is prescribed, and immigration of undesirables is further restricted. Permanent incapacity through blindness and certain other causes entitles the sufferers to invalid pensions. Maternity allowance of £5 was instituted. Injuries to seamen and to manual and clerical employees of the Commonwealth must be compensated at rates laid down. Bounties on wood pulp and rock phosphate, and rewards for the discovery of rock phosphate are provided. Bounties payable under the various Acts may be withheld from claimants where the conditions of employment and rates of wages are below the standard declared by the Commonwealth Court of Conciliation and Arbitration. The Sugar Excise and Sugar Bounty are repealed. (NOTE.—It was indicated that the Government of Queensland would deal with the matter.) The survey of a railway route from Pine Creek to Katherine River (Northern Territory) is authorised. The electoral machinery is extended to cover the taking of a referendum. Designs and trade marks legislation is extended to Papua. The British Copyright Act, modified to suit local circumstances, is adopted, and machinery for registration is instituted. Financial assistance is rendered to Tasmania by a grant of £500,000, payment being spread over ten years. Arrangements are made for the reduction of the British-Australian Squadron, and the consequent reduction of the naval subsidy. The method of prosecution of delinquents and the enforcement of penalties under the Defence Act are simplified, and the prescribed training of junior cadets is reduced by one-fourth.

By the legislation of 1913, the relations of service between owners and masters of vessels and their crews are regulated by provisions for the health, protection, and welfare of the seamen. Sugar excise and bounty are fixed. Norfolk Island is accepted as a Commonwealth Territory. Extension of the Northern Territory Railway is authorised. Transmission of letter-telegrams is instituted. Provision is made for payment in respect to judgments against the Commonwealth in the United Kingdom. Joint Parliamentary Committees of public accounts and of Commonwealth public works are established—the former to examine and make recommendations to Parliament in regard to public accounts, the latter to consider and report upon the larger public works proposed. Further financial assistance is rendered to Tasmania by a grant of 400,000*l*. The raising of 2,780,000*l*. on loan for certain prescribed purposes is authorised.

In 1914, many new measures were enacted. Trading with the enemy is restricted. Documents may be impounded and controllers appointed for enemy firms and companies. Exportation of goods may be prohibited. The issue of Treasury bills is authorised. Duties are imposed on estates of deceased persons, and landed estates are further taxed. A war loan from the Imperial Government is authorised. War pensions are arranged. A grant of 100,000*l*. is made in aid of the Belgian Government. Machinery for detection of crimes, and for apprehension, indictment, and punishment of offenders, is provided, special prominence being given to offences in connection with the defence and safety of the Empire. (In 1915 it was enacted that this statute should continue in force during the continuance of the war and for six months thereafter, and no longer.) Admiralty and maritime jurisdiction is conferred on the High Court. The Commonwealth Bank is authorised to take over business of other banks. Manufacture of pig-iron from Australian ore is encouraged by the provision of a bounty.

Further war measures are the chief features of the legislation of 1915. A Ministry of State for the Navy is created, salary being provided by the addition of 1,650*l*. to the 12,000*l*. annually appropriated for salaries of Ministers. Taking of a war census is prescribed. A war loan of 20,000,000*l*. is authorised. An income tax is imposed. Lighthouses may be acquired by compulsory process from States not agreeing to transfer them. Acceptance of Jervis Bay Territory (Naval College) is arranged. Trial by jury is prescribed for indictable offences. The Murray Waters agreement is ratified. A further war loan of 18,000,000*l*. is authorised.

During 1916, further war measures are passed. Authority is given to raise 50,000,000*l*. for war purposes, and to borrow 25,000,000*l*. from the United Kingdom. The War Pensions' Act is amended, and the Trading with the Enemy Acts also amended.

The necessary appropriations have also been made by the Parliament for the services of the various years.

*Commonwealth Departments.*

The Customs and Excise Departments of the States were transferred to the Commonwealth Government on the 1st of January, 1901, and the Defence and Post and Telegraph Departments on the 1st of March, 1901. Other departments which have been created are those of Home and Territories, the Attorney-General's Department, the Treasury, the Prime Minister's Department, and the Works and Railways Department.

*Public Debt of Australia, 30th June, 1916.*

The referendum of 13th April, 1910, gave power to the Commonwealth, at any time to assume all the State debts existing at that time. The distinction which formerly existed between the debts which could be taken over under the Constitution, and those which could not, consequently exists no longer. The following table shows the complete indebtedness of the States and Commonwealth at 30th June, 1916. In addition to the amount shown below, the Commonwealth owes £10,781,797 (included in the State debts) being the value of properties transferred from the States to the Commonwealth.

## NEW SOUTH WALES.

### *Limits and Area.*

The State of New South Wales lies on the eastern coast of Australia, almost entirely between the 29th and 36th parallels of south latitude, and between the 141st and 154th meridians east of Greenwich. It is bounded on the east by the Pacific Ocean, to which it presents a coast line extending over 700 miles, from Point Danger at its north-eastern extremity to Cape Howe at the south-east. From the point last mentioned, which is also the north-east limit of the State of Victoria, it is bounded by an imaginary line running in a north-westerly direction to the source of the Indi, a stream rising at the foot of Forest Hill, a few miles south of the Pilot Mountain, one of the most conspicuous peaks of the Australian Alps. The southern boundary of the State follows the course of the Indi, and afterwards of the Murray, into which the first-named stream ultimately merges, as far as the 141st meridian of east longitude. The intersection of the Murray with this meridian forms a common point of the three States of New South Wales, Victoria, and South Australia.

On the west, the State is separated from South Australia by the line of the 141st meridian, as far as its intersection with the 29th parallel of south latitude, at which point New South Wales, South Australia, and Queensland touch. Commencing at this point, the northern boundary of the State follows the 29th degree of latitude, till it is crossed by the Macintyre River, one of the upper branches of the Darling, not far from the 149th meridian. Thence it follows the course of the Macintyre upward, to the junction of its tributary, the Dumaresq; leaving the Macintyre it follows the tributary stream till it meets a spur extending from the main Dividing Range to the junction of Tenterfield Creek and the Dumaresq. The boundary runs along this spur until it joins the main range, thence, almost parallel to the coast, it follows the Dividing Range to Wilson's Peak, where the Macpherson Range branches eastward. Following the last-named range, the northern boundary reaches the coast at Point Danger.

The area comprised within these limits is estimated at 310,367 square miles (inclusive of Federal Capital area at Yass-Canberra—900 square miles), or 198,635,000 acres, being a little over two and a half times that of Great Britain and Ireland. Excluding the surface covered by rivers and lakes, the area would be 195,669,000 acres, or about 305,733 square miles.

The length of the State, from Point Danger on the north to Cape Howe on the south, is 683 miles. From east to west, along the 29th parallel, the breadth is 756 miles, while diagonally from the south-west corner, where the Murray passes into South Australia, to Point Danger, the length reaches 850 miles.

Sydney, the seat of Government, is in 33° 51′ 41·1″ S. lat., and 151° 12′ 23·10″ E. long.

Of the total area of the State, 59,487,478 acres have been alienated, or were in process of alienation on the 30th June, 1916.

The number of Alienated Holdings over one acre in extent for the year ended 30th June, 1915, were:—

| | | | |
|---|---|---|---|

### *History.*

This part of the Australian coast is said to have been discovered by Portuguese and Dutch navigators in the 17th century, but no settlement was made. Captain Cook explored it in 1770, and gave it the name of New South Wales, but the first settlement was not formed until 1788, at Port Jackson, under Captain Phillip, R.N. The capital was named after Viscount Sydney, who was Secretary of State for the Colonies when the settlement was formed.

The Settlement of New South Wales was then held to include the whole eastern portion of the continent. The first newspaper was established in 1803. The population in 1800 was 4,958. The Merino sheep was introduced in 1797. The passage through the Blue Mountains, giving access to the interior plains, was not discovered until

Digitized by Google

1813. Moreton Bay was settled in 1824. In 1828 the total population was only 36,598. The discovery of gold in 1851 led to a very rapid growth of what is now Victoria, settled in 1836, which was made a separate Colony in 1851. Responsible government was established in 1855. Moreton Bay, to the north, was constituted a separate Colony in 1859, under the name of Queensland. On the 1st January, 1901, the Colony of New South Wales united with the Colonies of Victoria, Queensland, South Australia, Western Australia, and Tasmania, in a Federal Commonwealth of Australia.

*Climate.*

The climate of New South Wales affords a wide range of temperature; from Kiandra, where the mean in shade in 1915 was 45·4°, to Bourke, 70·0°, Brewarrina, 69·5°, Moree, 69·2°, and Walgett, 68·6°. On the coast it varied from 59·7° at Bega to 69·4° at Casina, Sydney being 64·0°, almost the same as Barcelona. On the mountains snow lies in a few places all the winter. At Bathurst the mean temperature was 58·9°, and on the inland plains about 68·6°.

The rainfall decreases as the distance from the coast increases. The total fall during 1915 at Sydney was 34·71 inches; and the days on which rain fell 121. The average rainfall over 56 years is about 48 inches annually. At London the number of days is 146, and the amount 24 inches; 25 per cent. of this falls in quantities of half an inch and upwards in a day. Seventy-five years' experience in Sydney has never furnished one month entirely without rain; but in dry periods several months sometimes pass consecutively during which the fall is too small for water supply; and of England exactly the same remark has been made.

The prevalent winds in summer are the north-east sea-breeze and light westerly; in winter, dry cold westerly, and wet S. and S.E.

In winter, on the lowlands, frosts are common in the southern and rare in the northern districts.

*Trade and Industry.*

The great staple produce of New South Wales is wool.

The direct export of wool, the produce of the State, to countries outside Australia during the past years has been as follows:—

| | | | |
|---|---|---|---|
| 1908 | 262,260,071 lbs. | value | 11,219,666*l.* |
| 1909 | 279,852,326 ,, | ,, | 11,654,400*l.* |
| 1910 | 319,360,664 ,, | ,, | 13,599,582*l.* |
| 1911 | 295,315,438 ,, | ,, | 11,704,409*l.* |
| 1912 | 273,871,731 ,, | ,, | 11,496,850*l.* |
| 1913 | 259,244,810 ,, | ,, | 11,284,088*l.* |
| 1914–15 | 234,278,444 ,, | ,, | 9,755,675*l.* |
| 1915–16 | *259,615,533 ,, | ,, | *13,703,232*l.* |

* Includes produce of other States.

The other principal exports of domestic produce to countries outside Australia are:—Silver and silver lead bullion, coal and coke, cattle, sheep, horses, skins and hides, tallow, meats, leather, tin, fruit, copper, shale (kerosene), butter, flour, wheat, bran, pollard, etc., timber, oils, boots and shoes. In addition to these products, tobacco, sugar, many kinds of fruit, and other commodities are produced largely for home consumption.

The live stock on 30th June, 1916, was estimated as follows:—Horses, 719,542; cattle, 2,405,779; sheep, 32,600,729; pigs, 281,158.

The values of the chief articles of British and foreign produce imported in 1915-16 were:—Iron and steel, 1,339,548*l.*; agricultural implements, 185,353*l.*; timber, 888,507*l.*; sugar, molasses, etc., 1,018,390*l.*; boots and shoes, 170,350*l.*; books, etc., 223,267*l.*; stationery, 139,995*l.*; spirits, 490,238*l.*; ale and beer (including cider and perry), 96,227*l.*; vehicles, etc., 971,879*l.* (including bicycles, motor cars, etc.); drugs and chemicals, 391,632*l.*; tea, 913,285*l.*; tobacco, cigars, etc., 657,852*l.* About 47 per cent. of the oversea import trade was with the United Kingdom, and 37 per cent. export.

*Additional British and Foreign Articles Imported, 1915-16.*

The coal mines have steadily advanced since 1863. The produce of 18 mines in that year is given as 433,889 tons, valued at 236,230*l.*, while in 1881, 1,769,597 tons, valued at 603,248*l.*, were raised from 40 mines; and, in 1915, 9,449,008 tons, valued at 3,424,630*l.*, were raised from 112 mines. In 1916, 8,127,161 tons, valued at 3,336,419*l.*, were raised from 121 mines.

Sydney and Newcastle are ports of registry; 18 vessels, of a total tonnage of 2,903, were registered during the year ended 30th June, 1916, while the total number of vessels on the registers at 30th June, 1916, was 1,142, with a tonnage of 131,965.

*Manufactories and Works.*

In 1915-16 there were 5,210 manufactories and works, employing 116,401 persons, of whom 87,724 were males and 28,677 females. The total value of plant and machinery was 18,211,104*l.*; the total wages paid amounted to 13,413,845*l.*; and the value of the output was 70,989,864*l.*

*Currency and Banking.*

The currency is exclusively British sterling. At Sydney there is a branch of the Royal Mint at which gold was received during 1916 to the extent of 1,559,023*l.*

The 18 banks operating in the State in 1916 were:—Bank of New South Wales; Commercial Banking Company of Sydney, Ltd.; Bank of Australasia; Union Bank of Australia, Ltd.; Australian Bank of Commerce, Ltd.; London Bank of

Digitized by Google

Australia, Ltd.; English, Scottish, and Australian Bank, Ltd.; City Bank of Sydney; Queensland National Bank, Ltd.; Bank of North Queensland, Ltd.; Bank of New Zealand; Commercial Bank of Australia, Ltd.; National Bank of Australasia, Ltd.; Comptoir National d'Escompte de Paris; Royal Bank of Australia, Ltd.; Colonial Bank of Australasia, Ltd.; Commonwealth Bank of Australia; and Yokohama Specie Bank, Ltd. Total average amount of deposits in banks for June quarter, 1917:—

| | |
|---|---|
| Deposits bearing interest ... ... | £33,915,474 |
| Deposits not bearing interest ... | 46,599,972 |
| Total ... | £80,515,452 |

The average note circulation for the same period was 80,765*l.*, the decrease of late years being due to the issue of the Commonwealth notes.

The Savings Bank of New South Wales, established in 1832, and the Government Savings Bank, established in 1871, which were formerly conducted separately, were amalgamated on the 1st May, 1914. The number of depositors on the 30th June, 1916, was 806,882, and the value of deposits, 37,363,272*l.* These figures include transactions of the Savings Department of the Commonwealth Bank of Australia. Interest is allowed at the rate of 3¾ per cent. per annum on all deposits up to 500*l.*

*Means of Communication.*

On the 30th June, 1917, there were 4,437 miles of railways, owned and worked by the Government, the total cost of construction having been 72,006,621*l.* The receipts during the year ended 30th June, 1917, were 8,380,085*l.*, and the working expenses 5,915,360*l.*, the balance therefore available towards meeting the annual charge for interest being 2,464,725*l.* There were also 143½ miles of private railway, exclusive of other branch lines connected with coal and other mines. There were also 224 miles of Government tramways, earning 2,008,539*l.*, against working expenses amounting to 1,691,367*l.* The total capital expenditure on tramways was 8,309,629*l.*

*Telegraphs.*

There are 2,107 stations, and the revenue received during the year ended 30th June, 1915, was 314,093*l.* from telegraph, and 432,391*l.* from telephone.

The following are the numbers of telegrams transmitted and received in New South Wales during 1915-16:—

*Transmitted.*

| | |
|---|---|
| Outside New South Wales ... ... | 1,264,841 |
| Inland ... ... ... ... ... | 3,852,195 |
| Total ... ... | 5,117,036 |

*Received.*

| | |
|---|---|
| Outside New South Wales ... ... | 1,285,056 |
| Inland ... ... ... ... ... | 3,852,195 |
| Total ... ... | 5,137,251 |

Of inland rivers the Murray, Darling, Murrumbidgee, and Lachlan are navigable most of the year, and nearly all the coast rivers are navigable, especially the Richmond, the Clarence, the Macleay, the Manning, the Hunter, the Hawkesbury, and the Shoalhaven, while Port Jackson, Port Stephens and Jervis Bay are unrivalled natural harbours. In normal times steamers leave Sydney regularly for nearly all parts of the world, but the direct communication with Europe is chiefly by the vessels of the P. and O. (*viâ* Colombo and Brindisi), the Orient Royal Mail lines (*viâ* Suez and Naples), and by those of the Messageries Maritimes (*viâ* Marseilles), Canadian Australian line (*viâ* Vancouver), Oceanic line (*viâ* San Francisco), White Star line (*viâ* Durban and Capetown), Aberdeen line (*viâ* Natal and Capetown), Federal, Houlder, Shire and Bucknall lines (*viâ* Suez). Prior to the outbreak of war Seven mails per month were sent to and despatched from England.

Letters from England reach Sydney in about 31 days in normal times.

The number passing through the Post Office in 1915-16 was:—

| | |
|---|---|
| Letters and Postcards ... | 219,525,661 |

| Parcels... ... ... ... | 2,537,970 |

*Education.*

The education system of New South Wales is under the control of the Minister of Public Instruction, regulated by the Public Instruction Act of 1880. Teachers in State schools belong to the Public Service and are paid fixed salaries according to their qualifications and the classifications of their schools. Fees in State primary and superior public schools were abolished from the 8th October, 1906, and State High School fees were abolished at the close of 1910. Education is compulsory between the ages of 6 and 14 years.

At the close of 1916 there were 3,188 State schools divided into 19 high schools, 6 for boys, 5 for girls and 8 mixed; public schools, 1,972; provisional schools, 447; half-time schools, 162; travelling schools, 3; evening continuation schools, 44; subsidised schools, 539; and industrial and reformatory schools, 2. The State has been divided into public school districts, with one Local Board appointed for each district or sub-district. School buildings are erected and maintained wholly at the expense of the Government. Denominational schools have ceased to be supported by the State, but general religious instruction is imparted by the State teachers, and clergymen of the various denominations are entitled to appropriate one hour a day for religious instruction in the tenets of their respective Churches to pupils belonging to the same religious persuasion. Children are conveyed to central schools, and in very thinly-populated remote districts subsidies are paid either to families who combine and engage teachers, or to single families of 4 children and upwards: in the latter case it may take the form of assisting to board the children near existing schools. Three properly equipped travelling schools convey a means of instruction to several outlying groups in rotation. All children are carried free by rail to the nearest school, while conveyances are subsidised by the Department to carry pupils residing in an outlying district to a Central School.

Four hundred Bursaries, each tenable for four or five years at a High or District School, are awarded annually. Hitherto 600 Scholarships

Digitized by Google

were awarded each year. These Scholarships, which carried a free grant of text books have been discontinued, as free text books are now supplied to all High School pupils. Agricultural Scholarships, Technical Scholarships, and thirty University Bursaries are also awarded. A Higher Education Scheme has been established which provides for the award of (1) Qualifying Certificates which denote that pupils have undergone a primary course of instruction and are eligible to receive higher instruction either in the High or District Schools, or in the advanced classes of the superior Public Schools. (2) Intermediate Certificates issued on the satisfactory completion of a two years' High School course, and (3) leaving Certificates (equivalent to the University Matriculation Certificates) awarded on the satisfactory completion of a four years' High School course. Eighteen High Schools and an Agricultural High School are in operation. Probationary student Scholarships are provided for young persons desiring to enter the Public Service as teachers, and the Training College affords a one-year or two-years' course of training for State school teachers. In special cases longer courses are provided for. Classifications are awarded on attainments and practical skill. During 1915, 369 students underwent courses of training. In addition, 363 students were received during the year into a short (6 months') course of training preparatory to taking charge of small bush State Schools, or of receiving appointments as assistants in country schools. During 1912 the "Bursary Endowment Act" was passed by Parliament. This Act provides for the establishment of a fund for Bursaries tenable in secondary schools and in the Sydney University and for the constitution of a Board of Control. The first set of Bursaries (300) awarded under this Act took effect from 1st January, 1913.

Evening Continuation Schools have been brought into operation in city and country centres divided into the following classes: (1) Junior Technical Schools; (2) Commercial Schools—in both cases the object being to assist lads to push on more rapidly in the callings they have chosen; and (3) Domestic Schools, for girls only.

For the year 1916 the net cost to the State of public instruction was 1,837,187*l.*, exclusive of 102,139*l.* expended on technical education.

The University of Sydney was established and endowed by the State in 1850. Its State endowment was originally 5,000*l.*, and from 1890 to 1892 was 13,900*l.*, but it has recently been increased to 20,000*l.* The endowment is largely added to by annual special grants and by private donations. The State endowment and special grants for 1916 amounted to 53,391*l.* Three denominational colleges are affiliated to the University, each having a State endowment of 500*l.* per annum. In addition, there is the women's college, also affiliated, having a similar endowment. The University has the power of granting degrees in arts, law, medicine, science, engineering, agriculture, veterinary science and dentistry. Recently, several faculties have been added to its curriculum. During 1912 the University Amendment Act was passed the main provisions being representation of the Government and of Parliament upon the Senate; the broadening of the franchise; voting by post; the acceptance of the Leaving Certificate of the Education Department as the equivalent of Matriculation, the institution of Evening Tutorial Classes, and the provision of 200 Exhibitions annually exempting the holders from payment of fees. In the metropolis there is a public grammar school, with an enrolment of 723 pupils, and having a State endowment of 1,500*l.* There are also technical colleges, under the Department of Public Instruction, and classes are held in Sydney and in the principal country towns. The Central College—a large establishment—is extensively equipped and staffed for trades, professional, and scientific instruction. The fees are within the reach of all, and the colleges are open to males and females alike. There is an Australian Museum, a National Art Gallery, a Public Library, including the Mitchell Library, with endowments of 1,000*l.*, 2,000*l.*, and 2,000*l.* respectively, and a Music Library. Public libraries and schools of arts are established throughout the State and obtain Government subsidies. There are also a Royal, a Medical, a Linnæan, a Zoological, a Geographical, and an Art Society, a Government Observatory, Agricultural and Forestry Museum, and a Mining and Geological, and Technological Museums, Government Agricultural Colleges, Experimental Farms, with many other educational associations.

### *Local Government.*

Local Government throughout New South Wales is governed by the Local Government Acts, 1906–1916.

The greater part of the State is incorporated, leaving only the "Western Division," which is but sparsely settled, outside the scope of these Acts, though even in that division there are a few towns which, having been incorporated as Municipalities under the Municipalities Act of 1897, repealed, are governed by the Local Government Acts.

There are two kinds of Local Government organisation—*viz.*, Shires and Municipalities. Speaking generally, the Municipal form of organisation is applied to towns, the Shire form to the open country outside the towns. There are 136 Shires and 184 Municipalities.

### *Shires.*

The Shires were incorporated on 7th March, 1906. Each Shire is divided into three Ridings, with five exceptions, which upon reconstitution were each divided into six Ridings.

The First Council of a Shire consists of six members, each Riding, in Shires divided into three Ridings, electing two Councillors. In Shires divided into six Ridings, as in the cases referred to in the preceding paragraph, each Riding elects one Councillor.

For the purpose of any later election the number of members may be increased from six to nine on resolution of the Council, or where such increase has been made may be decreased to six, provided that before any such increase or decrease is made the Council must take a poll of electors on the question, and the decision of a majority of the votes cast at such poll determines the question.

The election of Councillors is held triennially, the last election having taken place on 27th January, 1917.

Included amongst the primary functions imposed upon Shire Councils are the following:—The control of all roads, bridges, public watering places for travelling stock, and wharves and jetties, the lighting of streets, the regulation of traffic, etc. The Shire Councils may, under the Act, largely extend their powers, and take up many duties

Digitized by Google

not at present part of their work, and many Councils are availing themselves of this provision in the Act.

To obtain the revenue they require, the Councils levy general rates not less than 1*d.* nor more than 2*d.* in the £ on the Unimproved Capital Value of ratable land (*i.e.*, the value the land would realise in the open market if it had no improvements on it, but with the rest of the surrounding district in its present state of development).

For special purposes Shire Councils may levy "special" or "local" rates, subject to the right of the ratepayers to demand a poll, at which the rate may be vetoed. Shire Councils are empowered by the Local Government (Shire Loans) Act, 1914, to borrow with the Governor's approval, up to thrice the amount of a year's income, for the purpose of carrying out any work which they are by law authorised to undertake.

On the petition of ten per centum of the ratepayers, the Council is required to submit the proposal to a poll of ratepayers, and if a majority of the votes cast at the poll is against the proposal, the borrowing cannot be proceeded with. Loans under the Shire Loans Act are a charge on the income of the General Fund.

Shire Councils may also obtain temporary accommodation to the extent of one-third of a current year's rate revenue.

In the case of portions of Shires which have been declared, by notification of the Governor to be "Urban Areas," the Shire Councils concerned may exercise all the powers of the Council of a Municipality, including the powers to borrow granted to Municipalities by the Local Government Act, 1906. This is intended to enable the financing of services and works required in unincorporated towns in Shires, where conditions akin to those of a Municipality obtain, but where the circumstances are not such as to warrant the incorporation of such centres as Municipalities. The question of whether any locality shall be declared an Urban Area is subject to a poll of the ratepayers of the locality concerned, in the event of such a poll being demanded.

To assist Shire Councils the Act provides that they shall be classified once every three years, and that not less than 150,000*l.* shall be distributed as endowment in accordance with the classification.

A sum of approximately 200,000*l.* is distributed amongst the Shire Councils annually for the upkeep of the main roads.

For the ten years previous to the passing of the Local Government Act, 1906, the Government of New South Wales levied a direct tax of 1*d.* in the £ on the Unimproved Capital Value of land, and this tax was taken into Consolidated Revenue. The Local Government Act provides that when a Shire Council levies a rate on the Unimproved Capital Value of land the Government land tax shall be suspended. The whole of the Shire Councils having levied such a rate, the land tax has been suspended throughout the whole of the area covered by the Shires.

### *Municipalities.*

The Municipalities Act of 1867, and its Amending Acts, which were consolidated in 1897, have been swept away, and the Municipal organisation brought into line with that of the Shires. The new law came into force on 1st January, 1907, the day on which the newly elected Shire Councils took up their task.

The election of Aldermen is held once in three years, at the same time as the Shire elections. The last municipal election, however, which should in the ordinary course have been held on the 27th January, 1917, was postponed to the 30th June, 1917, to allow of the preparation of new rolls of electors. The old system of the retirement of one-third of the Aldermen each year has disappeared—all the Aldermen go out of office on the same day.

The functions of Municipal Councils under the old law were confined within certain very circumscribed limits, which they had outgrown owing to the rapid progress of the State and the growth of town life. The Local Government Act, 1906, makes provision for any Council to extend very widely its sphere of activity as necessity occurs, so that it is possible now for a Municipality to undertake the conduct of an infants' milk depôt, or a public mortuary, or to regulate the erection of buildings or the sub-division of land for building sites, with many other powers.

The financial system also has been completely revolutionised. Under the old Municipalities Act all rates were levied on rental values. During the first year of the operation of the new Act this system was continued. From 1st January, 1908, all Municipal rates have been levied either on the Unimproved or Improved Capital Value. The whole of the General Purposes requirements may be provided for by a General Rate (which must not be less than 1*d.*, and may be any higher number of pence in the £ within the limit given below) on the Unimproved Capital Value of ratable land. If the Council prefers, it may levy only part of General Purposes rates as a General Rate on Unimproved Capital Value, and the rest as an Additional General Rate on either the Unimproved Capital Value or Improved Capital Value. Similarly, any special, local or loan rates may be levied on either Unimproved Capital Value or Improved Capital Value as Council may decide. In all these cases, however, except in the case of General Rates, the ratepayers may demand a poll, and at the poll may decide whether the rate is to be on the Unimproved or the Improved Capital Value. With respect to special and local rates, the ratepayers at the poll may also decide whether the rate shall be levied at all.

The limit of all rates (general, additional general, special, local and loan) taken together is fixed by the Act at a sum calculated by taking 2*d.* in the £ on the Unimproved Capital Value and 2*s.* in the £ on the assessed annual value. The products of these two calculations are added together; and the total which results is the limit beyond which a Council cannot levy rates. The limit under the old Municipalities Act was 2*s.* in the £ on nine-tenths of the rental value.

As to loans, the Local Government Act introduces the principle that wherever a Council proposes to borrow (except to repay an existing loan) they shall first submit the proposal to a poll of ratepayers. If the ratepayers at the poll approve of the loan, then before raising it a loan rate must be levied sufficient to pay interest and sinking fund contributions in respect thereof; and this rate must be continued until the loan is wholly repaid.

The law also provides for the introduction of uniformity into municipal accounts, the Government being empowered to make regulations prescribing the manner in which the accounts are to be kept.

Digitized by Google

Regulations made in pursuance of the Local Government Act require the accounts to be kept by double entry on a system of "Income and Expenditure." The accounts of municipalities in the past were, generally speaking, kept on a "Cash" System, by single entry.

In Municipalities, as in Shires, the State Land Tax disappeared on the Councils levying general rates on the Unimproved Capital Value of all ratable land.

A sum of approximately 50,000*l.* is distributed annually amongst the Municipal Councils for the upkeep of the main roads.

*Constitution.*

The first Legislative Council dates from 1824; it was greatly enlarged and made chiefly elective in 1842. "Responsible government" was established by the Constitution Act, 18 & 19 Vict., cap. 54 (1855). The Governor is appointed by the Crown; so also is the Legislative Council, of whom not less than four-fifths must be persons not holding office under the Crown, except officers on H.M.'s sea or land forces on full or half pay. The members of the first Legislative Council were appointed for five years, but all subsequent appointments have been made for life, subject to certain provisions contained in the Act. The Council at present consists of 71 members, who are not paid, with the exception of the President and Chairman of Committees, and any members who may accept portfolios in a Ministry. All members are privileged to travel free over all Government Railways and Tramways.

The Legislative Assembly, under the "Electoral Act of 1880," consisted of 108 members, elected in 72 districts increased under the provisions of that Act, which provides for giving increased representation to the several constituencies according to growth of population, and the "Wentworth Electorate Subdivision Act" to 141 members in 1891 for 74 districts. The qualification for election to the Assembly extended to "every male subject of Her Majesty of the full age of 21 years and absolutely free, being a natural-born or naturalised subject," with certain special exceptions.

The electoral franchise was given, subject to certain official and other disqualifications, to "every male subject of Her Majesty of the full age of 21 years and absolutely free, being a natural-born or naturalised subject," if entered on the Roll of Electors, under one or other of the following heads:—

1. "Resident Electors.—Six months in district.

2. "Non-Resident Electors. — Every such subject, whether or not so resident as aforesaid, who shall have at the time of making out the said Electoral List, and for the six months then next preceding shall have had within the district a freehold or leasehold estate in possession of the clear value of 100*l.*, or of the annual value of 10*l.* respectively, or who shall then occupy, and for the said six months have occupied, within the district, any house of the annual value of 10*l.*, or who shall hold, and for the said six months shall have held, a Crown lease or license for pastoral purposes within such district."

An Act of Parliament, assented to June 13th, 1893, provided for the division of the State into 125 electorates, each represented by only one member. The new Act also abolished the property qualification and plural voting, and established the "one-man-one-vote" system. Every male of the full age of 21 years, being a natural-born or naturalised subject, and who shall have resided in the State for a continuous period of one year, and shall have been resident three months in the electoral district for which he claims an elector's right, is qualified as an elector. As the qualification of electors who held Electors' Rights had been tested at Revision Courts, the residence necessary in the new district, on change of residence from one district to another, was reduced from three months to one month, during which period the elector is entitled to vote in the original electorate. Under this law the elections all take place on one and the same day. The first election under this Act took place on July 17th, 1894; the second on July 24th, 1895; the third on July 27th, 1898; and the fourth on July 3rd, 1901. Under an amending Act, passed in 1896, the franchise has been conferred on members of the police force, who are all in the employment of the State, and not controlled by local bodies.

The Electoral Acts were consolidated in 1902, and during that year the franchise was extended to women.

The voting at elections is by ballot, as it was also under the old Electoral Acts of 1858 and 1880, now repealed.

Early in 1904 the State was divided into 90 electorates, each of which has one member to represent it in the Legislative Assembly. The General Election, held in August, 1904, was the first election held after the new divisions had been made, and at which women exercised the franchise.

The electoral law was amended by the Parliamentary Elections Act, 1906, which abolished the system of elector's rights, and substituted therefor provisions for collection of Lists, the exhibition and revision of same before being printed as Rolls.

Under this Act a General Election was held on the 10th September, 1907. The Assembly lasts for three years, unless previously dissolved. Members receive 500*l.* per annum each; and, in addition, they may also travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the transmission of correspondence through the post.

The Parliamentary Elections (Second Ballot) Act, 1910, was assented to on the 31st August, 1910. It provides that if, as the result of the first ballot, the Returning Officer finds that no candidate has received an absolute majority of votes, a second ballot shall be taken between the candidate who has received the highest number of votes and the candidate who has received the next highest number of votes. It also provides for the revision of all supplemental rolls before every general election after the issue of the writs. The necessary residential qualification has been altered by this Act, so that a continuous residence of one year in the Commonwealth, six months at least of such period in the State and three months in the District is sufficient. The Parliamentary Elections (Amendment) Act, 1911, was assented to on 3rd October, 1911. It provides for an annual collection and revision of the Lists and consequent printing of the rolls, and that every person whose name so entered on the Lists is to receive a form of acknowledgment and every applicant for enrolment is to be notified by

Digitized by Google

post if his name has been added to the roll or if his application has been refused. It also provides that an elector absent from the district for which he or she is enrolled may vote for that district at any polling place in any other electorate. The residential qualification has also been altered to six months in the Commonwealth, three months in the State, and one month in the district, and the hours of polling extended to seven o'clock in the evening. Also members of the Naval and Military service were given the franchise.

The electoral Acts were consolidated in 1912.

## LORD HOWE ISLAND.

Latitude, 31° 30′ S. Longitude 159° 5′ E.

This island lies 436 miles north-east from Sydney, and 300 miles from Port Macquarie, the nearest part of the Australian continent.

It was discovered on February 17th, 1788, by Lieutenant H. L. Ball, of H.M.S. "Supply," while on his way from Port Jackson to found a settlement at Norfolk Island. It is of volcanic origin and crescent shaped, about seven miles in length and from one-half to one-and-three-quarters in width, containing about 3,220 acres. It is of great beauty throughout and covered with a dense and most luxuriant vegetation, but from the peculiar bouldery character of the formation of the major part of its floor, it has scarcely more than 300 acres suitable for agriculture. The soil of these few acres is extremely rich, and will produce almost any sub-tropical vegetation.

No lands have been sold, and the people pay no rent, occupying the land upon sufferance only—the Government reserving the right of resuming whenever they may see fit.

Digitized by Google

The population in April, 1911, was 105. Very fair and comfortable accommodation can be obtained amongst the settlers. The natural beauties of the island render it most attractive to visitors. Fish are very plentiful, and good sport can consequently be had. During war conditions an eight-weekly steam service has recently been instituted by Burns, Philp and Co., under contract to the Federal Government.

The Island is a dependency of New South Wales and the Government of New South Wales have appointed a Board of Control consisting of the Hon. J. C. L. Fitzpatrick (Acting Colonial Treasurer, &c.) Chairman; E. B. Harkness, Esquire (Under-Secretary, Chief Secretary's Office, &c.); and J. H. Maiden, Esquire, I.S.O., &c. (Director, Botanic Gardens, &c.) —Members. The Board take charge of the affairs of the Island, and the management and control of the Kentia palm seed industry. Lord Howe Island is the home of the Kentia palms, the hardiest and most beautiful palms in the world, and the seeds are collected and sold under the Board's direction. Thousands of bushels of these seeds are shipped annually to all parts of the world.

## QUEENSLAND.

### *Situation and Area.*

Queensland occupies the whole of the north-eastern portion of Australia, commencing at a point on the east coast called Point Danger, in lat. 28° 8′ south, about 400 miles north of Sydney, the capital of New South Wales.

The greater portion of the southern boundary line is formed by the 29th parallel of south latitude. The eastern seaboard extends about 1,500 miles, from Point Danger passing Cape York, the extreme northern point of the continent, and embracing the greater part of the Gulf of Carpentaria, terminates on the boundary of the Northern Territory, in lat. 10° 40′. Thursday Island, in Torres Straits, with Moreton, Stradbroke, Fraser, Hinchinbrook, Prince of Wales, Wellesley, and many other islands, are included in the State.

The breadth of the territory near the southern boundary is about 900 miles from the eastern coast line to the meridian of 138° east longitude, which forms the western boundary line of the State, separating it from the territory of South Australia. This includes the greater part of the Gulf of Carpentaria, which has a seaboard of about 750 miles. The whole of the State of Queensland comprises 670,500 square miles, or 429,120,000 acres (being equal to three times the German Empire and Belgium together).

### *Early History.*

Captain Cook landed in Moreton Bay in 1770, but the Brisbane River, running into Moreton Bay, was not discovered until 1823, and the Moreton Bay Settlement was formed from New South Wales in 1824. The Darling Downs were explored in 1828, and squatters or ranchers, as they are termed in America, began to settle on the rich pasture grounds. The territory was, however, not thrown open to colonisation until 1842, and, after explorations by Leichhardt, 1845-7, and by Kennedy in York Peninsula in 1847, it was separated from New South Wales on 10th December, 1859, when it became a separate colony, under the name of Queensland, with about 25,000 inhabitants, having responsible government from the time of the proclamation declaring the Colony distinct.

### *Climate and Physical Features.*

The climate is comparable to that of Madeira, the mean temperature being high but constant. The northern part is tropical. The mean temperature at Brisbane is about 68·2°, the extreme range during 1916 being from 32·5° to 96·8°. The rainfall in the interior is scanty and variable; the mean at Brisbane was about 53 inches; mean barometer 29·958.

The country extending along the eastern seaboard is indented with several fine bays and estuaries, which are the outlets of rivers, a number of which are navigable for good-sized vessels.

A mountain range, called the "Main," or "Great Dividing Range," extends throughout the greater portion of the Colony; it is a continuation of the main range, or Cordillera of New South Wales and Victoria, and runs northerly throughout its course, and continues its course northerly to its termination at Cape York, the most northerly point of the continent of Australia. At or near the 21st parallel of south latitude another range leaves the Great Divide nearly at right angles, and traversing the State westerly, separates the waters flowing east, south and west from those which, flowing northerly, debouch into the Gulf of Carpentaria. Between this range and the eastern shore are situated the highest mountains in the country, viz., the Bellenden Kerr Range, which reach an elevation of over 5,000 feet above the sea level.

### *Products and Industries.*

Between the main range and the sea, especially on the banks of the rivers, there are large quantities of good alluvial land, which in its natural state is covered with a dense growth of timber. Much of this, in the more settled portions of the country, has been cleared and cultivated, and is found to yield a remunerative return to the farmers, who are usually small proprietors, cultivating the soil principally with their own labour, and growing chiefly sugar, maize, English and sweet potatoes, arrowroot, and semi-tropical fruits.

The year 1902 witnessed the culmination of an unprecedented period of drought, and the reduce output of all primary products at that period resulted in general depression throughout the State.

Sugar growing is a very important industry. In 1916 there were 167,221 acres under cane, of which 75,914 acres were crushed, yielding a return of 4,579,514 tons of cane, which produced 176,973 tons of sugar at 94 % net litre.

Maize was grown on 181,405 acres, and returned a yield of 3,018,934 bushels, but the local demand is so great that practically none is sent out of the State.

Tobacco Cultivation.—During the year ended 31st Dec., 1916, 317 acres yielded 231,967 lbs. of cured leaf.

*In 1916 the quantity of land under arrowroot was 306 acres, which yielded 2,643 tons of tuber. A small proportion of this root is utilised for pig food.

*Outside Australia there are restrictions as to the term "Arrowroot." Although it is admitted that the product in Queensland—derived from "Canna Edulis"—meets all requirements, yet the term "Arrowroot" having been acquired by virtue of many years of trading, dealing with the product of another plant, namely "Maranta Arundinacea," the Queensland product has been practically prevented from entering the English market without such qualifications on the package as would prevent sale and exportation outside the Commonwealth.

Digitized by Google

Amongst other fruits bananas occupied 9,300 acres with a production of 1,051,212 bunches of fruit. Pineapples, 4,136 acres, with 867,221 dozen. Oranges, &c., 4,142 acres, with 227,545 bushels, the total value of all crops for 1916 was 6,019,006*l.*

Much of the country to the west of the dividing range of mountains is elevated tableland, consisting of wide plains, sparsely timbered but well grassed and watered, embracing many millions of acres of excellent agricultural soil. Within a certain distance of the mountains where the rainfall is tolerably regular, most of the land is well adapted for the production of wheat. This is cultivated in the neighbourhood of Toowoomba and Warwick on the Darling Downs; also at Roma and Mitchell further to the west. There is every prospect of the area of cultivation extending to the Burnett District and further west in the near future. In 1916, out of the total area planted with this cereal, 21,047 acres were mown for hay, and 227,778 acres yielded 2,463,141 bushels of grain, 10,915 acres were cut for green forage.

Grazing is far in advance of tillage farming in the State, and there are 1,936 squatting "runs" or tracts of land, containing 215,950,840 acres, leased from the Government at a very low annual rental, more than half the number of which are surveyed, besides which an additional area of 109,392,841 acres are leased as grazing farms, homesteads, and under occupation licence.

The chief exports oversea of home production were:

Goods sent to other States of Australia are not now counted as exports.

In some items the details given are of practically no value. Notably gold, green fruit, sugar, etc., and a goodly proportion of other primary products which, being transhipped in other States, are not now counted to Queensland in official statements.

The imports are textiles, alcohol, tea, flour, hardware and machinery, oils, &c. Nearly all of the external trade is with the United Kingdom and the other Australasian States and Colonies; what little is done elsewhere is principally with Hong Kong, Germany, India, China, and the United States.

*All sent to Southern States for further treatment prior to exportation (see production).

The mining industry is one of the most important in the State. The leading gold mines are situated at Charters Towers—the Rockhampton district, which includes the famous Mount Morgan mine—Gympie, Croydon, and Etheridge; but groups of other gold mines, some of considerable value, are being worked in over twenty-eight districts apart from those above-mentioned. The total production of gold during 1916 amounted to 215,162 fine ozs., value 913,951*l.*

Many other minerals are worked in the State. The principal of which and their value for 1916 were:—

*Tin.*—181,401*l.*, the chief centres of production being Chillagoe, 17,580*l.*; Cooktown, 26,812*l.*; Herberton, 85,364*l.*; Kangaroo Hills, 14,190*l.* and Stanthorpe, 34,542*l.*

*Silver.*—31,395*l.* Burketown, 1,035*l.*; Charters Towers, 2,816*l.*; Chillagoe, 711*l.*; Cloncurry, 7,664*l.*; Etheridge, 2,817*l.*; Gympie, 878*l.*; Herberton, 6,293*l.*; Mt. Morgan, 4,911*l.*; Rockhampton, *nil.*; Stanthorpe, 646*l.*; and Croydon, 1,917*l.*

*Limestone.* — 45,973*l.* Cloncurry, 24,723*l.*; Gladstone, 4,148*l.*; Rockhampton, 14,119*l.*

*Ironstone.*—37,781*l.* Rockhampton, 35,036*l.*

Total value of minerals other than gold, 3,107,056*l.* Excellent opals are also obtained from the western and extreme south-western portions of the State, the output for 1916 being of the value of 500*l.*,† whilst precious stones, comprising chiefly sapphires and other corundums, were found over an extended area. At Anakie, on the Central Railway, gems to the value of 14,733*l.*† were obtained last year. Excellent coal continues to be raised in the environs of Ipswich, the Burrum and Peak Downs, the Dawson Valley and the Darling Downs, whilst valuable deposits of this mineral are about to be worked at Callide, as well as in other portions of the central districts; but besides these pits numerous workable seams of this mineral are known, and their being actively worked depends solely on the opening of an extended market. The total output for 1916 was 907,727 tons, valued at 389,348*l.*

Useful timbers of various descriptions grow in abundance in Queensland, and ought to become a valuable export. The timber indigenous to the State is popularly divided into two classes, termed respectively "hard" and "soft" woods. The undermentioned trees supply the hard wood, which is most in demand: blue gum, flooded gum, iron bark, blackbutt, turpentine, stringy bark, spotted gum, bloodwood, beech, yellow wood, dark yellow wood, crows ash, &c., &c. Some of these woods are especially valuable for railway making, bridge, pier, and wharf building, as well as for fencing purposes, on account of their strength and durability. The timbers which are used for

† Owing to the War gems and opal were practically unsaleable.

Digitized by Google

house and boat building, cabinet and ornamental work, have a fine grain, are easily worked, and take a bright polish; a few of those most in use are as follows: red cedar, Moreton Bay pine, Bean tree, Kauri pine, Cypress pine, She pine, silky oak, satin wood, maple, &c., &c.

| | Timber. Super ft. |
|---|---|
| Pine .. .. .. | 75,231,330 |
| Cedar .. .. .. | 290,738 |
| Hardword .. .. | 37,706,944 |
| Other timber .. .. | 8,621,587 |
| | Number. |
| Railway sleepers .. | 491,958 |

N.B.—The quantity actually *cut* for all purposes is estimated at nearly *double* these quantities.

Amongst the medicinal plants supplying extracts and preparations which are attracting notice in both Europe and America, may be mentioned—*Duboisia myoporoides*, the extract of which is in demand as a substitute for belladonna; *Alstonia constricta*, whose bark is a valuable tonic; *Euphorbia Drummondii*, the extract of which is effective in dysentery and low fever; *Euphorbia pilulifera*, or the asthma herb; and the lemon-leaved iron bark which, on distillation, yields an essential oil equal to that of the lemon. The extract from leaves of the eucalyptus has come largely into favour as a remedy for colds, fevers, &c.

Brisbane, Maryborough, Bundaberg, Rockhampton, and Townsville are ports of registry, and had, on 31st Dec., 1916, 289 vessels on their registers, of a total tonnage of 27,608.

### *Water Supply.*

A considerable sum has been advanced from time to time to municipalities and boards for the construction of works for the supply of water to the city of Brisbane and to towns in the State, of which a large proportion has been repaid, leaving at the end of 1916 an indebtedness to the Government of 2,127,888*l.*

An important feature of the country west of the coast range is the proved existence of artesian water in some 376,800 of the 670,500 square miles comprising the area of the colony. At least 2,816 artesian bores have been sunk with an aggregate depth of 528·69 miles; the depth ranges from a maximum of 5,045 feet, the depth of the bore at Bimerah Run; 1,027 of these bores overflow. The daily yield ranges from 4,000,000 of gallons downwards, and the aggregate total output is over 433,877,460 of gallons per diem. Generally stated, the waters are soft, and otherwise of excellent quality. The static pressure at the surface ranges from fully 270 lbs. per square inch, as at the Government bore at Thargomindah, to a few lbs., and the temperatures of the waters range from 210° to 81° Fahr. The amount expended in boring for artesian water is estimated by the Government hydraulic engineer at about three-quarters of a million sterling, exclusive of the cost of casings, so that not far short of a million sterling represents the amounts expended, chiefly by pastoralists, in improving and increasing the value of the national estate. In addition to this expenditure, Government have expended large sums on the construction of water conservation works on main roads and stock routes, and these works have opened up country, facilitated settlement, and added to the value of public lands.

Irrigation has made a start in the State, and owing to the unfavourable season 10,886 acres were artificially watered last year. The crop chiefly watered is sugar cane, but vegetables, fruit, and grass lands are similarly treated.

### *Population.*

The population of Queensland, excluding the aborigines, was found by the returns of the census of April, 1881, to be 213,525 persons; a census was taken on the 1st of May, 1886, when it was found that the total population was 322,853 persons, an increase of 51·20 per cent. in 5 years; and the census of 5th April, 1891, showed the population to be 393,718; of these 223,799 were males, and 169,939 females. The census of 3rd April, 1911, showed that there were 329,506 males and 276,307 females, making a total of 605,813, exclusive of 8,687 aborigines. The population is mostly either Australasian born or of European parentage. The figures for 1911 do not include all aborigines, but only those living under civilised conditions. Population of State 30th June, 1916, 681,302 persons.

Census, 3rd April, 1911.

Practically the whole of the State is divided into local authority areas a few islands only being excluded, occupied by a population of about 1,500 persons. The receipts of the local authorities, including Water Boards and Shires, in 1916 were 1,633,135*l.*; their expenditure 1,715,194*l.*; the assessed capital value of the property in districts under their control 62,280,061*l.*, excluding cost of construction of waterworks (3,010,438*l.*), and liabilities 3,529,543*l.* Liabilities for water works, amounting to 1,777,176*l.*, which are due principally on behalf of these local bodies, are included in the figures given; assets, 4,933,944*l.*

Brisbane, the capital of the State, is beautifully situated on the fine river of that name about 20 miles from the mouth. The city, including its suburbs, had, on 31st December, 1916, an estimated population of 168,393 (ten mile radius). It is only about 10 miles in a direct line from the sea coast; the climate is healthy, and during the greater part of the year most enjoyable.

The other chief towns are Townsville (13,835), Ipswich (25,000), Maryborough (11,626), Rockhampton, including North Rockhampton (20,915), Gympie (12,419), Toowoomba (24,200), Charters Towers (17,298), Bundaberg (11,988), and M'Morgan (12,023). All these include an area of ten-mile radius, except Charters Towers which is for a five-mile radius. (Census 1911.)

### *Currency and Banking.*

There were, on 31st December, 1916, 11 banks, exclusive of the Commonwealth Bank, with 334 branches. The value of the coin and bullion is given as 2,440,856*l.*; deposits, 24,112,051*l.* The State Government Savings Bank, on 30th June, 1917, with 466 branches return the number of depositors as 224,392; the amount of deposits as 12,574,813*l.* Average value of each account 56*l.* 0*s.* 9*d.*

Digitized by Google

The Commonwealth Savings Bank, Queensland Branch, had on 30th June, 1917 :—

| | |
|---|---|
| No of Depositors .. .. | 57,193 |
| Value of Deposits .. .. | 2,151,145*l.* |
| Average Value of each A/c. | 37*l.* 12*s.* 3*d.* |

The currency and legal tender is exclusively British sterling. The Commonwealth has also silver coin in circulation and British coin is being gradually withdrawn, but some years will elapse before local coin is exclusively in use.

*Means of Communication.*

Queensland is divided for the purpose of Railway adminstration into three divisional railway systems, Southern, Central and Northern, in which on 30th June, 1916, there were altogether 5,357 miles of Government Railways open for traffic, being the longest mileage of open Railway in any Australian State, and 442 miles of Railways and Tramways of 3 ft. 6 in. gauge owned by private companies or Local Authorities and which are either worked by or under the Commissioner's inspection. On 1st Sept., 1917, there were 323 miles of Railway under construction, and 1,469 authorised by Parliament but not yet commenced.

The Central and Northern Divisions are each in charge of Deputy Commissioners, subject to the control of the Commissioner at Brisbane.

From Brisbane main trunk lines run west and north. The former crosses the Main Range (2,000 ft. high) and shortly after passing Toowoomba at the entrance to the Darling Downs, 101 miles from Brisbane, bifurcates, one arm proceeding due west through pastoral and wheat growing country until it reaches Cunnamulla (604 miles from Brisbane), the other crosses the Darling Downs and passing through the granite district in which are many flourishing fruit orchards, terminates at Wallan-Garra on the New South Wales border (223 miles from Brisbane). Here connection is given with the mail train services to the southern capitals. Off the western and southern Lines there are 14 Branches, with a total length of 688 miles, serving rich agricultural and pastoral districts, and when the construction of the additional lines authorised into these areas is an accomplished fact a vast increase in staple products due to closer settlement will result.

Within a radius of 100 miles from Brisbane there are 13 branch lines of 394 miles in length serving the suburban areas, seaside resorts, and rich agricultural and heavily timbered districts. One of these lines running due south meets the New South Wales border at Tweed Heads, 69 miles from Brisbane.

The Northern Trunk Line after leaving Brisbane follows the coast line for 397 miles to Rockhampton, passing through the towns of Gympie, Maryborough and Bundaberg and giving connection at the ports of Gladstone and Port Alma with the steamer services to the northern ports of the State. Off the Trunk Line there are ten branches, totalling 480 miles in length, serving agricultural, mineral and sugar lands, and heavily timbered districts.

The Central Line extends from the town of Rockhampton due west to Longreach, 428 miles, passing through pastoral country, with 8 branches of 390 miles of line into agricultural, pastoral and mineral areas, and to the port of Broadmount on the Fitzroy River, some 36 miles below the city wharves. North from Rockhampton the railway has been extended to Marlborough, a distance of 63 miles, and a further portion of this section of the North Coast Railway, which will, in time, link Cairns and Brisbane, is under construction towards St. Lawrence.

From the port of Mackay, 540 miles north of Brisbane, a short Line runs through the sugar growing country east of the Eungella Range, with three small Branches running north and south, a distance of 28 miles, into sugar country. In this district there are over 200 miles of light tramways into the sugar plantations and mills. From Mackay southward the coastal line has been constructed for a distance of 36 miles to Koumala, and a further section of 25 miles is being built to Carmila Creek, whilst north from Mackay, a section of 31 miles to St. Helens is in hand.

From the port of Bowen 645 miles north of Brisbane, a Line runs northward for 120 miles through pastoral and sugar growing country to the port of Townsville, and a branch line three miles from Bowen, 39 miles in length, runs southward into the rich sugar land of Proserpine. Both Lines will eventually form a link in the North Coast Trunk Line.

The Great Northern Railway which commences at the port of Townsville, 748 miles north of Brisbane, runs west for 481 miles through the well known mining town of Charters Towers, 82 miles from the Port, and from Hughenden (236 miles) the Line runs due west for over 200 miles through Northern Downs, pastured with millions of sheep, to the rich copper mining district of Cloncurry, thence with a southerly sweep to Malbon, where it bifurcates to the mining districts of Hampden, Mt. Elliott and the Duchess. North from Cloncurry another line, 69 miles in length, has been built to serve the Mt. Cuthbert Mineral District. At Hughenden a Line runs south-west to Winton, a distance of 132 miles, through fine pastoral country. At 54 miles from the Port another Branch runs south to the town of Ravenswood, until recently a flourishing mineral township; a portion of the Coastal Railway north of Townsville has been constructed.

In the far north over 900 miles from Brisbane from the port of Cairns, a line of Railway runs west over the Barron Ranges, past the famous Barron Falls, through some of the most picturesque tropical scenery in the world, through the wonderful timber scrubs of Atherton, the mineral township of Herberton, to the rich table land at the heads of the Herbert and Johnstone Rivers. A Branch Line joining the Main Line 64 miles from Cairns runs along the Johnstone River through rich scrub lands. At Mareeba, 46 miles from the Port, the private line of the Chillagoe Company junctions with the Cairns Railway. This private line runs to Mungana, a distance of 103 miles, and 75 miles from this junction another line 143 miles in length serves the rich mineral fields of the Etheridge, whilst from Dimbulah another line of 30 miles taps the coal fields of Mt. Mulligan.

From Cairns another railway runs southward along the coast for a distance of 42 miles, serving some of the richest sugar producing lands in Queensland. The extension of this Line will form another section of the Main North Coast Trunk Line.

From Cooktown, the furthest Northern port on the Eastern Coast, a railway runs to Laura, a distance of 67 miles.

From Normanton in the Gulf country a railway runs to the mineral town of Croydon, a distance of 94 miles.

Digitized by Google

The Lines under construction in Queensland embrace a comprehensive scheme of linking up the ports on the Pacific coast by railway, and the building of a transcontinental railway connecting the termini of the railway systems in the far west.

*Education.*

A Government system of elementary education was established by Act 39 Vict., No. 11. The central administration is vested in the Secretary for Public Instruction, and is carried out through the medium of travelling inspectors. Local school committees assist the department with advice and supervision. In 1916 there were in operation 1,512 State (including 7 high) Schools, with an enrolment of 129,403 pupils. The schools are free and unsectarian. There are also 144 private schools, with 18,221 children, and 10 grammar schools, with 1,636 pupils on the roll. A University is now established with 4 professors, 25 lecturers, etc., enrolment 213. There are no local rates for education, which in the primary schools is entirely paid for by the State. A system of technical instruction, conducted by Local Committees, is liberally endowed by the State.

*Immigration.*

The arrivals into the State from places outside the boundaries numbered 130,538, and the departures to all countries 151,860, showing an excess of departures of 21,332 (including Expeditionary Forces).

*Government.*

The constitution is regulated by the Letters Patent of 6th June, 1859, and Act 31 Vict., No. 38. The Legislature is formed of two Houses of Parliament, the Legislative Council or the Upper House, and the Lower House or Legislative Assembly. The members of the Council are nominated by the Governor, and hold their offices for life. The members of the Legislative Assembly are elected. There is no property qualification required for membership in either branch of the Legislature. The voting for members of the Assembly is by ballot. The Elections Act Amendment Act of 1905 provides for male and female adult franchise on residential qualification only, a twelve months' continuous residence in the State being the only proviso, subject to disqualifications for insanity, criminality, wife desertion, etc.

In the Upper Chamber of the Legislature there are at present 49 members, including the President of the Council. By the Electoral Districts Act, of 1910, the State is divided into 72 districts, each returning one member, or a total of 72 members as previously.

## SOUTH AUSTRALIA.

*Situation and Area.*

That portion of the Continent of Australia bounded on the east by the 141st degree of east longitude, on the north by the 26th degree of south latitude, on the west by the 132nd degree of east longitude, and on the south by the Southern Ocean, was constituted a British Province by Act of Parliament, 4 and 5 William IV., c. 95, under the designation of SOUTH AUSTRALIA. In 1861, the territory known as "No Man's Land," about 80,000 square miles, lying between the boundaries of South and Western Australia, was added by Act 24 and 25 Vict., c. 44, making the western boundary the 129th degree of east longitude. The area contained within those limits is estimated to be 380,070 square miles.

All the country from the 26th parallel of south latitude to the Indian Ocean, between the 129th and 138th degree of east longitude, was also annexed to South Australia, but was on January 1st, 1911, taken over by the Commonwealth. It is known as the Northern Territory.

Kangaroo Island (90 m. by 25 m.; area 1,500 sq. m., 1,000 ft. highest point), Nuyts Archipelago, the Gambier, and other islands on the south coast, are included in the State.

Adelaide, the capital of the State, is situated about five miles from the eastern shore of St. Vincent's Gulf, in latitude 34° 57′ S. and longitude

Digitized by Google

130° 38′ E., and Port Adelaide, the principal port, is about seven miles north-west from the city, and connected therewith by rail.

*Early History.*

The south coast of the State was surveyed by Flinders in 1802, and Stuart in 1829 discovered the Murray River and its upper tributaries. The South Australian Company, upon Wakefield's principles, was formed in England in 1834, under the Act mentioned above, and the first settlements were formed at Kangaroo Island and Adelaide in 1836. Copper was discovered 1842, by Menge. Responsible government was established in 1856. Sturt reached Port Darwin 1861, and the "Northern Territory" was added to the State in 1861 and 1863. (Since transferred to the Commonwealth Government.)

*Climate.*

The rainfall at Adelaide averages 21 inches annually, mostly from May to October. It varies from 16 to 42 inches on the plains and hills respectively. The mean temperature 63°, the extreme range being from 33° to 111°.

*General Government.*

The Parliament of South Australia consists of a Legislative Council and a House of Assembly, created by the Local Act No. 2 of 1855-56, which was proclaimed on October 25th, 1856. This Act, commonly called the Constitution Act, was passed by virtue of the Imperial Act 13 & 14 Vict., cap. 59.

The Legislative Council and House of Assembly, as originally constituted, consisted of 18 and 36 members respectively. By the Local Act No. 27 of 1875, the House of Assembly was increased to 46 members, representing 22 electoral districts. By Act No. 236 of 1881, six members were added to the Legislative Council, and the Colony was divided into four electoral districts for the purpose of Council elections. In 1882 the House of Assembly was further increased to 52 members, representing 26 electoral districts; and by Act No. 450 of 1888, the Northern Territory was created an electoral district, returning two members, thus raising the number to 54. By Act 779 of 1901, the number of members was reduced from 31st March, 1902, to 18 in the Legislative Council and 42 (representing 13 districts) in the House of Assembly. The Northern Territory having been transferred to the Commonwealth Government, the Electoral Districts then numbered 12, returning 40 members. By Act 1148 of 1913 the assembly Districts were altered, and now number 19, returning 46 members.

The five electoral districts of the Legislative Council are—Central No. 1, Central No. 2, Southern, Midland and Northern, each returning four members. (*Vide* Section 10, Act 959 of 1908, and Section 15 of 1148 of 1913). Elections are conducted by ballot. (*Vide* Section 21, Act 959 of 1908.)

The quorum of the Council consists of ten members, including the President.

The qualification for a member of the Legislative Council is that he shall have attained the age of 30 years, that he be a subject of the King, and that he has resided in the State for three years. The qualification of a voter is that he shall be 21 years of age, a natural-born or naturalized subject of His Majesty, and have resided in South Australia six months. As to other qualifications, see Act 1148, 1913. Members of both houses are paid 200*l.* per annum.

The House of Assembly, which is liable to dissolution by the Governor, is elected for three years; 8 Districts returning 3 members each, and 11 Districts returning 2 members each. The Constitution Act prescribes no other qualification as necessary for a member of the House of Assembly than that he shall be qualified and entitled to be registered as an elector. An elector's qualification to vote is that he shall be of full age, a natural born or naturalized subject of His Majesty, and have lived in South Australia for six months. The total number of electors in 1916 for the Legislative Council was 95,625, of whom 23,796 were females, and 71,829 males, and for the House of Assembly 251,860, of which 128,370 were females, and 123,490 males. The session is usually from June to December.

The franchise for both Houses was extended to adult women by Act 613 of 1894.

Responsible government is carried on by six Ministers, members of the Legislature, who form the Cabinet, and are *ex-officio* members of the Executive Council.

*Local Government.*

There are 34 municipalities in the State, whose powers are regulated by the "Municipal Corporations Act, 1890." The governing body consists of Mayor, Aldermen (Aldermen are at present elected for City of Adelaide and some of the Suburban Corporations only), and Councillors, elected by the ratepayers, who also elect the Auditors. The Council has power to levy rates for municipal purposes only on all house and land property within the municipal area, but the question of raising a loan must be submitted to a general meeting of the ratepayers, and a poll must be taken if demanded by six ratepayers. There are also 149 district councils having somewhat similar powers. The aggregate annual assessment of the property within the municipal areas and District Councils amounts to 4,668,868*l.*, and the revenue in 1916 amounted to 477,971*l.*, and the expenditure to 460,511*l.* In addition, the receipts for main roads amounted to 96,836*l.*, and the expenditure to 90,082*l.*

*Population.*

The population of the State at the census of 1901, was 358,346 persons, and of 1911, 408,558. This does not include the aborigines, of whom there are about 3,000. In 1911 there were 255 Chinese in the State. The immigration of Chinese is controlled by the Commonwealth Government under the Immigration Restriction Act, No. 17 of 1901. The population of the State on 30th June, 1917, was estimated to be 429,950. This excludes about 30,000 men on active service with the Australian Expeditionary Forces.

The inhabitants of the City of Adelaide, including the suburbs, on 3rd April, 1911 (census), were 192,294. On 31st December, 1916, they numbered 223,718.

About 85 per cent. of the whole population are members of Protestant Churches, and the remaining 15 per cent. are Roman Catholics. The Church of England is represented by 28 per cent.

*Education.*

The University of Adelaide was founded by Royal Letters Patent in 1881, and an Act of the local Parliament in 1874. It was endowed by private munificence, aided by an annual grant of

Digitized by Google

5 per cent. on all sums contributed from private sources, and an endowment of land, the total amount of income for 1916 being 27,427*l*. The University has the power of granting degrees in arts, law, medicine, science, and music; the staff consists of 11 professors, 59 lecturers and assistants and 13 teachers in the Conservatorium of Music. All classes are open to women. It had in 1916 301 undergraduates and 207 non-graduating students (exclusive of 281 students at the Conservatorium of Music), besides those attending extension lectures. Total expenditure, 25,485*l*.

In connection with the Art Gallery 2 Schools of Design have been formed, in which 700 students are instructed in painting and designing for technical purposes.

The School of Mines and Industries was established in 1889. It is supported by an annual parliamentary vote of about 9,000*l*. and by school fees. Diplomas are awarded in mining, metallurgy, and mechanical engineering. The staff consists of about 70 officers and teachers. The students number 2,409. In addition, 350 children from public schools received instruction in domestic economy. There are in addition five Schools of Mines in the country at Gawler, Moonta, Kapunda, Port Pirie and Mount Gambier.

Primary, secondary and technical education is provided for by the Education Acts of 1875, 1878, 1879, 1891, 1905, and 1915, by which the management of public education is committed to a Minister of Education—a member of the Cabinet. The education is secular, but not to the exclusion of the Bible; free from January 1, 1892, up to the compulsory standard, and it has been compulsory since 1876. In 1916 there were 858 schools, with 2,112 teachers, and 66,982 scholars. Included in these are 30 High (secondary) schools, with 130 teachers, and 3,047 scholars, and technical education is to be imparted in future.

The expenses of the Education Department for payment of teachers, etc., buildings, were during 1916, 350,616*l*. The total expenditure from loan money on school buildings up to December 31, 1916, was 759,135*l*.

Towards the maintenance of the South Australian Public Library, Museum, and Art Gallery, also country institutes the sum of about 20,000*l*. is annually granted by the Government.

### *Administration of Justice.*

The legal tribunals of the State consist of a Supreme Court, presided over by the Chief Justice and two Puisne Judges; the Court of Vice-Admiralty, of which the Chief Justice is Judge; Circuit Courts at Naracoorte, Mount Gambier, Port Augusta, and Gladstone, presided over by Judges of the Supreme Court; the Court of Insolvency, presided over by a Commissioner, who is a Stipendiary Magistrate, or by a Judge of the Supreme Court; Local Courts of Insolvency at Port Augusta, Gladstone, Mount Gambier, and Moonta, presided over by Stipendiary Magistrates; Local Courts of Civil Jurisdiction in all the principal towns throughout the State with full Jurisdiction, presided over by Stipendiary Magistrates, and Limited Jurisdiction, by Justices of the Peace; and Police Magistrates' Courts.

The number of persons convicted in the Supreme Court in 1916 was 52, approximately one in every 8,500 of the population.

### *Land Transfer.*

The Statute known as the Real Property Act of South Australia affords a process by which the transfer of landed property may be accomplished in as easy and cheap a manner as any ordinary commercial transaction. There can be no question that the operation of the measure has been highly advantageous to the community.

### *Loans for Public Works.*

Legislative sanction has been accorded from time to time for the raising of money by way of loan, for the prosecution of reproductive public works—such as railways, tramways, waterworks, telegraphs, harbour improvements, and other public purposes.

### *Currency and Banking.*

The legal tender and usual currency is exclusively British sterling.

Eight banking institutions in addition to the Commonwealth Government Bank carry on business within the State, all of which have establishments in the principal seaports and inland townships—numbering altogether 265 branches and agencies. Their names are: The Bank of Australasia; Union Bank of Australia, Limited; National Bank of Australasia, Limited; English, Scottish, and Australian Bank, Limited; Bank of Adelaide; Bank of New South Wales; Commercial Bank of Australia, Limited; and London Bank of Australia, Limited. The total average liabilities of the nine banks amount to (June, 1917) 16,419,980*l*., and the total average assets to 13,691,114*l*.

The Savings Bank is managed by a Board of Trustees appointed by the Governor, and has 29 branches and 279 agencies. The number of depositors on 30th June, 1917, was 269,110 and the total deposits amounted to 10,286,135*l*. Rate interest paid to depositors, 4*l*. per cent. The Commonwealth Savings Bank had 25,312 depositors and 1,042,854*l*. deposits at the same date. Nearly 75 in every 100 persons of the population are depositors in savings banks, the deposits averaging about 26*l*. per head of population.

### *Penny Banks.*

Agencies at schools, 511; depositors, 25,538; deposits, 22,362*l*.

### *Industry.*

It may be roughly estimated that not more than 150,000 square miles of the area of the State, are at present put to profitable use. Agricultural settlement has not extended 300 miles from the coast; and pastoral occupation may be said to have reached 1,200 miles. Forty-eight counties have been proclaimed to 30th June, 1917, embracing 84,103 square miles, or 53,825,920 acres. The area outside the declared counties covers 295,967 square miles, or 189,418,880 acres. Of the area of the State only 13,921,646 acres have been or are being alienated from the Crown—amounting, nevertheless, to about 90 acres for each male adult in the State about 115,000,000 acres being held under lease from the Crown. 2,943,395 acres are in process of alienation under systems of deferred payments. About two in every five acres of the alienated land is under tillage; the remainder is used for pastoral purposes only. All land is surveyed by the Government prior to leasing, and is divided into farms of extent varying from 80 to 20,000 acres—the necessary reserves being made public for railways, highways, watering stock, etc.

About two-thirds the total area of land cultivated is cropped with wheat (for grain, hay and

Digitized by Google

fodder), of which 3,112,479 acres were cultivated in 1916-17. The total area under cultivation was 5,118,607 acres. The following were the main crops grown in 1916–17:—Wheat, 45,745,064 bushels; oats, 1,839,541 bushels; barley, 1,734,420 bushels; hay, 615,059 tons; and the estimated value of the crops in 1915-16 was 12,833,147*l.*, or 29*l.* 3*s.* 8*d.* per head of population. The value of breadstuffs exported to oversea countries averages over 3,000,000*l.* annually.

Vine culture is an important and progressive industry; 27,764 acres of land were devoted to this purpose in 1915. Wine made, 3,709,878 gals. Exported oversea, 380,719 gals. The slopes of the hills produce wines of a full-bodied character similar to those of Spain and Portugal, whilst those made in the more elevated districts resemble the lighter wines of the Rhine. Whilst the local demand is fully supplied at very cheap rates, a considerable export trade in wines of a higher character is carried on. The wines of South Australia have always been awarded prizes at the several Great International Exhibitions.

Considerable attention has also been paid to the drying of raisins and currants; of the former 59,929 cwts., and of the latter, 66,518 cwts. were made in 1915. In 1916-17, 1,365,780 lbs. raisins and 1,655,114 lbs. currants were sent to oversea countries.

Almond trees (261,434) are of rapid growth, and large quantities of a superior description of soft-shell almond are gathered yearly for home consumption and for shipment. Apple trees, 1,061,753; apricot trees, 263,180; orange trees, 330,186; lemon trees, 38,354; pears, 205,440; plums, 180,936; peaches and nectarines, 283,013; cherries, 87,182; and also figs, quinces, raspberries, strawberries, gooseberries, walnuts, peanuts, etc. The principal kinds of fruits produced last season were as follows:—Apples, 832,872 cases, of which 119,610 cases were exported; apricots, 159,077 cases; pears, 118,268 cases; and plums, 114,014 cases. The dried fruit production was as follows:—Apricots, 3,939 cwts.; apples, 2,362 cwts.; peaches, 1,844 cwts.; and plums, 2,106 cwts.

The State possesses all the conditions requisite for the successful and profitable culture of the olive, 26,964 gallons of oil being expressed during 1913. Olive oil of the most delicate character has been expressed, and gained awards at the various Exhibitions. Its purity and superiority general over the imported article of commerce has acquired for it a high position in the local market.

Potatoes, onions, turnips, carrots, mangolds, pumpkins and melons, tomatoes, and practically all kinds of vegetables grow well in the State, their production in 1915 being valued at 240,995*l.*

In 1851 the total area of land leased from the Crown for pastoral purposes was 15,000 square miles. In 1916-17 there were 150,580 square miles in pastoral occupation. During the same period the number of horses has increased from 6,500 to 257,422; of horned cattle from 75,000 to 288,887; and of sheep from 1,000,000 to 5,091,282, whilst the exports of wool have increased from 4,000 to 100,744 bales. Last year there were made 9,547,932 lbs. of butter, and 2,463,271 lbs. of cheese; and 4,034,957 lbs. of bacon and hams were cured. In normal seasons, large quantities of butter, frozen meat, etc., are exported to Europe, in addition to tallow and skins and hides.

The number of manufactories is 1,266, employing 25,496 hands and 42,164 horse-power actually used. Wages paid 2,705,130*l.* Total value production 13,994,223*l.* Value of land, buildings, plant and machinery, 6,494,322*l.*

A few years ago, flour mills and tanneries were almost the only representatives of local manufactures; whilst these have largely increased in number and efficiency, many important additions have been made to the list, and there are now many steam flour mills, saw mills, foundries, agricultural implement works, breweries, and factories for clothing, boots and shoes, saddlery, jams, aerated waters, soap and candles, fertilizers, joinery, cycles and motors, brushware, glassware, etc., etc. Several marble and slate quarries of excellent quality, and over 100 building stone quarries have been opened.

The gasworks of the State are nine in number, of which one is for the supply of the City of Adelaide and suburbs, one is at Port Adelaide, one is at Glenelg, and the remaining six are in the principal country towns. There are also six electric supply companies.

The output of the electric and gas light and power establishments has increased from 293,215*l.* to 433,810*l.* or by 50 per cent. during the last five years.

278 vessels, of 74,073 tons, belonged to Port Adelaide.

Out of 8,533,912*l.* worth of produce exported oversea the value of breadstuffs amounted to 3,592,060*l.*; while wool represented 1,976,438*l.*; fruits and wine, 142,729*l.*; butter, 155,303; meats, tallow, etc., 104,454*l.*; concentrates and ores, 1,048,798*l.*; lead, pig, 454,439*l.*; bullion and specie, 439,250*l.*; copper, 173,700*l.*; zinc, 82,547*l.*; skins and hides, 204,378*l.*; animals, living, 17,663*l.*; leather, 42,837*l.*; manures, 29,111*l.*

The chief imports are textiles, sugar, alcohol, tea, hardware, and machinery, manures, paper, oils, timber and vehicles. The total external trade is 14,652,964*l.*, far the larger part of which is with the United Kingdom, the bulk of the remainder being with other British Countries, the United States, France, Italy, Russia and Japan.

The chief copper mines are those at Moonta and Wallaroo; the chief gold fields, Arltunga, Angipena, Barossa, Blumberg, Echunga, Luxemberg, Mount Grainger, Mount Pleasant, Mount Torrens, Nillinghoo, Tarcoola, Teetulpa, Ulooloo, Wadnaminga, Woodside, and Waukaringa, and Burrundie MacDonnell Ranges in the N.T. The minerals produced during the year 1916 were valued at 1,212,874*l.*, the chief being copper 822,527*l.*, gold 33,000*l.*, salt 83,000*l.*, and ironstone flux 200,382*l.*

The output of the smelting works has increased by 200 per cent. during the last five years, reaching 5,793,280*l.* in 1916-17, and our lime, cement and cement pipes establishments had an output of 98,988*l.*

### *Means of Communication.*

There are 43,620 miles of roads defined in the settled districts, the greater portion of the cost of which has been defrayed from the General Revenue—no special toll or rate having been levied. The aggregate number of miles macadamised is 10,109. In addition to the main lines, perhaps as many more miles of district or by-roads

Digitized by Google

have been constructed and kept in repair by local municipalities out of rates and grants in aid.

The railways are all constructed and worked by the Government. The mileage opened for traffic in the State is 2,221, exclusive of the Port Augusta Oodnadatta railway, 478 miles, and the East West railway, which are controlled by the Commonwealth Government. Up to June 30th, 1917, the cost of construction and equipment reached 17,687,344*l*. The receipts in 1916-17 were 2,273,530*l*., and the expenditure 1,725,341*l*. Working expenses average 60 per cent. of the gross revenue. Net revenue on cost, averages over 5 per cent. There is daily railway communication between Adelaide, Melbourne, Sydney, and Brisbane, and weekly between Perth.

The geographical position of South Australia necessitated early and earnest attention being devoted to the extension of the South Australian telegraphs, so as to afford communication with Melbourne, Sydney, Brisbane, Port Darwin, and Perth. To accomplish this South Australia, at her own risk, erected a line of telegraph, some 2,200 miles in length, at a cost of over 500,000*l*., across a continent which had only been traversed by an exploring party. An additional wire has been erected at a cost of over 50,000*l*. At present the railway reaches Oodnadatta, 688 miles north of Adelaide, and Pine Creek, 146 miles south of Palmerston, the intervening gap being 1,200 miles.

On the 30th June, 1917, there were 516 telegraph stations in the State, and the number of telegraph messages sent and received in 1916 was 3,570,996. There were 189 telephone exchanges, with 10,742 connections.

Internal water communication is afforded by the Murray River, on which steamers run for 2,000 miles. There is regular and frequent communication by mail steamers with all parts of Australasia as well as with Europe and San Francisco. The rates of postage are:—

| | Letters, per ½ oz. | Newspapers, each |
|---|---|---|
| Australasia | 1*d*. | not exceeding 10 ozs., ½*d*.; every additional 10 ozs. ½*d*. |
| United Kingdom | 1*d*. | not exceeding 8 ozs., 1*d*.; exceeding 8 ozs., but not exceeding 10 ozs., 2½*d*.; every additional 2 ozs. ½*d*.; when sent wholly by sea, 1*d*. for every 16 ozs. |
| All other Places | 2½*d*. | not exceeding 4 ozs., 1*d*.; every additional 2 ozs., ½*d*. |

The total number of Post Offices, 836; letters sent and received in 1916-17, 50,461,307; packets, 4,959,734; newspapers, 10,738,222.

Cable rate, London to Adelaide and *vice-versâ*, 3*s*. per word.

## TASMANIA.

*General Description.*

Tasmania is an island at the southern extremity of the continent of Australia, from which it is divided by Bass' Straits, 120 miles wide, the important colony of Victoria being on the other side of the straits. It lies between 40° 33′ and 43° 39′ S. lat., and 144° 39′ and 148° 23′ E. long.

*History.*

Tasmania was discovered in 1642 by the Dutch navigator, Abel Jan Tasman, and by him named Van Diemen's Land, the name by which it was known down to 1853. It was not discovered to be an island until 1797. It was formally taken possession of by England in 1803, and made auxiliary to the penal settlement at Botany Bay. The first free emigrants arrived in 1816, and the last convicts in 1853. Responsible government was introduced in 1856.

*Climate.*

Tasmania is one of the most healthy of the British possessions, and is never too hot in summer nor too cold in winter for out-door occupations to be carried on; nor is it subject to the droughts experienced in the other Australian States.

The three spring months commence in September, summer in December, autumn in March, and winter in June.

From observations taken at Hobart for 1915 the highest shade temperature recorded was 61·7° and the lowest 46·7°. The mean range for the year was 54·2. In 1915 rain fell on 198 days in the year, and the rainfall was a little more than 20·91 inches, the year being a very dry one throughout the island.

*Means of Communication.*

All the principal towns are united by telegraph. There are 2,806 miles of telegraph (with 4,374 miles of wire, including 408 of railway wires) open in the State. This excludes 432 miles of cable be-

Digitized by Google

longing to the Commonwealth Government. The total cost of telegraph and telephone construction up to 30th June, 1915, was 444,608*l.*, the receipts for telegraphs in 1914-15 being 23,814*l.* Construction including railway telegraphs and telephones, 1915, 462,115*l.* There are also 11,201 (wire) miles of telephone. Revenue in 1915-6, 28,600*l.*

There is a duplicate electric cable between Tasmania and Victoria, whence land-lines extend to Port Darwin, and thence to England *viâ* Java.

The number of messages received and despatched in 1915 was 746,017.

Steamers run between Melbourne and Launceston three times a week. Direct mail steamer from Hobart to Sydney twice a week. Direct mail steamer between Hobart and Melbourne, and Hobart and New Zealand every week. There are also steamers trading between Launceston and the north-west ports of Tasmania and Melbourne every week. The mail steamers from Sydney calling for fruit, also carry passengers. The steamer with mails from Melbourne to Colombo and London every week; time 32 days *viâ* Brindisi. The mail steamer from Sydney to San Francisco and thence to London, *viâ* New York, every four weeks; time about 40 days. The mail steamer *viâ* Vancouver, once a month. The mail steamer *viâ* Brisbane, Batavia, Aden, and Brindisi every four weeks; passage from Tasmania about 55 days. Direct communication is also afforded by the steamers of the Shaw, Savile Co. and New Zealand Shipping Co., one vessel of each Company calling at Hobart every 2 weeks.

In addition to the above, mails are deposited by Messageries Maritimes de France.

There are 400 (in addition to 65 receiving offices) places in Tasmania where post offices are established. The rates of postage are:—

| | Letters per ½ oz. | Newspapers. |
|---|---|---|
| Within Tasmania ... ... | 1*d.* | ½*d.* |
| Within Australasia ... ... | 1*d.* | ½*d.* |
| Also to the United Kingdom, oversea dominions, British colonies and protectorates (except the New Hebrides) | 1*d.* | ... |
| Europe, United States, etc.... | 2*d.* | 1*d.* per 4 oz. and ½*d.* every additional 2 oz. |

The number of letters and postcards and registered articles received and despatched in 1914 was 25,787,820; packets and newspapers, 12,419,223.

*Area.*

The State contains 26,215 square miles, the main island containing about 15½ million acres of land, and the smaller islands connected with it 1¼ million acres; 6,351,121 acres have been sold or granted to settlers by the Crown, leaving in the hands of the Crown land to the amount of 8,581,974 (incl. lakes) acres (exclusive of 1,830,590 acres) which are leased by settlers for sheep runs or other purposes, and 14,315 acres occupied by or reserved for State and Commonwealth Governments.

The adjacent islands are 55 in number, most of them being in Bass' Straits. The chief are the Furneaux group, including Flinders Island, Robbins Island, King Island, and Bruni and Maria Island on the east coast.

*Roads.*

The main road from the port of Hobart to Launceston is 123 miles long, passes through the centre of the State, and is maintained in fair order by the various municipalities. All the other main roads are under the control of municipalities, and are constructed and maintained by the Government. The cross and bye roads are under the care of local councillors, and are maintained partly by rates and partly by contributions from the Treasury.

*Railways.*

There are now 748½ miles of railway in the State, constructed mainly on the three foot six inch gauge. Of these 748½ miles, 581½ belong to Government, and cost 4,913,395*l.*, and 167 miles to private companies. The gross earnings of the government lines were 340,505*l.* and working expenses 289,186*l.* in 1916-17.

*Land.*

The upset price of Crown land fit for agriculture is 1*l.* an acre; the upset price of second-class lands a sum not less than 10*s.* an acre; and of third-class land a minimum of 5*s.* per acre.

Under the Crown Lands Act, 1903 (3 Ed. VII., No. 39), any person of the full age of 18 years may select for purchase, by private contract with the Government, one lot of first-class land not exceeding 200 acres, at 1*l.* an acre; 250 acres of second-class land, at not less than 10*s.* per acre; and 400 acres of third-class land, at not less than 5*s.* per acre, with one-third added for credit, payable by annual instalments for 14 years. First-class lands must be resided upon for 5 years and improved to the value of 1*l.* per acre before grant can issue, or any person of the age of 18, who has not already selected or purchased under that Act, may take up land, not less than 15 acres, or more than 50 acres, and beyond a deposit of 2*d.* per acre, no further payment is to be made until the fourth year. But a grant cannot be issued for the land unless improved to the extent of 1*l.* for every acre and resided upon for 5 years, inclusive of the 3 years' free occupation. Second-class lands must be improved to a value of 5*s.* per acre, and third-class lands to a value of 2*s.* 6*d.* per acre, before grant can issue therefor.

Credit is allowed on all purchases above 15*l.*

*Industry.*

The exports of the island are principally wool, grain, fruit, preserves, gold, copper, tin, wolfram, lead, hides, skins, and leather, hops, timber, vegetables, and tanning bark.

The land in crop on 1st March, 1916, was 333,334 acres and 675,335 acres permanently artificially sown grasses. There were in the State 169,575 horned cattle, and 1,624,450 sheep.

Tasmania possesses a great source of wealth in her minerals, which are now being turned to good account. Gold, silver, copper, tin, coal, wolfram, and also other minerals are found throughout the island. The principal goldfields are at Beaconsfield, Lefroy, and Mathinna. At Beaconsfield the Tasmania Mine is the main producer. Since the reef was discovered in 1877 up to 31st December, 1915, Tasmania mine has produced 841,244½ ozs. of gold, and the total amount paid in dividends is 772,672*l.* At Lefroy several mines are sinking, driving, etc. Silver is found on the west and east coasts. Total quantity of silver lead ore produced during the year ending 31st December, 1915, amounted to 10,382·95 tons, value 91,689*l.* Copper is also found, chiefly on the west coast, the Mount Lyell Mining and Railway Company's mine being a large producer. This company has its own smelting and reduction plants, and for the year ending

Digitized by Google

31st December, 1915, produced 7,901 tons of blister copper, etc., value 742,312*l*. Tin is obtained in various parts of the island, the principal workings being at Mount Bischoff in the north-west and Branxholm and Mount Cameron in the north-east. The Mount Bischoff Company produced during the year ending 31st December, 1915, 479 tons, and paid in dividends 21,000*l*., making a total of 2,455,500*l*. distributed amongst the shareholders. 1915, total tin 2,600 tons, value 292,306*l*. Coal deposits exist more or less throughout the State, the principal mines being the Cornwall and Mount Nicholas in the north-eastern part. Output for the year ending 31st December, 1915, 64,536 tons, value 30,418*l*., at pit mouth. Osmiridium is found in the Wilson and Savage Rivers and their tributaries. During the year ending 31st December, 1915, 247 ozs. were obtained, value 1,581*l*.

Dividends paid during 1913:—

| | | |
|---|---|---|
| Copper | ... ... | £ 39,445 |
| Tin | ... ... | 37,088 |
| Coal | ... ... | 1,203 |
| Silver | ... ... | 906 |
| | | £78,642 |

Hobart and Launceston are ports of registry, and had on 30th June, 1916, 215 vessels, of 11,349 aggregate net tonnage.

*Population.*

The population in 1881 was 115,705, of whom 61,162 were males, and 54,543 females.

On 5th April, 1891, the population of Tasmania was 146,667, of whom 77,560 were males, and 69,107 females, being 5·60 persons to the square mile. On 31st March, 1901, the population was 172,475, of whom 89,624 were males, and 82,851 females. The death-rate of 1904 was 11·04 to the 1,000 of the population. The number of inhabited houses not including tents (1,013) was 31,046. The black aboriginal population is now extinct, but there are on the Furneaux Islands a number of half-breeds (157). On 3rd April, 1911, population, 97,591 male and 93,620 female=191,211 persons.

Hobart, on the River Derwent, is a city of considerable size, containing within the Registration boundary an estimated population (31st December, 1915) of 39,838.

Launceston, on the River Tamar, the second town of the State, contains within the Registration boundary an estimated population (31st December, 1915) of 24,661.

*Local Government.*

The original of this form of Government was superseded in 1907 by the "Local Government Act" which divided the State into 49 municipalities, exclusive of Hobart and Launceston (founded in 1855). The former 48 municipalities are made up of wards, each receiving its own representatives. The Presidents of the Councils are called wardens, and are elected annually. The functions of the old town boards, road trusts, etc., are now merged into the new municipalities. Every elector of the municipality who is a resident or has a place of business therein is eligible to be elected as a councillor for so long as he continues to reside or to have a place of business in the municipality. Every male or female of the age of 21 years whose name is on the assessment roll as the owner or occupier of any property within the municipality, is entitled to vote in the election of councillors. In Launceston, Hobart, Mersey, Circular Head, Table Cape, Leven, and Strahan, the management of the harbours is in the hands of marine boards.

The total revenue from these local Government bodies was (Municipalities 370,195*l*., Marine Boards 55,398*l*.). 425,593*l*. including Government grants to Municipalities 14,416*l*. The total expenditure including expenditure from Loans (Municipalities 349,186*l*., Marine Boards 30,137*l*.) 379,323*l*.

The outstanding local debt at end of 1915 was about 1,577,345*l*.

*Currency and Banking.*

The legal tender and usual currency is British sterling.

There are seven banks established in the State—viz., The Commercial Bank of Tasmania, the Commercial Bank of Australia, Limited, the National Bank of Tasmania, the Union Bank of Australia, the Bank of Australasia, Bank of New South Wales, and Commonwealth Bank, with, together, 54 branches. The total assets on 31st December, 1914, amounted to 4,943,583*l*., deposits 4,306,244*l*. The note circulation on same date amounted to 13,409*l*. (not including a Commonwealth note issue (422,844*l*.) held by Banks).

In addition to above there are three saving bank systems, one being located at Hobart, one at Launceston, and one having many branches throughout the State, established by Commonwealth Government in connection with the Post Office Department, total deposits at time of last balancing being 2,301,336*l*.

*Education.*

State schools for primary education were originally established under a board provided for by Act 27 Vict., No. 11, in 1868. In 1887 the board was superseded by a department under the supervision of a Director of Education, working under the Minister of Lands as Ministerial head. The system is free, national and compulsory, with non-sectarian religious instruction. There were 457 State schools in operation on 31st December, 1915, the number of scholars on the rolls 35,310, and the average attendance 22,581. In 1914, 25 State school scholarships (open to children under 13 years of age, from all schools) were in force.

With a view of encouraging the pursuit of a regular and higher course of education amongst the youth of the State, the University of Tasmania was established in the year 1890, with power to grant scholarships and award degrees. In all eight scholarships are now awarded annually.

*Constitution.*

The constitution of Tasmania was settled by local Act (18 Vict., No. 17), constituting "the Parliament of Tasmania," and various amending Acts.

The Legislative Council consists of 18 members, elected for 15 electoral districts. Every member of the Legislative Council holds his seat for six years from the day of his election, at the expiration of which time his seat becomes vacant. The competency of the Council is not affected by vacancies, so long as nine members remain. No judge of the Supreme Court can be a member of the Legislative Council nor any person holding office of profit under the Crown (except responsible Ministers) nor contractors to Government. The qualification for a member is to be 30 years of age, and to be a natural-born or naturalised subject of His Majesty. The qualification for an elector is the possession of a freehold estate of 10*l*. or leasehold

Digitized by Google

of 30*l.* annual value, or being a graduate of any University in the British Dominions, or Associate of Arts of Tasmania, or qualified legal or medical practitioner, or minister of religion, or an officer of the army or navy, or retired officer of the Tasmanian Volunteer Force.

The House of Assembly consists of 30 members, elected for 5 electoral divisions. Any natural-born or naturalised subject of His Majesty can be elected, provided that he is not a judge of the Supreme Court, a person holding office of profit under the Crown (except responsible Ministers), nor a contractor to Government.

The duration of the Assembly is three years. The qualification of an elector for the Assembly is to be a British subject, 21 years old, and resident for 12 months. The Franchise is extended to women. Voting by ballot is regulated by 1st Ed. VII., No. 57. Parliament usually meets in July, and sits for about four months. Members, excepting Ministers and certain officers of Parliament, are paid 200*l.* Members of the Commonwealth Parliament are disqualified for a seat in either House, and a Minister of the Crown under the Commonwealth cannot hold a post as Minister in Tasmania.

The Governor is advised by a Cabinet of responsible Ministers.

*Succession of Governors & Lieutenant-Governors of Tasmania since 1893.*

## VICTORIA.

*Situation and Area.*

Victoria is situated at the south-east of the continent of Australia, and lies between the 34th and 39th parallels of south latitude and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 490 miles, and its greatest breadth is about 300 miles. Its extent of coast line is nearly 700 miles.

On the north and north-east Victoria is bounded by New South Wales, from which it is separated by the River Murray, and a direct line from the head waters of that stream, at Forest Hill, to Cape Howe. On the west it is bounded by South Australia, from which it is separated by a line approximating to the position of the 141st meridian, extending from the Murray to the sea. On the south and south-east its shores are washed by the Southern Ocean, Bass' Straits, and the Pacific Ocean

Digitized by Google

The southernmost point in Victoria, and on the whole continent of Australia, is Wilson's Promontory, which lies in latitude 39° 8′ S., longitude 146° 26′ E.; the northernmost point is the place where the western boundary of the State meets the Murray, latitude 34° 2′ S., longitude 140° 58′ E.; the point furthest east is Cape Howe, situated in latitude 37° 31′ S., longitude 149° 59′ E.; the most westerly point is the line of the whole western frontier, which, according to the latest correction, lies upon the meridian 140° 58′ E., and extends from latitude 34° 2′ S. to latitude 38° 4′ S., or 242 geographical miles.

The area of Victoria is, according to the most recent computation, 87,884 square miles, or 56,245,760 acres (nearly equal to Great Britain). The whole continent of Australia contains 2,974,581 square miles, and Victoria consequently occupies about a thirty-fourth part of its surface.

*Physical Features.*

Victoria is traversed, with more or less regularity, throughout its entire length from east to west by a chain of mountains and lesser hills, completely dividing it into two parts, and known as the Dividing Range. The summit of this range runs generally at a distance of 60 or 70 miles from the coast. The streams to the north of it flow towards the River Murray, and those to the south of it towards the sea. The eastern part of the range, which divides the Gippsland district from that of the Murray, is named the Australian Alps; and that part which separates the County of Ripon from that of Borung, and extends into the County of Kara Kara, is named the Pyrenees. The higher peaks of the Dividing Range are covered with snow for several months in the year. The mountainous country is, for the most part, densely wooded to the very summits with fine timber, but the peaks above the winter snow line are quite bare, or only partially covered with dwarfed trees or shrubs. From near Kilmore eastward, a distance of 200 miles, the mountains are generally so steep and inaccessible as to present a considerable barrier between the parts of the colony north and south of them, and they can only be traversed with great labour by the few passes that exist. From Kilmore westward the range rapidly dwindles, so that although presenting in places points of considerable height—such as Mount William and Mount Macedon—it is easily crossed. From Mount Macedon it becomes, as it stretches away to the Western district, a chain of hills, in parts only of considerable altitude, and offering no serious obstructions to crossing in very many places. That portion of the Murray basin commencing at Wodonga on the east as a point, and extending in the form of a regular triangle to a width of 200 miles along the western boundary of Victoria, has almost a flat surface, with a very slight inclination towards the Murray. The remaining country north and south of the Dividing Range and its spurs is moderately undulating; it is in some parts destitute of timber, but closely wooded in others. Besides the main Dividing Range, there are also other ranges extending in different parts of the country, many of them being spurs of the main chain. The highest peaks, however, are found in the Dividing Range and its offshoots.

*Population.*

Although Victoria occupies no more than the thirty-fourth part of the Australian continent, from various causes such has been its attractiveness as compared with the other States of the group, that it now contains 29 per cent. of the inhabitants of the whole continent. The population on the 31st December, 1916, was 1,399,799 viz., 666,931 males and 732,848 females. These numbers give a proportion of 109·88 females to 100 males.

*Immigration.*

For several years past the Government has been endeavouring to attract immigrants from the United Kingdom and other countries, and has met with a considerable amount of success. Agriculturists, rural workers, and domestic servants are the class of immigrants principally required. Farm labourers from the United Kingdom are charged £10 and domestic servants £8 for third-class passages from London to Melbourne. Inexperienced farm labourers obtain passages at a fare of £12. Other immigrants may obtain these passages for £16, to which the Government contributes £4, which makes the portion of the fare payable by the nominator £12. Persons in Victoria may nominate friends and relations in Great Britian by lodging a deposit of £8, the balance of £4 being payable in monthly instalments extending over six months. Where the nominees are the wife and child of the nominator a rebate may be made which will make the net fares for adult males £10, adult females £6, and children £3.

Upon the outbreak of war in August, 1914, instructions were issued by the Victorian Government to its representatives in England that no men should be accepted for assisted passages who were within the limits of the recruiting ages.

*Means of Communication.*

Melbourne, the metropolis of Victoria, is distant from Sydney by sea about 650 English miles, and by land 577 miles; from Adelaide by sea 560 miles, and by land 483 miles. It is now connected with Sydney, Brisbane, Adelaide and Perth by railway. Steam postal communication with England, *viâ* Ceylon and Suez, is maintained weekly by the steamers of the P. and O., alternating with those of the Orient Company. Mails are also carried by the lines of steamers belonging to the Pacific, British India and Messageries Maritimes (French) Companies.

The post offices in Victoria number 1,780, The postal, telegraph and telephone revenue was 1,491,153*l.*, in 1916-17, and the expenditure 1,201,575*l.*

There are 8,999 miles of telegraph lines open (including railway telegraphs), and about 29,446 miles of wire; also about 218,706 miles of telephone wire. The number of telegrams transmitted during 1916-17 was 3,428,871. There are 50,636 telephones in use in the State, with 38,025 subscribers. The amount received on account of telegraphs and telephones during the year 1916-17 was 632,751*l.*

The railways in Victoria are all owned by the Government. The number of miles open for traffic on 30th June, 1917, was 4,128, and 119 miles were in course of construction. The receipts in 1916-17 totalled 5,980,638*l.*, and the working expenses 4,303,958*l.* (including 131,416*l.* pensions and gratuities). The total cost of construction of lines opened to 30th June, 1917, was 55,808,517*l.* The interest and expenses on the debt incurred for construction amounted to 2,012,447*l.* during the year, and the revenue deficiency for the twelve months was 337,767*l.* The percentage of net receipts to capital cost was 3·0.

Digitized by Google

*Climate.*

From its geographical position Victoria enjoys a climate far more genial to Europeans than any other State of Australia. In regard to heat the weather is never severely oppressive, except during the prevalence of hot northerly winds, and these occur only at intervals during the summer months. Over a series of years the mean temperature at Melbourne was 57·4°; the mean atmospheric pressure at 91·3 feet above the sea level was 29·93 inches; rain falls on the average upon 136 days in the year, the mean annual rainfall being 25·48 inches.

*Early History.*

It is believed that the first Europeans who ever sighted any portion of the land now embraced within the limits of the colony of Victoria were Captain Cook and the officers and crew of His Majesty's ship *Endeavour*. Cook, however, did not attempt to land, but passed on to other discoveries.

On his return to England he reported the eastern part of Australia to be suitable for colonisation, and this led to a party of convicts being despatched there in 1788, under Captain Arthur Phillip, R.N. On the shores of Port Jackson, a few miles to the north of Botany Bay, Phillip established a permanent settlement, but for nearly ten years afterwards nothing was done towards the exploration of the southern shores of Australia. At length George Bass, a surgeon in the Royal Navy, started in a whale-boat, manned by six seamen, and, passing Cape Howe, coasted along that part of Victoria now called Gippsland, and rounding Wilson's Promontory—the southernmost point on the Australian Continent—entered Western Port on the 4th June, 1798. He, however, returned to Sydney without discovering Port Phillip Bay, which was first entered on the 5th January, 1802, by Acting-Lieut. John Murray, in command of the armed brig *Lady Nelson*. In October of the following year an attempt was made to colonise the territory by Lieut.-Col. David Collins, of the Royal Marines, in command of a party of convicts. Collins, however, after the expiration of three months, abandoned Port Phillip as unfit for settlement, and for the next twenty years the district attracted but little attention. Then two explorers—Hume and Hovell—made their way overland from Sydney, and, on their return, gave a satisfactory report of the country, the result being that a convict establishment was soon afterwards founded on Western Port Bay, which, however, was in a short time abandoned, apparently on economic grounds. The first permanent settlement in Victoria was formed at Portland Bay, by Mr. Edward Henty, from Van Diemen's Land—as Tasmania was then called—who landed on 19th Nov., 1834, and soon commenced to till the soil, run and breed stock, and carry on whaling operations. Others followed, but the absence of good land in the immediate vicinity of the port, and the openness of the bay, which rendered it unsafe for shipping during the prevalence of certain winds, caused it to be considered an unsuitable site. The capital was eventually founded at the northern end of Port Phillip Bay by two parties, one led by John Batman, who landed on 29th May, 1835, and the other by John Pascoe Fawkner, whose party arrived at the site of Melbourne on the 28th August of the same year. Both of these were from Van Diemen's Land, and they were soon followed by others from the same island, and from Sydney, who brought stock with them, and commenced to push their way into the interior. These were met by Major (afterwards Lieutenant-Colonel Sir) Thomas Mitchell, who, entering from New South Wales on the north, and traversing a considerable portion of the (as yet) unknown territory, was so struck with its wondrous capabilities that he named it Australia Felix, a title the aptness of which a subsequent knowledge of the geniality of its climate, the excellence of its soil, and the then unsuspected richness of its mineral treasures, has proved to be fully justified. The reports of Sir Thomas Mitchell, and the success of the first settlers, caused great excitement, not only in Australian settlements, but in the mother country. Herds of sheep and cattle driven overland from New South Wales speedily occupied the best parts of the new territory. Every available craft capable of floating was put into requisition to bring passengers and stock from Van Diemen's Land, and after a time shiploads of emigrants began to arrive from the United Kingdom. Regular government was first established under Captain William Lonsdale, who, having been sent from Sydney to take charge of the district, landed on the 29th Sept., 1836; and on the 2nd March of the following year Sir Richard Bourke, the Governor of New South Wales, visited it, and named the metropolis Melbourne. Mr. Charles Joseph La Trobe arrived on the 30th Sept., 1839, having been appointed to the principal official position in the settlement under the title of Superintendent. This title was changed to that of Lieutenant-Governor, when, on the 1st July, 1851, it was separated from New South Wales, and created a separate colony under the name of Victoria. Shortly afterwards rich deposits of gold were discovered, which led to a great influx of population. After a time discontent arose amongst the diggers in consequence of the oppressive character of the mining regulations, which culminated in riots on the Ballarat goldfield towards the end of 1854. The disturbance was soon quelled, with some bloodshed on both sides, and the grievances complained of were afterwards redressed. A new constitution, giving responsible government to the colony, was proclaimed on the 23rd November, 1855.

*Industry.*

The main industry is grazing and agriculture, 6,750,894 acres being under cultivation in 1916-17. The chief products were wheat, grown on an area of 3,125,692 acres, producing 51,162,438 bushels; oats, 441,598 acres, producing 8,289,289 bushels; barley, 93,015 acres, producing 1,799,784 bushels; potatoes, 73,618 acres, producing 187,992 tons; and hay, 897,186 acres, producing 1,232,721 tons. About 23,264 acres were devoted to the culture of the vine, producing 1,302,660 gallons of wine, 142,970 cwts. of raisins, and 66,449 cwts. of currants. A considerable area is devoted to the cultivation of fruit trees and vegetables; tobacco, hops, and olives are also grown. The dairying industry has made rapid strides; in 1916 there were produced 59,125,051 lbs. of butter (of which 30,706,719 lbs. were exported oversea) and 5,796,092 lbs. of cheese. In March, 1917, there were in the State 514,403 horses, 1,175,098 cattle (including 488,086 milch cows), 12,576,587 sheep, and 254,436 pigs. The wool exported oversea in 1916-17 amounted to 84,127,550 lbs., valued at 6,149,212*l*. The amount of gold raised in 1916 was 276,188 ozs., making a total since 1851 of 74,587,075 ozs., valued at 297,794,151*l*. Enormous

Digitized by Google

deposits of brown coal exist, and seams of true coal of good quality which have been discovered are being worked with success, and it is anticipated that in a short time the State will be nearly independent of outside supplies; the quantity of coal raised in 1916 was 417,183 tons, valued at 216,292*l*. The chief exports other than wool and gold (which comprise nearly half of the total), are grain and flour, butter, hides and skins, meats, live stock, leather, and tallow, besides a depôt trade in wool, tea, textiles, timber, tobacco, and sugar. The chief imports are wool, gold, textiles and apparel, sugar, live stock, woollens, coal, tea, and iron. Melbourne does 87 per cent. of the trade, the other principal ports being Geelong, Portland, Warrnambool, also Echuca, Wodonga, Wahgunyah, Yarrawonga, Gooramadda, Koondrook, Tocumwal, Cobram, Mildura, and Swan Hill on the Murray river.

The vessels on the Victorian register at the end of 1916 numbered 424, with a total tonnage of 172,986.

Victoria, as a manufacturing country, occupies a pre-eminent position in the Australasian group. The collectors of statistics are instructed to obtain returns only from establishments employing four hands or upwards, except when machinery worked by steam or other power is employed, and except when the existence of industries of an unusual or interesting nature seems to call for special comment. No attempt is made to enumerate mere shops, although some manufacturing industry may be carried on thereat; were this done, the manufactories of the State might be multiplied to an almost indefinite extent. The following is a statement of the number and nature of manufactories and hands employed therein during 1916-17 :—

*Manufactories and Works, 1916-17.*

| Nature of Industry. | Number of | |
|---|---|---|
| | Manufact'ries | Hands employed. |
| Tanning, fellmongering, &c. ... | 304 | 3,535 |
| Oil, soap, candle, &c. ... ... | 27 | 796 |
| Brick, stone, glass, &c. ... ... | 170 | 3,519 |
| Working in wood ... ... ... | 424 | 6,336 |
| Metal, machinery, &c. ... ... | 700 | 17,180 |
| Food, drink, tobacco, &c. ... | 635 | 15,334 |
| Woollen mills, clothing, boots, &c. | 1,141 | 41,233 |
| Printing, binding, paper, &c. / Organ, piano, &c. ... ... | 454 | 9,028 |
| Arms and explosives ... ... | 12 | 1,597 |
| Coachbuilding, bicycle, saddle, &c. | 533 | 4,575 |
| Shipbuilding, docks, &c. ... | 11 | 464 |
| Furniture, bedding, &c. ... ... | 268 | 2,766 |
| Drugs, chemicals, &c. ... ... | 94 | 2,086 |
| Surgical, &c., Instruments ... | 28 | 135 |
| Timepieces, jewellery, &c. ... | 91 | 948 |
| Heat, light and energy ... ... | 158 | 4,164 |
| Leatherware, &c. ... ... ... | 38 | 711 |
| Rubber goods, &c. ... ... ... | 57 | 2,563 |
| Total ... ... ... | 5,445 | 116,970 |

The total number of all establishments is 5,445, of which 1,731 use steam or gas engines, the total horse power of which is 136,985. They employ 116,970 hands, and the approximate total value of lands, buildings, machinery, and plant is 23,784,289*l*. The value of materials used was 37,103,570*l*., and of articles produced or work done 60,047,284*l*. The wages paid amounted to 11,833,517*l*.

The estimated value of Victorian production in 1915 was as follows :—

| | £ |
|---|---|
| Agricultural Production ... ... | 19,765,128 |
| Pastoral and Dairying Production | 10,501,954 |
| Mining Production ... ... | 1,946,697 |
| Forest ,, ... ... | 881,360 |
| Miscellaneous Products ... ... | 1,990,003 |
| Total Primary Products ... | 35,085,142 |
| Manufacturing—value added during process ... ... | 20,053,552 |
| Total ... ... ... | 55,138,694 |

*Irrigation.*

The climate of Australia is essentially a dry one, and it is to this that its superior salubrity is, to a great extent, attributed. The drawback, however, is that the rainfall is in parts so uncertain that great losses of stock, as well as of crops, occur in some years. Droughts in Victoria are neither so general nor so continuous as in several of the other States. Still, in certain districts, serious inconvenience and loss have been experienced at times on account of deficient rainfall. To obviate this the Government have passed several measures with the view of promoting national irrigation upon a large scale. By the Water Act of 1905 all existing irrigation trusts, with the exception of the First Mildura Irrigation Trust, were abolished, and their works and duties transferred to the State Rivers and Water Supply Commission. In 1909 an Act was passed extending the authority of this latter body by giving it the general construction of works formerly intrusted to the Department of Water Supply and by imposing on the Commission all the duties formerly performed by the Water Supply Department. The capital expenditure on the irrigation works controlled by the Commissioners on the 30th June, 1916, amounted to 3,623,799*l*. The Commission is empowered to levy rates on all lands capable of irrigation under their jurisdiction, the total area irrigated being 288,000 acres. The Mildura Irrigation Colony, lands, works, and approaches are controlled by the First Mildura Irrigation Trust. From time to time the Government has assisted the Mildura Trust until on the 30th June, 1916, the total amount advanced was 87,232*l*., which, together with interest accumulated to that date represents its total indebtedness to the Government. The extent of watering done by this Trust represented 41,405 water acres in 1915-16.

*Chief Towns.*

Melbourne, the capital, on the 31st December, 1916, had a population of 695,640. The first settlers established themselves on the site of the present city so recently as in 1835.

The other chief towns are Ballarat (40,691), Bendigo (35,790), Geelong (34,524), Warrnambool (7,400), Castlemaine (7,412), Maryborough (5,000), Hamilton (4,700), Mildura (5,200), and Stawell (4,410).

*Coloured Immigrants.*

With a view of restricting the immigration of Asiatics and other coloured persons, the Commonwealth Parliament passed the Immigration

Digitized by Google

Restriction Act in 1901, which provides that any person, who, when asked to do so by a public officer, fails to write out from dictation and sign in the presence of the officer, a passage of fifty words in any prescribed language, is prohibited from landing in Australia. Certificates of exemption are granted in certain cases, and members of the military and naval forces, as well as the master and crew of any public vessel of any government, are excepted. There are not more than 7,184 coloured persons in the State.

### *Banking and Currency.*

The following banks had branches, numbering about 682 in all, throughout the State during the December quarter of 1916:—The Bank of Australasia; of New South Wales; of New Zealand; of Victoria; Colonial of Australasia; Commercial of Australia; English, Scottish and Australian; London of Australia; National of Australasia; Royal of Australia; the Union of Australia; Queensland National; North Queensland; Ballarat Banking Co.; Comptoir National D'Escompte de Paris; and The Commonwealth. Bank of Australia.

The deposits at that period amounted to 59,202,831*l.*, and the paid up capital to 26,519,044*l.*

There are also 132 banks and branches, with 327 agencies at Post Offices of the Savings Bank. The number of depositors on the 30th June, 1917, was 780,139, and the amount on deposit was 28,355,390*l.* The legal tender and usual currency is exclusively British sterling.

A branch of the Imperial Mint is established at Melbourne, where gold to the value of about 2,000,000*l.* is coined annually.

### *Education.*

Education establishments in Victoria are of four classes, viz., the University, with its three affiliated Colleges, for superior education; State schools, for primary and secondary education; registered schools for primary and secondary education; and technical schools for instruction in the various arts. The Melbourne University was established under a special Act of the Victorian Legislature in 1853, and Royal Letters Patent were issued on the 14th March, 1859, declaring that all its degrees except those of divinity should be recognised in the United Kingdom and the British colonies and possessions. Affiliated to the University are three Colleges—Trinity, Ormond, and Queen's—connected with the Church of England, the Presbyterian, and the Methodist Churches respectively; also the Ballarat School of Mines. The number of students attending lectures at the University during 1916 was 1,297. From the date of the opening of the University to the end of 1916, the total number of students who matriculated was 8,293, and 5,859 direct degrees were conferred during the same period. The technical schools, which are controlled by the Education Department, number 23, there are also 2 Agricultural Colleges and 1 School of Horticulture. The principal of these is the Melbourne Working Men's College, established for the purpose of improving the general and technical education of the working classes and open to women as well as men. The gross enrolment of pupils, excluding those at agricultural and horticultural colleges, was 7,508.

The system of primary public instruction, which was commenced on 1st January, 1873, is strictly secular. Attendance at school is compulsory for children between the ages of 6 and 14, and State instruction is granted free of cost. In 1915-16 there were 2,225 State schools, with a total enrolment of 257,726 scholars, instructed by 6,704 teachers (including 510 temporary teachers). The average attendance was 161,632. In 1915-16 the cost of primary public instruction (exclusive of buildings, rent, &c.) was 1,051,182*l.* There is no local control over the schools.

The secondary schools are for the most part under the control of private persons or proprietary bodies, usually connected with some religious denomination. These now receive no State assistance, but formerly a few of the principal ones received money and grants of land from the Government. According to the returns for 1915-16, there were 495 registered schools in Victoria, with 1,909 teachers, and an attendance of 57,400 scholars. Of these the Roman Catholic denomination had about one-fourth, about one-third of the teachers, and over half the scholars.

### *Government.*

The Government of Victoria consists of a Governor appointed by the Crown, who is the official head of the Legislature, and assents in the name of the Crown to Acts passed by the Parliament. There is a Legislative Council, or Upper House of Parliament, consisting of 34 members elected for 17 Provinces, and an Assembly, or Lower House, consisting of 65 members returned by 65 Electoral Districts. The Constitution was established by an Act passed by the Legislature of Victoria, 1854, to which Her Majesty assented, in pursuance of the power granted by Act of the Imperial Parliament (18 & 19 Vict., cap. 55).

The constitution of the two Houses and the qualification of Members and Electors have been amended on several occasions; and a Reform Act received the Royal Assent on 26th November, 1903. By this Act the number of Members of both Houses was reduced, the franchise for the Upper House broadened, and the property qualification for membership reduced, and several other reforms made. In 1907 an Act was assented to abolishing the separate representation of railways and public officers in the Parliament of the State—one of the provisions of the Reform Act of 1903. Officers in the service of the Government are, however, forbidden to take any part in the political affairs of the State otherwise than by recording a vote, and are prohibited from using any influence in respect to any matter affecting their remuneration or position in the public service.

The Adult Suffrage Act of 1908, assented to on 31st March, 1909, places women on an equality with men as electors for the State Legislature.

One of the two Members of Council returned for each of the Electoral Provinces retires in rotation at the expiration of every three years, so that the tenure of seats is six years. The Governor has no power to dissolve the Council, except in case of a deadlock between the two Houses. The property qualification of members is possession of freehold property of an annual value of 50*l.* The property qualification of Electors of Members of Council is possession of freehold property rated in some municipal district at not less than 10*l.* per annum, or occupation of freehold or leasehold

Digitized by Google

property of not less than a 15*l.* annual rating. Graduates of Universities within the British dominions, matriculated students of the University of Melbourne, barristers and solicitors, legally qualified medical practitioners, officiating ministers of religion, certificated school-masters, and officers of the army and navy when not on active service, also have votes for the Legislative Council. The functions of this House differ very slightly from those of the House of Lords. Money Bills may be either accepted or rejected, but they may not be altered. By the Reform Act of 1903 the Council is now empowered to suggest alterations in these Bills.

An Act was passed in 1857 to abolish the property qualification required of members of the Legislative Assembly, and universal suffrage exists so far as the election of that body is concerned. Plural voting was abolished by an Act passed in August, 1899, so far as the election of members of the Assembly is concerned. The duration of the Assembly is, under ordinary circumstances, three years, but it may be dissolved by the Governor at any time. Vote by ballot has been in operation since 1856, and by an Act passed in October, 1900, provision is made for voting by post in certain cases.

All members of the Legislative Assembly, except such as are in receipt of official salary out of the Consolidated Revenue, are paid 300*l.* a year during the term of the present Parliament "for reimbursing their expenses in relation to their attendance in Parliament." The members of the Legislative Council are not paid.

An Act was passed in December, 1903, limiting the amount which may be expended by candidates for election expenses to 400*l.* and 150*l.*, for the Council and the Assembly respectively. The purposes for which such expenditure may be incurred are also defined.

### *Municipal Government.*

A very complete system of local self-government exists in Victoria. The municipalities are of two kinds, the first being called cities, towns, and boroughs, and the second shires. The whole extend over 87,234 square miles, comprising nearly the whole area of the State. Each district is a body corporate, with perpetual succession and a common seal. The governing body is a Council, the members of which are elected by the ratepayers, including women. Rates may be levied on all land within a municipality, except that used for public purposes, for such amount between 6*d.* and 2*s.* 6*d.* in the pound (the common rate is 1*s.*), as may be decided upon by the Municipal Council. In 1916-17 there were 52 cities, towns, and boroughs and 139 shires. The number of ratepayers was 401,414; the annual value of the rateable property was assessed at 17,319,418*l.*, representing a value in fee simple of 326,415,110*l.*; the total income in 1916 was 2,254,227*l.*, and the expenditure was 2,287,967*l.*; whilst their loan indebtedness amounted to 5,869,260*l.*

The harbour of Melbourne is under the control of the Melbourne Harbour Trust, created by Act in 1876. The revenue of the Trust in 1916 was 321,534*l.*, and its expenditure 512,522*l.*, including capital expenditure 284,281*l.* The outstanding debt of the Trust at the end of 1916 amounted to 1,850,000*l.*

The Melbourne Water Supply Works are now under the control of the Melbourne and Metropolitan Board of Works, which body is also empowered to undertake the sewerage of the metropolis. In 1915-16 the Board's ordinary revenue was 687,776*l.*, and its expenditure 667,776*l.*, exclusive of 426,768*l.* from loans; whilst there were loans outstanding at 30th June, 1916, amounting to 12,132,946*l.*, of which, however, 1,559,786*l.* was raised in the first instance by the general Government, and is included in the Public Debt. The expenditure on the sewerage works completed and in course of construction amounted to 7,315,580*l.* up to the 30th June, 1916.

There are also two Fire Brigade Boards, supported by equal contributions by the Government, the Municipalities and the Insurance Companies. In 1916 their revenue amounted to 114,012*l.*, their expenditure to 123,498*l.*, including 14,711*l.* loan expenditure, and their debt to 230,000*l.*

The Melbourne tramways were constructed by a Trust at a cost of 1,705,794*l.*, provided for by loans secured on the rateable property of the Municipalities. The debt was gradually extinguished by a sinking fund, contributed by the Melbourne Tramways Company, a public company, to which the lines were let for a period of 30 years. The lease expired on 1st July, 1916, when the balance of the outstanding debentures (450,000*l.*) was paid off. A Board consisting of five members, was nominated by the Government to take over and operate the undertaking from 1st July, 1916, to 31st October, 1918, or such earlier date as may be proclaimed by the Governor-in-Council. The Board is authorized to borrow up to 500,000*l.* in order to finance the amount required to purchase such property of the Melbourne Tramway Company as may be necessary to carry on the undertaking. The amount of the compensation was fixed at 335,000*l.* by His Honor Mr. Justice Cussen, an arbitrator appointed by the Governor-in-Council, but this award has been appealed against to the Privy Council.

*Printing Overseer*, H. J. Green, 384*l.*

DEPARTMENT OF LANDS AND SURVEY.

*Commissioner of Crown Lands and Survey*, Hon. F. G. Clarke, 1,000*l.*
*Secretary for Lands*, J. M. Reed, 900*l.*
*Surveyor-General*, A. B. Lang, 700*l.*

DEPARTMENT OF STATE FORESTS.

*Director of Melbourne Botanical Gardens and Government Grounds*, J. Cronin, 432*l.*, with quarters.
*Conservator of Forests*, H. R. Mackay, 800*l.*
*Senior Clerk*, J. Welsh, 456*l.*

DEPARTMENT OF AGRICULTURE.

*Minister of Agriculture*, Hon. D. S. Oman, 1,000*l.*
*Director of Agriculture*, Dr. S. S. Cameron, 900*l.*
*Government Analytical Chemist*, P. R. Scott, 600*l.*
*Entomologist*, C. French, Junr., 348*l.*
*Vegetable Pathologist*, C. C. Brittlebank, 336*l.*
*Chief Veterinary Officer*, W. A. N. Robertson, 600*l.*
*Experts—Tobacco*, T. A. J. Smith, 408*l.* *Agriculture*, A. E. V. Richardson, 700*l.*; W. Laidlaw, 480*l.* *Viticulture*, F. de Castella, 432*l.* *Dairying*, P. J. Carroll, 360*l.* *Poultry*, A. Hart, 286*l.* *Cheese*, G. C. Sawers, 276*l.* *Potato*, J. T. Ramsay, 260*l.*
*Superintendent of Exports*, R. Crowe, 600*l.*

DEPARTMENT OF PUBLIC WORKS.

*Commissioner of Public Works*, Hon. J. McWhae, 1,000*l.*
*Secretary*, E. T. Drake, 900*l.*
*Chief Clerk and Accountant*, G. Clowser, 576*l.*

*Port and Harbours.*

*Engineer-in-charge Ports and Harbours, also Superintendent Mercantile Marine*, G. Kermode, 700*l.*

DEPARTMENT OF MINES.

*Minister of Mines, Forests, and Health*, Hon. A. Downward, 1,000*l.*
*Secretary*, W. Dickson, 900*l.*
*Chief Clerk* (vacant).
*Government Geologist*, H. Herman, 667*l.*
*Accountant*, J. Shea, 552*l.*

MELBOURNE HARBOUR TRUST.

*Chairman of Commissioners*, G. F. Holden.
*Secretary*, J. H. McCutchan.
*Treasurer and Collector of Wharfage Rates*, R. E. Shepherd.
*Harbour Master*, W. G. Vincent.
*Engineer*, A. C. Mackenzie.

DEPARTMENT OF EDUCATION.

*Minister of Public Instruction*, Hon. M. Baird, 1,000*l.*
*Director of Education*, F. Tate, 1,000*l.*
*Chief Clerk*, C. S. McPherson, 696*l.*
*Accountant*, J. C. Jensen, 456*l.*
*Chief Inspector*, A. Fussell, 700*l.*

DEPARTMENT OF PUBLIC HEALTH.

*Minister of Health*, Hon. A. Downward.
*Board of Public Health*:—
*Chairman and Medical Inspector*, E. Robertson, M.D., 800*l.*
*Secretary*, T. W. H. Holmes, 576*l.*
*Engineering Inspector*, J. T. Oliver, 516*l.*

*Distilleries, Excise and Explosives.*

*Inspector of Excise*, H. E. Kennedy, 420*l.*
*Inspector of Explosives*, R. J. Lewis, 750*l.*

VICTORIAN RAILWAYS.

*Minister of Railways*, Hon. A. Wynne, 1,000*l.*
*Commissioners* (Chairman), C. E. Norman, 2,500*l.*; E. B. Jones, 1,750*l.*
*Secretary*, G. H. Sutton, 800*l.*
*Accountant*, T. F. Brennan, 800*l.*
*Superintendent of Transportation*, T. B. Molomby, 900*l.*

Digitized by Google

*Chief Engineer for Railway Construction*, M. E. Kernot, 1,000*l.*
*Chief Engineer of Way and Works*, J. H. Fraser, 1,000*l.*
*Chief Mechanical Engineer*, W. M. Shannon, 1,000*l.*
*Telegraph Superintendent*, W. A. Holmes, 750*l.*

MELBOURNE AND METROPOLITAN BOARD OF WORKS.

*Chairman*, W. J. C. Riddell, 1,500*l.*
*Secretary*, G. A. Gibbs, 1,200*l.*
*Treasurer*, R. Richardson, 800*l.*
*Engineer-in-Chief*, C. E. Oliver, 1,100*l.*

LICENSING COURT AND LICENCES REDUCTION BOARD.

*Chairman*, R. Barr, 800*l.*
*Members*, J. Lock and F. F. Cumming, 800*l.*

STATE RIVERS AND WATER SUPPLY COMMISSION.

*Commissioners*, W. Cattanach (Chairman), 1,500*l.*, J. S. Dethridge, 1,000*l.*, and E. Shaw, 900*l.*

LONDON AGENCY.

*Agent-General for Victoria in the United Kingdom* (Office, Melbourne Place, The Strand, W.C.). Hon. Sir P. McBride.
*Secretary*, H. G. W. Neale.

FOREIGN CONSULS.

*Argentine Republic*, Consul-General, U. A. Bartoli.
*Belgium*, Consul-General, E. Lauwers; Consul, F. Vanderkelen.
*Brazil*, Vice-Consul, H. A. Sheppard.
*Chili*, Consul, R. H. Barrows.
*China*, Consul-General, Quei Tzeking; Vice-Consul, Lu Ping Tieu.
*Colombia, United States of*, Consul-General, M. Lyle.
*Cuba*, Consul, Senor Antonio Altimira y Polo.
*Denmark*, Consul-General, Otto Wadsted; Vice-Consuls, E. N. Belcher and P. J. Holdenson.
*Ecuador*, Consul, E. Phillips.
*France*, Vice-Consul, Henri Fliche.
*Greece*, Consul, A. Maniachi.
*Guatemala*, Consul, A. De Bavay.
*Italy*, Consul-General, Cav. E. Eles.
*Japan*, Hon. Consul, D. B. Fullarton.
*Mexico*, Consul, A. McKinley.
*Netherlands*, Consul-General, W. L. Bosschart; Hon. Consul, O. Von Assche; Vice-Consul, P. E. Teppema.
*Nicaragua*, Consul, R. Medina.
*Norway*, Consul-General, Finn Koren; Vice-Consul, Hans H. T. Fay (acting).
*Panama*, Consul, E. Phillips.
*Paraguay*, Consul, A. S. Bloomfield; Vice-Consul, W. S. Fraser.
*Peru*, Consul, J. F. Loyer.
*Portugal*, Hon. Consul, J. Thomson.
*Russia*, Consul-General, A. N. D'Abaza; Vice-Consul, H. C. Sleigh.
*Servia*, Consul, A. E. Oldham.
*Spain*, Consul, Senor Don J. de Montero y de Madrazo.
*Sweden*, Consul, J. D. Waern.
*Switzerland*, Consul, G. Stahel.
*United States*, Consul, W. C. Magelssen; Vice and Deputy Consul, C. Hartlett.
*Uruguay*, Consul, H. A. Walters.

## WESTERN AUSTRALIA.

### *Situation and Area.*

Western Australia comprises nearly one-third of the Australian continent, namely, all that portion west of the 129th degree of E. longitude. The total area is 975,920 square miles (equal to half European Russia, or to over one-fourth of Europe). The city of Perth, the capital, is in lat. 31° 57′ S., long. 115° 51′ E.

### *Coast Line.*

The Southern and Western coast line is, to a great extent, of a flat and sandy character, with comparatively few natural harbours or other indentations, until the Kimberley Division is reached, where its character changes, and it becomes bold and broken, and fringed with numerous islands. The total length of the coast line, not including minor features, is estimated to be approximately 4,350 miles.

### *Bays, Gulfs, &c.*

The principal inlets, beginning from the north, are: Cambridge Gulf, Napier Broome Bay, Vansittart Bay, Admiralty Gulf, Montague Sound, York Sound, Brunswick Bay, Camden Sound, Collier Bay, King Sound, Beagle Bay, Roebuck Bay, Lagrange Bay, Port Walcott, Nickol Bay, Exmouth Gulf, Shark Bay, Champion Bay, Cockburn Sound, Koombana Bay, Geographe Bay, Flinders Bay, King George Sound, Bremer Bay, and Esperance Bay. With the exception of Princess Royal Harbour (the inner harbour of King George Sound), the principal anchorages used to the south of the 19th parallel of latitude are open roadsteads, which, as a rule, are only partially protected; but the holding grounds of these are fairly good, and accidents seldom happen to vessels properly found. Fine harbours have, however, been artificially provided at Fremantle, at the mouth of the Swan River, and at Bunbury, in Koombana Bay.

### *Capes.*

The principal capes are: Capes Domett and Dusséjour at the entrance of Cambridge Gulf; Cape Londonderry, which is the most northerly point of the State, with Cape Talbot, on the same peninsula; Cape Bougainville, lying between Admiralty Gulf and Vansittart Bay; Cape Voltaire, which is the western boundary of Admiralty Gulf; Cape Torrens, at the entrance to York Sound; Cape Lévêque, the western boundary of King Sound; Cape Bruguières, to the west of Nickol Bay; North-West Cape, which forms the western boundary of Exmouth Gulf; Cape Cuvier, at the northern extremity of Shark Bay; Cape Inscription, at the north end of Dirk Hartogs Island, so named because of an inscription plate placed there by Dirk Hartogs in 1616; Steep Point, situated on the southern entrance to Shark Bay, which is the most westerly point of the Continent; Cape Vlaming, being the Western extremity of Rottnest Island; Capes Naturaliste and Leeuwin at the south-western extremity of the Continent, and Point D'Entrecasteaux, West Cape Howe, Bald Head, Cape Riche, Hood Point, Cape le Grande, and Cape Arid on the Southern coast.

### *Tides.*

As would naturally be expected with so extensive a coast line, the tides are very varied, little or no rise and fall being experienced on the South and South-Western coasts, whilst from Shark

Digitized by Google

Bay northwards they increase rapidly, though not uniformly in range, attaining at King Sound a height of 46 feet.

*Islands.*

The islands which occur on the coast are, as a rule, small and unimportant, those best known being Garden and Rottnest Islands off Fremantle; the Houtman Abrolhos, near Champion Bay, on which guano is found; Dirk Hartogs and other islands in Shark Bay, used for pastoral purposes; Dampier Archipelago and the Montebello Group on the North-West coast; and off the Kimberley or extreme Northern coast, the Lacepedes, on which are guano deposits and the Buccaneer and Bonaparte Archipelagos, for the most part unexplored.

*Rivers.*

The principal rivers are: in the North, the Ord, with its tributaries, the Denham, Bow, Negri, and Panton; the Pentecost, with its tributary, the Chamberlain; the Durack, Drysdale, King Edward, Prince Regent, Charnley, Isdell, and the Fitzroy, with its tributaries the Margaret and Hann Rivers and Christmas Creek. In the North-West the De Grey, with its tributaries, the Oakover, Shaw, and Strelley; the Yule, the Fortescue, and the Ashburton, with its tributaries, the Henry and Hardy. Then, falling to the Western Coast, the Minslya, the Gascoyne, with its tributary, the Lyons; the Wooramel, the Murchison, with its tributary, the Sanford; the Greenough; the Swan, on which is situated the capital of the State, and which, inland, is called the Avon; the Murray, the Collie, and the Preston. And lastly, on the Southern Coast, the Blackwood, Donnelly, Warren, Frankland, Kalgan, Pallinup, Gairdner, Fitz Gerald and Phillips Rivers.

*Mountains.*

In the Kimberley District the two principal ranges of hills are the King Leopold and the Princess May ranges, the highest point in the latter, Mount Hann, attaining 2,800 feet. In the North-West, between the Fortescue and Ashburton Rivers, the highest range is the Hamersley, with Mount Bruce (4,024 feet). The Darling range, which extends from Yatheroo in the North to Point D'Entrecasteaux in the South, a distance of about 300 miles, attains its highest elevation, 1,910 feet above the level of the sea, at Mount Cooke in the Cockburn Sound District. In the South, the loftiest range is the Stirling range, the highest point of which is Bluff Knoll (3,640 feet). Between it and the coast, and parallel with both, extends the less elevated Porongorup range.

*Lakes.*

There are no lakes of any considerable importance in the State. Between the Darling range and the coast there are a few salt water lagoons, and many fresh water lakes, the majority of which are nothing more than swamps during the dry season, and none of them are of any economic importance. The so-called lakes in the interior of the State, which are frequently of very considerable area, are, except after the occasional heavy rains, merely immense salt marshes or clay-pans.

*Contour of the Country.*

That part of the State lying to the north of the 19th parallel of latitude may be described as mountainous, consisting of alternating high and lower lying plateaux; the highest country here is principally of sandstone formation. The North-West Division and much of the Gascoyne Division is a distinctly mountainous country, the ranges here being principally granite. The north and north-eastern parts of the State contain a large area of good pastoral country. A large proportion of the South-Western and Southern sea-boards is of flat, sandy character, with indications of a recent geological formation, and may be described as a vast forest, principally timbered with jarrah, white and red gums, and karri, most of which timbers are of great commercial value. From some points on the Western sea-board settlement has extended for about 500 miles inland; but, from very complete information furnished by explorers and prospectors, it is apparent that no considerable portion of the interior lying between the 19th and 31st parallels of latitude, and between the 121st and 129th meridians of longitude is suitable for any class of settlement except in connection with the development of the mineral resources. This area may be described as a great tableland, with an altitude of from one to two thousand feet above sea level, the surface of which consists largely of sand dunes, though in many parts of it there are large areas of clayey soils. Between the 30th parallel of latitude and the Great Australian Bight, much of the country is of limestone formation, and here there are immense areas of grass land, which only await the discovery of subterranean water to make them amongst the most productive areas of the State.

*Early History.*

The first authentic record of European explorers visiting any portion of Western Australia is contained in the words cut into the tin plate, now in the State Museum at Amsterdam, which was nailed on the 25th October, 1616, by Dirk Hartogs, the commander of the Dutch vessel *Eendragt*, to a post erected on Point Inscription on what is now called Dirk Hartogs Island. Other vessels successively visited, or were driven by stress of weather on the West coast of the Continent, notably the *Leeuwin* in 1622, the *Batavia* (Capt. Pelsart) in 1628, the *Limmen* (Capt. Tasman) in 1644, and the *Geelvinck* (Capt. de Vlaming) in 1696. The first Englishman, however, to land on these coasts was William Dampier, who, in 1688, in the *Cygnet*, landed at King Sound. French navigators followed during the next century and after, viz., de St. Alouarn, in *Le Gros Ventre*, in 1772, d'Entrecasteaux, in *La Recherche*, in 1792, Baudin, in the *Géographe*, in 1801, de Freycinet, in the *Uranie*, in 1818, and De Bougainville, with the vessels Thétis and Espérance, in 1825. In 1791, Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1801, Matthew Flinders, in the *Investigator*, explored the Southern coast of the Continent, which, at his suggestion, subsequently received the name of Australia; whilst from 1818 to 1822 Philip Parker King, first in the *Mermaid* and afterwards in the *Bathurst*, explored and carefully charted its Northern Coasts.

In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling, in H.M.S. *Success*, surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain Fremantle (afterwards Sir Chas. Fremantle, G.C.B.), in H.M.S. *Challenger*, took

Digitized by Google

possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieutenant-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the State was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on the 31st March, 1886.

*Constitution and Government.*

In 1870 the constitution, which was what is called "Representative," was established by Act 33 Vict., No. 13. The Governor was assisted by an Executive Council composed of the principal officers of the Government, and the Governor also had power to appoint two unofficial members to the Executive Council. There was also a Legislative Council, consisting then of three official members of the Executive Council, three unofficial nominees of the Governor, and 12 elected members.

Responsible government was granted to Western Australia in October, 1890, and the first Ministry was sworn in on 29th December, 1890.

The Legislature consists of two Houses: the Legislative Council, consisting of 30 members, and the Legislative Assembly, of 50 members.

Both Houses are elective.

*Legislative Council.*

*Provinces.*—The State is divided into 10 electoral provinces, each returning 3 members.

*Tenure of Seat.*—6 years.

*Qualification of Member.*—Any man who is (1) 30 years of age, and free from any legal incapacity; (2) a resident in the State for at least 2 years; (3) a natural-born subject of His Majesty or naturalised for 5 years, and a resident in the State during that period.

*Qualification of Elector.*—"The Constitution Act Amendment Act, 1899," has extended the right to vote equally to both sexes. The qualifications of a voter are laid down in the Act, which extends the franchise to every person, not under 21 years of age, and not otherwise disqualified, who (1) is a subject of the King, either natural-born or having been naturalised for at least 12 months; (2) has resided in the State for 6 months; and (3) in the province for which enrolment is claimed has freehold property of the clear value of £50, or is a householder or a ratepayer in respect of property of the clear annual value of £17, or a leaseholder to the clear annual value of £17, or a Crown leaseholder paying a rental of £10 per annum.

*Legislative Assembly.*

*Districts.*—There are 50 electoral districts for the Legislative Assembly, each represented by one member.

*Tenure of Seat.*—The members of the Assembly are elected for a period of 3 years.

*Qualification of a Member.*—Any man who has resided in the State for 12 months, if he be 21 years of age, and not subject to any legal incapacity, and is a natural-born subject of the King, or shall have been naturalised for 5 years, and shall have resided in the State for 2 years.

*Qualifications of Electors.*—Subject to certain qualifications every person not under twenty-one years of age, who—

(*a*) is a natural born or naturalised subject of His Majesty; and

(*b*) has resided in Western Australia for six months continuously; and

(*c*) has resided in the district for which he claims to be enrolled for a continuous period of one month immediately preceding the date of his claim,

is entitled to be enrolled as an elector, and when enrolled, and so long as he continues to reside in the district for which he is enrolled, to vote at the election of a member of the Legislative Assembly for that district. No person can be a registered voter in more than one electorate.

The Governor is advised by the following responsible Ministers, who form the Cabinet:—The Premier and Colonial Treasurer; the Minister for Lands and Agriculture; the Minister for Railways, Water Supply, and Industries; the Colonial Secretary and Minister for Education; the Minister for Works and Trading Concerns; the Attorney-General and Minister for Mines; and two Ministers without portfolio.

Western Australia is represented in the Federal Senate of Australia by six members, and in the House of Representatives by five members.

*Local Government.*

Under the "Municipal Corporations Act, 1906," municipal councils are allowed to levy general rates not exceeding 1*s.* 6*d.* in the £ per annum upon the ratable value of all house and land property. All license fees, tolls, dues, &c., under the Municipal Corporations Act are appropriated by the council of the municipality. Under the "Roads Act, 1911," Boards are allowed to levy a general rate as follows:—Upon the unimproved ratable value of land not less than 1*d.* or exceeding 3*d.* in the £, and upon the annual value not less than 9*d.* or exceeding 2*s.* in the £. Municipalities and Road Boards have power to borrow money for the construction of roads and other purposes. Both may levy "loan rates" for interest and Sinking Fund in connection with loans; for the former the rate must not exceed 1*s.* 6*d.* in the £, but for the latter no maximum has been fixed. The following municipalities have been proclaimed: Albany, Boulder, Broome, Bunbury, Busselton, Carnarvon, Claremont, Collie, Coolgardie, Cottesloe, East Fremantle, Fremantle, Geraldton, Guildford, Kalgoorlie, Kanowna, Leonora, Midland Junction, Mt. Magnet, Narrogin, Norseman, Northam, North Fremantle, Greater Perth, South Perth, Subiaco, Southern Cross, Victoria Park, Wagin, York. The municipal councils in towns where the population does not exceed 1,000 consist of a mayor and six councillors; where the population is between 1,000 and 5,000, of a mayor and nine councillors; where the population exceeds 5,000, a mayor and 12 councillors—the mayor being elected annually by the ratepayers, by whom also the councillors are elected for a term of three years. Local road boards and municipal councils have power under Acts of Parliament to issue licenses to carts, carriages, etc., within their respective districts and municipalities. 33,646*l.* was granted for the financial year 1915-16 to District Road Boards (of which there were, on the 30th June, 1916, 117) and Municipal Councils (30) for the construction, repair, and

Digitized by Google

upkeep of main and minor roads and bridges throughout the State, in addition to the moneys expended by the Public Works Department for the same purpose. Under the "Water Boards Act, 1904," Boards may levy a rate not exceeding 2*s.* 6*d.* in the £ on the annual ratable value of land, and have power to borrow money for the construction of works, etc. Under the Health Act, 1911, the Local Boards of Health of municipalities and other localities to which the provisions of the Act apply are required to make and levy such annual health rate as may be required for the purposes of that Act.

*Population and Chief Towns.*

The total population of the State at the 31st July, 1916, was estimated to be 314,740, excluding the aboriginal natives. The number of Chinese at the 1911 census was 1,812, of whom 1,775 were males and only 37 females. In addition to these there were 33 male and 27 female half-caste Chinese.

The chief towns are Perth (at the time of the 1911 census, 106,792, including the municipality of Fremantle, 14,499, and the various suburbs within the Metropolitan Area), and the following municipalities:—Albany (3,586), Boulder (10,824), Bunbury (3,763), Collie (1,731), Coolgardie (2,000), Geraldton (3,478), Kalgoorlie (8,781), Leonora (1,616), Northam (3,361), Wagin (1,000), York (1,535), and Broome, with a considerable floating population of pearlers, mostly Asiatics.

*Crown Lands.*

Of the total area of the State, 21,647,850 acres only were, on the 31st December, 1916, alienated or in process of alienation, while 197,806,246 acres were leased, viz., 193,833,114 for pastoral, and the balance for other purposes. No less than 405,134,704 acres were still unoccupied, and in great part unexplored. At present, the whole of the coast line, a length of 4,350 miles, not including minor features, from Eucla in the south to Cambridge Gulf in the north, may be said to be more or less settled, for a distance inland varying from one hundred to, in some places, five hundred miles, though a considerable portion of the land taken up, especially in the Kimberley, Eucla, and interior goldfields districts, has not yet been stocked or occupied.

North of Champion Bay large tracts of rural lands are only held on lease from the Crown for pastoral purposes. The south-west corner of the State, however, where the older settlements are situated, has now proved itself destined to become one of the world's greatest wheat producing areas, and agriculture here is progressing at an almost phenomenal rate, the wheat harvest having increased from 2,460,823 bushels in 1909, to 18,236,355 bushels in 1916. As a rule, a sufficient rainfall can be relied upon. In the neighbourhood of Toodyay, Northam, York, Beverley, Pingelly, Wagin, Katanning, and the other centres of the southern part of the State, the areas under farms and cultivation are constantly and rapidly extending, and of late wheat growing has been very successful a long way east of these places. The total area of land under cultivation on 28th Feb., 1916, was 8,056,952 acres, viz., under crop 2,189,456 acres, under permanent artificially sown grasses 9,119 acres, new ground cleared during the season and prepared for next season's crops 293,625 acres, land in fallow 686,421 acres, area of other cleared land, previously cropped, now used for grazing or lying idle 1,058,171 acres, ring-barked or partially cleared land 3,819,582 acres; beyond this, the travellers, way still lies for the most part through forests, varied by open sand plains covered with shrubs and flowering plants in infinite variety and beauty. Western Australia is famed for its "bush flowers." The flora is the most highly specialised in the world, four-fifths of the plants being endemic.

*Industry.*

One of the principal industries, as in the case of the other Australian States, is wool-growing. Sheep (of which there are 4,803,850) are depastured in all parts of the State. The northern districts are particularly favourable for stock of all kinds, and they are free from the "poison plant," which has proved such a hindrance to stock-farming in the south. The export of wool in the year ended 30th June, 1916, principally to London, was 28,868,646 lbs. greasy, valued at 1,258,577*l.* and 234,808 lbs. scoured and washed, valued at 14,606*l.* A considerable quantity of wine is also made. Since 1907, wheat growing has become a specially important industry. In that year, the export of wheat was valued at 96,675*l.*, that of flour at 34,565*l.* In 1910 the figures were respectively 406,326*l.* and 25,427*l.*, in 1911, 386,922*l.* and 54,565*l.*, in 1912, 100,148*l.* and 121,730*l.*, in 1913, 763,798*l.* and 239,840*l.*, whilst for the first six months of 1914 the values amounted to 1,343,856*l.* and 158,611*l.*; for the year ended 30th June, 1915, to 10*l.* and 26,630*l.*; and for the year ended 30th June, 1916, to 1,023,362*l.* and 214,166*l.* The season 1914–15 was an exceptionally dry one, and, in addition, war conditions have, of late, had an influence on the export. Another progressive industry is fruit-growing, especially apples, which latter are already exported in considerable quantities. The export of fruit rose in value from 925*l.* in 1907 to 32,274*l.* in 1913, to 68,280*l.* during the first six months of 1914, to 46,417*l.* during the year ended 30th June, 1915, and to 22,215*l.* during the year ended 30th June, 1916.

The principal forest area lies between south latitude 31° and 35°. West Australian "Jarrah" wood is well known throughout the world for its extraordinary durability, and is in great demand for paving, railway sleepers, piles for bridges, harbour works, etc. There is a large and increasing export of this timber, and the forests are worked by several companies enjoying concessions from the Government and also by the Government. The export of timber for the six months ended 30th June, 1914 was valued at 502,053*l.* The figures for the two subsequent years, 1914–15 and 1915–16, were respectively 808,392*l.* and 442,014*l.* Sandalwood is still abundant, and was exported to Asiatic countries to the value of 61,381*l.* during 1915–16.

At Broome and on the north-west coast generally, a fleet of some 218 schooners, cutters, and luggers are employed on the pearling banks, giving occupation to 97 white, 30 aboriginal, and 1,440 Asiatic pearlers. The export of pearl shell amounted to 158,597*l.* in 1915–16, when no pearls were exported.

For a long period lead and copper mines were held and worked in the neighbourhood of Champion Bay, but of late years little work has been done in them. Copper, however, has since been found also in several other districts, notably those of Mt. Morgans, Phillips River, and West Pilbara.

The other mineral resources of Western Australia were almost unknown, and quite undeveloped until comparatively recently. Gold was found in considerable quantity in the Kimberley goldfield in

Digitized by Google

1887; and although the field is now in a very depressed condition, chiefly owing to its distance and the great expense of any transactions there, it attracted a large number of experienced miners to Western Australia, and the result has been the discovery of gold in greater quantities elsewhere.

After the discovery and opening up of the Central and Eastern Goldfields of Western Australia, gold-mining became for the time being the principal industry of the State, and so rapidly did the annual output of gold increase for a number of years, that it placed Western Australia at the head of the gold-producing States of Australasia.

There are now 18 goldfields in existence—Kimberley, Pilbara, West Pilbara, Ashburton, Gascoyne, Murchison, East Murchison, Mount Margaret, Peak Hill, Yalgoo, Yilgarn, Coolgardie, East Coolgardie, North-East Coolgardie, North Coolgardie, Dundas, Broad Arrow, and Phillips River, and a large population is continually employed in searching for and extracting precious metals.

Much machinery is in operation, and the fields have for several years been well established, with a steady annual output and a settled population. The value of gold produced up to the end of July, 1916 was 127,881,864*l*. In the first seven months of 1916 the value of the gold production was 2,623,710*l*.

There is also good coal in the south-west corner of the State, and evidence of its existence in the vicinity of Champion Bay and the Irwin river. Coal is also said to exist in the Kimberley district. On the Collie Coalfield, situated in the Wellington district, six companies are successfully working coal-leases. The output in 1915-16 was 289,296 tons.

At the end of 1888 large deposits of stream tin were discovered at Greenbushes, on the Blackwood river, resulting in the opening up of a rich tinfield. Considerable quantities of tin have also been raised at Marble Bar.

Silver is found, mostly together with other minerals, and extracted in conjunction with gold. Other minerals found are antimony, godolinite, bismuth, tantalite, lead, asbestos, mica, wolfram and scheelite, zinc, ironstone, magnesite, limestone and pyritic ore.

### *Currency and Banking.*

The legal tender and usual currency is exclusively British sterling.

The following banks have establishments in the State: The Western Australian Bank, National Bank of Australasia, Union Bank of Australia, Limited, Bank of New South Wales, the Commercial Bank of Australia, the Bank of Australasia, the Commonwealth Bank of Australia, and the Royal Bank of Australia, Limited, which commenced business in 1915.

The deposits in the banks during the year ended 31st December, 1915, averaged 7,614,731*l*.

The Commonwealth Bank of Australia commenced business in Western Australia on 20th January, 1913. The average deposits for the year 1915 included above amounted to 1,620,727*l*., including Commonwealth Savings Bank Deposits.

The Government savings bank at Perth, with branch offices, was established in 1863; the deposits during the year ended 30th June, 1916, amounted to 3,640,874*l*., exclusive of amounts deposited in the School Savings Bank, viz., 13,965*l*.

Branches of the Commonwealth Savings Bank were opened in this State at the beginning of 1913, and the deposits during the year ended 30th June, 1916, amounted to 762,943*l*.

A branch of the Royal Mint exists in Perth. Expressed in ozs. of fine gold, the quantities received amounted in 1915 to 1,192,771 ozs. The total amount of fine gold received to the 31st December of the latter year was 18,601,622 ozs.

### *Education.*

Government Primary Schools exist in all parts of the State, and are under the control of the Minister for Education. The whole cost of the schools is borne by the Government, and the staffs are appointed by the Education Department.

Attendance at school of all children between the ages of six and fourteen is compulsory, and only in cases of poverty or sickness on the part of the parents is exemption granted to children between the ages of twelve and fourteen. General religious teaching, exclusive of dogmatic or polemic theology, is included in the course of instruction given, whilst representatives of various denominations are admitted to give instruction during school hours to their followers.

Boys over twelve and under fourteen years of age are trained as Junior Cadets in all schools.

The number of Government Primary Schools open in 1915 was 622. The average enrolment for the year was 46,258, and the average attendance 39,970.

Where an average attendance of ten children cannot be maintained, the Department pays an annual grant (from 7*l*. to 8*l*. 10*s*.) for each child if the parents secure a suitable teacher.

Children who complete satisfactorily the primary course may obtain the Department's "Qualifying Certificate." They may then pass to a High School for a four years' Secondary Course, or to the upper classes of a Central School for a two years' course.

Three courses—Commercial, Industrial, and Domestic—are provided in the upper classes of the Central Schools.

The four years' course in the Government High Schools is divided into two sections of two years each. The work of the lower section is, with very small exceptions, common to all students. In the upper section there is a considerable amount of specialisation.

Manual training in woodwork is included in the course of all the larger Primary Schools. In the Central Schools and High Schools metalwork is also taken.

Domestic work—Cookery, Laundry and Housewifery—is included in the course of all the larger Primary Schools, and also in the course of the Central Schools and High Schools.

Continuation Classes are provided for those who leave school without passing through the upper classes of the Central Schools or the High Schools. The courses of these classes are designed to lead to higher work in the Technical Schools.

Technical Schools are established in the principal centres. They include advanced work in Science, Trades Classes, Commercial Classes, Art Classes, Domestic Classes, etc. There is also a large School of Mines at Kalgoorlie.

The University in Perth provides courses for Degrees in Arts, Science (including Agriculture), and Engineering.

Scholarships are provided by the Government to enable pupils from the Primary Schools to pass to the Secondary Schools. Further scholarships are provided to be held at the Technical Schools, and ten scholarships are offered each year for the University.

Education is free throughout from the Kindergarten to the University. Fees at the Government High School were abolished at the beginning of

Digitized by Google

1913, when the University opened without fees. Fees in the Technical Schools were abolished at the beginning of 1914.

Private Schools are open to Government inspection, and must be declared efficient. The Government Secondary School Scholarships may be held at non-Government Secondary Schools.

The total Government expenditure upon education during 1915-16 (apart from the University and the cost of buildings) was 317,656*l*. The amount expended on buildings for the Education Department was 29,448*l*. There was also a grant of 13,500*l*. to the University. The aggregate expenditure upon Education was therefore 360,604*l*. The mean population of the State for the financial year was 315,209.

### *Means of Communication.*

The State possesses at present eight lines of Government railways as shewn below. The first four form the Southern System, which is connected with the Northern System by No. 5. The Midland Railway Company's (Private) line of 277 miles, constructed on the land grant system, and running from Midland Junction to Walkaway, also affords a connection between the Southern and Northern Systems.

The Hopetoun to Ravensthorpe and Port Hedland to Marble Bar Railways are not geographically connected with the remainder of the system.

| Division. | Main Line. Miles. |
|---|---|
| 1. EASTERN RAILWAY— Fremantle to Perth and Northam, including Belmont, Upper Darling Range, Canning Mills Extension, Mundaring Weir, Toodyay, and Bolgart, and Mahogany Creek Deviation | 156 |
| 2. SOUTH WESTERN RAILWAY— From East Perth Junction Southward to Bunbury and Jarnadup, including Canning and Bunbury Racecourse lines, Armadale-Fremantle, Pinjarra-Dwarda, Railway Mill, Brunswick-Narrogin, Boyanup-Busselton, Wonnerup-Nannup, and Donnybrook-Katanning lines ... | 609 |
| 3. GREAT SOUTHERN RAILWAY— Spencer's Brook to Albany, including York, Bruce Rock-Merredin, Brookton-Corrigin, Narrogin-Bruce Rock, Yilliminning-Kondinin, Wagin-Kukerin, Katanning-Nyabing, Tambellup-Ongerup and Torbay Junction-Denmark lines ... ... ... ... | 812 |
| 4. EASTERN GOLDFIELDS RAILWAY— From Northam Eastward to Southern Cross, Coolgardie, Kalgoorlie and Laverton, including Bullfinch, Norseman, Boulder-Brown Hill, Kanowna and Leonora branches | 690 |
| 5. EAST NORTHAM-MULLEWA RAILWAY— Including the Goomalling-Merredin Railway ... ... ... ... ... | 375 |
| 6. NORTHERN RAILWAY— Geraldton to Meekatharra, including Narngulu-Walkaway, Mt. Magnet-Sandstone, Geraldton-Ajana, and Naraling-Yuna lines ... ... ... | 542 |
| 7. HOPETOUN-RAVENSTHORPE RAILWAY— | 34 |
| 8. PORT HEDLAND-MARBLE BAR RAILWAY— | 114 |
| Total... ... ... | 3,332 |

These lines have numerous sidings, totalling in all 344 miles.

The Government have taken over from the 1st July, 1913, the Perth Electric Tramways.

There are also several other private lines, mostly constructed by timber companies in the south of the State, in extent about 688 miles.

A scheme has for years been under consideration by the Commonwealth Government, and is now being carried out, for the connection, by a proposed Transcontinental Railway (4ft. 8½in. gauge) from Kalgoorlie to Port Augusta, of the railway systems of Western and South Australia, a distance of 1,063 miles.

The receipts of the Government railways for the year ended June, 1916, were 2,088,110*l*., and the working expenses 1,511,655*l*. The total cost of construction has been 17,118,195*l*.

Of electric telegraph on the 30th June, 1916, there were 15,449 miles of wire. During 1915 the revenue received by the telegraph branch was 85,019*l*.; telephone receipts amounted to 73,408*l*., and postal and other revenue of the post and telegraph department to 187,675*l*.; cost of post and telegraph, 490,717*l*. (incl. new works). There is telegraphic communication with Europe, *viâ* South Australia, and by a direct cable from Java to Roebuck Bay, also with South Africa by Cocos Island. Postal arrangements embrace the whole of the settled portion of the State, both by inland services and by steamers on the coast. There are also 30,277 miles of telephone wire in the State; further 7,360 miles of Government, and 575 miles of private railway telephone wire, and 1,076 miles of Government railway telegraph wire.

A high-power wireless station has been erected at Applecross, between Perth and Fremantle, by the Commonwealth Government. Stations of lower power have been erected at Esperance, Geraldton, Roebourne, Broome and Wyndham.

The steamers of the P. and O. and Orient Companies carry mails weekly to and from the United Kingdom, Europe, and the other Australian States, which are further supplemented by those of the Messageries Maritimes, whilst the White Star line conveys those from and to South Africa at regular monthly intervals. Mails are also despatched to and received from Australian States, New Zealand, and Polynesia, by the various inter-State steamers. Local steamers supply coastal communication. Letters from England reach Perth in about 28 days *viâ* Brindisi. The rates of postage are:—

Letters.

| Places. | per ½-oz. |
|---|---|
| Within the British Empire, New Hebrides, Banks and Torres Islands | 1*d*. |
| Other Countries of Postal Union | 2½*d*. |

The federal postal statistics for the year ended 30th June, 1916, give the following as the number (each counted once) of letters, postcards, etc., received and despatched in this State :—

| | Inland. | English, Inter-State, and Foreign. |
|---|---|---|
| Letters, Post Cards and Letter Cards | 24,313,397 | 11,490,384 |
| Newspapers | 4,021,559 | 4,549,270 |
| Packets | 2,004,938 | 1,461,430 |
| Parcels | 202,994 | 128,667 |
| Registered Articles | 351,443 | 135,120 |

Fremantle is a port of registry, with 381 vessels and a tonnage of 32,923 on 31st December, 1915. Harbour works have been constructed, and the Royal Mail steamers, as also those of the Messageries Maritimes, make Fremantle their port of call.

*Aborigines.*

The native population is not large*, and in the more settled districts it is fast disappearing. The natives were, and still are, very useful to the pioneer settlers, as shepherds, stock-riders, and general station hands, and settlement has been very much assisted by their aid. In the northern districts they are occasionally employed as pearl-shell divers. As a general rule, they are not hostile, though at times very troublesome, especially when they take to sheep-stealing. Owing to their innate liking for a roving vagrant life, it has not been found possible to do much for them, except to teach them to be useful. In this connection may be mentioned the successful mission conducted at New Norcia (founded by the late Right Reverend Bishop Salvado), which was commenced in the year 1846. A Bill for the better protection of the aborigines of Western Australia was passed by the Houses of Legislature in 1897, but has since been repealed by the "Aborigines Act" of 1905 (amended, 1911). In accordance with the clauses of the latter the welfare of the natives is now entrusted to a sub-department of the State under the control of a Minister of the Crown, and provision is made for the appropriation of an annual sum of 10,000*l.* to be used by this sub-department. In addition to this sum, a further amount of 12,873*l.* was spent on behalf of the aborigines during the year ending 30th June, 1916.

*Climate.*

The climate of Western Australia, though hot towards the north, is one of the finest and healthiest in the world. The average death-rate during 1915 was 9·28 per 1,000. A hot wind, for a few hours now and then in the summer months, is the only disagreeable feature. The average rainfall at Perth is 33·18 inches (for 40 years), and the mean temperature is 64°. The rainy season extends from May to October.

*Governors of Western Australia.*†

Sir W. C. F. Robinson, G.C.M.G., 20th Oct., 1890.
Alexander Campbell Onslow, Administrator, 21st Sept., 1891.
Sir W. C. F. Robinson, G.C.M.G., Gov., 9th July, 1892.
Sir Alexander Campbell Onslow, Kt., Administrator, 18th Mar., 1895.
Sir Gerard Smith, K.C.M.G., Gov., 23rd Dec., 1895.
Sir Alexander Campbell Onslow, Kt., Administrator, 23rd Mar., 1900.
Edward Albert Stone, Administrator, 4th Mar., 1901.
The Hon. Sir Arthur Lawley, K.C.M.G., Gov., 1st May, 1901.
Sir Edward Albert Stone, Kt., Administrator, 14th Aug., 1902.
Admiral Sir Fredk. G. D. Bedford, G.C.B., 24th March, 1903.
Sir Gerald Strickland, Count della Catena, K.C.M.G., 31st May, 1909.
Major-General Sir H. Barron, K.C.M.G., C.V.O. 17th March, 1913.
Rt. Hon. Sir William Grey Ellison-Macartney, P.C., K.C.M.G., 9th April, 1917.

(Sir Edward Albert Stone, Kt., Lieutenant Governor, permanently appointed, 7th May, 1906, to act when necessary during absence of Governor from State.)

*District Officer*, Capt. J. J. H. Airey, 432*l*.

## THE NORTHERN TERRITORY.

*Area and Population.*

Upon the extension of New South Wales westward to the 129th meridian in 1827, the Northern Territory was comprised within that colony (see Commonwealth Official Year Book No 4, page 16), and in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911.

*Area and Boundaries.*

The total area of this Territory is 523,620 square miles, or 335,116,800 acres. Its length from north to south is about 900 miles, while its breadth from east to west is 560 miles. Its eastern boundary, dividing it from Queensland, is the 138th meridian of east longitude; and its western boundary, separating it from Western Australia, the 129th meridian. Its southern boundary is the 26th parallel of south latitude, dividing it from South Australia. The northern boundary is the coast line of those parts of the Indian Ocean known as the Timor and Arafura Seas. Near the mouth of the Wentworth River, in the Gulf of Carpentaria, the Coast line is met by the eastern boundary; at Cape Domett, near Cambridge Gulf, the western boundary cuts the northern coast line. The length of coast line is about 1040 miles, or 503 square miles of area to one mile of coast line; an exact survey has, however, not yet been made.

*Population.*

(i.) *Character.* In 1881 there were 670 Europeans in the Territory, and at the end of 1914 the number was estimated at 2,452. The Chinese population, at its maximum during the years of railway construction, 1887 and 1888, has gradually dwindled, the estimate for 1914 being 1,033. Japanese, first recorded in 1884, increased up to the year 1898, falling again after five years. The highest recorded population, excluding aborigines, was 7,533 in 1888; the estimate for 1914 was 3,720. The year 1911 was the first in which the population was dominated by the European race. A thirty years table of population, distinguishing races, will be found on page 1156 of the Commonwealth Official Year Book, No. 5. Subsequent to the census of 1911, a revision of the estimates, back to 1901, was made. The results are shewn in the following table:—

*Population of Northern Territory (Exclusive of Aborigines), 1907 to 1916.*

| Year ended 31st December. | Male. | Female. | Total. |
|---|---|---|---|
| 1907 .. | 3,095 | 642 | 3,737 |
| 1908 .. | 2,963 | 609 | 3,572 |
| 1909 .. | 2,927 | 576 | 3,503 |
| 1910 .. | 2,738 | 563 | 3,301 |
| 1911 .. | 2,662 | 586 | 3,248 |
| 1912 .. | 2,854 | 621 | 3,475 |
| 1913 .. | 2,995 | 677 | 3,672 |
| 1914 .. | 3,252 | 721 | 3,973 |
| 1915 .. | 3,687 | 876 | 4,563 |
| 1916 .. | 3,839 | 928 | 4,767 |

*Aborigines.*

The interior of the Territory is the most thickly populated by the natives, but it is believed that they are quickly dying out. In these

Digitized by Google

regions, remote from contact with other races, the native has maintained his primitive simplicity, and furnishes an interesting subject of study to the anthropologist and the ethnologist. At the census of 1911, full-blooded aboriginals in the employ of whites, and those who were living in a civilised or a semi-civilised condition in the vicinity of European settlements, were enumerated—the males bein' 743, females 480; total 1223. Estimates of the total black population of the Territory vary from 20,000 to 50,000.

### *Historical.*

#### *Exploration and Colonisation.*

(i.) *Coastal Surveys.* The coast was surveyed by King in 1817, and by Wickham and Stokes in 1838 and 1839. Port Darwin, the site of Darwin, the present capital, was discovered in the latter year.

(ii.) *Exploration of Interior.* Leichhardt traversed a great deal of the country in 1844-5, journeying from Queensland to Port Essington. Gregory started from Point Pearce in 1855, and reached Brisbane. Minor explorations were also successfully undertaken.

(iii.) *Crossing the Continent.* In 1861, Stuart began his transcontinental journey from Adelaide, and reached the north coast in July, 1862. His track has become the main route, and along it the telegraph line is constructed.

(iv.) *Demarcation of Boundaries.* Upon the extension westwards of New South Wales, in 1827, the Territory was included in that colony, and remained so until 1863, when it was added to South Australia, which in 1836 had been created a separate province.

(v.) *The Military Settlement.* A military post was formed on Melville Island in 1825. This was transferred in 1827 to Raffles Bay, and a few years later to Port Essington. Little public attention was given to the station, and no attempt at colonisation was made. It was abandoned in 1849.

#### *Control by South Australia.*

(i.) *Transfer.* As a result of representations to the Imperial Government by South Australia, the Territory was incorporated with that State in 1863, and administered through a Government Resident located at Port Darwin up to 31st December, 1910. Early attempts at settlement failed. Ultimately, Port Darwin was chosen for the site of the capital, and Palmerston (now officially named Darwin) founded.

(ii.) *Land Legislation.* The South Australian Government's land legislation was framed to attract settlers, viz., low rents with easy entry and unencumbered holding over long periods; or grant of fee simple at low price. Special arrangements were made to foster tropical agriculture, including the establishment of botanic gardens at Port Darwin, for observation and experiment. Large "runs" were established on the northern well grassed and watered pastures.

(iii.) *Mining.* The survey and construction of the overland telegraph revealed the auriferous nature of the country, and gold and other minerals were discovered in various localities. The Government regulated the area of claims and the conditions upon which they were held.

(iv.) *Cessation of Supervision by South Australia.* Progress was not as marked as was desired, the Territory being thought capable of more rapid development. Accordingly the Federal and State Governments agreed upon a surrender by the latter as from 1st January, 1911, since which date the Territory has been a dependency of the Commonwealth.

#### *Transfer to Commonwealth.*

(i.) *The Agreement.* An agreement of transfer, afterwards ratified by the representative Parliaments, was made between the two Governments. In accordance with a proclamation issued in the terms of the Commonwealth Acceptance Act (No. 20 of 1910), the transfer was effected on 1st January, 1911.

(ii.) *The Northern Territory Acceptance Act.* By the Commonwealth Act, the agreement is ratified and approved, the Territory is accepted together with the Palmerston and Pine Creek Railway; laws and courts of justice remain in operation, powers and functions of magistrates and officials remain vested; estates and interests continue upon the same terms; trade with Australian States is declared free. The Commonwealth assumes responsibility for the State loans in respect of the Territory, paying the interest yearly to the State, providing a sinking fund to pay off the loans at maturity, and paying off the deficit in respect of the Territory. It also purchases the Port Augusta to Oodnadatta railway, and agrees to complete the construction of the trans-continental railway from Port Darwin to Port Augusta.

(iii.) *The South Australian Surrender Act.*—The State Act approves and ratifies the agreement surrendering the Territory.

(iv.) *The Northern Territory (Administration) Act, 1910.*—The Act provides for Government authorising the appointment of an administrator and officials. South Australian laws are declared to continue in force as laws of the Territory and certain Commonwealth Acts to apply. Power is given to the Governor-General to make Ordinances having the force of law.

(v.) *Administration.*—A Resident Administrator, vested with supreme authority in internal affairs, was appointed in the Department of the Minister for External Affairs in February, 1912. Many other important administrative offices have also been filled.

(vi.) *Legislation.*—The main provisions of the Ordinances passed are as follows:—The powers and duties of the Administrator vested in the appointee, include custody of the public seal, appointment and suspension of officials, and execution of leases of Crown lands. He is assisted by a council of advice, not exceeding six, and meeting monthly. A Supreme Court with original and appellate jurisdiction is instituted, the method of appointment of the Judge is prescribed, and provision is made for trial by jury, and for the registration and summoning of jurors. A Sheriff, a Registrar-General, and a Health Officer are provided for, also the registration of births, marriages and deaths, and of deeds and documents. District Councils are authorised to assess land values and levy rates on unimproved value. Custody and control of aborigines with extensive powers of supervision are vested in the Chief Protector. Birds protected—some during the year, and some during part of the year, are scheduled. Crown lands are classified, and their mode of acquisition, entry and holding defined. Shop assistants are to have a weekly half holiday, and the establishments must be closed at a certain time. Mining is encouraged by the provision of rewards for the invention of new processes, and

Digitized by Google

the discovery of valuable deposits and of new mineral fields; subsidization of the industry and the issue of prospecting licences are also provided for. Licences to search for mineral oil, and leases of land for the working of the industry are available. A Board is constituted for the purpose of making advances to settlers, who intend to improve and stock their holdings, to purchase farm implements, plant, etc., or to pay off mortgages, the rate of interest and terms of repayment being set out.

### *Physiography.*

*Tropical Nature of the Country.*—The territory is within the torrid zone, with the exception of a strip 2½ degrees wide, which lies south of the Tropic of Capricorn.

*Contour and Physical Characteristics.*—The low flat coast line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl, and ironstone form the occasional cliffy headlands. The sea frontage of more than 1000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

Inland, the country is generally destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea, and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

### *Climate.*

On the northern coast, as in the tropics generally, there are two main climatic divisions—the wet season, November to April, and the dry season, May to October. The changes of season are uniform and regular. Immediately after the vernal equinox, the wet season is heralded by the cessation of the east-south-easterly monsoon, which gives place to calm and light variable winds. Intensely hot weather prevails for a few days, thunder-clouds gathering and increasing daily until they burst in heavy thunderstorms accompanied by hurricanes, and increasing in strength and frequency until the end of November, when they become of almost daily occurrence, about an inch of rain falling during each storm. During December the north-west monsoon sets in gradually, with rain nearly every day, and increasing in force until about the end of January. At this period of the year the wet season penetrates into the heart of the continent. This monsoon dies away at the autumnal equinox, and is succeeded by light and variable winds till the end of April, when the dry season commences with the setting in of the south-east monsoon. Nearly the whole of the rainfall occurs in the summer months.

### *Fauna and Flora.*

*Native Animals.*—The ordinary types of Australian fauna inhabit the territory. As elsewhere on the continent, the higher *Theria* are rare. There are many genera of marsupials, and individuals are numerous. The birds also are typically Australian, with brilliant plumage, and not generally gifted with song. Crocodiles and fresh-water tortoises frequent the northern rivers. There are some species of snakes, mostly non-venomous, the most numerous being the harmless python. Frogs abound, the water-holding frog being common in Central Australia. The rivers contain many varieties of freshwater fish. The molluscan fauna of the coast are mostly carnivorous, the vegetable feeders being very poorly represented, probably on account of the dearth of seaweed. Land and freshwater shellfish are not abundant. Among insects, many beautiful butterflies thrive in the warm damp atmosphere. Beetles also are strongly represented. The white ant is a pest, very few timbers being immune from its ravages. Anthills in the Territory sometimes attain a height of twenty-five feet and a diameter of ten feet. Another destructive insect, particularly active and mischievous inland, is the borer. Mosquitoes and sandflies are very troublesome, particularly from January to April. There are not many crustaceans.

*Imported Stock.*—Buffalo thrive in the Territory. At Port Essington they are numerous, and there are large herds on Melville Island. Timor ponies have also been introduced. Imported sheep and horned cattle thrive on the stations.

*Protection of Fauna.*—Ruthless destruction of native birds is prohibited. An Ordinance (No. 1 of 1912) gives the Administrator power to declare that any bird is protected; and provides that permits to export protected birds, or the skins or eggs of such birds, will only be issued subject to such conditions as the Administrator directs.

*Flora.*—The vegetation is tropical, many of the forms belonging to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriantly to the water's edge. The indented arms of the coast are thickly fringed with the mangrove. On the ranges, pines, fig trees, and orange trees flourish. The Roper River drains extensive forest lands. Leichhardt pines and palms form the vegetation of the tableland, which stretches across the Territory about the 14th degree of south latitude. On the higher steppes there are a few varieties of eucalyptus, and many fibre plants are also indigenous. On the wide expanses of plain country of the interior, there is little vegetation, tree growth being very scanty, consisting chiefly of stunted eucalypts, such as the gimlet gum, black box, and desert sheoak. In the north-western districts there is an almost entire absence of lichens and mosses, though ferns are plentiful in the vicinity of the Victoria River. The following orders are well represented:—*Euphorbiaceæ, Compositæ, Convolvulaceæ, Rubiaceæ, Goodenoviaceæ, Leguminosæ, Urticeæ.*

### *Production.*

There is no great home consumption of the articles produced in the Territory, the greater part being exported oversea and to the States of the Commonwealth.

*Stock.*—The spacious, well-grassed "runs" of the Territory are suitable for horse and cattle breeding. It is anticipated that the cattle trade with the East will develop. Large numbers are overlanded to neighbouring States, which also take considerable quantities of horse hides. The estimated number of stock on 31st December, 1915, was:—

*Live Stock, Northern Territory, 31st December, 1915.*—Horses, 19,957; cattle, 483,961; sheep, 57,827; pigs, 500; goats, 11,272.

Digitized by Google

Dairying as an industry is non-existent. The abundant indigenous herbage is, however, well suited for stock, and the making of hay and ensilage would ensure the development of the industry.

*Mining.*—Considerable quantities of the precious and commercial metals are mined. The discovery of gold and tin in various localities, and the measure of success that has attended their working, indicate scope for development. Both alluvial and reef gold are found, and there are several batteries and cyanide plants. The following table shews the total mineral production for 22 years.

*Value of Mineral Production, Northern Territory, 1905 to 1915.*

| Year. | Gold. | Tin Ore. | Wolfram. | Silver Lead. | Copper Ore. | Smelter Product (C'pp'r Base) | Total Value. |
|---|---|---|---|---|---|---|---|
| | £ | £ | £ | £ | £ | £ | £ |

| 1896 ... | 193 | 1,678 | 1,871 | 1907 ... | 208 | 958 | 1,166 |
| 1897 ... | 153 | 1,633 | 1,786 | 1908 ... | 150 | 674 | 824 |
| 1898 ... | 107 | 1,456 | 1,563 | 1909 ... | 190 | 630 | 820 |
| 1899 ... | 114 | 1,372 | 1,486 | 1910 ... | 140 | 602 | 742 |
| 1900 ... | 72 | 1,432 | 1,504 | 1911 ... | 101 | 575 | 676 |
| 1901 ... | 58 | 1,280 | 1,338 | 1912 ... | 84 | 542 | 626 |
| 1902 ... | 47 | 1,160 | 1,207 | 1913 ... | 90 | 530 | 620 |
| 1903 ... | 91 | 1,202 | 1,293 | 1914 .. | 136 | 462 | 598 |
| 1904 ... | 189 | 1,158 | 1,347 | 1915 ... | 112 | 389 | 501 |

(ii.) *Mining Accidents, 1900 to 1914.* In 1911 five mining accidents were recorded, four resulting in death. There were no serious accidents in 1910, 1912 and 1913. In each of the years 1914 and 1915 there was one death from accident. During the nine years preceding (1901-1909), nine fatal accidents and seven cases of serious injury were recorded, the majority of the victims being Chinese.

*Pearl Shell.*

In 1884 mother-of-pearl shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. Latterly, however, the opening up of new patches has led to a revival. In 1915, twenty-five boats were engaged, valued, with their equipment, at about £6,250; 150 men were employed. Forty-two tons of pearl shell were obtained, valued at £6,135 Bêche-de-mer valued at £160 was also raised and 100 lbs. of tortoiseshell, valued at £50.

*Commerce and Shipping.*

*Trade.*—The following table shews the total trade of the Territory for ten years from 1901 to 1910:—

*Value of Imports and Exports, Northern Territory, 1901 to 1910.*

| — | 1901. | 1902. | 1903. | 1904. | 1905. | 1906. | 1907. | 1908. | 1909. | 1910. |
|---|---|---|---|---|---|---|---|---|---|---|
| | £ | £ | £ | £ | £ | £ | £ | £ | £ | £ |

Digitized by Google

No record is now kept of the direction of trade between the Commonwealth States and Territories. It is, therefore, impossible to give the total imports and exports of the Northern Territory for years later than 1910. The figures for 1911, and following years are given below, with the average annual trade in five year periods from 1881 to 1910.

*Value of Imports and Exports, Northern Territory, 1881 to 1910, and 1911, 1912, 1913, 1914-15, 1915-16, and 1916-17.*

| Period. | Annual Imports. | Annual Exports. | Period. | Annual Imports. | Annual Exports. |
|---|---|---|---|---|---|
| | £ | £ | | £ | £ |
| 1881–1885 | 125,600 | 92,727 | 1911 | 14,284 | 44,662 |

The total exports for 1911 and later years are not available, only the articles sent beyond the Commonwealth being now recorded. The value of principal articles exported oversea for the years 1913 and 1914-15 are as follows :—Bêche-de-mer, 1913, £1,766; 1914-15, £2,472; 1916-17, Nil. Gold, 1913, £2,924; 1914-15, £590; 1916-17, Nil. Tin ore and concentrates, 1913, £27,120; 1914-15, £5,830; 1915-16, £12,316; 1916-17, £12,793. Wolfram, 1913, £2,384; 1914-15, £1,030; 1916-17, Nil. Pearl shell, 1913, £13,616; 1914-15, Nil; 1915-16, £6,135; 1916-17, Nil.

*Shipping.*—The Territory's oversea commerce is carried in British and Japanese bottoms. One of the British lines maintains a monthly service, other lines are irregular. Coastal shipping is chiefly in Australian vessels. There is a small local trade, a steamship running between Port Darwin, Port McArthur, Daly River, Victoria River, and Wyndham (Western Australia).

*Shipping 1881 to 1914-15.*—The average annual shipping of the Territory from 1881 to 1910 is shewn below in 5-year periods; the figures for 1911, 1912, 1913 and 1914-15 are also given.

### *Internal Communication.*

*Railways.*—Under the agreement ratified by the Act the Commonwealth is to construct the Northern Territory portion of the transcontinental railway line (connecting Adelaide and Darwin, *via* Port Augusta).

The Northern line from Adelaide terminates at Oodnadatta, about 100 miles south of the southern boundary of the Territory. The only line at present in the Territory is one from Darwin to Pine Creek, a length of 145½ miles, of 3 ft. 6 in. gauge; and Pine Creek is distant about 1,100 miles from Oodnadatta. The extension of this line southwards from Pine Creek to Katherine River is being proceeded with. It is stated that this transcontinental railway would bring London within seventeen days of Adelaide. The Commonwealth also acquired on 1st January, 1911, the property in the line from Port Augusta to Oodnadatta.

*Posts.*—The principal mail services are as follows:—

(i.) *Marine.* Postal communication is maintained between Sydney, Melbourne, and Adelaide, *via* North Queensland ports. The service extends to China and Japan. There is also a quarterly contract service between Darwin and Boroloola, calling half-yearly at Roper River; and a service every two months between Darwin and Wyndham, on the estuary of Ord River, in the north-east of Western Australia. These are subsided according to agreement for three years, the amount for the first service being £350; and for the second, £125 per voyage.

(ii.) *Inland.* Posts are also despatched into the interior of the Continent. One route is from the Katherine Telegraph Station southwards as far as Renner Springs, and then eastwards to Anthony Lagoon, where the Queensland mailman is met. The service is maintained with difficulty, on account of the many hardships caused by the alternations of extreme drought and flood.

Other inland routes are served, and there is a frequent service in Darwin.

*Telegraphs.*—The transcontinental telegraph line, covering a length of 2,230 miles, was completed on 2nd August, 1872, at a cost of nearly half-a-million sterling. The line runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, *via* Banjoewangie (Java), Singapore and Madras.

Between Darwin and Banjoewangie the submarine cable is duplicated.

### *Land Tenure.*

The system of land settlement in the Northern Territory has been reorganised by the Commonwealth Government. The Lands Ordinances of 1912, 1913 and 1914, regulate the future disposal of land in the Territory. A leasehold system only is provided for, and no further alienation of Crown lands will be permitted, unless such alienation is inpursuance of existing agreements. The classification and control of Crown lands is in the hands of a Board, consisting of the Director of Lands, the Director of Agriculture, and the Chief Surveyor. The classified land is leased in blocks, the maximum area ranging from 300 square miles of first-class pastoral to 1280 acres of first-class agricultural land. Before offering any land for leasing, the Board fixes the annual rental, but every lease is subject to reappraisement of rent at specified periods, viz., every 14 years in the case of town lands, and every 21 years in the case of agricultural and pastoral lands.

Leases under these Ordinances are in perpetuity, except as regards pastoral and miscellaneous leases, the term of which is 21 or 42 years, according to the quality of the land leased.

The lessee must reside on the land leased for a certain period every year, must fence, stock, and cultivate it to the extent prescribed, and must, within two years of the commencement of the lease, establish a home on it. In order to promote settlement in the Territory, the first five thousand blocks of agricultural land taken up on perpetual lease under this Ordinance will be rent free during the life of the applicant, or for 21 years from the commencement of the lease, whichever period is longer.

Many farms have already been surveyed on the Daly river, varying in size from 290 to 620 acres, and are now being alloted. The Government provides fencing, building materials, implements, and stock at cost price, and on long terms, or advances the money required for their purchase.

The various types of leases, licenses, and permits current are as follows:—(i.) Agricultural leases; (ii.) pastoral leases; (iii.) special leases; (iv.) leases with right of purchase; (v.) tropical products leases; (vi.) leases for horsebreeding stations; (vii.) licenses; and (viii.) pastoral and other permits.

(i.) *Area held under Lease, License and Permit.*—The following table shews the total area held under lease, license, and permit at the end of the year 1901, and from 1907 to 1914-15.

## PAPUA.

*Situation and Area.*

Papua (formerly called British New Guinea) is composed of a portion of the island of New Guinea, and of a number of islands, most of which lie to the south-east of New Guinea. The boundaries of the Territory are as follows:—"The S. and S.E. shores of New Guinea, from 141° E. long. eastward as far as East Cape, thence N.W. to 8° S. lat. in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8° S. parallel to 147° E. long., then in a straight line N.W. to the intersection of 6° S. lat. and 144° E. long., and continuing W.N.W. to the intersection of 5° S. lat. and 141° E. long. together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between 8° and 12° S. lat. and between 141° and 155° E. long., and not forming part of Queensland; and including all islands and reefs lying in the Gulf of Papua to the north of 8° S. lat."

New Guinea, the largest island in the world if Australia is excluded, lies some 80 miles to the north of Queensland, between 0° 0′ and 12° 0′ S. lat., and between 130° 50′ and 154° 30′ E. long. Its greatest length is 1,490 miles, and its maximum breadth 430 miles; its area being about 234,768 square miles. The islands which lie near Papua, and which form part of the Territory, number, great and small, about two hundred. Of these the principal ones are: Kiriwina (in the Trobriand group of D'Entrecasteaux), Woodlark, Normanby, Goodenough, Fergusson, St. Aignan, Rossel and Sudest.

*History.*

The island of New Guinea was discovered in 1511 by Antonio de Abrea, and it was touched at by several of the early navigators. The Archipelagos lying to the south-east of New Guinea were discovered by French navigators towards the close of the eighteenth century. The waters that are adjacent to the Archipelagos, and to the south-eastern coasts of New Guinea, have at different periods been partly surveyed and mapped by British ships of war.

The whole island to the west of 141° E. long. is claimed by the Dutch as suzerains of the Sultan of Tidore. The Dutch have established a post on the south coast of New Guinea, known as Merauké, which is in charge of a Resident. It is a little to the West of the S.W. extreme of the Anglo-Dutch boundary. That portion of the island which lies to the eastward of 141° E. long. and to the north of British New Guinea belongs to the

Digitized by Google

German Empire. A Government has been established and several industries are being started there. The acquisition by the British Crown of the portion of the island not claimed by Holland was long advocated by Australian statesmen, and the growing influence of France and Germany in the Pacific Ocean, coupled with the establishment of a penal settlement in the French island of New Caledonia, created some alarm in Australia lest a country lying so near to Australia as New Guinea should pass into the hands of a foreign Power. To prevent this from taking place as regards the eastern part of New Guinea, the Government of Queensland annexed it to the Empire on the 4th of April, 1883, but this proceeding was not ratified by the Imperial Government. The Intercolonial Convention held at Sydney in Nov. and Dec., 1883, passed resolutions urging the annexation of Eastern New Guinea, and undertook to recommend their respective Legislatures to provide for defraying a part of the cost of a Protectorate if one were established by the Imperial Government. On the Australasian colonies agreeing to guarantee 15,000*l.* a year to meet the cost, a Protectorate was proclaimed by Commodore Erskine on the 6th November, 1884, over the south-east coast of New Guinea and the adjacent islands.

General Sir Peter Scratchley was appointed Special Commissioner for the Protectorate, and arrived in 1885, but he succumbed, in the Protectorate, to malarial fever in November of the same year. He was succeeded by the Hon. John Douglas, C.M.G., formerly Premier of Queensland. At the Colonial Conference held in 1887, the Colonies of Queensland, N.S. Wales and Victoria undertook to guarantee 15,000*l.* a year for ten years, for defraying the cost of administering the territory now forming the Possession, on the understanding that Her Majesty's Sovereignty would be proclaimed over it. By the Queensland British New Guinea Act, 1887, that colony undertook to be responsible for the payment of the 15,000*l.* a year. The territory was annexed to the Crown by the newly appointed Administrator, Dr. (now Sir W.) Macgregor, on 4th September, 1888.

The Imperial Government has contributed some 52,000*l.* towards the founding of the Possession. The local revenue raised in the Possession was formerly paid over to Queensland, for distribution amongst the guaranteeing colonies, in reduction of their contribution of 15,000*l.* a year, but is now kept and expended by the Government of the Possession.

At the end of 1901 the Government of the Commonwealth agreed to take over the Possession as a territory of the Commonwealth, and brought proposals before the Federal Parliament (which were adopted) for providing towards the expenses of administration a sum not exceeding 20,000*l.* a year. The provision ran from 1st July, 1901, and was subject to revision at the end of five years. On the 1st Sept., 1906, a Proclamation was issued by the Governor-General of the Commonwealth of Australia, under the provisions of the Papua Act, 1905, declaring British New Guinea a Territory of the Commonwealth, under the name of "Papua." The above Act provides that a sum of £20,000 shall be paid out of the Consolidated Revenue Fund of the Commonwealth towards the revenue of the Territory in each financial year, up to and including 30th June, 1906, and thereafter such sums, if any, as the Parliament appropriates for that purpose. In 1914-15, 30,000*l.* was paid by the Commonwealth towards Administration.

*Description and Formation.*

It extends from east to west upwards of 800 miles, and about 200 from north to south towards either end, but is only about 50 miles deep behind Freshwater Bay, near the middle of the portion of the colony that is situated on the island of New Guinea. The total coast line of the Possession has been computed at 3,664 statute miles, 1,728 on the mainland and 1,936 on the islands. The total superficial area is about 90,540 square miles, of which about 87,786 are on the mainland of New Guinea, and 2,754 made up of many islands.

With the exception of the low coral islands of Kiriwina, Nada, part of Murua, and a few others of small dimensions, the islands are mountainous and principally of schistose formation, the highest, Goodenough, 8,000 feet. The eastern end of the Territory is also mountainous, and as the mountains extend westward they rise and coalesce to form a great central chain, which attains its greatest altitudes in the Owen Stanley range, the highest point of which is Mount Victoria, 13,200 feet, and in Mount Scratchley, the Wharton Range, and Mount Albert Edward, the latter about the same height as Mount Victoria. Further west the main range becomes more broken and lower, while pursuing nearly the same general trend towards the north-west as it had in the more eastern part of the colony. The western end of the Territory is for nearly 300 miles generally low and swampy until a long distance from the coast is reached. The mountains near the east end, on the mainland, are of igneous origin; the great masses of the central part of the main range are all schistose, while in the west sandstone predominates, but there are outcrops of igneous formation, such as Mount Yule, upwards of 10,000 feet high. On the Fly River, near the point of junction of British, Dutch, and German territory, there are limestones with fossil corals, and these are also met with at many other places in the low and swampy regions of the western end of the colony and elsewhere. The whole Territory is remarkably well watered. The great mountains, and by far the larger portion of the lower country, are all covered by forest.

*Rivers.*

The majority of the principal rivers open into the Gulf of Papua. They have a general direction towards a point near the middle of the Gulf. The two largest are the Fly and the Purari. The Fly spreads out its head branches over a large area in the centre of the island, comprising considerable portions of the three different territories. Its course is about 620 miles from the sea to the British-German boundary. The influence of the tide is felt for six or seven score of miles up the Fly. It is navigable by a steam launch for over 500 miles.

The Purari River is the second in point of size, and seems to start from the southern side of the Bismarck range of Kaiser-Wilhelmsland. It is navigable by steam launch for 120 miles. The Bailala and Lakekamu rise in undetermined mountains in the central main range. The Angabunga River has its origin from the western spurs of Mount Albert Edward; the Vanapa from the Owen Stanley Range, the Wharton Chain and the southern slopes of Mount Albert Edward; the Brown from the Owen Stanley Range east of Mount Victoria. On the northeast coast the rivers are all small, except four that open into the sea between Cape Nelson and the British-German

Digitized by Google

boundary. These are, proceeding northwards, the Musa, Kumusi, Mambare, and Gira. Each of them pursues a course from the central main range towards the north-east until it enters the sea. The Gira rises from the eastern spurs of Mount Albert Edward, and is smaller than the other three, all of which are nearly of the same size.

*Climate and Natural Resources.*

As Papua lies between five and eleven and a half degrees of south latitude, the climate of the lower part of the country is warm. It is outside the range of the hurricanes that pervade the southern part of the Western Pacific. At Port Moresby, the seat of Government, and situated near the middle of the colony, the average temperature for the year 1914-15 at 9 a.m. was 80°1. The average maximum readings for the same period, 85°2; the average minimum readings, 75°0. The hot season is from November to May; the hottest months are January and February; the cold season is from June to October, the coldest month is August. During the hot season winds on the south coast are from the north and west, and are unsteady; during the cold season they are from the south-east, and are much more regular.

At Port Moresby the rainfall for the year 1914-15 was 26·315 inches. It is much greater, but undetermined, on the central mountain ranges. On the south coast the climate is rather comfortable than oppressive during the cold season. It is generally agreeable at an altitude of 2,000 feet, a height that can be reached on foot in one day from Port Moresby. At 5,000 to 6,000 feet it becomes distinctly cold at night, the thermometer sometimes reading 55° F.; at 10,000 feet ice is met with in the early morning. Above that the grass is often covered with hoar frost, and the cold is severe.

Malarial fever, of a type that is as a rule comparatively mild, is not rare in the low parts of the country. About the time of the change of seasons inflammatory diseases of the chest frequently occur among natives.

There exists there the obstinate scaly ringworm, common in many parts of the Pacific. A mild form of Yaws, not nearly so severe as it is in the Pacific Islands, is indigenous. Sporadic cases of elephantiasis and leprosy are met with, but these have not affected any European. Lupus and simple ulcers are common, and rheumatism is not unknown. Beriberi is also met with in some districts. There is no scarlet fever, croup or diphtheria. Typhoid fever, smallpox, and Asiatic cholera have not appeared, but unfortunately dysentery has been introduced. Cases of cancer have been seen in the country. Such diseases as tape-worm and guinea-worm are unknown. Ankylostomiasis has recently been discovered in the coastal villages of Port Moresby.

The climate is favourable to the cultivation of all tropical products. The cocoanut palm bears well everywhere, and is common anywhere along the coast line, but in the far interior it is not met with. Cotton would be specially suited to the dry climate of the central district. Tobacco, in certain localities, of superior quality, and sugar cane seem to be indigenous or to be long domesticated; there are several native trees and plants that yield good classes of rubber. There are some good varieties of timber, including sandal wood, ebony, and cedar. Tea, cocoa, and coffee thrive well, but are not indigenous; the latter has been introduced and propagated. The climate is very congenial to rice and maize and all kinds of tropical fruit. The mineral deposits comprise gold, which exist over a large area; osmiridium, which has been found from the Gira River to the Owen Stanley Range; and in the Purari sandstone district there is coal. Indications of petroleum have been located between the Purari and Vailala Rivers along a coastal belt of twelve miles. Boring operations are being proceeded with on the latter river and samples of good quality have been obtained and used in an oil engine with very satisfactory results.

The marine resources comprise pearl-shell and pearls, trepang, sponges, and turtle shell.

*Fauna and Flora.*

There are no dangerous wild beasts in the Territory; wild swine are common. There are several varieties of wallaby, phalanger, and echidna. There are no deer, hares, or rabbits; the most dangerous creature is the crocodile. Many lives are lost each year through these amphibians and by snake-bite. The snakes are nearly related to those of Australia. The birds include the cassowary, many birds of paradise, a great variety of pigeons, the hornbill, the black and the white cockatoo, geese, many species of ducks, quails, and on the mountain tops snipe and woodcock.

The flora is as varied as the climate. On the tops of the highest mountain chains there are many species of grasses: several kinds of buttercup, forget-me-nots, daisies, rhododendrons, heaths, and other flowers of temperate climates. The forest there is principally cypress. From seven to ten thousand feet it is chiefly myrtaceous, often covered by trailing bamboo or mixed with pandanus. From two to five thousand feet the evergreen oaks are common. On the low lands there are several varieties of hardwood trees, afzelic bijuga, calophyllum, etc. Native cloth is made by beating out the bark of the paper mulberry, of the bread fruit tree, or of certain trees of the nettle family. Fibre is obtained from the banana, the cocoanut, from the bark of many saplings, and the best of all from the aerial roots of certain species of pandanus. Most of the trees and flowers that are met with in the tropical islands of the Pacific, or in North Queensland, occur also in Papua.

*The People.*

All the native tribes of the Territory that have up to now been met with seem to belong to the same race; they present, however, well-marked differences in physical appearance, disposition, language and customs, but not greater than the circumstances would lead one to expect. No clear trace of an older or earlier race than the existing one has been discovered. The present inhabitants doubtless arrived in the country when it was already covered by dense forest; this must have had its effect in separating the people into secluded, shy, and suspicious communities. To this is due the notable diversities so common between the communities of even adjacent districts, each being confined strictly to its own small territory, subject to circumscribed local influences. Thus, for example, the tribes on the Fly and other estuaries have, for generations, had only brackish water; others water running over calcareous formation, or over slate, lava, granite, etc., a circumstance that would perhaps differentiate quite as much as the great variety of food. Some tribes live almost exclusively on sago, others on yams and taro, some on bananas, others principally on sweet

Digitized by Google

potatoes. Many tribes live continuously in a heavy, moist, warm atmosphere near the coast line; others in the light and bracing climate of the mountains at an altitude of 4,000 to 6,000 feet. The average size of a Papuan is less than that of an average European. The race affinities with the Pacific are strong; on the coast line there is a small percentage of a smooth-haired Malay-like element that is absent in the interior. The isolation of the different communities has led to such diversities of dialect that people living only a few miles apart cannot understand each other's speech. There is a well-marked relationship to the languages of Polynesia, and this extends, especially in place names, right across the colony, but it becomes weaker in ordinary language as one proceeds towards the west. The dialects are easy to acquire, containing as they do few or no sounds that cannot be represented by the English alphabet, or easily pronounced by an English-speaking person. English is now making considerable progress. The European population is 1,037 and other aliens number 671 persons; the native population is estimated at about 271,000. The country and people have no history, and but few current well-defined traditions. These refer to only local movements and actions of tribes within the last four or five generations.

*Mode of Government.*

Papua had formerly the constitution of a Crown colony, regulated by Royal letters patent of 8th June, 1888, under which the Government was carried on by an Administrator, with the advice and assistance of an executive and a legislative council. The correspondence of the Administrator of British New Guinea with the Secretary of State passed first through the Governor of Queensland, and afterwards through the Governor-General of Australia. By Letters Patent, of 18th March, 1902, provision was made for placing the Possession under the authority of the Commonwealth, and for the revocation of the Letters Patent governing the Constitution as soon as the Commonwealth Parliament had provided by law for the future government. Provision was made by the Papua Act, 1905, proclaimed on the 1st September, 1906, as above stated. There was no form of Government among the native population, the Polynesian system of chiefs being practically unknown; patriarchal authority did not extend beyond near family relatives, and even then was only loose. A certain measure of chiefly influence is being created now by a few men under Government authority, but control over the natives is being best acquired by the gradual creation of a force of village policemen. The Administration has at its disposal an armed constabulary, consisting of about 301 natives, enrolled from many different districts. Special laws have been passed for the protection of the native population, and for dealing with lands. A code consisting of a series of simple regulations, which are from time to time being added to, has also been passed for the benefit of the native population. The general law of the Territory is the same as that of Queensland. The courts of the Possession consist of the Central, Petty Sessions, and Native Magistrates' Courts.

*Manufactures and Industries.*

There are no European manufactories in the Possession.

The chief industry worked by Europeans is gold mining. The number of miners has varied at different times from 100 to 800 men. Gold to the value of over 39,710*l.* in 1906-7, 52,837*l.* in 1907-8, 54,969*l.* in 1908-9, 54,927*l.* in 1909-10, 68,705*l.* for 1910-11, 49,316*l.* for 1911-12, 62,332*l.* for 1912-13, 47,233*l.* for 1913-14, 50,889*l.* for 1914-15, for 1915-16, 37,904*l.*, was declared at the custom house for export. It was nearly all obtained by alluvial mining. The gold-bearing country is extensive, but it is for various reasons very difficult to prospect. There are also indications of auriferous reefs, and several crushing plants have been established on Woodlark Island. Pearls, 1906-7, 1,700*l.*; 1907-8, 3,310*l.*; 1908-9, 1,529*l.*; 1909-10, 4,290*l.*; 7,635*l.* for 1910-11; 9,605*l.* for 1911-12; 9,284*l.* for 1912-13; 4,602*l.* for 1913-14; 6,113*l.* for 1914-15; 1,000*l.* for 1915-16. The pearl-shell fishery is of some importance; pearl-shell was exported in 1905-6, 502*l.*; 1906-7, 728*l.*; 1907-8, 157*l.*; 1908-9, 685*l.* 1909-10, 1,445*l.*; 1,114*l.* for 1910-11; 2,442*l.* for 1911-12; 8,512*l.* for 1912-13; 11,212*l.* for 1913-14; 4,292*l.* for 1914-15.; for 1915-16, 7,002*l.* The shell is widely distributed over the eastern seas of the colony, but large areas of water are difficult to work on account of their depth. Beche-de-mer is found on most of the reefs, and will always figure as a small industry, 1905-6, 3,027*l.*; 1906-7, 1,960*l.*; 1907-8, 1,069*l.*; 1908-9, 286*l.*; 1909-10, 171*l.*; 180*l.* for 1910-11; 1,355*l.* for 1911-12; 1,871*l.* for 1912-13; 2,857*l.* for 1913-14; 3,853*l.* for 1914-15.; 3,229*l.* for 1915-16. Sandal-wood to the value of 2,522*l.* was exported in 1905-6; 1906-7, 3,932*l.*; 1907-8, 6,346*l.*; 1908-9, 2,701*l.*; 1909-10, 4,628*l.*; 190*l.* for 1910-11; 259*l.* for 1911-12; 74*l.* for 1912-13; 85*l.* for 1913-14; 1,363*l.* for 1914-15; 1,416*l.* for 1915-16, It is sometimes found in the form of large trees, so far only in the central district on the mainland. It commands a fair price in the market. The rubber industry (1906-7, 1,385*l.*; 1907-8, 483*l.*; 1908-9, 113*l.*; 1909-10, 904*l.*; 2,054*l.* for 1910-11; 935*l.* for 1911-12; 517*l.* for 1912-13; 1,536*l.* for 1913-14; 1,501*l.* for 1914-15; 14,846*l.* for 1915-16) is important. The indigenous rubber commands a comparatively high price in the London market. Up to the last few years no systematic efforts had been made to plant cocoanuts. The old trees are only in small clumps, except in a few instances, and in those exceptional cases the groves are the property of large communities, who make extensive use of the cocoanut as an article of food. Many nuts are now being planted, but the amount available for copra-making (1905-6, 829 tons, 9,315*l.*; 1906-7, 7,467*l.*; 1907-8, 7,515*l.*; 1908-9, 13,376*l.*; 1909-10, 29,498*l.*; 17,837*l.* for 1910-11; 19,368*l.* for 1911-12; 16,912*l.* for 1912-13; 20,063*l.* for 1913-14; 12,693*l.* for 1914-15; 19,051*l.* for 1915-16) is not likely to reach a high figure for some time. There are large sago fields in the colony, but this article has not yet been worked for export. There can be no reasonable doubt that the sugar cane, which is indigenous and present in a great many varieties, and cotton, tea, vanilla, and tobacco, which is domesticated, and of exceptionally fine quality, will eventually be made into great industries.

*External Trade.*

The customs tariff is comparatively a light one; *ad valorem* duties do not exceed 10 per cent. The external trade is chiefly with Queensland and New South Wales. The external trade, imports and exports, as entered at the customs, amounted in 1905-6, 160,051*l.*; 1906-7, 151,532*l.*, 1907-8, 174,677*l.*; 1908-9, 174,372*l.*; 1909-10;

Digitized by Google

220,776*l.*; 1910-11, 320,320*l.*; 335,359*l.* for 1911-12; 346,339*l.* for 1912-13.; 335,274*l.* for 1913-14; 296,409*l.* for 1914-15; 348,468*l.* for 1915-16.

Two steamers belonging to Messrs. Burns, Philp and Co. are under contract for the conveyance every five weeks of mails and passengers to and from the Territory, and a small steamer of the same Company plies to and from Thursday Island, calling at all ports on the Papuan coast including the Islands of Samarai, Misima, Woodlark, Kiriwina and Thursday Island. The coasting and general inter-island trade is carried on by means of several small steamers and some small cutters or luggers, many of which are manned exclusively by Papuans. There are suitable substantial wharves for working cargo at Port Moresby and Samarai, at which places all manner of supplies are obtainable at reasonable prices. Macadamised roads are in course of construction. Much of the internal communication will be made by the rivers. Tracks have been cut in many directions, and the natives are becoming accustomed to travel alone or with Europeans over great areas. During the south-east trades travelling by small boat is uncomfortable and difficult west of Yule Island, where there is no barrier reef; but east of that the coast is largely protected. East of Yule Island harbours and good anchorages are numerous. In the interior travelling is done always on foot, but in the central district horses can be used on many tracks.

### *Magisterial Divisions.*

The Territory is divided into ten magisterial divisions, in each of which there is a resident magistrate, who is also invested with the executive authority of dealing in the first instance with any administrative matter that may arise. Besides these there are assistant resident magistrates with limited judicial powers in certain more populous districts. The Central Court, which possesses the jurisdiction of an ordinary Supreme Court, sits wherever there is occasion. The principal seat of Government is at Port Moresby. This place is centrally situated. It is easy to approach the harbour, and the latter is large, commodious, and sheltered from all winds. The population of Port Moresby consists of about 1,600 natives and some 425 Europeans. It is not well watered, but is very picturesque, and comparatively healthy. The immediate neighbourhood is not well suited for ordinary cultivation on account of the rather scanty rainfall. Port Moresby is a port of entry.

Samarai, the next place in importance, is an island of some sixty acres two miles from the south-east end of the mainland. There is no native village on that island. It is a port of entry, and the headquarters of the Resident Magistrate of the district. There is good anchorage there, but no convenient water supply. It is the port from which miners, pearl fishers, etc., generally obtain their supplies. Like Port Moresby, the neighbourhood of Samarai is very picturesque. Its rainfall is nearly three times as great as at the former place.

The third port of entry is the island of Daru, the headquarters of the Resident Magistrate for the Western Division. It has a good and safe harbour, with an approach that presents no difficulty. It is the only harbour Papua possesses in the west, and the island supplies the best building sites obtainable in that part of the country. It is visited by many boats engaged in the pearl-shell fishery of Torres Straits.

The fourth port of entry is Bonagai, in Woodlark Island.

### *Summary.*

Papua differs from all other countries in its newness. A large part of the interior is still in the stone age, much of it is in a stage of transition in which the stone axe and the steel tomahawk are used side by side. The aboriginal methods of house-building, of canoe-making, of pottery manufacture, of cultivation, are still generally maintained. About half of the coast line has been brought under missionary influence, and there are several stations on the larger rivers.

Four missionary societies are established in the Territory. They are the London Missionary Society, which has for its field the south coast of New Guinea; the Society of the Sacred Heart, which is established at Yule Island, and along the banks of the St. Joseph River; the Methodist Missionary Society of Australasia, which extends its influence over all the archipelagos; and the Church of England Mission, which has as its field the north-east coast of New Guinea, the last-named constituting the Diocese of New Guinea, organised under a Bishop of the Church of England. The two first-named societies were in New Guinea before annexation was proclaimed: the last two have come there since the proclamation of sovereignty. The native population take readily to civilisation in most great matters, while they often cling tenaciously to their own habits and customs in smaller and less important things.

| | Local Revenue. | Imports. | Exports. | Shipping. |

## NORFOLK ISLAND.

Norfolk Island is the principal of three small islands lying 900 miles E.N.E. of Sydney, in 29° 4′ S. lat. and 167° 59′ E. long., the other islets being Philip and Nepean Islands. They comprise altogether about 15 square miles, and were discovered in 1774 by Captain Cook. They remained uninhabited until 1788, when a penal settlement was formed there. This was removed in 1855, and in 1856 the inhabitants of Pitcairn Island were brought to the group, about 194 persons settling there, with their cattle, sheep, and pigs. The Pitcairn Islanders were the descendants of the mutineers of H.M.S. "Bounty," who occupied Pitcairn in 1790, and were removed at their own request to Norfolk Island. Of these 40 returned to Pitcairn. The group has since been made a depôt of the Melanesian Mission of the S.P.G., and the total population at the census of 1911 was males 407, females 385, Melanesians, males 161, females 32, total 985. The chief occupation is agriculture, but the men take part in the whale fishery.

There was formerly but little regular administration, the community being presided over by two of the leading inhabitants as unpaid magistrates, with a simple code of laws. The island was on the 24th June, 1856, placed under the control of the Governor of New South Wales, who was given power to appoint officers, make laws and grant lands. On 1st July, 1914, the island was made a territory of the Commonwealth. The office of the administration is the Department of External Affairs, Melbourne (*Minister for External Affairs*, Hon. Hugh Mahon, M.P., *Secretary*, Atlee Arthur Hunt, C.M.G.). It is a station of the Pacific Cable Board. Communication is maintained once every 5 weeks by steamer from Sydney. There is a resident doctor. Education is free, and there is an efficient school which is conducted by a head master (Mr. Passmore) placed at the disposal of the Commonwealth Government by the Department of Public Instruction, New South Wales. The village is Kingston.

*Administrator Chief Magistrate*, M. V. Murphy, J.P.
*Government Medical Officer*, Dr. A. S. Patton.

*Registrar of Lands*, E. Stephenson.
*Head of Police*, S. C. Werner.
*Registrar of the Magistrates' Court and Collector of Customs*, E. Stephenson.
*Postmaster*, Charles Rossiter.

## BAHAMAS.

*Situation and Area.*

The Bahamas, the most northerly of the British West Indian Colonies, are a chain of coral islands lying between 21° 42′ and 27° 34′ N. lat., and 72° 40′ and 79° 5′ W. long., composed of about 20 inhabited islands, and an immense number of islets and rocks. The principal islands are New Providence (containing the capital, Nassau), Abaco, Harbour Island, Eleuthera, Inagua, Cat Island (or San Salvador), Ragged Island, Rum Cay, Exuma, Long Island, Long Cay, the Biminis, and Watling's Island, all of which are ports of entry; and Great Bahama, Crooked Island, Acklin Island, Mayaguana, the Berry Islands, and Andros Island (containing the only river). The total area is 4,403½ square miles, or about half the size of Wales.

*History.*

San Salvador, so called by Columbus, the native name being Guanahani, one of the islands composing this chain, and identical with Watling's Island, was the first land discovered by him on his voyage in 1492. A few years later all the Carib inhabitants were transported to work in the Cuba mines. It does not appear that the Spaniards had any settlements on any of the islands of this group at any time. Early in the 17th century the islands were well known to the settlers of Bermuda and the Carolinas. They were included in the Royal Grant of Sir Robert Heath, the Attorney-General of England, of the 30th of October, 1629. By 1640 the islands had become a well-known place of resort by the inhabitants of Bermuda, and on the 9th of July, 1647, The Company of Eleutherian Adventurers was formed in London for the purpose of making an organised attempt at a systematic colonization and development of the islands. William Sayle, a former Governor of Bermuda, was the moving spirit of this venture, and associated with him were a number of influential city merchants and Members of Parliament. On the 31st of August, 1649, Parliament, on the petition of Sayle and others, passed "An Act for the Adventurers for the Eleutherian Islands," which constituted Sayle and his associates the Proprietors of the the Islands. Notwithstanding the Royal Grant to Heath in 1629 and the Cromwellian Act of 1649, Charles the Second, on the 1st of November, 1670, granted the Islands to Six of the Lords Proprietors of Carolina, namely, the Duke of Albermarle, the Earl of Craven, Lord Berkley, Lord Ashley, Sir George Carteret and Sir Peter Colleton. Before the Royal Grant of 1670 the inhabitants of the islands had organised the Settlement and instituted a form of Government which included an elective House of Assembly, and had selected Captain John Wentworth as their Governor. Wentworth applied to and received Commissions from the Governors of Jamaica. The Lords Proprietors appointed Hugh Wentworth as their first Governor on 24th April, 1671, but he did not take up the appointment. They then confirmed in office John Wentworth, the popularly elected Governor, on the 26th of December, 1671. A regular system of government was established including a Parliament, the Lower House of which was elective, and this was continued with several breaks until the Civil and Military Government of the Islands was resumed

Digitized by Google

by the Crown on the 20th October, 1718. Thirteen Proprietory Governors were appointed between 1671 and 1715. The Settlement on New Providence was sacked by the Spaniards on several occasions between 1680 and 1684. In 1684 nearly all the inhabitants were driven away, and it was not until 1688 that the Settlement was re-formed by their return, principally from Jamaica, under the leadership of Thomas Bridges. Bridges was recognised as Governor by the Lords Proprietors on the 12th July, 1688, and the Settlement had reached some importance when it was practically annihilated by the French and Spaniards in 1703. However, a year or so after this the dispersed inhabitants returned to New Providence and another Proprietory Governor was appointed in 1707. But the Islands became a regular rendezvous for pirates, and this finally determined the Crown to resume the Civil and Military Government of the place, and thus accede to the numerous petitions which the inhabitants had been making for several years and also carry out the express wishes of Parliament. Since 1718 there has been a continuous line of Royal Governors. The Islands were surrendered to a Fleet of the American rebels in 1776, and again to the Spaniards in 1781, but they had been re-taken by a British force under Colonel Deveaux before the conclusion of the war, which was brought to an end by the Peace of Versailles, 1783, when the British possession was confirmed. After the American Revolution a great number of Loyalists settled throughout the Brahamas Group and received substantial assistance from England, and on the 19th of March, 1787, the Lords Proprietors surrendered all their proprietory rights to the King for the sum of 12,000*l.*, which was provided by Parliament.

The Turks and Caicos Islands, which geographically form part of the Bahamas chain, and which had often in their early history been claimed both by Bermuda and the Bahamas, were separated from the other Bahamas in 1848, and formed into a distinct Presidency, under the government-in-chief of the Governor of Jamaica.

### *Climate and Inhabitants.*

The climate is salubrious and very pleasant in the winter season, and the Colony has in recent years been much frequented by visitors from the United States and Canada, there being excellent hotels and other accommodation for tourists. The average annual rainfall for the past 3 years was 48·08 inches, the rainy season extending from June to October. The mean minimum temperature is 71·9 degrees, the extreme range being from 90 to 57·5 during the years 1911 to 1916 (6 years). The last severe hurricane experienced was in September and October, 1908, causing loss of life, and much damage and distress in some of the Out Islands.

The majority of the inhabitants are of the negro race. About one-sixth are of European descent. English is universally spoken.

### *Trade and Industry.*

The commercial relations of the Colony are mainly with the United States. Considerable quantities of pine-apples (canned) are exported. In 1916 the exports were as follows:—8,480*l.*; but the principal export is sponge (136,551*l.* in 1916).

Cotton, the cultivation of which was introduced by Royalist refugees from the United States, was grown in large quantities prior to the abolition of slavery, and also during the American War, but has practically ceased to be grown.

The cultivation and preparation of the sisal fibre plant is an important industry, and the quantity and value exported in 1916 was 8,369,245 lbs., value 114,465*l.* fibre. The estimated area planted at the end of 1915 is over 20,000 acres.

The sugar-cane grows luxuriantly in many of the islands, but is little cultivated.

The Colony enjoyed great prosperity during the American Civil War, when it was the head-quarters of many blockade running operations.

Fishing is extensively carried on for the Nassau market, over 100 native-built boats, with 500 men, being employed. Turtle-shell, shells and pearls are largely exported. Sponge-fishing employs a large fleet. The approximate number of vessels engaged in the industry in 1916 was 517—aggregate tonnage 5,177—with 2,509 open boats, and a large number of long shore open boats; men and boys employed 5,000; and 334 men and women in clipping, sorting and packing for export. Nassau is a port of registry, and had, on 31st December, 1916, 490 ships registered, of 11,510 tons.

Salt-raking, one of the earliest industries, has fallen off, the export of salt in 1916 being only 572*l.*, as compared with 2,470*l.* in 1890. There is little market in America for Bahamas salt, but it is hoped it may be revived, Some of the islets yield guano. The chief imports are textile fabrics, bread stuffs, spirits, and wines. Lumber is exported in competition with Florida.

Lighthouses on several of the islands have been established, and are maintained by the Imperial Government at a cost of 10,000*l.* per annum, exclusive of stores supplied from England. Several lights are also maintained by the local government.

### *Currency and Banking.*

The legal tender currency is British sterling, and United States current coin*. Accounts are kept in sterling. There is no Colonial currency. A local bank, called the Bank of Nassau no longer does business. There is also a branch bank of the Royal Bank of Canada with deposits amounting to , *l.* A Post Office Savings Bank was established in January, 1886, and had, on 30th June, 1917, 23,983*l.* deposited.

### *Means of Communication.*

There are no railways or telegraphs in the Colony, and but few good roads except in New Providence. There are at present no contract mail services, but communication with New York and Cuba are being kept up as far as war conditions permit, by the New York and Cuba Mail S.S. Co. ("Ward Line"), and there are frequent motor boats between Nassau and Florida. Till February, 1892, the nearest point in telegraphic communication with Europe was Key West, but in that month a cable from Nassau to Florida was completed. The cable is not however at present in working order. A wireless station has been installed at Nassau. The rates of postage are:—

* On proclamation.

A parcels post with the United Kingdom (1*s.*, 2*s.* and 3*s.*) and the United States (6*d.* a lb.) has been established, also money order agreements with the United States and Canada.

*Constitution.*

The Executive Government is conducted, under Letters Patent, by the Governor, aided by an Executive Council not exceeding 9 members. The Legislative authority resides in the Governor, a Legislative Council, nominated by the Crown, and a Representative Assembly of 29 members, elected for 15 districts by persons owning land of the value of 5*l.*, or occupying houses of the rental value of 2*l.* 8*s.* in New Providence, or half that amount in the Out Islands. The qualifications of electors are full age, a residence of 12 months, with land value 5*l.*; or being a house-holder of premises value 2*l.* 8*s.* in New Providence, or 1*l.* 4*s.* elsewhere, for six months. The qualification of Members is possession of an estate of real or personal property of the value of 200*l.* The Executive Council is composed partly of official and partly of unofficial Members who have a seat in one of the branches of the Legislature. In the absence of the Governor the Senior Member of the Executive Council (nominally the Colonial Secretary, *ex officio*) administers the Government.

*Education.*

There is a Government system of elementary education, established 1847, and modified by laws of 1864, 1875, 1885, and Consolidating Act of 1908. The central control is in a Board of Education nominated by the Governor. Local Committees, partly elected, exercise local supervision only.

There are 51 unsectarian Government schools, with 6,470 scholars; 12 aided schools, with 779 scholars; 23 Church of England and 11 private schools, with 1,089 Church of England and 199 Private scholars; 4 Roman Catholic schools, with 408 scholars. The Government schools were made free in 1885. The compulsory clauses of the law are enforced only in Nassau and the larger villages. Higher education is provided at the Nassau Grammar School, the Queen's College, and St. Hilda's School, all in Nassau.

## BARBADOS.

*Situation and Area.*

Barbados is situated in latitude 13° 4′ North and longitude 59° 37′ West, and is the most easterly of the Caribbee Islands. It is nearly 21 miles long by 14 in breadth, and contains an area of 106,470 acres, or about 166 square miles, somewhat larger than the Isle of Wight.

*History.*

The exact date of the discovery of Barbados is not known. It is said to have been first visited by the Portuguese, who, finding it uninhabited and rude in appearance, named the isle *Los Barbados*, from the number of bearded fig-trees which they found. It was nominally taken possession of by the English ship *Olive* in 1605, when it was almost uninhabited. In 1625 Sir William Courteen, a London merchant, under the protection of the Earl of Marlborough, who held a grant of the island from James I., fitted out two large ships, only one of which arrived at Barbados, and the party, which consisted of some thirty persons, landed on the

Digitized by Google

leeward side of the island, formed a town called James' (or Hole) Town, and appointed Captain William Deane their Governor. In 1627 the Earl of Carlisle obtained a grant from Charles I. of all the Caribbee Islands. This grant was opposed by the former patentee, Lord Marlborough, but the matter was compromised on the Earl of Carlisle agreeing to settle on the Earl of Marlborough an annuity of 300*l*. Soon after this the Earl of Carlisle being employed on a diplomatic mission, the Earl of Pembroke, then Lord Chamberlain, obtained a revocation of the former nobleman's patent in his favour and supported Sir W. Courteen; but on the Earl of Carlisle's return from his embassy, he remonstrated with the king, who reinstated him in possession of the territory. Wolferstone, a native of Bermuda, was then commissioned by the Earl of Carlisle as Governor, and in 1628 sixty-four settlers arrived in Carlisle Bay, commenced the erection of wooden houses, threw a bridge across the river which intersected the ground, and laid the foundation of Bridgetown, the present capital. The Leeward and Windward men opposed each other, the latter ultimately triumphing. The civil war which raged in England contributed to people and enrich the island; and on the downfall of Charles, many families attached to the Royal cause found shelter in Barbados. The island was afterwards governed by Lord Willoughby, a Royalist, to whom it was conveyed by Lord Carlisle (son of the first patentee); but when the island was subdued by the Commonwealth he was banished. In 1662, after the Restoration, Lord Willoughby renewed his claim, and the kinsmen and heirs of the two earls brought forward demands on the settlers. To satisfy these claims, a duty of 4½ per cent. on all exports was imposed; and under certain conditions the proprietary government was dissolved and the sovereignty of Barbados annexed to the British Crown. The inhabitants long protested against the imposition of the 4½ per cent. duties, but without success; and it was not till 1838, four years after the abolition of slavery, that the tax was abolished by an Act of Parliament.

Barbados has not, like most of the neighbouring islands, changed owners; it has always remained in possession of Great Britain.

*General Description.*

Bridgetown, the chief town and port, is situated in the parish of St. Michael, in latitude 13° 5′ 42″ North, and longitude 3° 58′ 29″ West. This town contains, according to the census of 1911, 16,648 inhabitants. Speightstown, the only other town, has about 1,500 inhabitants.

Carlisle Bay, the harbour of Barbados, is an open roadstead, much exposed to the wind from the south and south-west. There is an inner harbour or careenage, protected by a structure called the Mole Head. It is a port of registry, and had registered, on 31st December, 1916, 81 vessels, of a total net tonnage of 21,249 tons.

The island is almost encircled by coral reefs, which in some parts, as off the parish of St. Phillip, extend nearly 3 miles to seaward, and prove very dangerous to navigation.

A geological map, with explanatory memoir of the island, was published in 1891 by Messrs. J. B. Harrison and A. J. Jukes Browne, which shows that that area of the island called the Scotland district, which is the part enclosed by a semi-circular sweep of the ridge in the north-east, is composed of sandstones, clays, and infusorial earths, the products of which may be in future a valuable source of revenue to the island; already excellent fire-bricks are made near the end of the railway.

In Schomburgk's history of Barbados there is a short reference to the deposit of asphaltum found in the island, and Messrs. A. J. Jukes Browen and J. B. Harrison casually mention it as occurring occasionally in small quantities, which planters have attempted to burn under their sugar boilers, but not with sufficient success to lead to its general use. In 1895 an American named Julius Pinney suggested to Mr. Walter Merivale, M.I.C.E., late managing director of the Barbados Railway, the possibility of mining it for commercial purposes. A mine was opened by Mr. Merivale on the College Estate in January, 1896, from which about 500 tons of the purest asphaltum were extracted during the year 1898. Other mines have since been opened, and in 1916 the total amount of manjak exported from the island was about 66 tons, of the value of 1,097*l*., prices averaging about 17*l*. a ton. There appears to be a demand for it in the following trades: varnish-making, gas-making, electric cable insulating, asphalt paving, &c.

Much of the geological information concerning the coral area was obtained from borings, &c., made by the Barbados Water Supply Company, whose operations were undertaken with a view to supply the rural population of the different parishes with water up to a height of 750 feet above sea-level. The town of Bridgetown was supplied for many years with an adequate supply of good water by the Bridgetown Water Works Company.

Both companies have been bought up by the Government, and the works have now been extended to all the parishes of the island.

*Industry.*

The chief articles planted for exportation for some years after the settlement of the island were indigo, cotton-wool, ginger, and aloes, besides several kinds of woods; and the manufacture of sugar does not appear to have been practised with much success till about the middle of the 17th century, when the cultivation of the sugar-cane increased rapidly, and the plant became, in commercial importance, the island's most valuable production. At that period, too, the introduction of African labour was commenced. In 1915 there were 320 sugar-works in operation, 49 are being sold out in small lots and rented in tenantries, 103 have steam works. The produce exported has been as follows:—

| | Hogsheads of Sugar. | Puncheons of Molasses. |
|---|---|---|
| 1907 | 37,752 | 61,112 |
| 1908 | 35,832 | 54,428 |
| 1909 | 17,795 | 69,036 |
| 1910 | 39,899 | 77,722 |
| 1911 | 23,524 | 84,887 |
| 1912 | 28,732 | 85,663 |
| | Tons. | |
| 1913 | 9,939 | 82,600 |
| | Hogsheads. | |
| 1914 | 33,605 | 101,985 |
| | Tons. | Gallons. |
| 1915 | 29,867 | 6,020,311 |
| 1916 | 55,453 | 9,816,015 |

The area under sugar cultivation is estimated at 64,000 acres. In September, 1898, the island, in common with St. Lucia and St. Vincent, suffered severely from the effects of a disastrous hurricane. In 1902-3 there was an epidemic of small-pox, which caused a prolonged quarantine and seriously

Digitized by Google

affected trade. Cotton-growing has been revived, with help from the Colonial Treasury and the British Cotton-growing Association, and under the guidance of the Imperial Department of Agriculture. In 1916, 137,718 lbs., of the estimated value of 9,845*l.*, were exported to the United Kingdom.

*Population.*

The population of the island in 1851 amounted to 135,939, and has increased steadily since; by the census of 1891 the population was returned at 182,306. By the census of the 2nd April, 1911, the population was 171,892, the decrease, as compared with the figures for 1891, being attributed to the large numbers of the labouring classes which have from time to time emigrated to Panama in connection with the Canal Works, while many others have gone to Para, Brazil, the United States of America and Canada in search of more remunerative employment than what can be obtained locally. The estimated population on the 31st December, 1916, was 184,259. English is universally spoken. Labour is cheap, and the productive capacity of the soil has been greatly brought out. The island has the appearance of a well-kept garden.

*Currency and Banking.*

Accounts are kept in sterling, and British coin is legal tender and the chief medium of circulation. There is no limit to the legal tender of British silver, and there is but little gold in circulation. There are two banks doing business in Barbados, the Colonial Bank, capital paid up 600,000*l.* sterling, and the Royal Bank of Canada, with a paid up capital of 1,291,666*l.* Total number of branches of the Colonial Bank throughout West Indies 13, with deposits of about 1,500,000*l.*, and a note circulation (five dollar notes) of 350,000*l.* In Barbados the estimated circulation is 30,000*l.* There is a Government savings bank, which had, on 31st March, 1917, 13,110 depositors, and deposits amounting to 450,149*l.*

There is an appreciable amount of American gold and notes in circulation, the gold coins are eagle or ten dollars, valued at 2*l.* 1*s.*, half-eagle or five dollars, 1*l.* 0*s.* 6*d.*, quarter eagle or two and a half dollars, 10*s.* 3*d.*, and the dollar 4*s.* 1*d.* Notes of the same amounts are cashed at the same values respectively.

*Internal Communication.*

A railway from Bridgetown to the parish of St. Andrew (24 miles as surveyed) was commenced in 1880, and completed on 10th September, 1882. The total cost of construction was 195,284*l.*; the receipts for the year 1897 were 5,503*l.*, exclusive of Government subsidy of 6,000*l.*, and the expenses 5,952*l.* Of the subsidy of 6,000*l.* per annum granted by the Legislature, only a sum of 82*l.* 17*s.* 6*d.* was paid in 1897, in consequence of the failure of the Company to comply with the provisions of Act 51 of 1896. It belonged to the Barbados Railway Company, Limited, but was on the 15th July, 1898, purchased by the Foreign American and General Trust Co., Limited, for the sum of 50,000*l.* No subsidy has been paid since its purchase by this Company. The whole line has been reconstructed as the Bridgetown and St. Andrew Railway, Limited (28 miles). The cost of construction to 31st December, 1904, was 39,011*l.*; the receipts for 1904 were 5,922*l.*

In 1905 the Company was bought out by the Barbados Light Railway, Limited, and, by a special Act, a subsidy of 2,000*l.* per annum for ten years was granted. In 1916 the Railway was bought by the Government.

There is telephonic communication between the police stations by 47 miles of line, which cost 1,465*l.*, and is open to public use. The Barbados Telephone Co., Limited, a private company, contains a total of 972 services, with a total length of line in use of about 2,230 miles. There is also a railway telephone line connecting all stations from Bridgetown to St. Andrews, about 28 miles.

*Mail Service, Postage, &c.*

In consequence of the European War, the contract with the Royal Mail Steam Packet Company, Limited, for a regular fortnightly service has been abandoned, and the Company have, with the exception of a cargo steamer, now and again, ceased to run their steamers to Barbados.

The only steamers arriving direct from England now are the Leyland and Harrison Lines from Liverpool, the Scrutton Line from London, and the Crown Line from Glasgow, and these, at irregular periods. Length of passage between 15 and 17 days.

The Quebec Line of steamers arrives fortnightly from the United States; the Lamport and Holt steamers call at Barbados on their voyage to New York from the Brazils at irregular periods, and occasionally from New York to the Brazils. The Canadian Line of steamers (The Royal Mail Steam Packet Company) from Halifax arrive every fortnight.

There is a station of the West India and Panama Telegraph Company at Barbados, and direct cable communication with St. Vincent, and thence to the other West Indies, America, and Europe.

*Rates of Postage.*

* See end of Introduction. A new rate of parcel postage with the U.K. came into force on 1st Jan., 1899.

Digitized by Google

The amount of money orders paid in the Colony during the year 1916 was 57,670*l.*, of which 17,539*l.* came from the Panama Canal Zone, and 22,492*l*, from the United States of America.

### *Education.*

A Government system of elementary education was established by Act No. 41 of the 9th December, 1878, which authorised an expenditure not exceeding 15,000*l.* annually. This section of the Act of 1878 was repealed, and Section 9 (d) of the Education Act Amendment Act, 1897, authorised an annual expenditure of a sum not exceeding 11,000*l.* on elementary education. This section has now been repealed by the Education (Amendment) Act, 1910, which authorises the amount to be spent on elementary education at a sum not exceeding 14,200*l.* Grants to higher education made the sum total of expenditure in 1916-17, 21,430*l.*

The central administration is vested in a Board appointed by the Governor, and the local control conducted by the clergyman of the district assisted by the School Committee. There are 149 schools, with 12,901 scholars (average attendance), and 22,979 on the rolls.

Barbados possesses a college founded by General Codrington, a native of the island, who died in 1710, and whose name it bears. It was affiliated to Durham University in 1875. It is under the administration of the S.P.G., who are the Trustees of General Codrington's will. There are several theological scholarships of the value of 30*l.* per annum from the College funds, and four Island Scholarships at 40*l.* per annum paid from the Colonial Treasury. The latter are confined to natives or sons of natives, or of persons domiciled in the island who have resided therein for at least ten years. There is a good grammar school, called Harrison College, in Bridgetown, established on an old foundation, which has been liberally supported by the Legislature. It has a staff of nine university men as Masters, including a Professor of Chemistry and Agricultural Science. The number of pupils at close of 1916 was 148. Another First Grade School, "The Lodge," situated in St. John's parish, to the N.E. of the island, was re-opened in 1882, after having been closed for several years. The number of pupils at the close of 1916 was 71. There are four Barbados Scholarships, established by the Education Board, and endowed by the Colony, each of the annual value of 175*l.*, tenable at an English University, or at an Agricultural or Technical College in Europe or America, for four years.

A first grade school for girls was opened in 1883, called the Queen's College. It has a staff of seven mistresses. The number of pupils was 66 at the close of 1916.

There are five second grade schools for boys and one for girls. These schools cost the Government, including grants for scholarships, 1,025*l.* annually.

### *Police, &c.*

A police force was established in Barbados in 1835 by an Act of the Legislature, and is stated to have been the first attempt in the British West India Colonies to establish a force of that description upon a similar footing. The Force consists of 3 officers and 324 non-commissioned officers and men. In 1882 the Harbour Police (established in 1867) were combined with the Land Police. A Juvenile Reformatory for boys was opened in April, 1883, and one for girls in April, 1911.

There is a lunatic asylum, a lazaretto and a general hospital in Bridgetown, to the latter of which the Colony contributes 7,350*l.* per annum.

### *Constitution.*

The Colony possesses representative institutions, but not responsible Government. The Crown has only a veto on legislation, but the Home Government retains the appointment and control of public officers, except the Treasurer, who is an officer of the House of Assembly. The Legislature consists of a Governor, a Legislative Council, consisting of nine members appointed by the King, and a House of Assembly, having twenty-four members elected annually on the basis of a moderate franchise. The qualifications of members and electors are regulated by a Franchise Act, which became law in April, 1884, and which repeals all previous legislation on the subject. By this Act a liberal extension of the franchise was granted, and 2,004 electors were registered under its provisions, the number previous to its enactment being only 1,641. This and other Acts relating to the franchise was consolidated by the Representation of the People Act, 1891, which became law on 1st January, 1892, and its amending Act of the 14th July, 1898. The only change made was the extension of the franchise to persons enjoying a pension of 50*l.* a year or more. The number of registered electors for the year 1916 was 1,979. The executive part of the Government is vested in the Executive Council appointed by the Crown and consists of the Governor, the Colonial Secretary, the Attorney-General *ex officio*, Sir F. J. Clarke, K.C.M.G., speaker of the House of Assembly, and Hon. Sir W. K. Chandler, LL.D., C.M.G., President of the Legislative Council, and such other persons as may be nominated by the King, and the Executive Committee consisting of the members of the Executive Council *ex officio*, one member from the Legislative Council, and four members of the House of Assembly nominated annually by the Governor. This body introduces all money votes, prepares the estimates, and initiates all Government measures. The Governor of Barbados was for many years the Governor-in-Chief of the Windward Islands, consisting of Barbados, St. Lucia, St. Vincent, Grenada, and Tobago, but in 1885, by Royal Letters Patent, Barbados was separated from the other Windward Islands, and made a distinct Government.

## BERMUDA.

### *Situation and Area.*

The "Bermudas" or "Somers' Islands" form a group or cluster of about 300 small islands, situated in the Western Atlantic Ocean, in lat. 32° 15′ N., and long. 64° 51′ W., about 580 miles to the eastward of Cape Hatteras in North Carolina, the nearest point of the neighbouring American Continent. The distance from Liverpool is about 2,900 miles, from Halifax in Nova Scotia 730, from New York 677, and from the nearest of the West Indian Islands about 800 miles. The total area is estimated at 19 square miles (less than one-eighth of Rutland).

### *History.*

These islands were discovered in the year 1515, by a Spanish mariner, Juan Bermudez, after whom they were called The Bermudas. The Spaniards, however, took no steps to form a settlement on the islands, and they were still entirely uninhabited when, in 1609, Admiral Sir George Somers' ship, *The Sea Venture*, while on a voyage with a fleet of eight other vessels, conveying a party of colonists to the new plantations then being formed in Virginia, was wrecked upon one of the numerous sunken reefs which surround the islands on every side. The reef is still called after the name of the Admiral's ship, The Sea Venture Flat.

Sir George Somers died in Bermuda the following year, and his companions, ignorant possibly of the prior claims of Juan Bermudez, called the group after him, "The Somers' Islands." The reports of the beauty and fertility of the land, taken home by Somers' nephew, Captain Mathew Somers, induced the Virginia Company to seek an extension of their Charter, so as to include the islands within their dominion, and this extension was readily granted by King James I., but shortly afterwards the Virginia Company sold the islands for the sum of 2,000*l.* to a new body of adventurers, called "The Governor and Company of the City of London for the Plantation of the Somers Islands," and thenceforward, for a considerable time, the islands bore the name of the Admiral who had led thither the first body of settlers.

### *General Description.*

The Bermudas, of which a good account will be found in the narrative of the voyage of the *Challenger*, may be described as a singular agglomeration of small islands and submarine sand-hills and coral reefs, forming together an irregular oval ring, measuring about 22 miles in length from N.E. to S.W., and about 3 miles in width from N.W. to S.E. The external ring—whether composed of islands or of sunken banks or reefs—is seldom more than a mile in width, and generally considerably less.

At present the southern portion only of the encircling ring is formed of islands, the northern, eastern, and western sides being composed of almost continuous reefs of coral. The largest island, generally known as The Main Island, is about 14 miles in length, and about a mile in average width; it contains about 9,000 acres of land, the highest point being only 240 feet above the sea. All the other islands taken together measure about 3,000 acres. The city of Hamilton, now the seat of Government, is situated about the centre of the main island, where a deep inlet running up for two or three miles into the land from the sheltered waters, enclosed between the encircling reef, forms a safe and convenient harbour for the vessels which carry on the island trade.

Next in importance to the main island is the island of St. George, on which stands the town of St. George, so named after Admiral Sir George Somers, whose heart is buried there. This town was formerly the capital of the Colony, and though now shorn of much of its importance by the transfer of the seat of Government to Hamilton, is still a town of considerable trade, and its harbour is much frequented as a harbour of refuge.

The other principal islands of the group are—Ireland Island, entirely given up for the accommodation of His Majesty's Dockyard and a number of other naval establishments; Boaz and Watford Islands, intervening between Ireland Island and the rest of the group, and now exclusively occupied by military depôts and garrisons; Somerset, Smith's, St. David's, Cooper's, Nonsuch, Rivers, Ports, and Godets—all inhabited by a civil population. The islands form an almost continuous chain, and there is uninterrupted communication by roads and bridges and causeways from St. George over the main island and Somerset, and over Watford and Boaz to Ireland Island—a distance of about 22 miles.

A little over a third of the inhabitants are of English descent, the remainder belonging to the negro race. English is universally spoken.

The climate has been long celebrated for its mildness and salubrity. The rainfall in 1916 was 50·40 inches, as against 61·08 in 1915, and 61·60 in 1914, equivalent to an increase of 2·03 per cent. on the decimal average for 1907-1916, namely 52·43 inches. There is no winter, the thermometer never falling below 40 deg. of Fahr., and the summers are never very hot, the thermometer rarely rising above 85 deg. The summer heat, too, is generally tempered by a pleasant sea breeze.

A number of Boer prisoners of war were confined in the Colony during the South African War (1899-1902).

In 1914 the Legislature voted the sum of 51,750*l.*, payable in fifteen yearly instalments, as a contribution to the Imperial Treasury in aid of the war fund.

Digitized by Google

The state of the Colony's finances did not admit of an immediate cash contribution and these annual payments represent a lump sum of the present value of 40,000*l.*

*Trade and Agriculture.*

In former days the inhabitants of Bermuda gave themselves up almost entirely to maritime pursuits. Numerous small vessels, of from 200 to 300 tons burthen, built by the islanders themselves, of their native cedar, traded between the West Indies and Demerara, and the United States, and the British colonies of North America. Later they extended their voyages, carrying the salt fish of Newfoundland to Italy and Portugal, and taking back the Port wine for which Newfoundland became celebrated, or running down to Madeira or Ascension to meet the homeward-bound Indian fleet, and taking back cargoes of tea or other Indian and Chinese products to be distributed along the American seaboard.

The repeal of the British navigation laws, the introduction of steam, and the very general substitution of iron for wooden ships, gradually destroyed the carrying trade which had been so profitable to Bermuda, and now the maritime fleet may be said to have ceased to exist, and the industry of the islanders is entirely confined to mercantile pursuits and to turning to account the small quantity of agricultural land which they possess.

The soil of Bermuda is naturally calcareous, free-draining, and poor in humus. A fair state of fertility is, however, readily maintained by the regular use of manures and fertilisers. Not more than one-fourth of the total area of the colony can be cultivated, but the climate, combined with the geographical position of these islands, compensates for the small extent of arable land. There is never any danger of frost, and seeds may be sown and plants put out at any time. The main crops, potatoes, onions and green vegetables, are planted from August to March, and are reaped and shipped from December to June when the New York market is comparatively bare of early potatoes and fresh vegetables.

Two main crops of potatoes are grown; the Bliss Triumph in the fall and the Chili Garnet in the winter. The "seed" for the former is imported from Long Island and for the latter from Nova Scotia. Government Regulations passed in 1915 prevent the importation into the Colony of seed potatoes that have not passed a field inspection conducted by a representative of the Board of Agriculture. Onions are not as extensively grown as formerly but still form one of the important crops of the Colony. The green vegetable industry has developed rapidly and as many as 300,000 crates of vegetables, consisting mainly of carrots, beets, lettuce, parsley and celery, were exported in 1916. In order that the vegetables may arrive in New York in fresh condition they are shipped under refrigeration. The lily industry is very much smaller than in former years.

The summer months are hot and the winter crops cannot be successfully grown, but corn, melons, sweet potatoes, pumpkins, etc., are planted and give satisfactory returns.

Practically the whole of the exports go to the United States, and two-thirds of the imports come from that country, the remainder coming from the United Kingdom and Canada. There is a small trade with the West Indies.

Of late years the Islands of Bermuda have become a favourite winter resort for Americans and Canadians seeking to escape the rigours of the climate of the continent. Large hotels have sprung up, and a considerable amount of money is expended by the visitors.

During the year ending 31st December, 1916, over 11,000 persons, American and Canadian, visited the Colony.

*Currency and Banking.*

The coins in circulation are British currency, which is legal tender. There is no limit to the legal tender of British silver. Bermuda Government £1 Currency Notes to the value of £28,000 have been placed in circulation since 1915. There are two incorporated banks, the Bank of Bermuda, Limited, and the Bank of N. T. Butterfield & Son, Limited, and several of the leading merchants do a considerable amount of business as private bankers and agents. A Government savings bank was established in 1871, and there are branches at Hamilton, St. George's, and Sandy's Parish. The number of depositors at the end of 1916 was 2,204, the total amount of deposits 42,620*l.*

*Education.*

In 1839 the Colonial Legislature first granted a sum of money to aid elementary schools.

The central control is vested in a Board of Education, consisting of ten members appointed by the Governor under the provisions of the Schools Act, 1907.

All the schools are *private* schools, charging fees. Attendance is compulsory, and there were, in 1916, 31 aided schools with about 2,730 scholars.

There are, in addition, about 23 schools which receive no State aid.

In August, 1905, the Legislature established an annual scholarship of 150*l.*, tenable by youths, natives of Bermuda, for two years at some educational institution abroad to be approved by the Governor, with a view to assisting youths to prepare to compete for the Rhodes' Scholarship awarded to Bermuda.

*Means of Communication.*

Telegraphic communication with the United Kingdom has been secured by the laying of a cable between the Islands and Halifax, Nova Scotia.

Rates to Halifax, 1*s.* 4*d.* per word.
,, England, 2*s.* 6*d.* ,,

This cable has also been carried on to Turks Island and Jamaica, thus giving direct telegraphic communication with the West Indies.

Communication between Bermuda and New York is maintained by steamers of the Canada Steamship Lines, Ltd., sailing at 7-day intervals during the winter months and 10-day intervals in the summer.

Four Contract steamers carrying passengers and freight between Nova Scotia and the West Indies also call at Bermuda on their Northward and Southward voyages.

Letters from England usually take twelve days.

| | Letters. | Newspapers. |
|---|---|---|
| Within the Colony, per 1 oz. | 1*d.* | ¼*d.* per 2 oz. |
| To U.K., India and British Colonies* per ½ oz. | 1*d.* | Books per 2 oz. / Papers per 2 oz. — ½*d.* |
| To all other countries ,, | 2½*d.* | |

Parcels to England, 1*s.* for 3 lbs.; 2*s.* for 7 lbs.; 3*s.* for 11 lbs.

*Internal Communications.*

There are no railways in the Colony. There are approximately 105 miles of colonial and 15 miles of military roads. There is a private telephone company, which has about 775 subscribers and about 1,600 miles of wire in line.

*Government and Constitution.*

Representative government was introduced into the Colony in 1620, but the charter of the Bermudian Company of London was annulled in 1684, and since then the Governors have always been appointed by the Crown, and the laws of the Colony have been enacted by a local legislature consisting of the Governor, the Legislative Council, and the House of Assembly. The session lasts usually from November to June.

The Governor is assisted by an Executive Council, consisting at present of four official and two unofficial members. The Legislative Council consists of nine members, three of whom are official and six unofficial. The House of Assembly consists of thirty-six members, four of whom are elected by each of the nine parishes. The members of Executive Council and of the Legislature are paid 8*s.* a day for each day's attendance. There are 1,303 electors, the electoral qualifications being the possession of freehold property of not less than 60*l.* value. The qualification for a member of the House of Assembly is the possession of freehold property rated at 240*l.*

*Local Government.*

Hamilton and St. George have been incorporated since 1793 and 1797 respectively, and there are nine parish vestries, all the members of which, as well as of the two town corporations, are elected annually.

## BRITISH GUIANA.

*Situation and Area.*

This Colony is a portion of the South American Continent, extending from east to west about 270 miles, and from north to south about 540 miles. It includes the settlements of Demerara, Essequebo, and Berbice, and is bounded on the east by Dutch Guiana, from which it is divided by the River Corentyn, on the south by Brazil, on the west by Venezuela, and on the north and north-east by the Atlantic Ocean. Its area is about 89,480 square miles, extending from 9° to 1° north latitude, and from 57° to 61° west longitude. About 275 square miles only are under cultivation.

The western boundary was till 1899 in dispute with Venezuela. The Dutch, while British Guiana was in their possession, claimed the whole watershed of the Essequebo river, while the Venezuelans asserted that the Spanish province of Guayana extended up to the Essequebo itself. Various attempts were made to settle the question by negotiation, but without result; and in 1886 Her Majesty's Government, without prejudice to their claim to the whole territory held by their Dutch predecessors in title, declared definitely that they would not allow any advance on the part of Venezuela beyond the boundary recommended by Sir R. Schomburgk, who surveyed it in 1842-43, as a good natural boundary, well within the limits which Great Britain might have rightfully claimed. Shortly after this, in 1887, Venezuela broke off diplomatic relations with Great Britain, which were only resumed in 1897 after arbitration on the territory in dispute had been agreed upon between the British and Venezuelan Governments by a treaty dated 2nd February, 1897. The tribunal constituted by the treaty—composed of two judges of the High Court of England, two judges of the Supreme Court of the United States, with Professor de Martens as President—met at Paris on 15th June, 1899, and after hearing arguments by counsel on both sides gave their decision in favour of a line not greatly differing from the Schomburgk line, though they awarded to Venezuela Point Barima and the immediately adjacent land and the district between the Wenamu and the upper reaches of the Cuyuni.

A further claim to the southern portion of the western boundary was made by Brazil; and the Paris tribunal, while pronouncing in favour of the British claim at this part of the line, expressly reserved the rights of Brazil. This matter had been the subject of negotiation since 1843, and after renewed and partly successful attempts to settle the question completely by negotiation, the more important difference was referred to the arbitration of the King of Italy by a treaty of November, 1901. The proceedings in this case were entirely written, and were completed in February, 1904. The judgment of the King of Italy was given on 14th June, 1904, and resulted in the establishment of the British title to about half the area which His Majesty's Government claimed against Brazil. Great Britain retained everything to the east of the Mahu or Ireng and the Upper Takutu, including the Savannah country of the Macusis and Wapisianas. Brazil was awarded the country between the Mahu and Cotinga.

*History and Constitution.*

The territory was first partially settled between 1616 and 1621 by the Dutch West India Company, who erected a fort and depôt at Fort Kykoveral

Digitized by Google

in the present county of Essequebo. In 1624 a settlement was founded on the Berbice by Van Peere, a Flushing merchant, under license from the Company. The first English attempt at settlement was made by Captain Leigh on the O'apock river (now French Guiana) in 1604. The effort, though followed up by Robert Harcourt in 1613 and 1627, failed to establish a permanent settlement. Lord Willoughby, famous in the early history of Barbados, also turned his attention to Guiana, and founded a settlement in Surinam in 1663, which was captured by the Dutch in 1667, and ceded to them at the peace of Breda in exchange for New York. The Dutch retained their hold on the three colonies with more or less firmness, now yielding to England, now to France or Portugal, till 1796, when during the war of the French Revolution they were captured by a British Fleet from Barbados. The territory was restored to the Dutch in 1802, but in the following year retaken by Great Britain, and finally ceded to that Power in 1814.

Under the Dutch, Demerara and Essequebo constituted one Government, and Berbice another, an arrangement which continued in force under the British Administration down to the year 1831.

The constitution of the Colony of Berbice dates from the year 1732. Under it the Governor was nominated by the Directors of the Mercantile Body called the Berbice Association, and was assisted by a council of six. In 1826 an order of the King in Council was issued, dissolving the then Council of Government, appointing another, and thenceforward vesting the right of appointing to vacancies in the Governor as representing the Crown.

The Court of Policy for Essequebo appears to have been established very early in the history of the Colony. In 1773 that for Demerara, which had existed less than 30 years, was merged in it, and the seat of Government for the United provinces established at Stabroek, the site of the present capital Georgetown. Disputes having arisen between the Colonists, the local Government and the West India Company as to the right of appointing the colonial members of the Court of Policy, in the year 1788, a provisional "Plan of Redress," as it was termed (being in fact the draft of a new constitution) was framed by a Committee of the States-General, to whom had been referred sundry petitions of the Colonists. This being approved of, a commission was despatched by the States-General to the Colony, who on their arrival in 1789 dissolved the then existing Government and established a new one for the conjoined Colonies upon the basis of the scheme in question, which continued in operation notwithstanding the captures of the Colony by the British in 1796 and in 1802, and its cession in 1803, the Articles of Capitulation having stipulated that the laws, usages, and institutions of the Colony should be maintained as before.

The Council or Court of Policy consisted of 1st, The Director-General; 2, The Commander of Essequebo; 3, The Fiscal of Essequebo; 4, The Fiscal of Demerara; 5 and 6, two Colonists from Essequebo; 7 and 8, two Colonists from Demerara.

In the first instance, the unofficial portion of the Council was to be chosen from a double nomination by the Colleges of Kiezers or Electors, of which there were two, one for each County,* each consisting of seven Members elected by a majority of the votes of the inhabitants possessing not fewer than twenty-five slaves, such votes to be in writing and signed by the voter. The tenure of the office of Kiezer, as subsequently defined by Proclamation of Sir Benjamin d'Urban in 1831, was to be for life, unless the party resigned or ceased to be an inhabitant.

In 1795 it was deemed necessary, during a period of some confusion, to introduce four members "commissioned" by the Colleges of Electors of both Colonies to have, jointly with the Court of Policy, the administration of the public funds. In the following year, however, Governor Beaujon annulled this arrangement, and to secure to the inhabitants more ample control of taxation enacted that in lieu of the four above-mentioned, there should be six inhabitants adjoined to the Governor and Court of Policy, three from each Colony, to be elected by the inhabitants qualified as in the case of Kiezers, and to serve for two years, but with powers strictly limited to raising Colony taxes, and assisting in the audit of the public accounts.

Beaujon's proclamation was materially modified, though without affecting the definition of the duties of the financial representatives, by a proclamation of Acting Governor Carmichael in 1812, consolidating the two Colleges of Kiezers and Financial Representatives. This proclamation remained operative, though unconfirmed by the Crown, until, in 1831, when the three provinces were united, it was annulled by a Royal Instruction restoring the pre-existing arrangement, and extending the right of suffrage to the inhabitants of Berbice.

With an exception in regard to the franchise, to be noticed hereafter, this has been the usage and procedure till now, from which the inference has been drawn that the Financial Representatives had, and have, no authority whatever, except by express permission from the Crown, to discuss any item upon the estimate so as to alter its amount, although they might refuse to include any sum to which they objected in their calculations of the funds necessary to be raised by taxation.†

The colonial members have never acquiesced in this interpretation of the constitution, and there have been frequent collisions between the Executive and Elective sections of the Court.‡ The position they assume is based upon the construction of a passage in a decree of the States-General, dated 27th August, 1788, to the effect that "the contributions for the Colonial Chest are to be regulated by the inhabitants themselves"; and a passage in the instructions issued to Director-General Van Grovestein in 1793, "He will take care not to leave the administration of the Colony Chest wholly to the Colony Members of the Court of Policy, but will thereto admit a great number of the Colonists—for example, the 'Kiezers of both rivers.'" The nature of certain entries in the Minutes from 1798 to 1806 has also been held to support this contention.

In the year 1855 under the administration of Sir Philip Wodehouse, an Ordinance was passed to alter and amend the Political Institutions of the Colony, but it was not approved by Her Majesty; and from that date till 1891 the only constitutional legislation was the passing of Ordinance No. 1 of

* Demerara and Essequebo only are here alluded

† Proceedings relative to the Functions of the Financial representative, 1832.

‡ During the discussions on the Civil List in 1848-9, it was suggested by some of the Elective Section to adopt this course, leaving upon the Governor the responsibility of paying the difference between the sums fixed and the amount provided.

Digitized by Google

1864, a declaratory Act, defining the meaning of the term "Colonist," as employed in the "Plan of Redress" above noticed; and Ordinance No. 16 of 1864, to remove some difficulties in the exercise of the functions of the College of Electors.

The Constitution, as it existed up to 1891, may be summed up very briefly. It consisted of a Governor, Court of Policy, and a Combined Court. The functions of an Executive and Legislative Council and House of Assembly were performed by the Governor and Court of Policy, except as regards taxation and finance, which were and still are dealt with by the Combined Court, composed of the Governor and Members of the Court of Policy, combined with the six Financial Representatives. The Court of Policy passes all laws and ordinances, except the Annual Tax Ordinance, which is passed by the Combined Court.

During 1891 an Act was passed, which came into force in 1892, effecting a considerable change in the constitution. By this Act the administrative functions of the Court of Policy have been transferred to an executive council, and the duties of the former become purely legislative.

The Combined Court has the power of (1) imposing the Colonial taxes and auditing the public accounts; and (2) discussing freely and without reserve the items on the annual estimates prepared by the Governor, in Executive Council. The first of these powers is the birthright of the Combined Court, having been bestowed in 1796, when Governor Beaujon called the financial representatives into being, "with a right of voting only for the raising of colonial taxes and not further"; while the second is conferred periodically by His Majesty's Order in Council after each renewal of the Civil List and is co-existent with the Civil List. The Civil List has recently been renewed for five years from the 1st January, 1913.

The Court of Policy, under the new constitution, consists of the Governor, seven official members, and eight elected members. It may be prorogued or dissolved at any time by the Governor and in any case is dissolved at the end of five years, and a general election must be held within two months of the date of dissolution. The number of financial representatives, who with the Court of Policy form the Combined Court, remains unchanged (6).

The qualifications for members and electors are now contained in Ordinance 24 of 1909, and are too complex to be recapitulated here.

There is a Public Officers' Guarantee Fund, and also a Widows' and Orphans' Fund, towards the latter of which all officers with salaries over 100*l*. contribute 4 or 5 per cent. of their salaries. On the 21st December, 1900, the latter fund was closed to officers appointed thereafter, who are now subject to a scheme of compulsory insurance.

Pensions are granted to public officers under Ordinance No. 11 of 1903, after reaching the age of 55 years, or on medical certificate of physical or mental incapacity, provided the officer has served 10 years.

### *Local Government.*

In 1837 the first municipal body was incorporated. The principle has now been materially extended in its application.

The existing municipal authorities are: mayor and town council, Georgetown; and mayor and town council, New Amsterdam. Their revenue in 1914 was respectively 60,285*l*. and 12,461*l*., and their expenditure 59,450*l*. and 11,957*l*. There are also 103 village and country districts, whose revenue and expenditure in 1915 were respectively 15,057*l*. and 14,267*l*.; in 1916 the figures were 14,653*l*. and 14,565*l*. The total village debt was 15,745*l*. in 1915, and 17,974*l*. in 1916.

The Roman-Dutch law is in force in civil cases, modified by Orders in Council and local Ordinances; the Criminal Law is now based on that of Great Britain, and is administered in the same manner, except that there is no Grand Jury.

### *Internal Communications.*

The three rivers, Demerara, Essequebo, and Berbice, are navigable for 90, 35, and 150 miles respectively. Beyond these distances, owing to the nature of the country, they abound in cataracts and waterfalls. There is a good network of roads, and there are small canals in connection with the Demerara River. There is a railway from Georgetown to Rosignol, Berbice—60½ miles in length, and one from Vreeden Hoop to Parika, on the West Coast of Demerara, 18½ miles in length, owned by the Demerara Railway Company, Limited. The Government pays a subsidy to the Company with regard to the line from Mahaica to Rosignol and Vreeden Hoop to Parika to make up with the net earnings a sum equal to interest at 4 per cent. on $1,500,000, or 312,500*l*. The line was constructed at a total cost to date of 694,621*l*. 8*s*. 1*d*. A railway, 18¾ miles in length, connecting the Upper Demerara and Upper Essequebo rivers leading to the interior, and affording access to the gold diggings, in connection with which a daily service of steam launches plies on the Demerara and Essequebo rivers, has been open since the beginning of 1897. The postal telegraph system comprises about 554 miles of line, with 12 cables, having a total length of 23½ miles. It is in connection with a cable to Trinidad, and thus with the other West Indian Islands, Canada, Europe and the United States. The revenue from the telegraph and telephone services in 1916 was 7,695*l*. and the expenditure for maintenance, including all salaries, 6,129*l*. A telephone exchange (650 subscribers) is established at Georgetown and at New Amsterdam (100 subscribers) in connection with the postal telegraph, as well as a Police Exchange (35 subscribers); length of telephone and telegraph lines 2450 aerial wire and 30¼ miles of cable, longest line 17 miles. Steamers owned by a local Company run under contract from Georgetown to Mallali on the Demerara River to Mount Everard on the Barima River, 46 miles from Morawhanna, and from New Amsterdam up the Berbice River. The Company's steamers also run (not under contract) from Georgetown to New Amsterdam. Steamers owned and worked by Government run from Georgetown to Suddie on the Essequebo coast, to Bartika at the junction of the Essequebo, Mazaruni and Cuyuni Rivers, and to the Pomeroon District. Launches of light draught can, during a portion of the year, proceed up the Barima River to Arakaka, the centre of the mining industry in the North-Western District. Roads have been also opened by the Government between the Barima and Barama rivers, between the Potaro and Conawaruk rivers, from Kalacoon towards the Caburi creek between the Essequebo and Massaruni; and a road has been constructed by private enterprise between Cartabo point on the Massaruni River to the Puruni River. A

Digitized by Google

well-organised postal service extends throughout the colony, letters reaching Pomeroon in 24 hours from Georgetown, and the North-Western District in 36 hours. Georgetown and New Amsterdam are lighted by electricity; and in the former there is an efficient electric tram service on the overhead trolly system.

### *Education.*

A State-aided system of elementary education was established by Law No. 3 of 1876.

The schools are denominational, except the Estates schools. The central administration is vested in the Director of Primary Education and the local control conducted by managers, who are usually ministers of religion.

The number of schools receiving aid in 1916 was 228, with 33,508 scholars, and the aid granted amounted to 32,277*l.* 2*s.* 8½*d.*

Provision is made for higher education by a Government college in Georgetown, in which the course of instruction is similar to that of a public school or first grade grammar school in England, and there is awarded annually one public scholarship of the value of 200*l.* per annum, tenable at a University in England for three years. Scholarships, entitling the holders to free education at the Government College or at other approved schools, are granted to scholars of the Primary Schools.

### *Currency and Banking.*

Accounts are kept in dollars and cents. British sterling and United States gold coin is current and legal tender, as well as Spanish and Mexican gold. Spanish, Mexican, or Colombian dollars are no longer legal tender, under Ordinance No. 1 of 1876.

The Colonial Bank and Royal Bank of Canada have establishments at Georgetown, with branches at New Amsterdam, Berbice. The Colonial Bank also has a branch at Mahaica on the East Coast, Demerara, and the Royal Bank of Canada has a branch at Rose Hall, Berbice.

The Colonial Bank, in British Guiana, on the 31st December, 1916, had a note circulation of 114,531*l.* 5*s.* 0*d.*, and the Royal Bank of Canada, in British Guiana, 88,977*l* 1*s.* 8*d.* The total note circulation in the Colony on the 31st December, 1916, was 203,508*l.* 6*s.* 8*d.*

The first Government savings banks were established at Georgetown and New Amsterdam in the year 1836. There are 50 Post Office Savings Banks. At the end of 1916 these banks had 28,856 depositors, with 214,665*l.* to their credit.

The Combined Court in November, 1910, passed a resolution approving of the amalgamation of the two Banks, and authorising the transfer of the Government Savings Bank to the Post Office on the 1st July, 1911.

The British Guiana Bank opened a Savings Bank Department, when this amalgamation took place, and a considerable amount of business went into their hands.

### *Industry and Productions.*

The staple products of British Guiana were in former years sugar, rum, molasses, cotton, and coffee. The soil of some parts of the Colony is capable of producing coffee of rare excellence, the Berbice River coffee being once much prized. The latter two industries have now given place to the cultivation of the sugar-cane and allied products—rum, molasses and molascuit—which at present is the chief industry of the Colony, and furnishes 81 per cent. in value of its domestic exports. Timber, charcoal, and balata, a species of gum, are also exported. There are 37 sugar estates in active operation, with a total area of 166,671 acres, of which 75,915 are under sugar, 15,807 under rice and other cultivation, and the remainder used as pasture lands or uncultivated.

The forests, with which the interior of the colony is covered, abound in woods of rare beauty and value. Some of the hard woods are, from their remarkable durability, peculiarly suitable for house and shipbuilding purposes, while others are equally prized for the manufacture of household furniture.

During 1916, 101,650 tons of sugar, 4,386,834 pf. gallons of rum, and 998 tons molascuit or cattle foods were exported. The bulk of the production is high class vacuum pan sugar for refining purposes, while certain quantities of the far-famed "Demerara Crystals" are still exported.

Further attention is being given to the general planting of coconuts, coffee and cocoa, on the vegetable soils on the banks of the rivers* and especially to the cultivation of Para rubber. Rice is now grown to a considerable extent, chiefly by free coolies, on the low lands within the empoldered areas, upwards of 50,700 acres being now under cultivation. Rice exported, 1916, 13,009 tons, valued at 217,396*l.* The development of the minor industries is receiving considerable attention.

Gold and diamond working is carried on by about 4,500 diggers. Of gold, 36,245 ozs. were exported in 1916, valued at 135,214*l.* The diamonds exported during 1916, 16,180 carats, valued at 29,801*l.*

The values of the principal exports besides sugar, rice and gold are:—Timber, 13,700*l.*; balata, 163,896*l.*; charcoal, 7,112*l.*; firewood, 4,670*l.*; coconuts, 5,850*l.*; lumber, 4,789*l.*

The chief imports are breadstuffs, beef, pork, cheese, butter, cornmeal, flour, machinery, dried fish, manure, tobacco, oils, earthenware, glass and hardware, cutlery, textiles, malt and spirits.

Thirty-seven per cent. of the trade is with the United Kingdom, 28 per cent. with Canada, and 17 per cent. with the United States; the other important countries being Dutch Guiana and the West Indies.

### *Climate.*

The climate is hot, but not unhealthy. The mean temperature throughout the year is 80·5° Fahr., the mean maximum being about 85° Fahr., and the mean minimum 75° Fahr. The heat, which is greatly tempered by cooling breezes from the sea prevailing during the greater portion of the year, is felt more from July to October than at other times, owing to the partial cessation of these breezes. There are annually two wet seasons, from June to the end of August and during December, January and February. The annual rainfall for the past 34 years averages about 90 inches in Georgetown. The rainfall in 1916 was 88·52 inches.

* The cocoa estates are chiefly on the banks of the Demerara River, and on Canal No. 1, West Bank. Coffee was grown principally in the county of Berbice, and Liberian coffee has been planted with great success on estates on Canal No. 1 and in the Pomeroon and North-West Districts.

*Towns.*

The capital is Georgetown, situated in lat. 6° 49′ 30″ N., and long. 58° 11′ 30″ W., and possessing a population of 54,318 in 1911. New Amsterdam has a population of 8,604. Both these are ports of registry, having on 31st December, 1916, 48 vessels, of a total tonnage of 3,123.

*Means of Communication.*

The regular mail communication with the Colony is maintained by the vessels of the Compagnie Générale Transatlantique, from France and the West Indies, monthly. There are also the lines of steamers of the Quebec Steamship Co. and the Trinidad Shipping Co. from New York, via the West Indies, the Royal Mail Steam Packet Coy.'s steamers from Canada, via West Indies, both running fortnightly, Scrutton's Line of Steamers from London, as well as other lines trading to the Colony which carry mails but the periods of departure of the latter are uncertain.

*Population in* 1841, 98,154; 1851, 135,994; 1861, 155,907; 1871, 193,491; 1881, 252,186; 1891, 278,328.

*By Census of* 1911, 296,041.

*Estimated Population on* 31*st Dec.*, 1916, 313,859.

The population of the colony was made up in 1911 of—Aborigines, 6,901; East Indians, 126,517; Chinese, 2,622; Portuguese, 10,084; Africans, 706; Europeans other than Portuguese, 3,937; Blacks, &c., 114,780. Of the total 218,705 were natives of the colony; males were 153,717; females, 142,324, and 13,000 Aborigines estimated.

*Immigrant Population on Estates*, 31*st Dec.*, 1916.

| | Under Indenture. | Not under Indenture. | Children. |
|---|---|---|---|
| East Indians | 6,731 | 39,209 | 19,536 |

The approximate number of East Indian immigrants not residing on estates is 72,468. Total immigrant population, 137,944.

The aboriginal Indians actually within the settled districts of the Colony at the period of taking the Census of 1911 were found to number 6,901, but the numbers of the tribes within the British territories vary, and are at all times very uncertain.

*Governors since* 1898.

Sir Walter J. Sendall, G.C.M.G. . 27 Mar., 1898

## BRITISH HONDURAS.

*Situation and Area.*

British Honduras is a Colony on the east coast of Central America, bounded on the north by Yucatan, on the west by a straight line drawn from the rapids of Gracias a Dios on the River Sarstoon, to Garbutt's Falls on the River Belize, and thence due north to the Mexican frontier, on the south by Guatemala, and on the east by the Bay of Honduras. It lies between 18°·29 and 15°·54 N. latitude and 89°·15 and 87°·50 W. longitude.

The area of the Colony is 8,598 square miles, about the size of Wales, including Albion Island in the River Hondo (about 26 square miles), and Ambergris, St. George's, English, Turneffe and other Cays, 212 square miles, a large portion of the latter being mangrove swamps without any soil. It is estimated that about 80 square miles are under cultivation.

*History.*

The coast was discovered in 1502 by Columbus, and its early settlement is supposed to have been effected from Jamaica, about 1638, by adventurers, who were attracted by the fine timber (logwood and mahogany) which grew on the banks of the Hondo and other rivers. Their headquarters were long at St. George's Cay. The name of the present chief town and of the River Belize is alleged to be a corruption of the name of the buccaneer Wallis, who was driven from Hispaniola in that year, and who is said to have been the leader of the settlers.

An earlier settlement had been made by a chartered company, of which the Earl of Warwick was chairman and John Pym treasurer, on two small islands off the Mosquito coast, in 1630. The Mosquito natives were very friendly to the English settlers, and their king, shortly after the conquest of Jamaica, placed himself under English protection, and the Governors of Jamaica exercised a sort of supervision over the affairs of the settlement. In 1739 the native king made a treaty resigning his country to Great Britain, and forts were built in 1742 at the Island of Ruatan, and at Black River on the mainland. Ruatan was abandoned in 1749, but at the same time an officer was formally appointed by the Government of Jamaica to superintend the settlements. By the treaty of Paris in 1763 it was agreed to abandon the settlements, and the forts were dismantled and the garrisons withdrawn. The settlers remained, however, and from that date until 1798, when the last attempt to establish the sovereignty of Spain over the territory was defeated by the inhabitants in the "Battle of St. George's Cay," the Spaniards made frequent but ineffectual attempts to expel the woodcutters by force of arms; and treaty after treaty was concluded, which had little other effect than to stimulate the enterprise of the settlers by the recognition, thus step by step accorded, of the footing they had gained for themselves in Central America, without, in the first instance, any thought of territorial aggrandisement, but solely in pursuit of the industry in which their fortunes were embarked.

The Bay Islands were recognised as part of the Republic of Honduras in 1859.

The only subsequent events of external significance which need here be noticed, are the definition, as above, of the boundaries of the Colony (of which a survey has been partially executed); and the frequent border troubles, connected with the revolt in

Digitized by Google

1849 of the Indian population of Yucatan against the Spanish inhabitants, the result of which was that the Indians were in possession of the country to a considerable distance north of the Hondo until 1901, when the Mexicans subjugated them. Occasional incursions into the Colony were made from time to time by the Indians, the last being in 1872, by the Icaiché tribe on the N.W. frontier.

*Constitution.*

The first settlers from 1638 to 1786 managed their own affairs. Persons were annually elected to act as Magistrates at public meetings held for the purpose. These Magistrates discharged all executive and judicial functions. Resolutions were passed at public meetings, and they formed the laws binding on the community. In 1756 these customs were formally recognised by the King's Government, after the visit of Admiral Sir William Burnaby to the settlement in that year. The customs of the settlers were codified and published, and became known as "Burnaby's Laws."

In 1786 a Superintendent was appointed by the Home Government, but during the years 1790–1797 elected Magistrates again ruled the settlements. From this latter date Superintendents were regularly appointed until 1862. An Executive Council was established in 1839 to assist the Superintendent, and in 1853 a Legislative Assembly was formally constituted, consisting of 18 elected and 3 nominated members. The settlement was declared a Colony on the 12th May, 1862, and a Lieutenant-Governor was appointed subordinate to the Governor of Jamaica. In 1870 the Legislative Assembly was abolished by a local enactment, and a Legislative Council substituted therefor, consisting of five official, and not less than four unofficial, members, with the Lieutenant-Governor as President. Since 1913 the Council contains five official and seven unofficial members. On the 31st October, 1884, Letters Patent were proclaimed constituting the office of Governor and Commander-in-Chief, which rendered the Colony independent of Jamaica. These were renewed by Letters Patent proclaimed on the 10th September, 1909.

The English Common Law and all statutes of the Imperial Parliament "in abrogation or derogation or in any way declaratory of the Common Law" passed before 1899 extend to the Colony as far as local circumstances render such extension suitable, and subject to modification by Colonial ordinances. Pursuant to Ordinance No. 9 of 1913, a revised edition of the Consolidated Laws has been published in two volumes. This edition came into force on the 14th January, 1915, and supersedes the edition published in 1887 and all Ordinances passed before June, 1914. Appeals to His Majesty in Council be regulated by Chapter 16 of the Consolidated Laws.

The Executive Council consists of the Governor, and six members, three of whom are *ex officio*, the other three appointed members.

For administrative purposes the Colony is divided into six districts—Belize, which includes the capital at the mouth of the river of the same name; the Corosal district; the Orange Walk district; the Cayo district; the Stann Creek district; and the Toledo district, the main station of which is Punta Gorda, comprising the extreme south of the Colony.

*General Description.*

In its physical outlines the Colony resembles other parts of Central America, the land being flat and swampy throughout the greater portion of the coast line, and gradually rising as the interior is approached. The characteristic soils of the Colony are known as Cahoon ridge (the vegetable alluvium along the river valleys), the Pine ridge (sandy tracts covered with pines, scrub, and wiry grass), and Broken ridge (intermediate between these two). Besides these there are swamp, savannah, and mountain.

The chief rivers are in the north of the Colony, and run in a north-easterly direction, the Belize reaching the sea on the east, and the Hondo and the New River on the north.

The northern district, of which the Hondo forms the natural boundary, is but little raised above the sea; but towards the south the character of the country becomes more elevated, until in the Cockscomb Mountains a height of some 4,000 feet is attained. That district of the Colony remained until 1879 wholly unexplored, when it was traversed by the then Colonial Secretary, Mr. Fowler, from Garbutt's Falls on the Belize River, at the western frontier, to the sea coast south of Deep River. The country proved to be a succession of valleys and hills, from 1,200 to 3,000 feet above sea level. The westerly portion was an open undulating grassy country, forming magnificent pasturage lands. Towards the coast it was all forest, full of valuable timber. No inhabitants were seen, but ancient Indian ruins, consisting of large stone buildings, were discovered. The soil generally was rich, but a few rugged spots were encountered. Some fine gold-bearing quartz veins were discovered, and other indications of minerals were noticed.

In 1888 Governor Sir R. Goldsworthy, with an exploring party, ascended the Cockscomb Mountains.

*Industry.*

The chief industry is wood-cutting, now over 200 years old. 6,986,476 superficial feet of mahogany, 557,808 superficial feet of cedar, 7,165 tons of logwood, 3,990 lbs. of logwood extract, and 512,290 lbs. of logwood chips were exported in 1916. The next in importance is fruit, the exports in 1916 having been 791,321 bunches bananas, 1,193,517 (number) plantains, and 5,287,434 coconuts. The Colony also exported 3,289,479 lbs. sapodilla gum, 2,617 lbs. of rubber, and sponges and tortoise-shell, 916 lbs. and 3,876 lbs. respectively.

Alternating with stretches of sandy plain, yielding pine trees, are large areas of very rich land, on which, in addition to mahogany and many beautiful hard woods of which little or no use is made, the cahoon palm and vanilla orchid are most noticeable by reason of their abundance and the luxuriance with which they grow. The Colony has not yet been exploited by the economic botanist, otherwise these rich oil-bearing nuts and vanilla would certainly have been turned to profitable account instead of being allowed to go to waste. There is a wide field for the colonist with a little capital and a stock of perseverance and common sense.

A contract was signed in September, 1904, for the sale of the pine trees on Crown land to Mr. B. Chipley, a citizen of the United States, at a price of 1 cent. per tree. It is anticipated that the opening up of the interior of the Colony, which will be necessary for the purposes of this contract, will be of great benefit to trade.

Belize is a port of registry, and had registered on 31st December, 1916, 359 vessels, of 6,241 tons nett.

Digitized by Google

The imports consist mainly of cotton goods and hardware, malt liquors, spirits, refined sugar, tea, tobacco, wines, provisions, and specie. The commercial intercourse is mainly with the United States and Great Britain.

*Communications.*

The easiest communication is by water along the coast. There is regular communication once a week with New Orleans, Puerto Barrios, and Puerto Cortes, fortnightly with New York and Mobile, and every month with Liverpool and Colon. The usual length of the journey between England and British Honduras is 16 days, *viâ* the United States. Telegraphic communication with Europe is maintained by a land line to Consejo on the Hondo River, by a cable across the Hondo connecting with the Mexican Telegraph System through Payo Obispo in Yucatan (1911), and by radio-telegraphic communication with New Orleans (1915).

A telegraph and telephone line has also been constructed from Belize to the most southerly town of Punta Gorda, and another from Belize to the Cayo. A Radio-telegraph Station has been erected in Belize.

A short railway leads from the town of Stann Creek, 25 miles inland, the first section of which was opened towards the end of 1908, and the second section in March, 1909. The line was practically completed in 1910, but extraordinary floods in 1911 carried away a couple of bridges, and did other damage, which have been replaced.

*Rates of Postage.*

| Within the Colony, per 2 ozs. 2 cents, and 1 cent. for each subsequent oz. or fraction of an oz. | | 1 cent per 4 oz. |
| To the United Kingdom, India, British Colonies* and United States . . | per oz. 2 cents. | 1 cent per 2 oz. |

Commencing from 1st April, 1916, a war tax of 1 cent for the first unit of weight is levied on letters destined to places in the Colony, and other countries to which the postage is 2 cents per ounce.

| | | |
|---|---|---|
| Elsewhere (5 cents for first oz. and 3 cents for each subsequent oz. or fraction of an oz.) . . . . . | | 1 cent per 2 oz. |

There are post offices at Belize, Corosal, Orange Walk, Stann Creek, Stann Creek Railway, Middlesex, Punta Gorda, San Estevan, All Pines, Riversdale, Monkey River, Mullins River, and on the Belize River at Isabella, Big Falls, Boom, Banana Bank, Spanish Look-out, The Cayo, Benque Viejo, and at San Pedro, Ambergris Cay, and Cay Caulker, Northern River, Progreso; Gales Point, Caledonia, and Guinea Grass.

Money order offices are established at Belize, Corosal, Orange Walk, Stann Creek, Punta Gorda, and The Cayo.

*Climate.*

Though situated within the tropics, the climate is sub-tropical in character. The maximum shade temperature is 90°, the minimum 62°. The dew point in Belize, a seaport, is relatively high. Sea breezes prevail for the greater part of the year. The average rainfall during the past twenty years has been 81·48 inches per annum. From the middle of February to the middle of May is the dry season. For the rest of the year there is rain to some extent during every month, the heaviest rainfall being in the months of September, October and November, during which months about one-third of the total rain occurs.

*Currency and Banking.*

Up to the 14th October, 1894, the coins in circulation were principally South and Central and American silver dollars; there was no paper currency. The standard of value was the Guatemalan dollar, and Chilian and Peruvian silver coins were also current and legal tender, as well as a colonial currency of one-cent pieces, at fixed ratings with the Guatemalan dollar. By Ordinance No. 31 of 1894, the currency has been established on a gold basis, the United States gold dollar being adopted as the standard coin. Gold coins of the United States Mint are legal tender for the amounts of their respective denominations in standard dollars; also the British sovereign and half-sovereign for the amounts of $4·867 and $2·433 respectively. There is a local subsidiary currency of 50 cent, 25 cent, 10 cent, and 5 cent silver pieces, and a Government note issue of the following denominations: 1, 2, 5, 10, 50 and 100 dollars; a nickel bronze 5 cent piece and a bronze cent piece are also current. The limit of the legal tender in silver is fixed at $10, and in nickel or bronze at 50 cents. The Government Savings Bank, established in 1846 at Belize (with branches at Corosal, Orange Walk, Stann Creek, Punta Gorda and the Cayo), had, on 31st March, 1917, $108,768·91.

On the 14th October, 1912, The Bank of British Honduras, Ltd., was bought over as a going concern by the Royal Bank of Canada. Banking business of every character is conducted.

*Education.*

The schools, both Secondary and Primary, are, with one or two exceptions, denominational. With few exceptions, all Primary schools are inspected and aided by the Colonial Government. Fifty-eight received aid in 1916, to the extent of $23,733·90, with 5,919 scholars on the roll, and 4,314 average attendance. The total cost of Primary education for the year was $34,276·98.

The total number of pupils on the roll in all the schools was about 6,300, with an average attendance of 4,670.

A law "To provide for Compulsory Education in certain cases," was passed in January, 1915. It has chiefly been applied to Indian towns and villages.

*Population.*

The population on the 31st December, 1916, based on the Census of 1911, was:

| | |
|---|---|
| Belize District ... ... ... | 15,840 |
| Corosal District ... ... ... | 6,158 |
| Orange Walk District .. ... | 5,595 |
| Stann Creek District ... ... | 5,324 |
| Toledo District ... ... ... | 4,183 |
| Cayo District ... ... ... | 5,223 |
| Total ... ... | 42,323 |

* See end of Introduction. A reduced rate on parcels exchanged with the U.K. came into force on 1st Jan., 1899.

Digitized by Google

About 400 are Europeans, and 200 White Americans. Of European descent there are about 2,000.

Population of towns at census of 1911: Belize, 10,478; Corosal, 1,789; Orange Walk, 856; Stann Creek, 2,640; Mullins River, 372; Punta Gorda, 799; Monkey River, 449; The Cayo, 895. These have local boards, with, in 1916-17, an aggregate revenue of $50,964·03, and an expenditure of $47,822·10.

# DOMINION OF CANADA.

## THE DOMINION.

The Provinces of Ontario, Quebec (formerly constituting the Colony of Canada), New Brunswick and Nova Scotia, were, by the Imperial Act, 30-31 Vict., c. 3, formed into one Dominion. This Act was brought into force on July 1st, by Royal Proclamation, bearing date the 22nd May, 1867. Its essential provisions are given below.

The Governor-General of Canada was, by Letters Patent of 1st April, 1870, appointed Governor of Rupert's Land. The admission of Rupert's Land into the Dominion of Canada after the 15th July, 1870, was provided for by Order in Council of the 23rd June, 1870, and the Province of Manitoba was erected out of this Territory by a Canadian Act, 33 Vict., cap. 3, and made a Province of the Dominion 15th July, 1870.

By Order of Her Majesty in Council, dated 16th May, 1871, issued on the authority of the British North America Act, 1867, on Addresses from the Houses of Parliament of Canada and the Legislature of British Columbia, that Colony was incorporated in the Dominion, the union taking effect from the 20th of July, 1871.

Prince Edward Island was admitted by Order in Council, bearing date 26th of June, 1873, on the 1st of July in that year.

By an Act passed in 1876, the portion of the N.W. Territories lying to the north of Manitoba was created into a separate district, under the name of the District of Keewatin, but under the control of the Lieutenant-Governor of Manitoba.

By a Canadian Act, 38 Vict., cap. 49 (1875), the territories formerly known as "Rupert's Land" and the North-Western Territory (with the exception of the portion forming the Province of Manitoba) were placed under the jurisdiction and control of a Lieutenant-Governor and Council, separate and distinct from Manitoba.

On the 31st of July, 1880, in compliance with the prayer of an address from the Parliament of Canada, dated the 3rd of May, 1878, Her Majesty issued an Order in Council annexing to the Dominion of Canada from the 1st of September, 1880, such British Possessions in North America (other than Newfoundland) as were not previously included in the Dominion.

By Minute of Council of May 17th, 1882, the districts of Assiniboia, Saskatchewan, Alberta, and Athabaska, were created, and by Order in Council October 2nd, 1895, modified by Order in Council 18th December, 1897, the remaining territory was subdivided into the districts of Ungava, Franklin, Mackenzie, and Yukon, the last-named being made a separate territory, distinct from the North-West Territories, under special regulations by chapter 6 of the Acts of the Federal Parliament, 1898.

By chapters 3 and 27 of the Act of 1905 the four provisional districts of Alberta, Assiniboia, Saskatchewan and Athabaska were formed into the two provinces of Alberta and Saskatchewan, and were admitted into the Dominion as such on the 1st September, 1905. The dividing line runs north and south. Alberta has an area of 255,285 square miles, and Saskatchewan of 251,700 square miles.

By Federal Act passed in the Session of 1912, the boundaries of the Provinces of Ontario, Quebec and Manitoba were extended. Ontario was enlarged by 146,400 square miles, Quebec by 354,961 and Manitoba by 178,100.

### *History.*

Particulars as to the history of each province will be found in the following pages, but it may here conveniently be stated that the north-east coast of the Dominion seems to have been first discovered by the Norse seamen of the middle ages. Cabot reached Labrador in 1497, and the fisheries off this coast were frequented early in the sixteenth century. In 1535 Cartier settled on the St. Lawrence on behalf of France, and others followed. The whole territory became British by the Treaty of Paris, 1763.

### *Constitution.*

The Executive Government is vested in the Crown, and is exercised by a Governor-General appointed by the King, assisted by a Privy Council chosen and summoned by himself. The Cabinet, as in England, is a Committee of the Privy Council, formed of the principal members of the Government. The seat of Government, until the King shall otherwise direct, is Ottawa, in Ontario.

The supreme legislative power is vested in a Parliament, consisting of the King, a Senate, and a House of Commons. The Senate now consists of 96 members nominated for life by the Governor-General, and so chosen that 24 belong to Ontario, 24 to Quebec, 24 to the Maritime Provinces, and 24 to the Western Provinces. The qualification for Senator is the possession of property worth $4,000, age of thirty years, and residence within the province for which he is appointed. The House of Commons consisted originally of 181 elected members, which number has been increased by additions on the accession of new provinces, and by the increase in population, and was, at the expiration of the twelfth Parliament in October, 1917, 221; 86 representing Ontario, 65 Quebec, 18 Nova Scotia, 13 New Brunswick, 10 Manitoba, 7 British Columbia, 4 Prince Edward Island, 7 Alberta, 10 Saskatchewan, and 1 the Yukon Territory. The basis on which the number of members allotted to each province is regulated, is that Quebec shall always have 65, and the other provinces a proportional number according to their population at each decennial census. By the

Representation Act, 1914 (4-5 Geo. V. c. 51) which was assented to on June 12th, 1914, it is provided that the House of Commons shall in the thirteenth Parliament (1917- ) consist of 235 members, distributed by provinces as follows :—P.E.I. 4; N.S. 16; N.B. 11; Que. 65; Ont. 82; Man. 15; Sask. 16; Alberta 12; B.C. 13; Y.T. 1. There is no property qualification. Each member of the Senate receives $2,500 per annum, and each member of the Commons a maximum of $2,500 per session, with certain deductions for days of non-attendance. A Parliament lasts five years if not sooner dissolved. Election is by ballot. During the War the members of the House of Commons are to be elected under the War-time Elections Act, 1917, which, among other provisions, gives the vote to female relations of those who are serving or have served without Canada in the present War, and takes the vote away from recently-naturalized aliens of enemy origin. The session usually extends from November to May.

For each province there is a Lieutenant-Governor, appointed by the Governor-General, and holding office during pleasure, but not removable within five years of appointment, except for cause assigned. He receives a salary fixed and provided by the Dominion Parliament, and is assisted by an Executive Council usually composed of the chief provincial officials who possess the confidence of the Provincial Assembly.

Each province has a "Legislative Assembly," and in Quebec and Nova Scotia there is also a "Legislative Council," forming a second chamber. The Provincial Legislatures possess the power of altering their constitutions. The territory not comprised within any province (such as the North-East Territory and the Arctic Islands) is very thinly inhabited, and is governed by a Commissioner and a Council of four appointed by the Governor in Council at Ottawa.

The Dominion Parliament has exclusive legislative power in all matters except those specifically delegated by the constitution to the Provincial Legislatures, and the Canadian Constitution is in this respect the reverse of that of the United States. Among such general matters may be named public finance, trade regulation, postal service, currency, coinage, banking and navigation matters, defence, the law relating to crimes, bankruptcy, copyright, patents, marriage and divorce, naturalisation, and native (Indian) affairs.

The powers of the Provincial Legislatures are confined to certain specified subjects, of which the chief are the alteration of their own constitutions, direct taxation within the province, and provincial loans, the management of provincial public lands, and of provincial and municipal offices, hospitals, gaols, &c., licences, local works, and the general civil law and procedure. With regard to education, they have full powers, subject only to certain provisions to secure protection to religious minorities. In agricultural, quarantine, and immigration matters, they possess concurrent legislative powers with the Dominion Parliament.

The Judges are appointed by the Governor-General in the superior, district, and county courts throughout the Dominion, except in the probate courts of Nova Scotia and New Brunswick.

The Dominion Government assumed the Provincial debts existing at the time of the Union, and agreed to pay to each Province an annual subsidy at the rate of 80 cents per head, as ascertained by the census of 1861, and in the case of Nova Scotia and New Brunswick, by each subsequent decennial census until the population of each of these two Provinces amounted to 400,000. Each Province also received an annual allowance for Government.

The Provinces of Nova Scotia and New Brunswick, whose public debts were less, proportionally, at the Union than that of the old Province of Canada became entitled to receive an interest allowance, payable half-yearly, on the difference between their respective debts and certain stipulated amounts.

The annual subsidies granted to the several provinces have been revised by Imperial enactment (1907), and are now as follows :—

(*a*) A fixed grant according to population :— Where population is—

| | $ |
|---|---|
| Under 150,000 | 100,000 |
| 150,000, but does not exceed 200,000 | 150,000 |
| 200,000 ,, ,, 400,000 | 180,000 |
| 400,000 ,, ,, 800,000 | 190,000 |
| 800,000 ,, ,, 1,500,000 | 220,000 |
| over 1,500,000 | 240,000 |

(*b*) A grant at the rate of 80 cents per head of the population of the province up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number.

(*c*) An additional grant of $100,000 yearly to the province of British Columbia for a period of ten years, from 1907.

In lieu of public lands in Alberta and Saskatchewan, which the Dominion retains, each province receives until its population reaches 400,000, an annual sum of $375,000, payable half-yearly; thereafter until the population reaches 800,000, an annual sum of $562,500; thereafter until the population reaches 1,200,000, $750,000; thereafter the sum payable shall be $1,125,000.

Each of these two provinces, inasmuch as they were not in debt at the time (1905) of their statutory creation, are entitled to be paid half-yearly, in advance, an annual sum of $405,375.

By chapter 32 of the Acts of the Parliament of Canada, 1912, the boundaries of the Province of Manitoba were extended northward to the 60th parallel of north latitude, and eastward to the shores of Hudson Bay, the area of the enlarged province as a result approximating the respective areas of the Provinces of Alberta and Saskatchewan. In consequence of this enlargement allowances from the Federal Treasury practically identical in amount and upon the same basis as the allowances or grants to Alberta and Saskatchewan, as recited in the preceding paragraphs became payable to the Province of Manitoba.

By chapter 42 of the Acts of 1912, an additional annual grant of one hundred thousand dollars was made to the Province of Prince Edward Island.

Bills passed by the Provincial Legislature require the assent of the Lieutenant-Governor, and may be disallowed within a year by the Governor-General. Those passed by the Dominion Parliament require the assent of the Governor-General, and may be disallowed within two years by the King.

Provision was made in the Act constituting the Dominion for the admission into it of any of the other British possessions on the continent of North America, and they have all been since admitted except Newfoundland.

Provision was also made for the construction of a railway from the River St. Lawrence to Halifax, and (in the Order in Council admitting British Columbia) for the construction of a railway from the Atlantic to the Pacific Ocean. Both these have been constructed.

*Local Government.*

In all the provinces local self-government has been developed to the fullest extent. In the complete form as adopted by Ontario, Manitoba, British Columbia and other provinces, the whole municipal organisation comprises: (*a*) the townships, being rural districts of an area of 8 or 10 square miles; (*b*) villages with a population over 750; (*c*) towns with a population of over 2,000. Such of these as are comprised within a large district, called a county, constitute (*d*) the county municipality; (*e*) cities are established from the growth of towns when their population exceeds 15,000. The townships and villages are administered by a reeve and councillors; the towns by a mayor and councillors, and the cities by a mayor and aldermen. The governing body of the county municipality is composed of the members elected by districts containing one or more townships or villages, the presiding officer being styled "Warden." The Councils have powers to levy rates, create debts, promote agriculture, trade or manufactures, or railways, powers relating to drainage, roads, paupers, cemeteries, public schools, free libraries, markets, fire companies, preservation of the peace, &c.

*Situation and Area.*

The Dominion of Canada occupies the northern half of the American continent (except a portion of Labrador, Newfoundland, and Alaska, the latter belonging to the United States), stretching from latitude 49° to beyond the polar circle, and comprises an area computed at 3,729,665 square miles (30 times the area of the United Kingdom, or nearly four times that of British India). The seven older Provinces of the Dominion (including added territory to the Provinces of Ontario, Quebec and Manitoba) comprise a little over 1,773,000 square miles. The Dominion includes all the Arctic islands (but not Greenland, which is Danish), as well as Anticosti, Prince Edward Island, and Cape Breton on the east, and Vancouver and Queen Charlotte's Islands on the west.

| Kitchener ... ... ... ... | 15,186 |
| Guelph ... ... ... ... | 15,175 |

About 2,055,000 of the people are of French extraction, over one million six hundred and five thousand of these residing in Quebec, where French is the usual language spoken.

The total population includes about 105,000 Indians, living chiefly in Manitoba, British Columbia, and the North-West Territories. They are under the supervision of Government agents, and have large districts reserved for them, where they live mainly by hunting, fishing, and traffic in furs. According to the census of 1911 there were 27,774 Chinese in Canada, most of whom are in British Columbia, and a few thousand Esquimaux along the northern coasts.

The number of immigrants arrived during the year ended 31st March, 1917, was 75,374, about one-third of whom belonged to the farming or farm-labouring class; 8,282 were from the United Kingdom, and 61,389 from the United States.

The imports for home consumption from the United States in 1916-17 (including coin and bullion) were $677,631,616, and the customs duties collected on merchandise amounted to $75,516,314.

The amount of customs duties on British goods was $62,045,582.

*Industry.*

The main industry of the Dominion is agriculture, an enormous quantity of cereals and dairy produce being raised and exported. "Homesteads" of 160 acres can be obtained without any payment, and the process of settlement on the land in the west is rapidly going on; 45 per cent. of the population is engaged in agriculture, and 17,030 "homesteads" were granted in 1916, covering an area of 2,724,800 acres. In 1915 there were 3,307 butter and cheese factories and 13 factories producing condensed milk and cream. The value of land, buildings and plant was $14,030,942. The number of persons employed in factories during the year was 6,849, and the amount paid for salaries and wages was $3,403,420. The quantity of butter made in factories during the year was 83,991,453 lbs., with a value of $24,385,052; the quantity of cheese made was 183,887,837 lbs., with a value of $27,097,176; and the quantity of condensed milk, cream, etc., made was 36,380,909 lbs., with a value, including all products of condenseries, of $3,725,668. The fisheries of the maritime provinces are very extensive, and large quantities of dried, pickled, and canned fish and lobsters are exported. The value of the yield in 1916-17 was $39,202,011, and the number of men employed in connection with the fisheries in 1915-16 was 102,182. The lumber and fur trades are also important. Manufactures have been very considerably developed, the value of the output being in 1915, $1,165,975,639, as compared with $1,381,547,225 in 1910. The principal minerals produced in 1916 were coal $38,797,437; gold, $19,162,025; silver, $16,854,635; copper, $32,580,057; nickel, $29,035,497; asbestos, $5,133,332; lead, $3,540,870; cement, $6,529,861; pig iron (made from Canadian ore), $1,328,595; bricks, $2,358,245; natural gas, $3,924,632; and petroleum, $392,284. The total production of minerals was $177,357,454. Ship-building is an important industry, and, besides ships, the principal among manufactured articles exported are furniture and other manufactures of wood, leather, agricultural and musical instruments.

The arrivals and clearances show, in the year 1916, a total tonnage of 126,430,522 tons. Engaged in sea going trade, 24,827,650 tons, 68,709,424 tons engaged in coasting trade, and 32,893,448 tons engaged on inland waters between Canada and the United States.

The number of steamers and sailing vessels on the Register Books of the Dominion on 31st December, 1916, was 8,660, with a net tonnage of 942,598. Of this number 4,202 were steamers, with a gross tonnage of 799,183. The number of men and boys employed was over 42,566.

In 1916 the number of lights shown was 1,555, lightships 12, lightboats 1, and fog-alarm stations 13; the number of fog whistles, hand fog horns, fog bells, etc., was 323; the number of gas buoys, whistling buoys, bell buoys, and submarine bells, 469; the number of light keepers and engineers of fog-alarms, with masters of lightships, was 1,099.

*Railways.*

The increase in the railway mileage of Canada for the year ended June 30th, 1916, was 1,852, as compared with 4,787 in 1915, 1,491 in 1914, and 2,577 in 1913. Of the increase of 1,852 miles in 1916, slightly over 68 per cent. took place in the three western provinces (Saskatchewan, Alberta, and British Columbia). The total railway mileage in actual operation on June 30th, 1916, was 37,434.

On June 30th, 1916, the total amount of capital invested in Canadian railways was $1,893,125,774. Of this total $847,979,443 are stocks, $176,284,882 are debenture stocks and $868,861,449 are funded debt. Stocks, bonds and debenture stock combined, averaged $67,471 per mile for the lines against which the liability actually existed. Aggregate earnings of the steam railways were $261,888,654, an increase over 1916 of $62,045,582 or 31 per cent. Operating expenses amounted to $180,542,259, an increase as compared with 1915 of $32,811,160 or 22·20 per cent.

The steam railways of Canada carried 49,027,671 passengers and 109,659,088 tons of freight, an increase of 2,705,636 passengers, or 5·84 per cent. and a decrease of 22,454,250 tons of freight, or 25·75 per cent. as compared with 1914.

The railways of Canada have been built largely under different forms of Government aid. The principal forms of aid granted have consisted in land grants, cash subsidies, loans, the issue of debentures and the guarantee of bonds or interest. Aid has been granted both by the Dominion and

Digitized by Google

Provincial Governments and also by municipalities. The total area of the land granted as subsidies to steam railway companies by the Dominion and Provincial Governments up to June 30th, 1916, extends to 55,740,249 acres.

The Dominion Government has constructed the eastern portion of the new National Transcontinental Railway from Moncton, N.B., to Winnipeg, Man., and the expenditure on this line up to March 31st, 1916, was $159,881,197. Also the Dominion Government owns and operates the Intercolonial Railway, which extends from ocean ports in Nova Scotia and New Brunswick to Montreal, and the Prince Edward Island Railway. During 1916 the total cash subsidies paid to railways amounted to $1,240,435, all of which were paid by the Dominion Government. From 1851 up to June 30th, 1916, the total value of public aid granted to steam railways in Canada, exclusive of the capital of the two government-owned railways (I.C.R. and P.E.I.R.), amounted to $240,072,359.

The amount of aid paid to steam railways by the Dominion Government up to June 30th, 1916, is made up of the capital of the two government-owned lines, amounting to $127,077,098 and $184,719,628, representing the aid granted by the Dominion Government to other railways. The latter includes in 1912 the sum of $4,994,417 paid to the Grand Trunk Pacific Railway Co. under the Implement Clause of the agreement between the Government and the Company, and increased in 1916 to $6,263,716. This clause provides that the Government shall make up the difference between the amount realized in certain bonds and their par value. In each year since 1886 the aid granted to other railways includes the sum of $10,189,521 paid by the Government to the Canadian Pacific Railway Company for land taken over by the Government from the Company's land subsidy.

Amongst the principal railway systems of Canada are those of the Canadian Pacific, the Grand Trunk, the National Transcontinental, the Canadian Northern, and the Intercolonial and Prince Edward Island Railways. On June 30th, 1916, the Canadian Pacific had a mileage leased and owned of 12,900, as well as 1,416 miles of double track. The Company's gross earnings during the railway year 1916 were $124,654,571; its operating expenses were $78,237,828, and its net earnings were $46,416,743. The Grand Trunk Railway Company had on June 30th, 1916, 3,556 miles under operation. The Grand Trunk Pacific Railway, with its main line from Winnipeg, Manitoba, to Prince Rupert, B.C., and its branches, was operating at that date 1,963 miles, making a total of 5,519 miles for the Grand Trunk system of Canada. The gross earnings of the Grand Trunk Railway for the year ended June 30th, 1916, were $39,155,040, its operating expenses were $28,782,013, and its net earnings were $10,373,027. The Grand Trunk Pacific main line and branches are now being operated for passenger and freight service.

The National Transcontinental Company had on June 30th, 1916, 2,002 miles under operation. The gross earnings amounted to $5,798,516, and the operating expenses to $5,369,062, and its net earnings to $429,454.

On June 30th, 1916, the Canadian Northern Railway system had a mileage of 9,647. The Company's gross earnings were $34,476,275, its operating expenses were $25,244,186, and its net earnings were $9,232,089. The total mileage operated by the Canadian Government Railways is 4,178, including the Intercolonial Railway, 1,514 miles; the Prince Edward Island Railway, 275 miles; the Transcontinental Railway, 2,002 miles; and other railways, 387 miles. On the new line from Le Pas in Manitoba to Hudson Bay, which is under construction by the Dominion Government, at March 31st, 1916, 241 miles of track had been laid, and 241 miles of telegraph line built. Grading had been completed to mile 378, or within 47 miles of Port Nelson. The expenditure for the year ended March 31st, 1916, was $4,889,132, making a total expenditure up to that date, $15,749,908.

In the fiscal year 1916-17 the total storeage capacity of the 3,360 grain elevators and warehouses in Canada was 193,844,000 bushels.

There are 62 electric railways, with a mileage of 1,674. In 1916, the aggregate of gross earnings was $27,416,284, as against $26,922,900 in 1915. Operating expenses for the year amounted to $18,099,906 as compared with $18,131,842 in 1915. The number of passengers carried was 580,094,167. On June 30th, 1916, the total amount of capital invested in Canadian Electric Railways was $154,895,584. Of this total $67,738,273 are stocks and $87,157,309 are funded debt.

*Telegraphs.*

There are 55,316 miles of telegraph line, and 206,575 miles of wire in operation in Canada (exclusive of miles of wire of Government lines), of which 11,843, including 382 miles of cables, are owned and operated by the Dominion Government; 11,897,924 messages were sent in 1916 (not including weather and shipping reports), and the number of offices was 4,621, being one to about every 1,760 of the population. Canada ranks seventh in actual telegraphic mileage among the various countries of the world, and first with respect to the number of offices in proportion to population. There is direct cable communication with Great Britain, Newfoundland, and Bermuda, and also a deep-sea cable between Vancouver Island and the United States. In the latter part of 1902 telegraphic communication was opened up between Canada and the Australian Colonies by the Pacific Ocean Cable. The telephone is very generally used. On the 30th June, 1916, there were 548,421 telephones and 1,600,564 miles of telephone wire in use, of the latter, 1,125,365 miles were urban and 475,199 rural. The earnings amounted to $18,594,268 and the operating expenses to $11,147,201. On June 30th, 1916, the capital liability of telephones in Canada was $76,920,314, of which $29,416,956 are stocks and $47,503,358 are funded debt.

There were, on March 31st, 1916, 569 electric light companies in Canada. Every Province of the Dominion is supplied with the electric light.

*Canals.*

There are six important systems of Government canals, affording, with the St. Lawrence River connections, magnificent inland communications. From Lake Superior to the sea there is water passage nowhere less than 14 feet deep. The total length of canals proper open is 262¼ miles, but the aggregate length of inland navigation rendered available by them is 3,000 miles, the St. Lawrence system alone having a length of 2,384 miles. The receipts for the year 1916 were $446,722, and the working expenses, including repairs, $1,227,097. Over one hundred and

Digitized by Google

forty million dollars have been expended on the construction, enlargement and repairs of these canals, including the amount expended on the Sault St. Marie Canal to connect Lakes Superior and Huron, which was opened in the season of 1895.

The Canal tolls were abolished by way of experiment in 1903, and have not yet been reimposed.

*Currency and Banking.*

There is an uniform currency throughout the Dominion, consisting of dollars, cents, and mills., $4·86⅔ being equal to one pound sterling. In addition to this Canadian coinage, the gold coins of the United States are also legal tender.

The Ottawa Branch of the Royal Mint was established in pursuance of The Ottawa Mint Act, 1901 (1 Edw. VII., c. 4), under which an annual sum not exceeding $75,000 is payable to the Imperial Treasury for the purpose of defraying the salaries of officials and other expenses of the Mint, the fees and all sums received being retained by Canada.

Memorandum of gold, silver, and bronze coin struck and issued by the Ottawa Mint during the calendar years 1915 and 1916 :—

| Description of Coins. | 1915. | | 1916. | |
|---|---|---|---|---|
| | Struck. | Issued. | Struck. | Issued. |
| Gold (Sovereigns) .. .. .. | — | 13 | 6,111 | 11,035 |
| | — | or 63.26 | or $29,740.20 | or $53,703.66 |
| | $ | $ | $ | $ |
| Gold—Canadian $5's .. .. .. | — | 55.00 | — | — |
| ,, ,, $10's .. .. .. | — | 480.00 | — | — |
| Silver .. .. .. .. .. | 184,548.60 | 206,000.00 | 1,134,301.00 | 1,302,000.00 |
| Bronze .. .. .. .. .. | 48,369.66 | 50,400.00 | 111,101.42 | 110,700.00 |

The Mint issues gold, silver and copper coins for circulation in Canada, and sovereigns and half-sovereigns coined are legal tender in every country under the British flag.

The Savings Banks, under the charge of the Government, on March 31st, 1917, had $56,216,089 on deposit. There are two savings banks operating under special charter, and these had on deposit on March 31st, 1916, $40,405,037, and on March 31st, 1917, $44,139,978. In addition all the 22 chartered banks have savings banks branches, but the returns to the Government do not specify the amounts on deposits in these branches.

The following banks were established in Canada, June, 1917 :—

*Ontario*—(Headquarters).

Bank of Toronto.
Dominion Bank.
Standard Bank.
Imperial Bank.
Bank of Ottawa.
Bank of Hamilton.
Canadian Bank of Commerce.
Home Bank of Canada.
Sterling Bank of Canada.

*Quebec*—(Headquarters).

Bank of Montreal.
Molsons Bank.
Banque Nationale.
Bank of B. N. America.
Royal Bank of Canada.
Provincial Bank.
Banque d'Hochelaga.
Merchants' Bank of Canada.
Quebec Bank.
Union Bank of Canada.

*Nova Scotia*—(Headquarters).

Bank of Nova Scotia.

*Other Provinces*—(Headquarters).

Northern Crown Bank, Manitoba; Weyburn Security Bank, Sask.

These banks had, on December 31st, 1916, 3,309 branches, distributed throughout the Dominion.

## BANKS AND BANKING.

General statement of Chartered Banks, 1915–1916.

| Calendar year. | Capital paid up. | Notes in Circulation. | Totals on Deposit. | Discounts to the People. | Liabilities.[3] | Assets. |
|---|---|---|---|---|---|---|
| | $ | $ | $ | $ | $ | $ |
| 1915..... | 113,982,741 | 105,137,092 | 1,198,340,315 | 1,066,252,854 | 1,353,629,123 | 1,596,424,643 |

[3] Excluding capital and rest or reserve fund.

In addition to the notes issued by the chartered banks, the Government issues notes of various denominations, and the average monthly circulation in 1890 amounted to $15,501,360, and in 1916 to $176,816,006. The Dominion Government by statute must always hold, as security for the redemption of Dominion notes issued and outstanding up to and including fifty million dollars, an amount in gold equal to not less than 25 per cent. of the amount of such notes.

Digitized by Google

To secure the issue of notes in excess of fifty millions it must hold a dollar in gold for each dollar of notes. As a war measure, under the provisions of the Finance Act, 1914, the Minister of Finance was empowered to issue Dominion Notes to banks upon the deposit of approved securities with the Minister. No notes are issued below five dollars except by the Government. On July 1st, 1912, the Dominion Government issued five dollar notes for the first time.

*Post Office.*

The number of offices in 1916 was 13,057. The net revenue for the year ended March 31st, 1916, was $18,858,410, and the expenditure $16,009,139. At the end of the calendar year 1916, there were 3,894 rural mail delivery routes, on which were erected 178,083 boxes; the corresponding figures for the calendar year 1915 were 3,432 routes and 154,183 boxes.

The mail communication with Great Britain is now weekly *viâ* Quebec in summer and *viâ* Halifax in winter (less frequent than before the war). With the West Indies there is a fortnightly mail service *viâ* Halifax, and from three to four trips per week *viâ* United States ports. There is a through service twice a day across the continent from Halifax on the Atlantic to Vancouver on the Pacific coast by the Canadian Pacific and Inter-colonial Railways, a monthly direct steam service with New Zealand and *viâ* New Zealand with Australia *viâ* Vancouver. With Japan and China there is a direct connection by steamer from Vancouver once every two weeks throughout the year.

The rates of postage are as follows:—

LETTERS.—To Canada, United Kingdom and all parts of the British Empire, United States, and Mexico, 2 cents per oz.; to all other countries, 5 cents for first oz. and 3 cents for each subsequent oz. or fraction thereof. A war tax of 1 cent is imposed on each letter and post card mailed in Canada on which the postage rates are less than 5 cents for the first oz. on letters and 2 cents each on post cards.

NEWSPAPERS.—To Canada, United States and Mexico, and (if published in Canada) to United Kingdom and certain British Colonies, 1 cent per 4 oz.; in all other cases 1 cent per 2 oz.

There is a direct parcel post to Newfoundland, West Indies, New Zealand, Australia, United Kingdom, Hong Kong, and Japan, and parcel post via England to other countries.

*Governors-General since Confederation.*

1867. Viscount Monck, G.C.M.G., P.C.
1868. Lord Lisgar, G.C.B., G.C.M.G., P.C.
1872. The Marquis of Dufferin, K.P., G.C.M.G., G.C.B., P.C.
1878. The Marquis of Lorne, K.T., G.C.M.G.
1883. The Marquis of Lansdowne, G.C.M.G.
1888. Lord Stanley of Preston, G.C.B.
1893. The Earl of Aberdeen, G.C.M.G., P.C.
1898. The Earl of Minto, G.C.M.G., P.C.

*Assistant to Minister and Financial Comptroller*, Graham A. Bell, C.M.G., $4,500.
*Assistant Deputy Minister and Secretary*, L. K. Jones, I.S.O., $4,000.
*General Managers, Government Railways, Eastern*, C. A. Hayes, Moncton, N.B.; *Western*, F. P. Brady, Winnipeg, Man.
*Chief Engineer*, W. A. Bowden, B.Ap.Sc., $5,000.

POST OFFICE DEPARTMENT.

*Postmaster-General*, Hon. Pierre E. Blondin, $7,000.
*Deputy Postmaster-General*, R. M. Coulter, C.M.G., M.D., $5,000.
*Assistant Deputy Postmaster-General*, H. B. Verret, $4,000.
*Assistant Deputy Minister*, Robert Fowler, $3,500.
*Superintendent, Government Annuities*, Samuel T. Bastedo, $4,000.
*Financial Superintendent*, W. J. Johnstone, $4,000.
*Superintendent Rural Mail Delivery Branch*, A. Bolduc, $4,000.
*Controller of Postal Stores*, Sidney Smith, I.S.O., $3,700.
*Accountant*, W. J. Glover, $3,500.
*Superintendent, Postage Stamp Branch*, E. J. Lemaire, $3,300.
*Controller of Railway Mail Service*, Bartholomew M. Armstrong, $3,600.
*Superintendent, Money Order Branch*, F. E. S. Grout, $3,100.
*Superintendent, Savings Bank Branch*, James H. Fairweather, $2,800.
*Superintendent, Mail Contract Branch*, George Clayton Anderson, $3,700.
*Superintendent Dead Letter Branch*, George J. Binks, $3,300.
*Secretary*, A. W. Throop, $3,200.

DEPARTMENT OF JUSTICE.

*Minister of Justice and Attorney-General*, Hon. Charles Jos. Doherty, D.C.L., LL.D., $7,000.
*Solicitor-General*, Hon. Hugh Guthrie, K.C., $6,000.
*Deputy Minister*, E. L. Newcombe, C.M.G., K.C., M.A., LL.B., $10,000.
*Asst. Deputy Minister and Secretary*, W. S. Edwards, $4,500.
*Inspectors of Penitentiaries*, D. Stewart, $4,000; W. St. P. Hughes, $3,800.
*Chief Commissioner of Police of Canada*, Lieut.-Colonel Sir Arthur Percy Sherwood, K.C.M.G., M.V.O., A.D.C., $5,000.

THE ROYAL NORTH-WEST MOUNTED POLICE OFFICE.

*Comptroller* Angus A. McLean, B.A., B.C.L., $5,000.
*Assistant Comptroller*, Chas. F. Hamilton, $3,100.
*Commissioner*, Aylesworth Bowen Perry, C.M.G., $4,000.

DEPARTMENT OF AGRICULTURE AND STATISTICS.

*Minister of Agriculture*, Hon. Thomas A. Crerar, $7,000.
*Deputy Minister*, George F. O'Halloran, B.A., B.C.L., $6,000.
*Assistant Deputy Minister and Secretary*, A. L. FitzGerald Jarvis, I.S.O., $3,700.
*Director of Experimental Farms*, Joseph H. Grisdale, B. Agr., $3,400.
*Director-General of Public Health*, F. Montizambert, C.M.G., I.S.O., M.D. (Edin.), F.R.C.S.E., D.C.L., $5,000.
*Veterinary Director-General*, F. Torrance, B.A., D.V.S., $5,000.
*Dairy and Cold Storage Commissioner*, J. A. Ruddick, $4,000.
*Registrar, Trade Marks and Copyrights*, P. E. Ritchie, B.A., B.C.L., $3,700.

Digitized by Google

*Exhibition Commissioner*, Wm. Hutchison, $4,500.
*Chief Clerk, Patents*, W. J. Lynch, I.S.O., $3,300.

DEPARTMENT OF MARINE AND FISHERIES.

*Minister*, Hon. Charles C. Ballantyne, $7,000.
*Deputy Minister*, Alexander Johnston, $5,000.
*Assistant Deputy Minister*, Cameron Stanton, $4,000.
*Chief Engineer*, Lieut.-Colonel W. P. Anderson, C.M.G., C.E., $4,000.
*Superintendent of Meteorological Service and Director of Magnetic Observatory, Toronto*, Sir Robert Frederick Stupart, F.R.S.C., $4,000.
*Chief Accountant*, Alexander Boyle, $3,400.

DEPARTMENT OF THE NAVAL SERVICE.

*Minister of the Naval Service*, Hon. Charles C. Ballantyne (*Minister of Marine and Fisheries*).
*Deputy Minister and Comptroller of the Naval Service*, G. J. Desbarats, C.M.G., B.Ap.Sc., C.E., $6,000.
*Director of Naval Service*, Vice-Admiral Sir C. E. Kingsmill, R.N. (ret.), $5,000.
*Engineer-Commander*, Arthur C. Darley, R.N., $4,000.
*Commander and Chief of Staff*, Lieut. R. M. T. Stephens, C.M.G., R.N. (ret.), $3,500.
*Paymaster*, H. C. Pinsett, R.N., $3,011.
*Superintendent Radio-Telegraph Service*, C. P. Edwards, $3,000.
*Chief Hydrographer*, W. J. Stewart, $3,500.
*Superintendent of Tidal and Current Surveys*, Dr. W. Bell Dawson, $3,400.
*Commissioner of Fisheries*, Edward E. Prince, F.R.S.C., LL.D., $4,000.
*Superintendent of Fisheries*, Wm. A. Found, $3,400.
*Accountant*, L. J. Beausoleil, $3,100.

DEPARTMENT OF MILITIA AND DEFENCE.

*Minister of Militia*, Maj.-Gen. Hon. Sydney C. Mewburn, K.C., $7,000.
*Parliamentary Secretary*, F. B. McCurdy, $5,000.
*Deputy Minister*, Surgeon-General Sir Eugène Fiset, Kt., K.C.M.G., D.S.O., M.D., $5,000.
*Accountant and Paymaster-General*, J. W. Borden, $4,000.
*Assistant Deputy Minister and Secretary of the Militia Council*, Ernest F. Jarvis, $3,850.
*Director of Contracts*, H. W. Brown, $3,850.
*Chief of the General Staff*, Maj.-Gen. W. Gwatkin, C.B.
*Quartermaster-General*, Major-General Sir D. A. Macdonald, Kt. Bach., C.M.G., I.S.O.
*Master-General of the Ordnance*, Maj.-Gen. H. M. Elliott.
*Adjutant-General*, Colonel V. A. S. Williams (overseas), Brigadier-General E. C. Ashton (acting).
*Inspector-General, Eastern Canada*, Maj.-Gen. F. L. Lessard, C.B. *Western Canada*, Maj.-Gen. Sir S. B. Steele, K.C.M.G., C.B., M.V.O.

HIGH COMMISSIONER IN LONDON.

*High Commissioner*, 17, Victoria Street, London, S.W., Hon. Sir George H. Perley, K.C.M.G.
*Secretary*, William Linney Griffith, $6,000.

DEPARTMENT OF LABOUR.

*Minister of Labour*, Hon. Thomas W. Crothers, B.A., K.C., $7,000.
*Deputy Minister of Labour*, F. A. Acland, $5,000.

DEPARTMENT OF IMMIGRATION AND COLONIZATION.

*Minister of Immigration and Colonization*, Hon. James A. Calder, $7,000.
*Superintendent of Immigration*, W. D. Scott, $4,000.
*Assistant Superintendent, London, England*, John O. Smith, $4,400.
*Inspector of United States Agencies*, W. J. White, $4,000.
*Medical Inspector*, P. H. Bryce, M.D., $4,000.
*Commissioner of Immigration, Winnipeg*, J. Bruce Walker, $3,500.

## COMMISSIONS.

*Permanent Railway Commission.*

*Chief Commissioner*, Sir Henry L. Drayton, K.C., $12,500.
*Assistant Chief Commissioner*, D'Arcy Scott, $9,000.
*Deputy Chief Commissioner*, Hon. Wilfrid B. Nantel, $8,000.
*Commissioners*, S. J. McLean, LL.B., Ph.D., A. S. Goodeve, A. C. Boyce, $8,000 each.
*Chief Engineer*, G. A. Mountain, $5,000.
*Secretary*, A. D. Cartwright, $4,000.

*Civil Service Commission.*

*Commissioners*, Hon. W. J. Roche, *Chairman*, $6,000; Clarence Jameson, Michel G. La Rochelle, K.C., B.A., LL.D., $5,000 each.
*Secretary*, Wm. Foran, $3,700.

*Conservation Commission.*

*Chairman*, Hon. Sir Clifford Sifton, K.C.M.G.
*Assistant Chairman and Secretary*, James White, F.R.G.S., F.R.S.C., $5,000.
*Medical Adviser to Committee on Public Health*, Charles A. Hodgetts, C.M.G., M.D., $4,000.
*Chief Forester*, Clyde Leavitt, M.Sc.F., $3,200.
*Mining Engineer*, W. Dick, M.Sc., $2,700.
*Hydro-Electric Engineer*, L. G. Denis, B.Sc., $2,700.
*Agriculturist*, F. C. Nunnick, B.S.A., $2,700.

*International Joint Commission.*
*Canadian Section.*

*Chairman*, Charles A. Magrath, $7,500.
*Commissioners*, H. A. Powell, K.C., $7,500, Pierre B. Mignault, K.C., $7,500.
*Secretary*, L. J. Burpee, $4,000.

## ECCLESIASTICAL.

CHURCH OF ENGLAND.

*Primate of All Canada*, His Grace the Most Reverend S. P. Matheson, D.D., LL.D.
*Archbishop of Ottawa, Emeritus*, The Most Rev. Charles Hamilton, D.D., D.C.L.

*Province of Canada.*

*Metropolitan and Archbishop of Nova Scotia*, Most Rev. C. L. Worrell, D.D., D.C.L.
*Bishop of Fredericton*, Rt. Rev. J. A. Richardson, D.D.
*Bishop of Montreal*, Rt. Rev. J. C. Farthing, D.D.
*Bishop of Quebec*, Rt. Rev. L. W. Williams, D.D.

*Province of Ontario.*

*Metropolitan and Archbishop of Algoma*, Most Rev. G. Thorneloe, D.D., D.C.L.
*Bishop of Ontario*,

PRESBYTERIAN CHURCH IN CANADA.

*Moderator*, The Very Rev. John Neil, D.D., *Toronto, Ont.*

METHODIST CHURCH OF CANADA.

*General Superintendents of the Methodist Church in Canada*, Rev. S. D. Chown, D.D., *Toronto.*

## III. THE PROVINCES.

### ONTARIO AND QUEBEC (OLD CANADA).

*History.*

Canada was discovered by Sebastian Cabot in 1497. In 1525, the French took possession of the country in the name of the King of France, and ten years later Cartier explored the St. Lawrence, so naming that splendid river from having entered it on St. Lawrence's day.

In 1608 Quebec, the first settlement, was founded. During their early days and for a considerable time after, the French settlers were few in number, suffered great hardships, and were much engaged in conflicts with the Indian tribes, the aboriginal inhabitants. The principal incentives to their colonisation were the profits of the fur trade and missionary zeal.

Digitized by Google

In 1759 Quebec succumbed to the British forces under General Wolfe; and in 1763 the whole territory of Canada was ceded to Great Britain by the Treaty of Paris. It may be mentioned that for three years, from 1629 to 1632, Quebec had been in English possession, having been captured by David Kirk, but was retroceded to France by the peace of *St. Germain-en-laye.*

From 1763 to 1774 Canada was governed by military authority, until in the latter year a nominee council was established by Act of the Parliament of Great Britain. By the same Act the Roman Catholics were given the free exercise of their religion; the Catholic clergy were declared entitled to receive their accustomed dues and rights, but with respect only to those professing the Catholic religion; and in civil cases it was declared that resort should be had to the Laws of Canada for the decision of the same.

In 1791 an Act of Parliament was passed (31 Geo. III., cap. 31), authorising the Crown to issue a proclamation dividing Canada into two Provinces, Upper Canada (now Ontario) and Lower Canada (now Quebec), and establishing a constitution for each. As the form of government was similar in each Province, a description of that of the Lower Province will suffice. By the Act in question the Legislative authority was vested in a Legislative Council appointed by the Crown, and in a House of Assembly elected by the inhabitants; the Lower Province was under a Governor, whilst the Upper was under a Lieutenant-Governor. Both the Houses of Assembly thus created, and especially that of Lower Canada, were in constant conflict with the Executive Government from the end of the American War in 1814, until the Canadian Rebellion of 1837-8. The risings in both Provinces were caused by Governor after Governor attempting to rule by the aid of Executive Councils not possessing the confidence of the Provincial Assemblies. The rebels were suppressed with very little difficulty. Afterwards the constitution of Lower Canada was suspended, and Lord Durham was sent out from England as Governor-General, with special powers and instructions to report on the affairs of the country. He recommended a Union of the Provinces, and indeed foreshadowed the larger confederation, which has since been adopted. In accordance with Lord Durham's recommendation, the two Provinces were re-united by Act 3 & 4 Vic., cap. 35, and the Legislative Bodies of the united Provinces were consolidated: the new Legislative Council was to consist of not less than 20 members (it used in fact to exceed double that number); the members were appointed for life. Subsequently, by 17 & 18 Vict. c. 118, the Canadian Legislature was empowered to alter the Constitution of the Legislative Council. This power was utilised in 1856 by an Act of Canada which made half of the Legislative Council elective for terms of eight years. This modification was an important one, for it was because of the dissatisfaction caused by the behaviour of the elected Councillors that, on the creation of the Dominion of Canada in 1867, the new Senate was made appointive. The new House of Assembly, created in 1840, consisted of 84 members, there being an equal number from each Province. Municipal Institutions were established in Canada in 1841.

*Constitution.*

The constitution of Canada in operation under this union was defined in its main features under title I. of the Local Consolidated Stat., 1859. Canada was divided into 125 electoral districts and boroughs, returning in all 130 members to the House of Assembly, 65 for Upper Canada, and 65 for Lower Canada; whilst the Legislative Council consisted of 48 elected members, and 22 members nominated under the old constitution.

In 1854 the question of the "Clergy Reserves" was settled by the application of the property to municipal purposes, vested interests being respected. In the same year seignioral tenure was abolished in Lower Canada.

As years passed, increasing difficulty was experienced in the conduct of public affairs owing to the antagonism of the members for Upper and Lower Canada. Things having come almost to a "deadlock" about 1864, an escape from the difficulty was sought in a project for the union of all the British North American provinces, which, after negotiation, was agreed to, and embodied in the "British North America Act, 1867."

There is an elected Legislative Assembly in each Province (Ontario, 111 members; Quebec, 81 members), elected for four years by manhood suffrage, with no property qualification. Members in Ontario are paid mileage and $15 per day for 30 days, or a maximum of $1,400. Quebec also possesses a Legislative Council or Upper House of 24 members, who hold their seats for life, nominated by the Lieut.-Governor in Council. The members are paid $1,500 as sessional indemnity.

*Industry.*

The industrial wealth of Ontario is derived, primarily, from its farms, its forests, mines and fisheries; secondarily, from its manufactures. In 1915, the value of the farm land, buildings, implements and live stock of the province was $1,497,053,277. There are over 14,620,739 acres of cleared farm land. The farms average 115 acres in extent, of which 81% are owned by the occupants. The average value of farm products per acre is greater than in any other province, and the total annual production is placed at $211,000,000. Dairying and the breeding and feeding of live stock are combined with general farming. The value of the cheese factory output is about $18,864,386 annually. The total dairy output is valued at $40,000,000, the live stock output at $93,762,223.

All the fruits usually grown in the temperate zone may be produced in Ontario, not only successfully, but in a very high degree of excellence. Apples constitute the principal crop, but tender fruits such as peaches, pears, plums and grapes, are very extensively grown in the Niagara peninsula. The canning and preserving of fruits and vegetables is a well established industry. From 700,000 to 1,000,000 barrels of apples are exported annually, chiefly to Great Britain.

The value of the output of the mines and mineral industries of Ontario in 1916 was $65,303,822, as compared with $54,245,679 in 1915. The quantity of gold produced in 1916 was 497,833 ounces, valued at $10,339.259, an increase over 1915 of 86,245 ounces, or $1,837,868. The aggregate value of gold produced in Ontario to December 31st, 1916, was $33,663,648. Since the discovery of silver at Cobalt, in 1903 to 1916 shipments from the camp and outlying silver areas, were 255,322,279 ounces, valued at $135,829,548. In 1916 the quantity of silver produced was 19,915,090 ounces worth $12,643,175, as compared with 24,746,534 ounces, worth

Digitized by Google

$12,135,816 in 1915. The quantity of nickel produced in Ontario in 1916 was 41,299 tons, valued at $20,649,279, as compared with 34,039 tons, valued at $17,019,500 in 1915.

Quebec enjoys a widely distributed, though little advertised, prosperity. Oats, hay, and potatoes are the chief crops. The best known mineral product is asbestos, of which recently the supply was about 90 per cent. of the world's. The industrial development has been rapid, especially in paper and tobacco products.

*Education.*

In Ontario the central control is vested in the Minister of Education, who is a member of the Provincial Cabinet. General regulations are framed by him with the approval of the Government for both the elementary (public and separate) and continuation and high schools (including collegiate institutes) of which there are 6,892, with 573,178 scholars in 1915. Both kinds of schools are under the control of local boards of trustees, are required to have only certificated teachers, and are efficiently inspected. There is a provincial (non-denominational) university (Toronto), with an affiliated university college, and four theological colleges are also affiliated. There are also two non-denominational and two denominational colleges with university powers in the Province, and numerous high schools or colleges for boys and girls. Ample provision is made for the instruction of the deaf and the blind. There is also a well-equipped agricultural college, now affiliated with the provincial university. Schools are attached to the reformatories for juvenile criminals of both sexes. Primary education is free and compulsory. Public libraries, day and evening industrial, technical, and art schools receive Government grants.

In Quebec the Superintendent of Public Instruction, assisted by a council of 44 members, is invested with the central control of education. The council is divided into committees for the management of Roman Catholic and Protestant schools respectively. The local control is vested in local elective boards. The schools are maintained partly by local taxation and fees, and partly by grants from the Provincial Government. There were, in 1915, 7,040 schools, with 448,087 scholars, including the high and superior schools, and fourteen normal schools supported by the State. There are also schools of agriculture, commercial and classical schools, and three universities—two Protestant, McGill College, Montreal, and Bishop's College, Lennoxville, and one, Laval University, Roman Catholic.

*Climate.*

The climate is dry, bracing, and very healthy, although the range of temperature is great. The mean temperature at Toronto is 45°, at Montreal 42°; the extreme range being from 12° below zero to 91°. The average annual rainfall at Toronto is 26 inches; at Montreal 27 inches, principally from May to September. The snowfall between December and March is considerable.

## PROVINCE OF ONTARIO.

*Lieutenant-Governors since* 1897.

ONTARIO.

1897 Hon. Sir Oliver Mowat, G.C.M.G.
1903 Sir William Mortimer Clark, K.C.
1908 Hon. Sir John Morison Gibson, K.C.M.G., K.C., LL.D.
1914 Sir John Strathearn Hendrie, K.C.M.G., C.V.O.

SEAT OF GOVERNMENT, TORONTO.

The Province is represented by 24 Members in the Senate and 86 Members in the House of Commons of Canada.

*Provincial Revenue and Expenditure.*

| | Total Revenue. | Dominion Subsidy. † | Expenditure. |
|---|---|---|---|
| 1914 | $11,121,382 | $2,396,379 | $11,819,311 |
| 1915 | $12,975,732 | $2,396,379 | $12,704,362 |
| 1916 | $13,841,339 | $2,396,379 | $12,706,332 |

*Lieutenant-Governor*, His Honour Sir John Strathearn Hendrie, K.C.M.G., C.V.O., $10,000.
*Official Secretary*, Lt.-Col. Alex. Fraser.

EXECUTIVE COUNCIL.

*Premier and President of the Council*, Hon. Sir William Howard Hearst, K.C.M.G., $9,000.
*Attorney-General*, Hon. Isaac Benson Lucas, $6,000.
*Minister of Education*, Hon. Robert Allan Pyne, M.D., $6,000.
*Minister of Public Works*, Hon. Finlay George Macdiarmid, $6,000.
*Secretary*, Hon. W. D. McPherson, $6,000.
*Treasurer*, Hon. T. W. McGarry, $6,000.
*Minister of Agriculture*, Hon. Sir W. H. Hearst, K.C.M.G. (Premier).
*Minister of Lands, Forests and Mines*, Hon. G. Howard Ferguson, $6,000.
*Ministers without portfolio*, Hon. R. F. Preston, Hon. W. J. Hanna.
*Clerk, Executive Council*, J. Lonsdale Capréol, K.C., $3,100.
*Assistant Clerk*, Matthew Curry, $2,300.

LEGISLATIVE ASSEMBLY (111 MEMBERS).

*Speaker*, Hon. D. Jamieson, M.D., $2,500.
*Clerk*, A. H. Sydere, $2,800.
*Librarian*, A. Pardoe, $2,900.
*Sergeant-at-Arms*, F. J. Glackmeyer, I.S.O., $2,000.
*King's Printer*, T. A. Wilgress, $1,300.
*Law Clerk*, A. M. Dymond, $4,000.
*Clerk of the Crown in Chancery*, A. H. Sydere.
*Provincial Archivist*, Alexander Fraser, $2,000.

## NOVA SCOTIA.

### *Situation, Area, and Population.*

Nova Scotia is a peninsula between 43° 46′ N. lat., and 61° 67′ W. long., connected with New Brunswick by an isthmus about 14 miles wide; its length is about 300 miles, and its breadth about 100 at its widest, with much variation. The island of Cape Breton, separated by the Gut of Canso, forms part of the Province. It contains an area of 20,907 square miles, about one-fifth part of which consists of lakes, rivers, and inlets of the sea. The population at the last census was 492,338.

### *History.*

Nova Scotia was discovered by John Cabot in 1497; it was colonised by the French in 1598; was taken by the English, and a grant of it made to Sir W. Alexander, by James I. in 1621. In 1632 it was restored to France, with Quebec, by the Treaty of *St. Germain-en-laye*, but again ceded to England at the Peace of Utrecht in 1714. After the Peace of Aix-la-Chapelle, in 1748, a settlement of disbanded troops was formed there by Lord Halifax, and the city which now bears his name is the capital of that province. Cape Breton was not finally taken from the French until 1758. From 1784 to 1819 it formed a separate colony.

### *Description.*

Halifax is the capital; population at the last census 46,619. Its harbour is open at all seasons, and is not surpassed by any in the world, affording safe anchorage for at least 1,000 ships. A dry dock is also situate at Halifax capable of accommodating the largest ships.

There are many other fine harbours which are able to afford shelter to the largest vessels. There is no point in the province distant over thirty miles from a good seaport.

Some of the other chief towns are: Annapolis, Antigonish, Dartmouth, Digby, Glace Bay, Kentville, New Glasgow, Truro, Yarmouth, Pictou, Windsor, Sydney, Amherst, Lunenburg, and Liverpool.

Extensive iron and steel works are established at Sydney and New Glasgow, and these centres are developing very rapidly.

Minerals of almost all kinds abound. The production of the principal minerals, that are at present mined, for the year ended 30th September, 1916, is as follows:—

| | | | |
|---|---|---|---|
| Coal raised | ... | ... | 6,500,000 long tons |
| Gypsum | ... | ... | 279,500 tons. |
| Limestone | ... | ... | 514,574 ,, |

There are large deposits of copper and other minerals which have not, as yet, been commercially mined.

The greater portion of the inhabitants are engaged in agriculture and the growth of fruit, for which the province is well adapted. Apples of different varieties and of very superior quality are extensively grown and exported to England and other parts of Europe. A crop of 1,000,000 barrels is regarded as an average.

A large quantity of wood pulp is manufactured and exported, principally to England; the conditions prevailing are well suited for this industry, which is rapidly growing.

The fisheries of the province are very valuable. The value of the catch of fish in 1916 was $8,150,000. There are many establishments for canning and preserving lobsters and drying and preserving other fish.

The timber trade is carried on to a considerable extent. England is the chief customer, but shipments are also made to other parts of Europe. Spruce and pine are the principal kinds of timber manufactured and exported.

There are a number of shipyards for the building of wooden vessels, and the establishment of a plant for the construction of steel ships is proposed, and will probably be proceeded with in the near future; large bonuses are offered to encourage the establishment of such plant.

The climate is remarkably healthy and more temperate than that of any other part of the Dominion. The mean temperature at Halifax is 65°, the extreme range being from 11° below zero to 88°.

### *Constitution.*

Nova Scotia is represented in the Dominion Parliament by 12 Members in the Senate and 18 Members in the House of Commons.

The local government is administered by a Lieut.-Governor, advised by an Executive Council of nine members (three of whom are departmental heads), responsible to the Legislature, which consists of a Legislative Council of 21 members appointed by the Governor for life, and a House of Assembly of 43 representatives elected every five years. The Members are paid $700 sessional indemnity.

### *Education.*

The present system of elementary education was established by law in 1865. The central control is vested in the Council of Public Instruction—a body identical in membership with the Executive Council of the Province. The local management of schools is vested, so far as the ordinary school sections or districts are concerned, in a Board of Trustees chosen by the ratepayers

Digitized by Google

of the section or district. But in incorporated towns, the powers of trustees are exercised by a Board of Commissioners partly appointed by the Town Council and partly by the Government.

In 1916 there were 2,837 schools in operation, with a gross attendance of 109,189. Education is compulsory in towns, *i.e.*, non-attendance exposes to pecuniary penalties between the ages of 7 and 12.

Under "The Technical Education Act," of 1907, local technical schools have been established in all the larger industrial centres in order to produce a class of educated, skilled workmen for the various manufacturing industries. A central institution called the "Nova Scotia Technical College" has been established at Halifax, where instruction of a college grade is provided in mining, civil, mechanical, and electrical engineering. The principal of this college is the Director of Technical Education.

*Provincial Finances.*

## NEW BRUNSWICK.

### *Situation, Area, and Population.*

New Brunswick is situated between 44° 40′ and 48° 5′ N. lat., and 63° 30′ and 69° W. long.; its area is 27,177 square miles, or about 17,393,410 acres. It is connected with Nova Scotia by a low isthmus. The population in 1911, was 351,889.

### *History.*

New Brunswick was part of the ancient French Province of Acadia and was ceded to England by the Treaty of Utrecht in 1713. Great Britain, however, did not obtain full possession of the country until after the fall of Quebec in 1759. It was first colonised by British subjects from New England in 1762, and in 1783, at the close of the Revolutionary War, it received a large body of Loyalists from the Thirteen Colonies. In 1784 it was separated from Nova Scotia, of which it had formed a part.

### *Climate.*

The mean temperature of St. John is 41°, the extreme range being from 19° below zero to 85°. The average annual rainfall is 40 inches, and the snowfall 75 inches, the latter extending from November to April inclusive.

### *Industries.*

Coal is abundant. Recent valuable discoveries of oil have been made; copper and gypsum exist in large quantities. There are also several salt springs, and antimony, iron, and manganese have been found in considerable quantities. There are also vast deposits of rich bituminous shale, which is likely to have a good commercial value. A great portion of the country is covered by dense forests of fine timber, the cutting and working of which —or "lumbering"—furnishes remunerative employment to many. Wheat, Indian corn, barley, buckwheat, and oats, are the principal cereals raised. Apples and plums of excellent quality are largely grown, also strawberries, raspberries, and other small fruits. The fisheries are extensive, both sea and river. Some of the finest salmon fishing in the world is to be had in this province. Fredericton, 65 miles inland, is the capital (pop. about 9,000), but St. John, on the mouth of the river of the same name, is the leading commercial centre (pop. 42,511). Other towns are Moncton (11,345), Chatham (4,666), Woodstock (3,856), and St. Stephen (2,836).

### *Constitution.*

New Brunswick is represented in the Canadian Senate by 10 Members, and sends 13 Members to the House of Commons.

There is a Legislative Assembly of 48 Members, elected under a liberal franchise. An Act was passed in 1891 abolishing the Legislative Council from the end of the then present Parliament, and the Council came to an end with the dissolution of 1892.

Members receive $500 per session, and their travelling expenses.

### *Education.*

A system of elementary education was established by Act, 1871. The central control is vested in a Board of Education, and the local management is in the hands of Boards of School Trustees. Education is free between the ages of 6 and 20. There were in 1916, 1,996 schools and 73,007 scholars, exclusive of normal and model schools, which had an enrollment of 540.

There is a university at Fredericton, also at Sackville and Memramcook.

*Local Judge in Admiralty of the Exchequer Court*, Hon. John D. Hagen, $1,000.

*Judge of the Court of Marriage and Divorce*, Hon. O. S. Crocket, $500.

*County Court Judges*, John R. Armstrong, $3,500; William Wilson, John L. Carleton, Henry F. McLatchy, W. B. Jonah, and Robert A. Borden, $3,000 each.

*Registrar of the Supreme Court*, T. C. Allen, K.C., D.C.L., $3,300.

*Representative of Province of New Brunswick at London*, F. W. Sumner.

---

## MANITOBA.

*Area and Situation.*

Manitoba became a Province of the Canadian Federation by legislative enactments taking effect on the 15th July, 1870. It is bounded on the north by the 60th parallel of latitude; on the west by the Eastern boundary of the Province of Saskatchewan; on the south by the United States; on the east by the western boundary of the Province of Ontario to Hudson's Bay, and by Hudson's Bay for a distance of 300 miles.

The area of Manitoba is 251,832 square miles, of which 232,000 square miles are land and about 20,000 square miles are water.

*Description.*

The agricultural capabilities of the province of Manitoba are very great. The soil is a rich, black loam, the surface deposit showing a very high content of nitrogen, phosphoric acid and potash. It is, therefore, peculiarly adapted to the growth of cereal grains, and owing largely to the presence of the element nitrogen in large quantities, wheat possessing a high percentage of gluten is produced.

Manitoba No. 1 Hard, because of its superior milling qualities is in great demand by English millers, and has made the province famous. Winnipeg is now the leading grain market on the Continent.

The principal agricultural exports of the country are wheat, oats, beef, cattle and dairy products. In 1916 the production was as follows:—

| Product. | Area in Acres. | Average yield Bushels. | Total yield Bushels. |
|---|---|---|---|
| Wheat | 2,994,529 | 10·16 | 30,439,600 |
| Oats | 2,062,411 | 32·8 | 67,729,922 |
| Barley | 1,153,660 | 20·9 | 24,116,141 |
| Flax | 55,608 | 10·5 | 587,635 |
| Peas | 3,112 | 14·5 | 45,231 |
| Rye | 20,190 | 1.7 | 36,163 |
| Potatoes | 62,581 | 145·1 | 9,080,602 |
| Other field roots | 18,561 | 207·3 | 3,849,132 |

Live Stock in Province, 1915.

| Horses. | Cattle. | Sheep. | Pigs. |
|---|---|---|---|
| 419,006 | 669,082 | 146,776 | 375,597 |

The average yield of wheat per acre for ten years is 19·6 bushels per acre, and it is estimated that the province is capable of sustaining 30,000,000 of people. Free grant lands are still available in several districts into which new railways are being projected. Good farms within easy reach of a railway may be purchased at from $10 to $25 per acre.

The growth of Winnipeg, the principal city, is remarkable. In 1870 it contained about 215 inhabitants, and in 1881 it had a population of about 10,000; in 1896, 35,000; and now it is about

Digitized by Google

250,000. The other chief towns of the province are Brandon, Portage la Prairie, Neepawa, Emerson, Carman, Selkirk, Carberry, Minnedosa, Morden, Manitou, Deloraine, Dauphin, Souris, Virden, St. Boniface, Morris, Swan River, Gimli and The Pas.

Coal of the light variety is to be found in the Souris Valley. Several brick manufacturing plants have been established throughout the province, and the manufacturing of cement for building purposes has proved to be successful. A sand suitable for glass is found in great quantities, and the industry is being developed.

Manufacturing industries are becoming numerous in Winnipeg, the annual output has grown from $8,616,248 in 1901 to $54,504,000 in 1916. There are now 400 factories, employing over 22,257 workers, with a capital invested of $73,200,000, and manufacturing is growing also in other centres of the Province.

The Winnipeg Power Plant on the Winnipeg River, 77 miles from the City of Winnipeg, now develops about 40,000 h.p. and is capable of developing 100,000 h.p., is owned and operated by the City. The cost of energy is from 1/2 to 3 cents. per K.W. hour.

*Railway Facilities.*

In the year 1879 there was no railway in the whole of the country between Lake Superior and the Rocky Mountains. At the close of 1916 there were in the province of Manitoba 4,544 miles of railways in operation. These railways afford easy access to market from all parts of the Province.

*Climate.*

The mean temperature at Winnipeg is only 33°, the extreme range being from 40° below zero to 95°, but the climate is bracing and healthy. The average annual snowfall (November to March), 53 inches.

*Constitution.*

Manitoba is represented by 4 members in the Dominion Senate and 15 members in the House of Commons.

The Province has a Legislative Assembly of 48 members elected by adult suffrage, for 5 years. The Legislative Council or Upper Chamber was abolished by a local Act passed in 1876. The members of the Legislative Assembly are paid $1,500 per session, and their travelling expenses

*Education.*

By the "Public Schools Act" of 1890, a system of national schools was established throughout the Province. This Act provides "that all public schools shall be free schools, and that every person in rural municipalities between the ages of 5 and 21 years, and in cities, towns and villages between the ages of 6 and 21 years shall have the right to attend some school."

In 1916 there were 1,534 schools in operation, employing 2,946 teachers. Normal schools are provided for the training of teachers.

There is one University, styled "The University of Manitoba," with examining and degree-conferring powers only. The affiliated colleges are St. John's (Episcopal), St. Boniface (Roman Catholic), Manitoba (Presbyterian), Wesley (Wesleyan), and the Manitoba Medical.

Manitoba also has an Agricultural College with 197 students in 1916, reduced from 800 in 1914, on account of the War.

*Finances.*

| | Total Revenue. | Dominion Subsidy. | Expenditure. |
|---|---|---|---|
| 1916. | $5,950,119·23 | $1,406,204·06 | $6,157,381·21 |

## BRITISH COLUMBIA.

### *Situation and Area.*

British Columbia is the western province of the Dominion of Canada, situated on the north-west coast of North America, and comprising the territory bounded on the north by the 60th parallel, on the east by the 120th meridian to the 54th parallel, and the Rocky Mountains to the 49th parallel, on the south by the United States, and on the west by the Pacific Ocean.

The length of the coast line in a direct line north and south, is 541 miles, but the total length, following the sinuosities of the coast, is 4,334 miles, exclusive of islands. The coastline of Vancouver Island is 1,884 miles, and the length 288 miles. The area (including Vancouver Island and Queen Charlotte Island) is about 383,000 square miles. The distinguishing physical features of British Columbia are the great mountain ranges which intersect the country in parallel lines, the general direction being north and south; the extensive plateaux of the central interior; the rich valleys which produce in abundance all kinds of agricultural produce; the vast forests of commercial timber; and the deeply indented seaboard. The population, at the census of 1891, was 98,173, 1901, 190,000, 1911, 392,480; 1917 (estimated) 420,000.

### *History.*

British Columbia was constituted a Crown colony in 1858, in consequence of the large immigration on the discovery of gold in the Thompson and Fraser Rivers. Vancouver Island was granted to the Hudson's Bay Company under certain conditions in 1849, and the same year it was made a Crown colony. In 1866 the colonies of British Columbia and Vancouver Island were united under the former name, and on July 20th, 1871, British Columbia entered the Dominion of Canada as a Province. The Province is represented by six members in the Senate, and thirteen members in the House of Commons of Canada.

### *Constitution.*

The Provincial Government is administered by a Lieutenant-Governor and an Executive Council, or Cabinet, of eight Ministers, members of the legislative assembly of 47 members, on the British system of ministerial responsibility. The House of Assembly is elected for five years, every male and female adult (British subjects) having resided six months in the Province and duly registered, being entitled to a vote. In 1917 by the Provincial Elections Amendment Act, the franchise was extended to women. Members of the Legislature receive a sessional indemnity of $1,600, and a mileage allowance for travelling expenses.

### *Crown Land and Surveys.*

The area of the Province of British Columbia is 238,489,600 acres. Of this area about 12,000,000 acres are crown granted, 4,000,000 granted to Railway Companies, 21,000,000 acres controlled by the Dominion Government, and about 2,000,000 acres in process of alienation, leaving about 200,000,000 acres available for disposition under the various Land Acts. About 10,000,000 acres are held under timber licences or leases, 650,000 acres under grazing or coal leases, and 1,900,000 acres under parks and game reserves. A total of 16,400,000 acres of land have been surveyed, 6,300,000 acres of which are surveys of timber areas, and 408,000 acres of mineral claims. Approximately 2,000,000 acres of surveyed lands are available for free preemption. Geographic and land maps can be obtained on application to the Department of Lands.

### *Agriculture.*

Agriculture in British Columbia has progressed steadily during the past four years. Mixed farming, stockraising, dairying, fruit-growing, poultry raising, and truck-gardening are the principal sources of agricultural production in the Province.

*Value of Agricultural Products.*

| 1914. | 1915. | 1916. |
|---|---|---|
| 30,184,100 | 31,127,801 | 32,182,915 |

Arable land in British Columbia is estimated to be about 22,600,000 acres, or 10 per cent. of the total area, of which the area at present under cultivation is only 1·3 per cent., and 12 per cent. of the total area occupied as farm land. The total number of farms is estimated to be 15,000.

In 1916 the imports of agricultural produce were valued at $17,199,662, and exports of domestic produce at $3,783,649.

Of production in 1916, live stock and meats, poultry and dairy products comprised over 50 per cent. of the total value, or a total of $15,685,171. The total value of fruit was $2,176,662; vegetables $3,374,517; fodders $5,741,979; and grains $3,293,220.

### *Mining Industry.*

The total mineral production of British Columbia to the end of the year 1916 amounts in value to $580,560,715, towards which sum gold has contributed $165,970,887; coal and coke

Digitized by Google

$165,829,315; copper $114,559,364; and silver $41,358,012.

A great advance is being made in metalliferous mining—particularly copper mining—the output of this metal alone in 1916 amounted in value to $17,784,494, as compared with $9,835,500 in 1915, this increase being due to the opening up of new properties chiefly in the coast district. The total output of the mines of the Province in 1916 was $42,290,462, an increase over the preceding year of almost 44 per cent.

The minerals of the Province chiefly consist of gold, copper, silver, lead, zinc, and coal. Approximately 230,000 square miles of country still remain to be explored for minerals.

*Value of Mineral Production.*

| 1914. | 1915. | 1916. |
|---|---|---|
| $26,338,825 | $29,447,508 | $42,290,462 |

Detailed reports are obtainable from the Bureau of Mines, Victoria.

*Forest Wealth.*

The stand of merchantable timber in the Province of British Columbia is estimated to reach the enormous total of four billion (400,000,000,000) feet board measure, which is over half the total of all Canada. The annual cut is at present in the neighbourhood of one and one-half billion (1,500,000,000) feet board measure.

British Columbia occupies an especially advantageous position for supplying the overseas markets. It has vast quantities of timber unsurpassed in size, quality and suitability for the manufacture of all kinds of dimension timber, lumber, piling, railway ties, pulp, paper and other products. The principal export timber trees of British Columbia are Douglas Fir, Western Red Cedar, Western Hemlock, and Sitka Spruce or Silver Spruce. The production and value of production from British Columbia forests for the past four years is as follows:—

*Production.*

Feet, Board Measure.

| 1914. | 1915. | 1916. | 1917. |
|---|---|---|---|
| 1,151,903,000 | 1,017,683,000 | 1,280,253,000 | 1,305,625,000 (ten months). |

*Value.*

| | | | |
|---|---|---|---|
| $28,680,000 | $29,150,000 | $35,526,000 | —— |

*Water Resources*

All the water in rivers and streams of the Province is in the right of the Crown and may be appropriated for various purposes under the rules and regulations of the Water Act. Of these purposes the most important is Power and Irrigation. In respect of the first mentioned, there is probably no area on the continent of America so favoured in water power resources. Large power sites are strategically situated so that in time many districts may be served with electrical energy by transmission lines of economic length. It is of interest to note that contiguous to Vancouver, the largest centre of population, within a radius of one hundred miles, there is available well over 750,000 horse power, of which over 150,000 is developed, while upwards of 30,000 horse power is developed on the Kootenay River near Nelson, and is supplying smelters at Trail and Grand Forks. The Trail smelter is one of the largest in America, and one of the few not producing gold, silver, copper, zinc and lead. In regard to irrigation, such is largely practiced south of the 51st parallel of latitude. Water has been recorded for upwards of 600,000 acres of lands, of which approximately 100,000 have been brought under cultivation. Our fruit areas depend largely, if not wholly, upon irrigation. The largest and one of the most important of these is the Okanagan Valley, which now has a well-established fruit and vegetable industry. Through co-operation in production and marketing, those areas dependent upon irrigation are becoming very attractive.

*Fisheries.*

The commercial fisheries of British Columbia are of considerable importance. Salmon, halibut, and herring are the principal food fishes, and cod, colachans, pilchard, clams, oysters, shrimps, etc., are also produced in large quantities. The whale fisheries are also a not unimportant branch of the fishing industry.

*Value of Fisheries Products.*

| 1914. | 1915. | 1916. |
|---|---|---|
| $13,891,398 | $11,515,086 | $14,538,320 |

*Manufactures.*

The values of manufactures in British Columbia have never been reduced to exact figures, but estimates based on official figures for the past three years give the following returns:—

| 1914. | 1915. | 1916. |
|---|---|---|
| $50,000,000 | $60,000,000 | $55,000,000 |

Owing to a certain activity in the shipbuilding trade, the returns for 1917 will probably show an increase. This industry has received a great impetus on account of war demands. Both wooden and steel ships are now being constructed in the Province. The demand for tonnage will doubtless continue for years to come, and it is believed the shipbuilding industry will give an impetus to development of the iron deposits of British Columbia, resulting in the manufacture of local steel for use in the shipyards.

*Railways.*

British Columbia has 3,419 miles of railway in operation, and 439 miles of railway under construction, to October, 1916. The Canadian Pacific Railway, the Grand Trunk Pacific Railway, the Canadian Northern Railway, and the Pacific Great Eastern Railway, are the main railways of the Province, with various branches of the Canadian Pacific Railway extending through the southern and south-western portions of the Province, and additional lines entering the Province from the United States.

Digitized by Google

*Education.*

A complete system of free education was established by Act No. 16 of 1872. The central control is vested in the Council of Public Instruction, composed of members of the Executive Council. The Minister of Education directs the general management of the schools through the Superintendent of Education. In each rural school district three trustees are elected to attend to the local affairs of the school, and in municipal school districts seven, five or three (according to grade, whether cities of the first, second or third class, or district municipalities) trustees are elected for this purpose.

There are at present 39 high schools in the Province, employing 152 teachers. The number of public schools in operation is 769, under 1,832 teachers. The total enrolment of high and public schools is 64,570. The schools are free and non-sectarian. The highest morality must be inculcated, but no religious dogma or creed is permitted to be taught. Schools are established wherever there are 10 children between the ages of 6 and 16 years available for school purposes.

*Lieutenant-Governors since* 1900.

1900 Sir Henri Joly de Lothbinière, K.C.M.G., K.C., LL.D., D.C.L.

## PRINCE EDWARD ISLAND.

*Situation and Area.*

This island, which was admitted into union with the Dominion of Canada on the 1st July, 1873, is situated almost wholly between 46° and 47° N. lat., and between 62° and 64½° W. long. Its area is 1,356,120 acres, or 2,133 square miles; it is about 130 miles long, and 34 its greatest breadth. It was discovered by Sebastian Cabot, 1497; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, but, on the petition of its inhabitants, was constituted a separate Colony in 1769.

The population at the last census (1911) was 93,728.

*Description.*

The climate is milder than in the neighbouring provinces, and is considered very healthy. The island is generally well wooded and watered, and the soil is fertile.

Besides the usual domestic industries of an agricultural people, there are numerous factories, tanneries, foundries, grain mills, and establishments for canning and preserving lobsters, fish, etc. Many cheese and butter factories have lately been established. The breeding and raising of silver and black foxes in captivity is an important industry, there being about 363 fox ranches in the province.

The waters adjoining comprise by far the most valuable section of the fishing grounds of America, and are very largely resorted to.

The chief towns are Charlottetown (12,080) and Summerside (3,000). A line of railway traverses the island, belonging to, and worked by, the Dominion Government. It is 210 miles in length, including branches. A railway is constructed through Belfast and Murray Harbour (about 50 miles), and one of the longest bridges in Canada is erected across the Hillsboro' River, over which trains and carriages run. New branch railways are built to Montague and Vernon River Bridge.

*Constitution.*

Responsible Government was established in Prince Edward Island in 1851. There is a Lieutenant-Governor, appointed by the Governor-General, an Executive Council (the Cabinet) of 9 members, and a Legislative Assembly of 30 elected members.

Each member receives a payment of $200 per annum.

The island is divided into three counties, King's, Queen's, and Prince, each of which elects ten representatives to the Assembly. The island is also represented in the Dominion Parliament by four members in the Senate and four in the House of Commons.

*Education.*

A system of general education is established by law. The central control is vested in a Board of Education, consisting of the Executive Council and Chief Supt. of Education and Principal of P. of W. College. The local management is in the hands of a chief superintendent. Education is free, non-sectarian, and compulsory between the ages of 8 and 13 years. There were in 1915 477 schools, with 18,402 scholars. There is one higher college amalgamated with the normal school. In addition to the above there is also a Roman Catholic College not under the control of the Government. There are also two private

Digitized by Google

Kindergartens. A new consolidated school has been opened at Hillsboro' through the beneficence of Sir William McDonald, of Montreal, a native of the island. Others have been opened at Tryon, Mt. Stewart and Wilmot by the people themselves.

*Finance.*

The province has a large sum to its credit at Ottawa, from which it draws interest. There is a provincial tax on Land and Incomes, and a Succession Duty. There is also a Road Tax in the country, and municipal rates in the towns.

*Sheriff of King's County*, Robert Curran.

## PROVINCES OF SASKATCHEWAN AND ALBERTA.

By a Canadian Act, 38 Vict., cap. 49, the territories formerly known as "Rupert's Land" and the North-Western Territory, were, with the exception of such portions thereof as form the Province of Manitoba and the district of Keewatin, called and known as the North-West Territories, and were created into a Government entirely separate and distinct from Manitoba. The Act was put into force by Proclamation of 7th October, 1876. The Territories were governed by a Lieutenant-Governor, aided by an Executive Council.

By chapters 3 and 27 of the Acts of 1905, the two provinces of Alberta and Saskatchewan were formed out of the southern portion of the Territories, and were admitted into the Dominion as such on the 1st September, 1905. The dividing line runs North and South being meridian 110 West of Greenwich.

Saskatchewan, called after the river of the same name, meaning "rapid current," has an area of 250,650 sq. miles, and an estimated population in 1914 of 625,000 persons, an increase of 533,000

Digitized by Google

since the census of 1901. It lies between 102°–110° West and 49°–60° North, with Manitoba on the East and Alberta on the West. The Government consists of a Lieut.-Governor, an Executive Council and a representative Assembly of 54 members. The Province is represented in the Dominion Parliament by 10 members in the House of Commons, to be increased after redistribution to 16, and 4 in the Senate. The seat of Government is at Regina (named in honour of Queen Victoria).

The remarks regarding the agricultural capabilities of Manitoba apply to Saskatchewan. The crop area for 1917 was: Wheat, 8,273,253 acres; oats, 4,521,642; barley, 669,927; flax, 753,700. Free grants of lands can still be had, and there are millions of acres awaiting settlement and cultivation. The agricultural industry of the Province has made phenomenal progress, and marked development is seen in manufacturing spheres.

The following are the financial figures for 1915-16: Revenue, $4,801,063·80; expenditure, $5,258,755·21; less sinking fund, $75,498·96; net expenditure, $5,183,256·25.

A provincial university with faculties in arts, science, divinity, and agriculture is situated at Saskatoon.

The Province is traversed by three lines of railway, of which the Grand Trunk Pacific, recently completed, has opened up a large section of the northerly part of the Province.

*Lieut.-Governor*, His Honour Richard S. Lake.
*Assistant*, Captain Alphonse B. Allard.
*Secretary*, Miss L. Clements.

*Executive Council.*

*Premier, Minister of Education and President of Council*, Hon. W. M. Martin, $6,000.

## PROVINCE OF ALBERTA.

Alberta, as noted above, was erected into a Province by an enactment of the Parliament of Canada, taking effect September 1st, 1905, out of the territory acquired from the Hudson's Bay Company. Previously it formed part of the North-West Territories. The total area of the Province is about 253,000 square miles, including about 2,500 square miles of water. The Government is vested in a Lieut.-Governor, an Executive Council, and a Legislative Assembly composed of fifty-six (56) members elected by the people, for five years. The Executive Council consists of eight Members. The seat of Government is at Edmonton.

The population of Alberta has increased from 73,022, in 1901, to 497,117, in 1916. The census figures are:—

| | | |
|---|---|---|
| 1901 Census | ... ... | 73,022. |
| 1906 ,, | ... ... | 185,412. |
| 1911 ,, | ... ... | 374,663. |
| 1916 ,, | ... ... | 497,117. |

Alberta has very extensive coal fields, and in the Northern portion of the Province a vast and compact area of merchantable timber. The coal mines in 1916 produced 4,648,604 tons of coal.

The total area in crops, 1916, was 3,821,476 acres.

| | Acres. | | Bushels. |
|---|---|---|---|
| Spring Wheat... | 1,549,075 | yielding | 41,163,471 |
| Fall Wheat ... | 18,663 | ,, | 447,475 |
| Oats ... ... | 1,394,927 | ,, | 60,798,239 |
| Barley ... ... | 297,967 | ,, | 8,477,232 |
| Flax ... ... | 43,361 | ,, | 574,702 |
| Speltz ... ... | 2,305 | ,, | 62,107 |
| Rye ... ... | 10,134 | ,, | 212,503 |

Free homesteads are available for thousands of settlers in desirable localities.

Fifty-seven (57) creameries operated in the Province in 1915 with a butter output of 5,450,000 pounds, and thirteen (13) cheese factories with an output of 100,000 pounds.

There are 4,566 miles of railway in operation. The Government of Alberta own, control and operate the telephone system of the Province, the Long Distance lines consisting of 16,931 miles of wire, and the Rural line system of 32,444 miles of wire.

*Lieut.-Governor*, His Honour Robert George Brett, $9,000.
*Private Secretary*, Major R. T. Stafford, $1,200.

*Executive Council.*

*Premier, Minister of Railways and Telephones*, Hon. Chas. Stewart.
*Attorney-General*, Hon. C. W. Cross, $6,000.
*Provincial Treasurer*, Hon. C. R. Mitchell, $6,000.
*Minister of Public Works*, $6,000.
*Minister of Agriculture*, Hon. Duncan Marshall, $6,000.
*Provincial Secretary*, Hon. A. J. McLean, $6,000.
*Minister of Education*, Hon. J. R. Boyle, $6,000.
*Minister of Municipal Affairs*, Hon. W. Gariepy, $6,000.

*Deputy Ministers.*

*Deputy Attorney-General*, A. G. Browning, $3,600.
*Deputy Minister of Public Works*, L. C. Charlesworth, $3,900.
*Deputy Minister of Education*, John Ross, $3,600.
*Deputy Minister of Agriculture*, H. A. Craig, $3,600.
*Deputy Minister of Railways and Telephones*, W. J. Harmer, $4,000.
*Deputy Provincial Treasurer*, W. V. Newson, $3,600.
*Deputy Minister of Municipal Affairs*, J. Perrie, $3,600.
*Deputy Provincial Secretary*, E. Trowbridge, $3,600.
*Clerk of Executive Council*, J. D. Hunt, $4,800.
*Provincial Auditor*, E. W. Burley, $3,600.
*Government Printer*, J. W. Jeffery, $2,400.

*Public Utility Commission.*

*Chairman*, G. H. V. Bulyea, $7,500.
M. F. Black, $6,000.
A. Carpenter, $6,000.
*Secretary*, Jas. Reilly, $2,400.

*District and Supreme Court Clerks*, J. I. Poole (Wetaskiwin), $208·33; F. S. Simpson (Red Deer), $150; H. T. Harding (Stettler), $125; S. A. Wallace (Medicine Hat), $150.

*Deputy Clerks (Supreme and District Courts)*, E. T. Westlake (Taber), $50; John C. Smith (Bassano), $75.

Supreme Court Clerks at each place are Registration Clerks.

---

## NORTH-WEST TERRITORIES AND YUKON.

The North-West Territories now consist of the territories formerly known as Rupert's Land and the North-Western Territory, except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta and the Yukon Territory, together with all British Territories and possessions in North America and all islands adjacent thereto not included within any province, except the colony of Newfoundland and its dependencies. The Territories are governed by a Commissioner appointed by the Governor-General, with a Council of not more than four members, also appointed by the Governor-General, and the Commissioner in Council is empowered to make ordinances for the Territories.

The boundaries of the Yukon Territory were more closely defined by a Proclamation of the 16th August, 1897, amended by C. 41 of 1 Ed. VII. By an Act of the Dominion Parliament, 61-62 Vict., cap. 6, the Yukon Provisional District was declared and constituted a separate Territory, arrangements being made for its local administration by a Commissioner under instructions given by Order in Council or the Minister of the Interior. From 1896 to 1917 the Yukon produced $148,070,285·00 of minerals. The production was at its maximum in the year 1900. There has been a gradual falling off in the output since that time. The value of the gold produced in 1916 was $3,975,208.20. The population is about 6,000.

### The North-West Territories.

*Commissioner*, Frederick White, Esq., C.M.G.

### Yukon Territory (Dawson).

## CEYLON.

### *Situation and Area.*

Ceylon, the ancient Taprobane (Támraparnú, the Island of "dusky leaves"), is an island in the Indian Ocean, off the southern extremity of Hindústán, lying between 5° 55′ and 9° 51′ N. lat. and 79° 41′ and 80° 54′ E. long.; its extreme length from north to south *i.e.*, from Point Palmyra to Dondra Head, is 266 miles; its greatest width 140½ miles, from Colombo on the west coast to Sangemankande on the east. Its area is 25,332 square miles, or about equal to Holland and Belgium.

The Máldive Archipelago, 400 miles west of Ceylon, made up of 17 groups of islets, which are sparsely inhabited by a mixed race of probably Aryan original stock, speaking a dialect akin to Elu, or old Sinhalese, is tributary to Ceylon, to which the Sultan sends an embassy annually. The inhabitants of the Archipelago have for at least six centuries professed the Mohammedan religion. The islands are covered with coco-nut palms and yield millet, fruit, and coco-nut produce. Communication is mainly by native craft with India and Ceylon. The population is estimated at 72,237; the people are traders and seamen. Malé, the largest island, is 7 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

### *Climate.*

The climate for a tropical country is comparatively healthy; the heat in the plains, which is nearly the same throughout the year, being much less oppressive than in Hindústán. Along the coast the annual mean temperature is about 80° Fahr.; at Kandy, 1,665 feet above sea level, it is 76° (average of ten years); at Colombo the annual variation is from 76° to 86°; at Galle 70° to 90°, and at Trincomalee 74° to 91°. In the mountain ranges there is of course a great variety of climate, the thermometer at the hill station, Nuwara Eliya, which is some 6,000 feet above the level of the sea, falling at night as low as 32°. The annual mean rainfall is about 87·83 inches, the rainy season extending from April to June and from September to November, but there is hardly a month without some rain, and the result is the luxuriant vegetation for which the island is famous.

### *History.*

The authentic history of the island begins at the fifth century B.C., when an Aryan invasion from the Valley of the Ganges established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity, exempt from the Hindu persecutions which drove it from India. The island abounds in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1795-6 the British took possession of the Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1801, Ceylon was constituted a separate Colony. In 1815 war was declared against the native Government of the interior; the last Kandyan King was taken prisoner, and the whole island fell under the rule of the British.

### *Constitution.*

In 1798 the first separate British Governor arrived. He governed without a Council, until the appointment of a "King's Council" in 1801. This gave place in 1833 to the two Councils now existing.

By Letters Patent and Instructions issued at the end of 1910, and by an Ordinance passed in the same year in Ceylon, the present constitution was settled.

The Government is administered by a Governor, aided by an Executive Council of seven members, viz., the Colonial Secretary, the Officer Commanding the Troops, the Attorney-General, the Controller of Revenue, the Treasurer, the Government Agent for the Western Province and one other office-holder; and a Legislative Council of 21 members, including the *ex-officio* members of the Executive Council, four other office holders, and six nominated and four elected unofficial members. Of the elected members two represent the Europeans, one elected by the urban residents and one by residents in the country districts and small towns. One member is elected by the educated Ceylonese, other than Burghers or Europeans, and one by the Burgher class. Of the unofficial members nominated by the Governor, two represent the low-country Sinhalese, two the Tamils, one the Kandyans, and one the Mohammedan community.

For purposes of general administration, the Island is divided into nine Provinces, presided over by Government Agents, who with their assistants and subordinate Headmen are the channel of communication between the Government and the people.

### *Population, Area, and Statistics.*

According to the decennial census, taken on the 10th March, 1911, the population was 4,110,367, an increase of 14·9 per cent. on the population enumerated in 1901. The details of the population were as follows (including the military, shipping and estates):—

| | |
|---|---|
| Western Province ... | ...1,108,686 |
| Central ditto ... | ... 672,560 |
| Northern ditto ... | ... 370,016 |
| Southern ditto ... | ... 629,183 |
| Eastern ditto ... | ... 183,996 |
| North-Western Province ... | 434,271 |
| North-Central ditto ... | 86,276 |
| Province of Uva ... | ... 216,858 |
| Province of Sabaragamuwa | 408,521 |
| Total | 4,110,367 |

Among these were 8,524 Europeans, 26,673 Burghers and Eurasians, 2,715,686 Sinhalese, 1,060,167 Tamils, 267,054 Moors, 12,992 Malays, and 19,271 persons of other nationalities. The Buddhists (2,474,393) numbered more than half the population, there were 939,701 Hindús, 410,525 Christians (mostly Roman Catholic), 284,482 Mohammedans, and 1,266 other religionists. The population of the principal towns was as follows:—Colombo, 213,396; Negombo, 13,152; Moratuwa, 27,253; Kalutara, 13,006; Kandy, 30,148; Jaffna, 40,539; Galle, 40,187; Matara, 13,851; Batticaloa, 10,715; Trincomalee, 9,086; Kurunegala, 8,163; Badulla, 6,488.

Digitized by Google

The number of Indian coolies on the tea estates, etc., is about 440,000. They are under no indentures, and are free to quit on giving a month's notice. The total number of plantation labourers, including coolies born and settled in Ceylon, as well as of other races, is estimated at 510,000.

The entire area of the Colony is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,000 feet above the sea level. The most important products are:—

| | Acres. |
|---|---|
| Coconuts ... ... ... | 968,730 |
| Rice ... ... ... | 672,071 |
| Tea ... ... ... | 497,984 |
| Grain (other than Rice) ... | 133,609 |
| Rubber ... ... ... | 221,632 |
| Cinnamon... ... ... | 41,753 |
| Cocoa ... ... ... | 45,183 |
| Tobacco ... ... ... | 13,154 |
| Coffee ... ... ... | 830 |

During 1916, the number of plumbago mines reported to have worked was 2,881. The amount of plumbago exported during the year was 668,216 cwts.

The minimum upset price of Crown land is rs. 15 per acre. 20,221 acres were sold in 1916 at an average price of rs. 54 per acre.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realised by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Stamps, and Railway Receipts. The revenue from the sale of salt for the financial year 1915-16 was rs. 1,745,469·92. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 3 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy, and Galle, by the Provincial Road Committees, by the Local Boards of Health and Improvement which have been established in the towns of Kalutara, Negombo, Minuwangoda, Gampola, Nuwara Eliya, Matale, Nawalapitiya, Hatton Dickoya, Matara, Batticaloa, Trincomalee, Kurunégala, Puttalam, Chilaw, Anuradapura, Badulla, Bandarawela, Ratnapura, Kegalla, Moratuwa, and Jaffna and by Gansabhawas amounted in 1916 to rs. 7,037,145.

The municipal debt on 31st Dec., 1916, was rs. 15,651,067. Of this amount rs. 11,087,720 were borrowed from the Government for the Colombo Drainage Works, and rs. 3,000,000 for Water Works. Rs. 265,928 is the balance of a loan obtained by the municipality of Galle for the construction of waterworks, and rs. 189,417 is the balance due from the municipality of Kandy for waterworks and drainage.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,392,963 lbs.; 1886, 7,849,888 lbs.; 1888, 23,820,471 lbs.; 1890, 45,799,518 lbs.; 1895, 98,581,060 lbs.; 1900, 149,264,602 lbs.; 1905, 170,183,558 lbs.; 1910, 182,070,094 lbs.; 1911, 186,594,055 lbs.; 1913, 191,509,414 lbs.; 1914, 193,583,592 lbs.; 1915, 215,632,727 lbs.; 1916, 203,256,347 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. On the failure of coffee planters preferred to substitute cinchona and tea. Within recent years planters have turned their attention to rubber, the demand for which had increased owing to trade requirements, and while in 1898 750 acres were estimated to be planted with rubber, in 1901 there were 2,500 acres, in 1904 11,000 acres, in 1905 40,000 acres, in 1906 100,000 acres, in 1907, 150,000 acres, in 1908, roughly, 180,000 acres, in 1910 186,634 acres, in 1911 about 215,000 acres, in 1913 about 232,731 acres, and in 1915 about 198,588 acres under this product.

The value of the products of the coconut palm exported in 1916 was rs. 42,167,288. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1916 was rs. 2,825,059 and of cinnamon, rs. 1255,694. Of the total Ceylon produce exported that portion going to the United Kingdom was valued at rs. 130,714,726, that to British possessions valued at rs. 33,476,803, and that to foreign countries at rs. 120,646,447.

The chief imports are rice from India, valued at rs. 61,158,003 in 1916, and textiles and coal from the United Kingdom.

### *Law and Justice.*

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by Colonial ordinances. Kandyan law and Mohammedan law also prevail among Kandyans and Mohammedans respectively. The criminal law has been codified on the model of the Indian Penal Code, and the codification of the law of Criminal and Civil procedure respectively have been completed.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; the Police Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Police Courts, and a civil jurisdiction in all cases. In addition to these there are the Gansabáwas, Village Councils, and Village Tribunals, instituted under the Ordinance No. 24 of 1889, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. Besides settling a considerable amount of litigation, they have provided a valuable machinery for carrying out local improvements. They are empowered to make rules, subject to the approval of the Governor and the Executive Council, relating to their village economy, and it is noticeable that in many instances they have not only voluntarily provided school buildings and undertaken the cost of the current expenses and repairs, but have made elementary education compulsory.

### *Education.*

Satisfactory progress is being made in education. The number of scholars in Government schools at the end of 1916 was 116,712, in schools aided by Government 241,933, and in unaided schools 31,789.

The total expenditure on account of the Education Department was rs. 2,265,964·84. In 1868, the

Digitized by Google

number of scholars was only 6,897, and the expenditure rs. 161,660. The improvement is due to the institution of a Department of Education and the adoption of a system under which the educational wants of the Island are met partly by Government, partly by schools receiving grants in aid from Government. The Government schools are all unsectarian, and no fee is charged for vernacular education; small fees are charged for English teaching.

The only High School entirely supported by Government is the Royal College, but there are numerous and excellent Grant-in-aid High Schools. Two Government scholarships, each of £250 per annum for three years (extended in certain special cases to four years), to be spent at English universities, are awarded annually.

A technical education is provided at the Grant-in-aid Industrial Schools and Orphanages, of which there are 38. A central Technical College was founded in Colombo in 1893; its title has since been changed to "Government Technical Schools."

A Government Training College for Masters' and Mistresses in English Schools and Government Vernacular Schools was opened in 1903.

### *Medical Institutions.*

*Medical College.*—The Ceylon Medical College was founded in 1870 to provide a course of Medical training for the natives of Ceylon. The curriculum is a full five years' course, and since 1887 the Licence of the College has been recognised by the General Medical Council as a registrable Colonial qualification. The courses of instruction and examinations are also recognised by many of the British Examining Boards. The licence has been conferred upon 289 candidates since the College was opened; of recent years about 18 qualify annually.

There is a Junior or Apothecary Department in which students go through a two years' course, and after passing the prescribed examinations are qualified to serve as Apothecaries.

The College has a staff of over 20 lecturers and is managed by a Council incorporated by law, which is also the Medical Registration Authority for the Colony.

There are at present about 270 students.

The Government maintains 80 hospitals, exclusive of 22 infectious hospitals, 17 jail hospitals, and two asylums, one for lunatics of 414 beds, and the other for lepers of 406 beds. There are special institutions for diseases of women, and for the eye, ear and throat. There is a Bacteriological Institute. There are 425 dispensaries, 77 of which are attached to hospitals, the remaining 348 are institutions independent of hospitals. In addition there are 375 private estate dispensaries and 55 estate hospitals which receive free drugs from the Government.

The Ceylon Civil Medical Department consists of one Principal Civil Medical Officer and Inspector-General of Hospitals who is also Principal of the Medical College, one Assistant Principal Civil Medical Officer and Inspector-General of Hospitals, two Itinerating Inspecting Medical Officers, one Accountant, one Director De Soysa Bacteriological Institute, one Medical Superintendent, General Hospital, Colombo, one Medical Superintendent, Lunatic Asylum, one Medical Superintendent, Leper Asylum, one Superintendent, Civil Medical Stores, one Assistant Bacteriologist, nine Provincial Surgeons, 77 officers having British qualifications, 2 with a Calcutta degree, 13 with Madras degrees, 2 medical women with British qualifications, 71 with licences in medicine and surgery granted by the Ceylon Medical College, of whom one is a medical woman, 301 apothecaries, 9 inspectors of vaccination, and 132 vaccinators, including 6 females. There are two institutions where nurses are trained, and the nursing staff consists of 27 European qualified matrons and sisters, 47 European Roman Catholic sisters, 46 matrons and 81 nurses trained locally, and 40 pupils in training.

The cost of working the department amounted in 1915-16 to rs. 3,384,510·79. The expenditure on account of estate medical aid was rs. 1,132,078·72. The receipts, which included cost of maintenance of paying patients, sale of medicines, voluntary collections at dispensaries and medical college fees, etc., amounted to rs. 332,137·78. The export duty levied for the partial upkeep of the Estates Branch of the Department yielded rs. 668,087·78.

### *Currency and Banking.*

The weights and measures in common use are British.

Accounts are kept in rupees, and the money in circulation is Indian and Ceylon rupee currency and sovereigns, gold having been made a legal tender in 1901 at the fixed rate of rs. 15 per sovereign. Ceylon cents take the place of the Indian annas and pice. The notes of the Chartered Mercantile Bank remained in circulation to some extent until 1888, when its charter expired, but since the failure of the Oriental Banking Corporation in 1884, the Government has instituted a note-issue of which the amount in circulation on the 31st July, 1916, was rs. 27,605,000. These notes are legal tender except at the Colombo Issue Office.

The following banks have establishments in the Colony: Mercantile Bank of India, Limited; Chartered Bank of India, Australia, and China; Hong Kong and Shanghai Banking Corporation; Bank of Madras; National Bank of India, Limited. None of these now issue notes in Ceylon.

The Ceylon Savings Bank was established in 1832, and Post Office savings banks were opened in 1885. The deposits in these two banks amounted, on 31st Dec., 1916, to rs. 6,686,761.

### *The Colombo Harbour.*

A body designated the Colombo Port Commission was established on the 1st July, 1913, to administer the affairs of the Port of Colombo. The Commission is responsible for the efficient working of the Port, and has powers of executive action and initiative. It is composed of six official members, six unofficial members, and a secretary. The official members are the Principal Collector of Customs (Chairman), the Principal Civil Medical Officer, the General Manager of the Railway, the Deputy Collector of Customs, the Master Attendant, and the Harbour Engineer. Five of the unofficial members are nominated by the Ceylon Chamber of Commerce, and the sixth (representative of the native interests of the Port) by the Governor.

The Harbour Works consist of three breakwaters. *The South-West*, commenced in 1873, and completed in 1885, at a cost of 705,207*l.*, is 4,212 feet long, and runs from the shore in a direction North by East. It is built of concrete

Digitized by Google

blocks weighing from 18 to 30 tons, set in what is known as the sloping bond system.

*The North-East and North-West* breakwaters were commenced in 1894, and completed in 1906, at a total cost of 500,000*l.* The North-East breakwater is a rubble embankment 1,100 feet long, tipped from a staging.

The North-West breakwater is an island work, 2,657 feet in length, running between the two shore breakwaters, leaving a southern entrance of 800 feet, and a northern entrance of 700 feet. This breakwater is of similar construction to the South-West arm.

These three breakwaters enclose an area of 640 acres, or one square mile.

*The Graving Dock.* In addition to the above-named works a Graving Dock was commenced in 1899, and is now in use. It is 700 feet long, 85 feet wide at the entrance, and has a depth over the sill of 30 feet at low water. Its cost was about 400,000*l.* There is also a guide pier, 800 feet long, to assist vessels entering the dock.

*The Patent Slip* was commenced in 1899, and opened on the 1st January, 1903, the cost being 43,000*l.* It is 800 feet long, the cradle being 220 feet, and is capable of dealing with vessels up to 1,200 tons dead weight.

*The Coaling Depôt* consists of 24 acres of land, reclaimed from the sea, with a frontage of 2,200 feet, from which 18 jetties project into the harbour for the landing, stacking, and shipping of coal.

The total cost of the Reclamation and Jetties amounts to about 163,000*l.*

*The Fishery Harbour* has been constructed to the northward of Colombo harbour for the use of the fishermen as a beaching ground, the whole of the foreshore inside Colombo harbour having been covered up by reclamation work. The fishery harbour consists of a rubble breakwater running out from the shore in a curve for 800 feet, the sheltered part forming a natural beaching ground for fishing canoes. The cost was approximately 12,000*l.*

The total expenditure on the Colombo harbour from 1873, when the first breakwater was commenced, to 30th June, 1913, when the Colombo Port Commission assumed control of the harbour, was rs. 44,790,267·39, or 2,986,018*l.*, taking the value of the rupee at 1*s.* 4*d.*

An extension of the S.W. breakwater, starting from a point 3,150 feet from the shore end, was commenced in December, 1907, and completed in April, 1912. The arm is 1,800 feet long, and runs in a direction almost due north, protecting the present main entrance from the S.W. Monsoon seas. The cost of this additional arm was 380,000*l.*

In the period 1st July, 1913, to 30th September, 1916, a sum of rs. 4,596,536·31 or 306,436*l.*, has been spent on various development and maintenance works by the Harbour Engineer's Department of the Colombo Port Commission, and a sum of rs. 1,789,232·27 or 119,282*l.* by the Public Works Department, making a total of rs. 6,285,768·58 or 425,718*l.*

### *Colombo Water Supply.*

The Colombo Water supply is obtained from Labugama Reservoir which is situated at a distance of 28¾ miles from the City.

The Reservoir was formed by impounding the waters of the Wak-Oya, a tributary of the Kelani Ganga.

The Catchment area which is 2,385 acres in extent, is free from habitation or cultivation.

The Reservoir has a capacity of 1,235 million gallons to the lowest draw off sluice.

The average rainfall for the past 30 years is 160 inches, the maximum being 210·91 and the minimum 127·55 inches.

Filtration works of the Jewel Gravity Type are situated immediately below the Reservoir embankment.

The water is conveyed to the two service Reservoirs situated within the limits of the City by a duplicate 20 inch diameter pipe line and one of 30 inch diameter.

There are some 225 miles of distribution mains and water service is available to all premises in the City.

The average daily consumption is estimated at 6½ million gallons, and the consumption per head per day equals 25 gallons.

### *Railways*

The lines of railway, all of which are owned and worked by the Government, are distributed thus:—Broad Gauge (5ft. 6in.), Colombo to Bandarawela (160¾ miles), Polgahawela to Kankesanturai (212⅛ miles), Peradeniya Junction to Kandy and Matale (21½ miles), Ragama Junction to Mahara Quarry (1¼ miles), Colombo to Matara (98½ miles), Ragama to Chilaw (41¾ miles), Fort Junction to Wharf (1⅛ miles), Madawachi to North and South Pier, Talaimannar (67⅞ miles). Narrow Gauge (2ft. 6in.), Colombo to Yatiyantota (48⅛ miles), Avisawella to Dela (33¾ miles), Nanu Oya to Ragalla (19¼ miles). Total mileage 706 miles. The total cost of construction up to 30th Sept., 1916, charged in account was rs. 130,044,966. The receipts for the 12 months ended 30th Sept., 1916, were rs. 18,965,982, and expenditure rs. 7,944,893.

The following new lines are under construction or about to be constructed, viz.:—

Broad Gauge, Bandarawella to Badulla, 21 miles.
Narrow ,, Dela to Opanaike, 16 miles.

By the completion of the Talaimannar extension the railway systems of India and Ceylon were brought within 20 miles of one another, the intervening distance being covered by steamers of the South Indian Railway Co., which ply between Dhanuskodi (the Indian Port) and Talaimannar (the Ceylon Port). The other extensions are for the better transport of planting produce (tea, rubber, coconuts, etc.).

### *Roads.*

Of metalled and track metalled roads there are 3,281 miles; gravelled and natural roads, 465 and 279 miles respectively; of canals 153·02 miles. The maintenance of 4,026 miles of road cost, in 1916, rs. 2,951,311, or an average rate of rs. 735 per mile. This is exclusive of roads within municipal limits, and of minor roads which are not in the charge of the Department of Public Works. Every male between the ages of 18 and 55 is bound to perform six days' labour in the year on the roads, or to contribute a rupee and-a-half (two rupees in the town of Colombo)

Digitized by Google

by way of commutation. The Road Committees collect the commutation, but the amount derived from this source is inconsiderable as compared with the outlay. Substantial progress has been made in recent years in the restoration of the ancient irrigation tanks, and the construction of new waterworks.

*Telephones.*

The Government telephone system comprises an exchange at Colombo (1,619 subscribers), in trunk communication with exchanges at Kandy (87 subscribers), Nuwara Eliya (78 subscribers), Galle (49 subscribers), and smaller exchanges at Hatton, Gampola, Kalutara, Kelanlya, Kotte, Kurunegala, Nawalapitiya, Negombo, Matale, Peradeniya and Polgahawela; and also purely local exchanges at Anuradhapura, Bandarawela, Diyatalawa, and Matara. There are, in addition, over 63 licensed private systems of various sizes, several of which are connected by means of junction lines and subsidiary trunks with one another and the main trunk lines. The mileage of telephone wire in the Government system is estimated at 1,291 (aerial) and 7,523 (underground).

*Telegraphs.*

Nearly all parts of the island are served by the Government telegraph system, which has 193 offices working. The system comprises 2,001 miles of line and 6,813 miles of wire. Ceylon is in direct telegraphic communication with India by a cable which starts from Talaimannar and crosses the Pamban Channel. It is also connected with Europe by a direct cable from Colombo to Aden and with the Far East and Australia by a direct cable to Penang.

There is a Government wireless telegraph station at Colombo having a normal daylight range of about 400 miles, open to traffic of all kinds.

*Means of Communication.*

1. A fortnightly mail service by P. and O. steamers between the United Kingdom and Ceylon, Straits and China, and Australia. 2. A fortnightly service between Marseilles and Ceylon Straits and China, and a monthly service between Ceylon and Australia by the steamers of the Messageries Maritimes. 3. A fortnightly service between the United Kingdom and Australia, calling at Colombo, by steamers of the Orient Line. The passage to Brindisi or Marseilles generally occupies from 14 to 16 days, and to Bombay, Madras, Calcutta, Penang, Singapore, and China 4, 2, 5, 4, 5, and 14 days respectively. There is also a monthly mail service between Ceylon and Mauritius, carried on by the British India Steam Navigation Company. There is a daily service by rail between Ceylon and India.

Letters, etc., from England reach Colombo in about 16 days (14½ minimum, 17½ maximum).

Further facilities are afforded for communication by the N.Y.K. Line with Aden and the Straits and China, while the Natal Direct Line and the Indian and African Line maintain a service between Ceylon and South African Ports. There is also an irregular service between Ceylon and the Maldive Islands by buggalows

NOTE.—The above are normal services which are considerably restricted and varied by War conditions.

*Rates of Postage.*

To the United Kingdom, and British Colonies and Protectorates which have adopted the Imperial Penny Postage.

*Assistant Lecturer*, L. J. Gratiaen, B.A. (Lond.), Rs. 2,400.
*Art Master and Instructor in Manual Training*, F. H. Bergen, 300*l.* to 400*l.*
*Mistress of Method*, Miss Lilian Daly, 250*l.* to 350*l.*

*Department of Agriculture.*

*Director of Agriculture*, F. A. Stockdale, 1,000*l.*
*Botanist and Mycologist*, T. Petch, B.A., B.Sc., 600*l.* to 750*l.*
*Superintendent of Experiments*, 600*l.* to 750*l.* (vacant).
*Entomologist* (vacant), 400*l.* to 600*l.*
*Superintendent of Botanic Gardens*, 400*l.* to 600*l.*, H. F. Macmillan, F.L.S., F.R.H.S.
*Superintendent of Low-country Products and School Gardens*, Rs. 7,500, C. Drieberg, B.A., F.H.A.S.
*Assistant Botanist and Mycologist*, 300*l.* to 500*l.* G. Bryce, B.Sc.
*Manager, Peradeniya Experiment Station*, 300*l.* to 400*l.* (vacant).
*Manager, Dry Zone Experiment Station*, 300*l.* to 400*l.*, G. Harbord.
*Curator, Royal Botanic Gardens, Peradeniya*, 252*l.* to 360*l.*, T. H. Parsons.
*Curator, Hakgala*, 240*l.* to 300*l.*, J. J Nock.

*Colombo Museum.*

*Director of the Colombo Museum and Marine Biologist*, J. Pearson, D.Sc.*, 650*l.*; G. A. Joseph (acting).
*Librarian of the Colombo Museum*, G. A. Joseph, 300*l.* to 400*l.*

*Forest Department.*

*Conservator of Forests*, H. F. Tomalin, M.I.C.E., F.G.S., 1,200*l.*
*Deputy Conservators of Forests* (2), 750*l.* to 900*l.* (vacant).
*Deputy Conservator of Forests*, A. J. Kilmartin, Diploma of Forestry, Oxford, 600*l.* to 700*l.*
*Deputy Conservator of Forests*, J. D. Sargent, B.A. (Oxon.) Diploma of Forestry, Oxford, 600*l.* to 700*l.*
*Assistant Conservators*, G. D. Templer, 500*l.*; F. J. S. Turner, 500*l.*; J. C. C. Middleton (temporarily appointed *Assistant Superintendent in Police Department*), 450*l.*; A. B. Lushington, 425*l.*; W. W. Fyers, 400*l.*; R. M. White, B.A. (Oxon.) Diploma of Forestry, Oxford, 475*l.*; J. R. Ainslie,* Diploma of Forestry, Oxford, 350*l.*; O. Jones,* B.A. (Oxon.) Diploma of Forestry, Oxford, 450*l.*; A. B. Fontyn, Rs. 3,500; *5 Foresters*, Rs. 1,800 to Rs. 2,280 (1 vacant); *4 Foresters*, Rs. 1,260 to Rs. 1,740; *1 Forest Ranger*, Rs. 750 to Rs. 1,500; *19 Forest Rangers*, Rs. 600 to Rs. 1,200 (4 vacant); *24 Forest Rangers*, Rs. 300 to Rs. 540; *5 Supernumeraries*; *9 Probationers* (5 vacant).

*Medical Department.*

*Principal Civil Medical Officer and Inspector-General of Hospitals*, G. J. Rutherford, 1,250*l.* to 1,400*l.*
*Assistant Principal Civil Medical Officer and Inspector-General of Hospitals*, E. Langley Hunt, C.M.G., 750*l.* to 900*l.*

* On War Service.

*Itinerating Inspecting Officers*, 600*l.* to 800*l.*, J. Lunn (one vacancy).
*Accountant*, W. C. H. Tripp, 400*l.* to 500*l.*; after ten years, 550*l.* to 700*l.*
*Director Bacteriological Institute*, L. Nicholls, 600*l.* to 800*l.*
*Assistant Bacteriologist* E. Burgess, 400*l.* to 500*l.*
*Superintendent Civil Medical Stores*, A. D. Cotton, 240*l.* to 400*l.*
*Provincial Surgeons* (Rs. 7,200 to Rs. 9,600) :—
G. S. van Rooyen.
C. B. Lourensz.
W. Margenout.
A. de Saram.
L. Brohier.
A. Kalenberg.
H. Bawa.
W. T. Ohlmus.
C. de Vos.
*Medical Superintendent, Lunatic Asylum*, L. D. Parsons, 600*l.* to 800*l.*
*Medical Superintendent, Leper Asylum*, R. Pestonjee, Rs. 7,200 to Rs. 9,600.
*Medical Superintendent, General Hospital*, G. Thornton, 600*l.* to 800*l.*
*Medical Officer, King Edward VII. Anti-Tuberculosis Institute*, C. I. de Silva, Rs. 6,000.
*1st Grade Medical Officers* (Rs. 3,600 to Rs. 5,400*l.*) :—
M. Sinnetamby, F. Vethecan, F. Grenier, A. Raja Singham, F. Foenander, J. C. Cooke, A. Rode, R. G. Jayetikeke, L. A. E. de Zilwa, V. Vanlangenburg, W. C. Pieris, E. P. Aserappa, S. C. Paul, G. W. van Twest, R. F. La Brooy, C. S. Rutnam, F. R. Alles, E. N. Jan, L. A. Ekanayake, A. Nell, A. E. Spaar, E. Garvin Mack, H. S. Rasiah, Miss C. E. Anderson, C. J. Tillikaratne, L. A. Prins, H. Ludovici, A. L. Pereira, C. E. van Rooyen, D. Schokman, H. M. Peiris, Miss A. de Boer, C. F. Nugara, F. Keyt, E. W. Scharenguivel, H. J. de Saram, H. U. Leembruggen, K. Eapen, S. Subramaniam, S. P. Joseph.
60 *Medical Officers 2nd Grade*, Rs. 2,040 to Rs. 3,000.
63 *Medical Officers 3rd Grade*, Rs. 1,500 to Rs. 1,800.

*Ceylon Medical College.*

*Principal*, G. J. Rutherford, M.R.C.S., L.R.C.P.
*Registrar*, P. James Kelly, M.B., 600*l.* to 800*l.*
*Lecturer on Physics*, W. N. Rae, B.A., 400*l.* to 500*l.*
*Professor of Chemistry*, A. F. Joseph, B.Sc., A.R.C.Sc., 400*l.* to 500*l.*
*Lecturer on Anatomy*, E. C. Alles, F.R.C.S., Rs. 3,600 to Rs. 4,500.

*Government Analyst's Department.*

*Government Analyst*, K. C. Browning, 600*l.* to 800*l.*
*Assistant Analyst*, C. T. Symons, 600*l.*

*Veterinary Department.*

*Veterinary Surgeon*, G. W. Sturgess, Rs. 7,875.

*Mines.*

*Inspector of Mines*, T. G. Hunter, 650*l.*

*Factories.*

*Inspector of Factories*, Noel Woodhouse, 200*l.* to 350*l.*

*Police.*

*Inspector-General of Police*, H. L. Dowbiggin, 1,050*l.* to 1,200*l.*
*Deputy Inspector-General*, 750*l.* to 900*l.*, J. H. Daniel.
*Senior Superintendent*, 750*l.* to 900*l.* (vacant).
*Superintendents* (550*l.* to 700*l.* and 450*l.* to 500*l.*), H. Thornhill, T. P. Attygalle, A. G. Gottelier, D. V. Altendorff, W. Ludovici, R. J. Tyler, P. N. Banks.*
*Assistant Superintendents* (350*l.* to 425*l.*), R. G. B. Spicer, E. F. L. Wright, A. I. Sheringham, H. N. Wood, W. C. C. King, J. D. Aitken, H. A. Collette, O. G. Piggford, G. Manwaring, J. E. Bennett, F. W. Morris, J. Ludovici (acting), A. Peries (acting), A. Jackson (acting).
*Probationers*, commencing at 225*l.* per annum, B. Langran, G. H. Bromley, G. H. Ferguson, G. S. Baker.

Temporarily seconded or appointed for service in the Police Department.

*Assistant Superintendents*, J. C. C. Middleton, W. K. S. Hughes, G. A. Gore-Davids, Captain T. G. Salmon, H. Lloyd-Jones, C. T. Nettleton, S. H. Titley, A. R. Aitken, C. E. Wedd.

*Prisons.*

*Inspector-General of Prisons and Superintendent of the Colombo Convict Establishment*, Major A. W. de Wilton, 1,200*l.*
*1st Assistant Superintendent of Prisons*, Major W. H. Robinson, 500*l.*
*2nd Ditto*, W. Phillips, 450*l.*
*3rd Ditto*, A. F. G. Walker, 350*l.* to 400*l.*
*4th Ditto*, F. O. Woodford,* 350*l.* to 400*l.*
*Acting Assistant Superintendent*, J. P. D. Parsons, 250*l.* (temporary).

*Government Stores Department.*

*Colonial Storekeeper*, J. Gibb, 400*l.* to 500*l.*
*Assistant Storekeeper and Accountant* (vacant).

*Railway Department.*

(*Offices, Colombo.*)

*General Manager*, G. P. Greene, 1,400*l.*
*Office Assistant*, J. M. Orkney, 500*l.* to 600*l.*

*Chief Ordnance Officer*, Major R. L. D. Whitfield.
*Command Paymaster*, Lt.-Colonel C. S. Harris.
*Senior Medical Officer*, Major P. W. Mathew.

## CYPRUS.

*Situation and Topography.*

The Island of Cyprus is situated in the eastern-most basin of the Mediterranean Sea, with Asia Minor to the north and Syria to the east, at distances of 60 and 41 miles respectively. It lies between 34° 33′ and 35° 41′ N. latitude, and between 32° 20′ and 34° 35′ E. longitude. The port of Larnaca on the southern coast is 258 miles from Port Saïd, and 1,117 miles from Valletta in Malta.

Its area is 3,584 square miles, equal to Kent, Sussex, and Middlesex combined. It is the third largest island in the Mediterranean, being only exceeded in size by Sicily and Sardinia. Its greatest length from west-south-west to east-north-east, between Cape Drepano and Cape St. Andrea, is about 140 miles, and its greatest breadth from north to south is about 60 miles.

The main topographical features of the island are the northern and southern mountain chains, and the great plain of the Mesaoria extending between them across the island from the Bay of Morphou to that of Famagusta. The northern range, called the Carpas Mountains, and, towards their western extremity, the Kyrenia Mountains, forms a continuous chain near the northern shore from Cape St. Andrea to Cape Kormakiti, a distance of about 100 miles. The southern range, which is the more extensive and lofty of the two, occupies the western and south-western portions of the island, and trending thence eastwards along the south coast, terminates in the isolated peak called Santa Croce (or Stavrovouni), about 12 miles west of Larnaca. The highest summit of this range is Mount Troödos, 6,406 feet above the sea level, and on its south-eastern slopes are the summer quarters of the garrison, of the High Commissioner, and some of the principal officials.

The rivers of Cyprus are nearly all mountain torrents, dry in summer. None are navigable. The principal are the Pedias and the Idalia.

*History and Archæology.*

The history of Cyprus is too long and eventful to be related here except in the briefest outline. Excavations have shewn that in the second millennium B.C. the island must have been an important centre of Aegean civilization, having intercourse both with Assyria and with Egypt, and at a very early date important Greek and Phœnician colonies were established in it. In the 6th century B.C. it passed under the rule of Egypt, but in 525 B.C. it joined Cambyses in his war against the Egyptians and so was absorbed in the Persian Empire. The whole island, with the exception of the Phœnician town of Amathos, took part in the Ionic revolt in 502 B.C., but the Persians recovered possession in about a year and at the battle of Salamis the fleet of Xerxes included 150 Cypriote ships. At the end of the 5th century the famous Evagoras of Salamis established his supremacy over the whole island and raised it for a brief period to a position of practical independence, but after his death it again came under the control of Persia. After the battle of the Issus, Cyprus hastened to join Alexander the Great and sent 120 ships to assist him in the siege of Tyre. At the division of Alexander's Empire, the possession of Cyprus was disputed by Syria and Egypt, but it eventually passed to the latter. In 58 B.C. it became a Roman province and was for a time joined to

Digitized by Google

Cilicia, during which period it was administered by Cicero. Presented by Antonius to Cleopatra, it reverted to Rome on her death, and remained a Roman province until the division of the Empire, when it was assigned to the Byzantine Emperor. Its proximity to Syria exposed it to the assaults of the Saracens, and it changed hands more than once between the 7th and 10th centuries A.D. It was finally recovered for Byzantum by Nicephorus Phocas in 965, and remained attached to the Eastern Empire until 1184. In that year its Governor, Isaac Comnenus, revolted and declared himself Emperor of Cyprus. Isaac maintained his independence until 1191, when Cyprus was conquered by Richard I. of England, in revenge for the ill-treatment of the crews of some English ships which had been wrecked on the island. Richard sold the island first to the Order of the Temple and later, when the Templars' found the task of government beyond their powers, to Guy de Lusignan, King of Jerusalem. Cyprus was ruled by the Lusignan dynasty from 1192 until 1489, but during that period the Genoese Republic exercised a suzerainty over part of the kingdom, from 1373 until 1464, by holding possession of the principal port of Famagusta. From 1489 until 1571 Cyprus belonged to the Republic of Venice. In the latter year the Turks conquered the island, and retained possession of it until its cession to England, in 1878, for administrative purposes. On the outbreak of war with Turkey in 1914 the island was annexed to the British Crown by Order in Council of the 5th of November, 1914.

*Historical Monuments of the Country.*

(1) *Prehistoric and Classic Sites.* — The numerous sites of Bronze Age and Hellenic communities have nearly all been ransacked and completely rifled by the various excavators of the latter half of the nineteenth century, beginning with Cesnola and Lang. Probably very little now remains to be exploited in the future. The museums of Constantinople, New York, Italy, and elsewhere are full of objects from Cyprus. The areas turned over by the searchers for ancient graves and temple sites have now reverted once more to agricultural use. The site of the Temple of Venus, near Paphos, and the site of the Roman provincial town of Salamis, near Famagusta, have, however, been scheduled as "ancient monuments" under the "Antiquities Law, 1905."

(2) *Byzantine and Mediæval Architecture.*— Numerous ancient churches survive from the Dark Ages, before the Latin occupation of the island, but these are all either in ruins or have been very much rebuilt. They are to be found chiefly on the northern range of hills and in the Carpas. Their history is, of course, unknown, but several of them are of an interesting Byzantine character. The ruins of the mediæval churches of Famagusta and Nicosia, and of the castles of the Lusignans, have been exhaustively described by Camille Enlart, in "L'Art Gothique en Chypre," published by the French Ministry of Public Instruction, 1899. Several of these very interesting monuments have been enclosed by the Government of Cyprus. Only one important building of the Venetian occupation survives, in a ruined condition. This is the Palace of the Proveditore in Famagusta. A few traces of domestic architecture, of what appears to have been an imposing character, may still be detected amongst the ruins of the mud houses, but these traces are becoming rarer every year, as the towns and villages are subjected to the continual rebuildings of the squalid Levantine style.

(3) The Turkish occupation is not represented by any architectural monument, but the great fortresses of Famagusta, Kyrenia, and the curious circular earthwork (the first and perhaps most imposing of its kind) constructed round Nicosia by Giulio Savorgnano in 1567, were very probably restored, and perhaps completed in their present style by the Turks.

*Museums.*

A museum to contain the large quantity of fragments found on temple sites and in cemeteries during the last thirty years has been built in Nicosia, and has lately been greatly enlarged. A large collection of mediæval fragments found in Famagusta has been gathered together, and now reposes in one of the old churches devoted to the purpose.

*Climate.*

The mean temperature, as recorded in the screen at Nicosia, for the last ten years is 65·74° Fahr.; mean maximum, 77·49°; mean minimum, 53·98°. Highest shade temperature during that time 110·°; lowest 28°. Average rainfall for last ten years, 21·05 inches. The year 1916-17 had a rainfall of 17·21 inches. Figures for rainfall refer to the whole Island. The rainy and cool season is from October to March. The climate is varied, hot and dry in the plains in summer, and damp on the sea-shore; the climate on the hills inland is bracing and healthy. In winter the temperature rarely falls below freezing point. Malarial fevers are prevalent during the hot months, and, if the winter is mild, they occur throughout the year. Sanitary improvements and plantations of trees have, however, had a beneficial effect.

*Population.*

The population of the several districts, excluding the military, at the census taken in 1881, 1891, and 1901, was :—

| | 1901. | 1891. | 1881. |
|---|---|---|---|
| Nicosia ... ... | 71,289 | 61,695 | 56,300 |
| Famagusta ... | 48,508 | 41,423 | 38,207 |
| Larnaca... ... | 26,073 | 23,760 | 20,766 |
| Limassol ... | 39,139 | 35,730 | 28,717 |
| Paphos ... ... | 35,205 | 31,674 | 28,424 |
| Kyrenia ... | 16,808 | 15,004 | 13,216 |
| Total ... | 237,022 | 209,286 | 185,630 |

Population, Census 1911 :—

| | |
|---|---|
| Nicosia ... ... ... | 81,497 |
| Famagusta ... ... ... | 58,530 |
| Larnaca ... ... ... | 29,737 |
| Limassol ... ... ... | 46,084 |
| Paphos ... ... ... | 38,508 |
| Kyrenia ... ... ... | 19,752 |
| Total ... ... | 274,108 |

The Moslems, who are all Ottoman Turks, form about 25·9 per cent. of the population, the rest being nearly all Christians of the Independent Cypriote Church.

The Cypriote Church is a branch of and in communion with the Orthodox Eastern Church, but is "autocephalous" (*i.e.*, The Archbishop of Cyprus is not subordinate to any Patriarch). This position of independence it has retained undisputed since

Digitized by Google

the 5th century when the Emperor Zeno finally decided against the claims of the Patriarch of Antioch to exercise authority over it.

Christianity was originally introduced into the island by St. Paul and St. Barnabas, the latter of whom, a Cypriote Jew by birth, was martyred at Salamis.

*Towns.*

The chief towns are Nicosia, the capital, 16,052 (15,752 in 1901) inhabitants; Larnaca, 9,262 (7,965 in 1901); Limassol, 10,302 (8,298 in 1901). The two latter are open roadsteads. At Famagusta, on the east, it has often been proposed to construct a great commercial and naval harbour. The inner harbour is dredged over an area of 900 feet by 600 feet, to 24 feet at low water (ordinary spring tides), with a channel of approach 250 feet wide and 26 feet deep. The curtain wall, south of Othello's Tower, has been pierced with three arches, giving access from the town to the new quay. The quay is faced with a concrete wall 900 feet long in 24 feet of water. Further accommodation for sailing vessels and local craft has been provided in a basin 450 feet long, 200 feet wide, and 15 feet deep at low water. At present the town is little more than a collection of ruins encircled by fortifications, and it has 1,233 (871 in 1901) inhabitants, nearly all Moslems, but it is now being rebuilt and opened out. Varosia, a suburb of Famagusta, has a population of 3,599 (2,599 in 1901), nearly all Christians. The four towns already mentioned are the capitals of four of the six administrative provinces into which the island is divided—the other two capitals being Ktema, 3,091 inhabitants (2,845 in 1901), the modern capital of Paphos, on the south-west, and Kyrenia, 1,726 inhabitants (1,336 in 1901), where a small harbour has been constructed, in the district of the same name on the north coast, which has some trade with the opposite coast of Karamania. A harbour for small coasting vessels exists at Paphos, the site of the ancient capital of that district. This had become silted up and almost useless, but it has recently been dredged sufficiently to enable small sailing vessels to enter and lie in safety.

*Industry.*

Cyprus was in ancient times famous for its copper mines, and an American syndicate is now making trial borings on a considerable scale in the Evrychou Valley. Gypsum is exported in a raw state from the Carpas, mostly to Egypt, and manufactured—*i.e.*, in the form of plaster-of-paris—from the Carpas, Larnaca and Limassol, where machinery has been set up for grinding it; from these ports it is mostly sent to Egypt. Asbestos is found on Mount Troödos, and is exploited by the Cyprian Mining Company.

The main industry of the island is agriculture, the products chiefly consisting of cereals, caroubs, wine and spirits, cotton, linseed, aniseed, silk, cheese, wool, fruit, and vegetables; cattle, mules, donkeys, sheep, and poultry are also exported. Agriculture has been greatly retarded by want of water, the rainfall being deficient, and much of what does fall being allowed to run to waste. A scheme for storing water for irrigation was completed in 1901 under the superintendence of an engineer lent by the Government of India, and is under the direction of the Director of Public Works. The caroubs and cereals are exported mainly to the United Kingdom, France, and Egypt.

The improvement of agriculture is fostered by the Government by means of Government Gardens for the raising and distribution of plants and seeds, by village experiments and demonstrations by agricultural instruction to schoolmasters, by travelling agricultural experts, agricultural shows, &c. The planting of almond, olive, carob and other fruit trees is increasing rapidly.

Live stock is raised at the Government farm from imported stock. There is an agricultural department school, and a scheme is at work for sending young Cypriotes to Europe for agricultural training.

Cyprus wine, which has been famous from very early times, is somewhat heady for ordinary use, and its value in commerce has been lessened by the tarry flavour it acquires from the practice of carrying it to port in tarred skins. This practice has for some time been discouraged as much as possible, and the construction of roads through the grape districts enables the wine to be conveyed in barrels. Improved methods of manufacture are being brought into use. Both wine and spirits have, since the extra duty was imposed in France, found a fairly good demand in Egypt and elsewhere in the Levant.

The restoration in recent years of a weekly direct mail service with Egypt has led to an increased production of fruit and vegetables, for which the island is well adapted. It has also given a great impetus to the export of the surplus oxen, sheep, and other animals. For the Uganda railway some 1,300 mules were exported, and stud donkeys have been exported at intervals for the Government of India. Mules and donkeys have also been exported in considerable numbers for the use of the allied troops in Macedonia.

In past years much injury was done to the crops by locusts, but the work of locust destruction was vigorously prosecuted for many years with great success, chiefly on what is known as the "screen and pit" system. Screens topped with American cloth, over which the locusts cannot pass, were stretched across the country in front of the armies of young locusts on the march. The locusts were then gradually forced into pits dug at intervals transversely to the screens, from which, as they are topped with a zinc lining, they could not emerge. This system, as the locusts became more scattered, was discarded in favour of a system of collecting locust eggs and purchasing live locusts. Both the purchase and the spraying systems have been employed in recent years.

The forests of the island, which had been largely destroyed in the past, are recovering under the protection now afforded. Natural re-afforestation is very slow, partly in consequence of the large number of goats, of which Cyprus, in proportion to its area, contains a large number, and partly in consequence of the forest fires that occur through the summer months.

Sponge fishing has been extensively carried on along the coast by boats from the Greek islands. By a law passed in 1890 power was given to the High Commissioner to grant exclusive privileges for fishing the coasts for sponges.

Sea fishing is comparatively neglected, and it is difficult to obtain fish all the year round except at the seaport towns.

The chief imports are cotton and woollen goods, tobacco, groceries, rice, leather, petroleum, timber, sugar, soap, copper and iron; the exports are chiefly cereals, cotton, caroubs, linseed, aniseed,

Digitized by Google

silk, raisins, fruit and vegetables, cheese, sumac, wool, wines and spirits, vinegar, flax, sesame, asbestos, gypsum, and terra umbra.

*Currency and Banking.*

Under an Order in Council, which came into operation on the 1st January, 1901, the following coins are legal tender currency :—Gold, the sovereign. Silver, 18, 9, 4½, 3 piastre pieces, limit of tender 540 piastres (nine equal to one shilling). Bronze, 1 piastre, half piastre, quarter piastre, limit of tender, 27 piastres (40 paras=1 piastre). Currency Notes have been issued from time to time since September, 1914, as a war measure.

The Imperial Ottoman Bank has a branch established at Larnaca, and agencies at Nicosia, Limassol and Famagusta.

The Bank of Athens has a branch established at Limassol and agencies at Nicosia, Larnaca, Famagusta and Paphos.

There is a Bank of Cyprus, with headquarters in Nicosia.

A Government savings bank was opened on 1st January, 1903.

The Turkish weights and measures are in use. The oke=2·8lbs. avoirdupois; and the donum= about ⅓ acre. A law relating to weights and measures was passed in 1890.

*Means of Communication.*

The Government Railway from Famagusta to Nicosia (36 miles) came into use in August, 1905, was extended to Morphou (25 miles), in 1907, and to Evrychou, in the direction of Troödos (15 miles), in 1915.

There is no navigable waterway in the island. Roads between all important places are maintained, and many villages are now connected with them by cart roads. There are motor car services between Nicosia, Larnaca, Limassol, Famagusta, Paphos, and Kyrenia, the chief towns of each district. The Famagusta harbour was completed in June, 1906. An extension of the pier at Larnaca, with a solid sheltering arm at the sea end, giving protection to small boats and lighters in all weathers, was completed in 1909. The ancient harbour at Paphos has recently been dredged to a sufficient depth to admit of its use by the small coasting craft that trade between Egypt, Syria, Asia Minor and Cyprus, and the area available for such craft increased in the Kyrenia Harbour. There are no Government telegraphs, other than those along the railway, but the Eastern Telegraph Company, Limited, maintain a cable from Egypt to Cyprus and land lines connecting the six principal towns of the Island and the Troodos Government Quarters. A weekly Mail Service is maintained between Egypt and Cyprus by subsidized steamers of the Khedivial SS. Co.

The rates of postage are as follows :—

| | Letters. | Newspapers per 2 ozs. |
|---|---|---|
| Within the island | ½ c. p. per ½ oz. | ¼ c. p. |
| To U.K., India, Egypt and British Colonies* . . . | 30 paras per oz. | ½ c. p. |
| To other countries | 2 c. p. per ½ oz. | ½ c. p. |

The Parcels Post is established between Cyprus and the United Kingdom and the principal colonies and foreign countries, as well as within the island.

* *See* end of Introduction.

Money Orders and British Postal Orders are also issued and paid in the island. The C.O.D. system is in force in Cyprus.

*Education.*

A general system of grants in aid of elementary schools was established in 1882.

In accordance with a law passed in 1895, Boards of Education have been established, one to regulate the Moslem schools and another to regulate the Christian schools. There is also in each district a District Committee for Moslem schools, and a District Committee for Greek-Christian schools, presided over in each case by the Commissioner of the District. The Education Law was further consolidated and extended in 1905.

During the school year 1916-1917 there were 479 elementary schools in connection with the Orthodox Church, enrolment 32,369, which received 6,445*l.*, grant in aid, and 212 Moslem elementary schools, enrolment 7,000, which receive grant in aid amounting to 1,650*l.*

An Armenian boys' school and an Armenian girls' school in Nicosia, a school at the Armenian Monastery near Kythrœa, with an infant-school in Nicosia, an Armenian mixed school at Larnaca, and 4 Maronite schools are also aided by Government; enrolment, 124.

The 12 elementary Moslem schools which were maintained entirely by a grant from Constantinople are closed and have not been in operation this year.

4 endowed and 10 other Greek-Christian elementary schools, enrolment 613, and 30 Moslem elementary, etc., enrolment 677. Elementary schools are maintained by local contributions only, without any aid from Government.

The total number of elementary schools of all classes is 699 (*i.e.*, 212 Moslem, 487 Christian), and the total enrolment is 39,576, viz :— 7,000 Moslems and 32,576 Christians.

*Secondary Schools.*

There is a Moslem "Idadi" school in Nicosia which is supported entirely by the Government, as an inheritance from the previous Administration.

A Greek-Christian gymnasium in Nicosia and high schools at Larnaca, Limassol, Famagusta, and Paphos, are managed by elective committees under the Secondary Education Laws, 1905–7, but are supported mainly by entrance fees, without State aid.

The "English School," conducted by English masters on the lines of an English grammar school, prepares boys who are going to England for their education and also for commerce. It has 140 pupils, chiefly sons of Government officials of all nationalities, and is supported by school fees.

*British Occupation.*

On the 4th June, 1878, a Convention was signed at Constantinople between the representatives of Her Britannic Majesty and the Sultan of Turkey, by which England engaged to join the Sultan in defending his Asiatic possessions against Russia in certain contingencies, and the Sultan, "in order to enable England to make necessary provision for executing her engagements," consented "to assign the Island of Cyprus, to be occupied and administered by England." On the 1st of July an Annex to this Convention was signed at Constantinople, in explanation of the conditions of the

Digitized by Google

occupation. The following is the English official version of its provisions :—

"I. That a Mussulman religious Tribunal (Makhémé-i-Shérieh) shall continue to exist in the island, which will take exclusive cognisance of religious matters, and of no others, concerning the Mussulman population of the island.

"II. That a Mussulman resident in the island shall be named by the Board of Pious Foundations in Turkey (Evqaf) to superintend, in conjunction with a Delegate to be appointed by the British Authorities, the administration of the property, funds, and lands belonging to mosques, cemeteries, Mussulman schools, and other religious establishments existing in Cyprus.

"III. That England will pay to the Porte whatever is the present excess of revenue over expenditure in the island; this excess to be calculated upon and determined by the average of the last five years, stated to be 22,936 purses, to be duly verified hereafter, and to the exclusion of the produce of State and Crown lands* let or sold during that period.

"IV. That the Sublime Porte may freely sell and lease lands and other property in Cyprus belonging to the Ottoman Crown and State (Arazi Mirié vé Emlaki Houmayoun), the produce of which does not form part of the revenue of the island referred to in Article III.

"V. That the English Government, through their competent authorities, may purchase compulsorily, at a fair price, land required for public improvements, or for other public purposes, and land which is not cultivated.

"VI. That if Russia restores to Turkey Kars and the other conquests made by her in Armenia during the last war, the Island of Cyprus will be evacuated by England, and the Convention of the 4th of June, 1878, will be at an end."

On the 14th of August, 1878, a supplementary agreement was signed, giving to Her Britannic Majesty for the term of the occupation full powers for making laws and conventions for the government of the island in Her Majesty's name, and for the regulation of its commercial and consular relations and affairs, free from the Porte's control.

The Order in Council of the 5th of November, 1914, annexing the island contains the following provisions :—

"1. From and after the date hereof the said Island shall be annexed to and form part of His Majesty's Dominions and the said Island is annexed accordingly.

"2. Nothing in this Order shall affect the validity of any Instructions issued by His Majesty under the Royal Sign Manual and Signet to the High Commissioner and Commander-in-Chief of Cyprus, or of any Order in Council affecting Cyprus, or of any Law or Proclamation passed or issued under any such Instructions or Order, or of any act or thing done under any such Instructions, Order, Law or Proclamation, save in so far as any provision of any such Order in Council, Law or Proclamation may be repugnant to the provisions of any Act of Parliament which may, by reason of the annexation hereby declared, become extended to Cyprus, or to any Order or Regulation made under the authority of any such Act or having in Cyprus the force and effect of any such Act."

* The exercise of these rights by the Porte was agreed to be abandoned, from the 1st of April, 1879, for a payment of 5,000*l.* a year. (Agreement of the 3rd February, 1879.)

*Government.*

An Order in Council, bearing date 6th July, 1907, is the instrument now regulating the government of the island. The administration is in the hands of an officer styled High Commissioner; there are Legislative and Executive Councils, and the High Commissioner is invested with the powers usually conferred upon a Colonial Governor. The Legislature consists of the High Commissioner, who is usually to preside, six non-elective Members, being office-holders, and twelve elected Members, three to be chosen by the Mahometan and nine by the non-Mahometan inhabitants of the Island. British subjects and foreigners who have resided five years in Cyprus can exercise the franchise, and are eligible for election as well as Ottoman subjects. The qualification for the franchise consists in the payment of any class of the taxes called Verghi. The Council may be dissolved by the High Commissioner whenever he sees fit, and must be dissolved at the end of five years. The island, for legal and administrative purposes, is divided into six districts namely—Nicosia, Larnaca, Limassol, Famagusta, Kyrenia, and Paphos. In each the Government is represented by a Commissioner.

The courts which were in existence at the time of the occupation have been superseded by a new set of courts constituted by an Order in Council, dated the 30th November, 1882 (as amended by amending Orders in Council) which provides for :—

(1) A supreme court of criminal and civil appeal consisting at present of two judges.

(2) Six assize courts, having unlimited criminal jurisdiction, and consisting of one or more judges of the supreme court, sitting with one or more judges of the district courts.

(3) Six district courts, having criminal jurisdiction up to three years' imprisonment, and unlimited civil jurisdiction; and consisting of a President and two ordinary Members, one a Christian and the other a Moslem.

(4) Six Magistrates' courts, consisting of the President of the district court or the two ordinary Members, having summary jurisdiction up to one month's imprisonment and a fine of 5*l.* and in some cases up to six months' imprisonment or a fine of 10*l.* The High Commissioner has power to establish additional Magisterial Courts, constituted of a single judge or two or more judges; and several such courts have been established.

(5) Village courts, of which there are at present ten village judges. The President and the ordinary judges of the district court have also jurisdiction. The Village courts have jurisdiction in various matters up to 2*l.* or 5*l.* and in certain cases up to 10*l.*

(6) Under the Mussulman Religious Tribunals Law, 1883, four Mussulman Religious Courts are established.

The above statements apply to jurisdiction over Cypriots: the jurisdiction over persons who are not Cypriots differs in various ways.

Actions in the courts are divided into "Cypriot" and "Foreign" actions, according to the nationality of the defendant or defendants, and in "Foreign" actions the President of the Court alone generally exercises jurisdiction.

The principal sources of revenue in Cyprus are :—

1. Verghi Kimat, a tax of 4 per 1,000 on the capital value of lands, houses and other immovable property.

Digitized by Google

The above rate of 4 per 1,000 has been modified to the extent of the valuation in any town or village so as to yield, as nearly as may be (provided that any fraction of 10 paras in such rate shall be counted as 10 paras) a sum equivalent to the amount of the assessment prior to the coming into operation of the Valuation Law 13 of 1913, Section 5.

2. Tithes of the following products of the Island:—

Cereals—taken in kind.

Tithe-Dues are taken on exportation of:—carobs, cotton, linseed, aniseed, raisins, wound silk, black seed ("Mavro Koko"), silk cocoons, and manufactured silk, if manufactured by other than hand looms.

[The tithes of all other articles have been abolished, many in 1882, sixteen in 1897, and that on olives and olive oil in 1899.]

3. Sheep, goat, and pig tax.

4. Export duties on wines and spirits, and licences for the retail of intoxicating liquors.

5. An excise on tobacco.

6. Stamps, court fees, royalties, licences, &c., &c.

7. Salt monopoly.

8. Locust tax (for locust destruction).

9. Import duties.

All exemptions formerly enjoyed by foreigners have been abolished.

There is a police force of about 790 men, when at full strength, mostly Moslems, including the rank and file detailed for duty as prison warders.

## EAST AFRICA PROTECTORATE.

*Extent and Boundaries.*

The East Africa Protectorate extends from the Umba to the Juba River, from German East Africa to Abyssinia, and inland as far as the borders of Uganda. It includes certain mainland dominions of the Sultan of Zanzibar—viz., a strip extending 10 miles inland along the coast from the German frontier to Kipini, the islands of the Lamu Archipelago, and an area of 10 miles round the fort of Kismayu, these territories having been leased to Great Britain for an annual rent of 17,000*l.* The original concession was made to a company, subsequently called the Imperial British East Africa Company, but the territory was transferred in 1895 to His Majesty's Government, and the whole Protectorate was placed under the control of a Commissioner and Commander-in-Chief. It was transferred on April 1st, 1905, from the authority of the Foreign Office to that of the Colonial Office. By an Order in Council dated 9th November, 1906, the Protectorate was placed under a Governor and Commander-in-Chief, and the Order in Council of 22nd October, 1906, constituted Executive and Legislative Councils. The frontiers have been defined by agreements with Germany (1890 and 1893) and Italy (1891). All Foreign Consular Jurisdiction was, during the year 1908, transferred to the British Court. The Protectorate consists of seven provinces and a tract of territory, now partly organised, lying to the north-west. The provinces are each under a Provincial Commissioner, and are divided into districts and sub-districts as follows: Seyidie (capital, Mombasa), comprising the districts of Vanga, Mombasa, Malindi and Voi, and the sub-districts of Rabai and Taveta; Ukamba (capital, Nairobi), including the districts of Kitui, Kiambu and Machakos; Tanaland (capital, Lamu), with districts of Lamu and Kipini; Jubaland (capital, Kismayu), consisting of the districts of Kismayu and Gosha; Kenya (capital, Nyeri), with districts of Fort Hall, Nyeri, Meru and Embu, with the sub-district of Chuka; the Naivasha Province (capital, Naivasha); including the districts of Naivasha, Nakuru, Eldama Ravine, Rumuruti, Masai Reserve, Uasin Gishu and Turkana; the Nyanza Province (capital, Kisumu), including the districts of Kisumu, Lumbwa, Nandi and North and South Kavirondo, the Northern Frontier District, with headquarters at Moyale, near the Abyssinian boundary. The provinces of Naivasha and Nyanza were formerly the Eastern Province of Uganda, but were transferred to the East Africa Protectorate on April 1st, 1902.

The Protectorate has an area of about 248,000 square miles. Mombasa is the largest town and principal port; the inhabitants number about 32,000, of whom about 320 are Europeans. It is situated on the Eastern side of an island of the same name, possessing two fine harbours, one at

Digitized by Google

Mombasa itself and the other at Kilindini, on the South-Western side of the island. There is a lighthouse and signal station at the entrance to the Port.

Kilindini is the finest land-locked and sheltered harbour on the East coast of Africa and with an ample water supply and improved harbour facilities, a scheme for which is under consideration, will be the centre of distribution for the trade of Equatorial Africa. The capital of the Protectorate is Nairobi, the headquarters of the Administration and the central station on the Uganda Railway. The inhabitants number 15,274, including 2,020 Europeans. There are also 400 European farmers and some 50,000 natives in the immediate vicinity of Nairobi. Port Florence is the railway station on Lake Victoria.

The two principal rivers in the North are the Tana and Juba, which flow into the Indian Ocean. They are both navigable for about 400 miles by shallow draught steamers.

### *Population.*

The total population is estimated at 2,786,000, including 14,000 Asiatics and 5,485 Europeans. On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes, such as the Masai, the Somalis and the Gallas.

The prevailing religious beliefs are Pagan, but on the coast Mohammedanism has made great progress. There are in the Protectorate many Christian mission stations, representing thirteen different societies—British, French, Italian, Swedish and American, two of them being Roman Catholic. At these stations are schools for elementary instruction and handicrafts.

### *Constitution.*

Legislation is by Ordinances made by the Governor, with the advice and consent of the Legislative Council, the Indian codes being followed as far as applicable. The High Court is situated at Mombasa, and sessions are held at Nairobi, Naivasha, Kisumu and various other places. In all cases to which natives are parties local ideas and customs are considered. The legal status of slavery has been abolished throughout the East Africa Protectorate.

### *Climate.*

The Lowlands, or districts near the coast, are fairly healthy for the tropics. The hot season is from January to April. The Highlands, or central plateaux, have a temperate climate, the mean average temperature at noon is 78° F. July, August and September are usually cold months.

### *Currency and Banks.*

The standard coin is the rupee, with a value of one shilling and fourpence, *i.e.*, 15 = £1.

The silver coins in use are:—

One rupee, equal to 100 cents.
Half ,, ,, ,, 50 ,,
Quarter,, ,, ,, 25 ,,

Nickel: 10 cent and 1 cent bits.

The English sovereign is legal tender for Rs. 15.

There are also Protectorate Currency Notes for 5, 10, 20, 50, 100 and 500 rupees.

*The National Bank of India Ltd.* (Head Office:—26 Bishopsgate Street, London) are bankers to the Government of British East Africa, with branches in the Protectorate at Mombasa, Nairobi, Nakuru, Kisumu, Kampala, Entebbe and Jinja.

*The Standard Bank of South Africa, Ltd.* (Head Office:—10, Clement's Lane, Lombard Street, London) have branches at Mombasa, Nairobi, and Eldoret in the Uasin Gishu Plateau.

### *Products and Trade.*

The agricultural products of the lowlands are cocoa-nuts, rice, maize, and various native grains; cotton, sisal, rubber and tobacco are also cultivated. Experiments with a view to a large extension of cotton growing are being made, and the introduction of other seeds and plants of economic value is being tried. In the highlands potatoes, fruit and vegetables, maize, sim sim and beans grow freely, and are now exported; coffee, wheat and barley are successfully cultivated, and on an increasing scale. On the uplands extensive pasture grounds are available for cattle, sheep and ostriches. The grading of native with imported stock has made great advancement.

The forest products of the coast are rubber, gum-copal and timber. Mangroves grow on the coast, acacia and ebony in the scrub forests further inland. The highland forests contain croton, olive, fig and several good timber trees. Several large areas of fibre-bearing land have been leased near Voi and Kibwezi for the purpose of developing the Sanseviera fibre, which is indigenous. Sisal and rubber are being extensively planted.

The mineral resources of the Protectorate are not yet well ascertained, but iron is known to occur abundantly in most districts; mica diatomite and graphite are found in Ukamba; limestone is worked near Kitui, Makindu and Lake Victoria; opals are common in the Rift Valley; a large deposit of carbonate of soda has been found in the south part of Ukamba; gold mining began, but was discontinued. Recent concessions include prospecting rights and grants of agricultural and grazing land.

In recent years land has been disposed of as follows:—

| Year. | Freehold. acres | Leasehold. acres | Total. acres | Agriculture. acres | Grazing. acres | Fibre. acres | Fuel. acres |
|---|---|---|---|---|---|---|---|
| 1907 | 32,795 | 538,573 | 571,368 | 26,126 | 329,219 | 214,400 | 1,623 |
| 1908 | 15,926 | 432,856 | 448,782 | 7,323 | 374,211 | 66,892 | 356 |
| 1909 | 10,348 | 363,222 | 373,570 | 18,394 | 350,988 | 3,362 | 826 |
| 1910 | 6,216 | 383,382 | 389,598 | 19,852 | 369,746 | — | — |
| 1911 | 4,941 | 603,811 | 608,752 | 7,370 | 601,382 | — | — |
| 1912 | 9,844 | 328,189 | 338,033 | 27,888 | 310,145 | — | — |
| 1913 | 13,256 | 558,903 | 572,159 | 14,052 | 494,276 | 63,831 | — |

The value of the imports (exclusive of railway material, administration stores, and specie) and of the exports, the amount of the customs receipts at the eight ports, and the tonnage entered at Mombasa and Kilindini were (rupee 16*d.*), as follows:—

| Years. | Imports. | Exports. | Customs. | Tonnage entered. |
|---|---|---|---|---|
| 1907-08 | 799,717 | 515,052 | 75,204 | 1,995,940 |
| 1908-09 | 797,158 | 436,313 | 81,655 | 1,838,159 |
| 1909-10 | 775,246 | 590,057 | 63,593 | 1,914,153 |
| 1910-11 | 1,000,346(*a*) | 962,911 | 78,123 | 1,364,740 |
| 1911-12 | 1,330,437 | 1,016,898 | 101,088 | 1,563,659 |
| 1912-13 | 1,808,343 | 1,203,201 | 146,085 | 1,635,640 |
| 1913-14 | 2,147,937 | 1,482,876 | 158,637 | 1,791,081 |
| 1914-15 | 1,469,210 | 1,004,796 | 145,545 | 1,171,702 |
| 1915-16 | 1,708,333 | 1,111,424 | 185,249 | 818,576 |

Figures for 1916-17 are not available. The tonnage handled at Kilindini was (tons):—

| | Imports. | Exports. |
|---|---|---|
| 1915-16 . . . . . | 103,570 | 20,864 |
| 1916-17 . . . . . | 153,589 | 56,689 |

(*a*) Includes £66,382 for Magadi Railway Material.

Foreign imports by sea are liable to duty at the rate of 10 per cent. *ad valorem*, with the exception of spirits and liqueurs which pay at the rate of five rupees per gallon for 50 degrees of the Gay Lussac Alcoholometer. Certain articles imported for industrial agricultural, stock-breeding, railway and some other purposes are free. There are specific export duties.

In 1915-16 the chief imports were cotton piece goods, 451,022*l.*; provisions, 159,848*l.*; grain and flour, 113,202*l.*; spirits, wine, ale and beer, 97,340*l.*; sugar, 95,033*l.*; tobacco, cigars and cigarettes, 90,596*l.*; building materials, 46,028*l.*; machinery and parts thereof, 44,724*l.*; vehicles and parts thereof, 40,981*l.*; oil (petroleum), 35,987*l.*; bags and sacks, 35,597*l.*; soap, 27,813*l.*; cotton manufactures, unenumerated, 25,334*l.*; cutlery and hardware, 20,475*l.*; haberdashery and wearing apparel, 19,716*l.*; tea, 19,510*l.*; iron and steel manufactures, 17,227*l.*; coal, 15,343*l.*; leather and leather manufactures, 15,153*l.*; implements, agricultural, 14,370*l.*; matches, 10,953*l.*; salt, 9,844*l.*; canvas, 9,599*l.*; arms and ammunition, 6,668*l.*; all other articles, 285,964*l.* Total value of trade imports, 1,708,333*l.*

In 1915-16 the chief domestic exports were hides and skins, 104,764*l.*; grain and oil seeds, 37,076*l.*; coffee, 17,297*l.*; copra, 8,433*l.*; rubber, 4,081*l.*; potatoes, 3,478*l.*; carbonate of soda, 1,724*l.*; fibre, 77,050*l.*; wool, 10,061*l.*; borities (rafters), 8,264*l.*; ivory, 7,946*l.*; all other sorts, 49,345*l.* Total value of domestic exports, 329,519*l.*

Of the imports 684,362*l.* were from the United Kingdom; 447,263*l.* from British possessions; 127,976*l.* from Holland; 168,951*l.* from the United States; 30,800*l.* from France; 24,891*l.* from Switzerland; 16,632*l.* from Italy; 207,458*l.* from other countries.

Of the exports 482,674*l.* went to the United Kingdom; 457,328*l.* to British possessions; 114,674*l.* to Italy; 28,902*l.* to France; 27,847*l.* to other foreign countries.

*Communications.*

The vessels of the British India Steam Navigation Company under four weekly mail contract tranship passengers and mails to the P. & O. at Aden; also a cargo steamer from London once a month runs as far as Zanzibar and back to London; the steamers of the Messageries Maritimes call monthly.

From the beginning of 1910 the Union-Castle Mail Steamship Company extended their sailings to Mombasa; these sailings take place every twenty-eight days from and to London *viâ* Marseilles. At the end of the year 1913-14 the Union-Castle Steam Ship Company greatly improved their service to the East Coast of Africa, including Kilindini, *viâ* the Suez Canal by the addition of two very fine steamers of 11,500 tons each, designed and fitted with the utmost regard to the comfort of passengers. The Societa Annonima Nazionale run a four-weekly service between Genoa and Mombasa calling at the principal ports *en route*, including those of Italian Somaliland. Communication between the ports of the Protectorate is maintained by steamers belonging to an Indian firm.

The Clan Ellerman and Harrison line has a four-weekly cargo steamer from Liverpool as far as Beira.

During the war all the above arrangements are subject to variation.

The Uganda (Mombasa-Victoria) Railway is worked as a State Railway of the East Africa Protectorate. Its length is 618 miles, with a gauge of one metre. The construction cost to March 31st, 1917, was 6,497,279*l.* The telegraph is worked by the East Africa Protectorate Postal Department at the principal stations, and at railway stations by the railway staff. Seven steamers on the Lake are also worked in connection with the railway. In 1916-17 (exclusive of railway material) 328,130 tons of goods, and 764,045 passengers were carried.

| | 1915-16. | 1916-17. |
|---|---|---|
| Revenue . . . . . | £634,098 | £ 768,881 |
| Expenditure . . . . | 340,116 | 428,113 |

The railway zone extends one mile on either side.

The Post Office of the Protectorate (inclusive of the Uganda Post Office, which is worked by the Protectorate Post Office) received and despatched 5,731,802 letters, packets, etc., in 1915-16, and 7,621,217 in 1916-17; 398,214 telegrams in 1915-16, and 529,010 in 1916-17 (excluding 103,784 received from military lines in German East Africa).

The telegraph system has 3,097 miles of wire (exclusive of Uganda). The lines connect Mombasa with Lamu (200 miles), with Kisumu (587 miles), and Kilindini (2 miles), Kisumu with Entebbe (281 miles) (75 miles double line in East Africa and rest in Uganda), Londiani with Eldama Ravine (22 miles), Lumbwa with Kericho (17½ miles), Nairobi with Nyeri, West Kenia, Meru and Archers Post (204 miles), Kibigori with Nandi, Eldoret, and Sergoit (64 miles), Mazeras and Rabai (2 miles), Magadi Junction with Machakos (16½ miles), Kismayu, Gobwen, and Yonte (17½ miles), Magadi Railway (90 miles). A cable connects Mombasa with Zanzibar.

The Imperial Finance Act, 1911, empowered the Treasury to advance as much as 250,000*l.* for the purpose of providing improved railway communication and harbours and improved water supply for Mombasa. In 1912 a further sum of 375,000*l.* was provided for loan. In 1915 a further loan of 1,868,000*l.* was authorised for Kilindini harbour works, railway improvements and roads and bridges, out of which 62,840*l.* was received up to 31st March, 1917. There was no grant-in- aid.

The following are the chief sources of Revenue:

| | 1915-16. | 1916-17. |
|---|---|---|
| Customs | 145,398*l.* | 243,770*l.* |
| Port, Harbour, Wharf and Lighthouse Dues | 1,413*l.* | 1,181*l.* |
| Licenses and Taxes | 230,121*l.* | 315,296*l.* |
| Fees of Court or Office, &c. | 26,012*l.* | 38,642*l.* |

*Chief of Customs*, F. W. Major, C.M.G., I.S.O., 600*l.* by 25*l.* to 800*l.* with 60*l.* duty allowance.
*Deputy Chief of Customs*, N. B. Cox, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Collector of Customs*, G. Walsh.
*Customs Assistants*, G. D. Kirsopp, G. F. Chalmers, E. G. Gulliver, P. D. Rochford, 250*l.* by 15*l.* to 400*l.*
*Preventive Officers*, J. Doherty, S. Chivers, E. A. Shelver.
*Inspector of Customs, Watchmen and Boatmen*, S. C. Ward, 200*l.* by 10*l.* to 250*l.*
*Head Godown Keeper*, J. Sutherland, 200*l.* by 10*l.* to 250*l.*

*Port and Marine.*

*Port Officer*, Capt. H. W. Turner, 400*l.*, by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Assistant Port Officer and Pilot*, A. G. Sergeant, 250*l.* by 15*l.* to 400*l.*

*Audit.*

*Auditor*, H. C. E. Barnes, 600*l.* by 25*l.* to 700*l.* and 60*l.* duty allowance.
*Senior Assistant Auditor*, W. E. Knollys, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Assistant Auditors*, J. Twells, H. N. Lee, J. Parnall, A. E. Forrest, 250*l.* by 15*l.* to 400*l.*

*Judicial.*

*Chief Justice*, R. W. Hamilton, 1,000*l.* and 100*l.* duty allowance.
*1st Puisne Judge*, T. D. Maxwell, 800*l.* with 80*l.* duty allowance.
*2nd Puisne Judge*, G. H. Pickering, 700*l.* with 70*l.* duty allowance.
*Magistrates*, J. A. Sheridan, C. M. Barton, E. T. Johnson, S. Hearnedley, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Registrar of the High Court and Principal Registrar of Documents*, W. S. Wright, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Deputy Registrars of the High Court*, J. F. St. A. Fawcett, A. E. Sockett, 250*l.* by 15*l.* to 400*l.*
*Administrator-General*, J. W. H. Parkinson, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.

*Attorney General's Department.*

*Attorney General*, J. W. Barth, 900*l.* with 90*l.* duty allowance.
*Solicitor General*, I. L. O. Gower, 700*l.* with 70*l.* duty allowance.
*Crown Counsel* (vacant).

*Registration of Documents Department.*

*Principal Registrar of Documents*, J. C. Ward, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.

*Recorder of Titles Department.*

*Recorder of Titles*, A. J. Maclean, 500*l.* by 25*l.* to 600*l.* with 50*l.* duty allowance.
*Deputy* (vacant), 450*l.*

*Police.*

*Inspector-General*, Col. W. F. S. Edwards, C.M.G., D.S.O., 600*l.* by 25*l.* to 800*l.*
*Staff Officer to I.G.P.*, M. St. C. Thom.
*Commissioner of Police*, W. K. Notley, 600*l.* by 25*l.* to 700*l.* with 60*l.* duty allowance.
*Assistant Commissioner*, P. F. Browne, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Superintendents*, R. M. Ewart, Capt. R. W. B. Robertson-Eustace, J. P. Moore, Capt. W. Rigby, D.S.O., F. D. Tyssen, J. C. Bentley, C. S. Long-Innes, Capt. G. E. Smith, 400*l.* by 20*l.* to 500*l.*
*Assistant Superintendents*, Capt. G. S. Cary, J. M. Lumley, J. F. Wolseley-Bourne, R. T. H. Anderson, B. A. K. McRoberts, E. S. Higgins, M. St C. Thom, E. R. S. Taylor, R. F. Rainsford, C. F. Bristow, L. E. Skinner, Lt. G. Whittington, F. R. J. Knollys, 250*l.* by 15*l.* to 400*l.*
*Quartermaster*, J. B. Ellard, 300*l.* by 15*l.* to 400*l.* with 30*l.* duty allowance.
*Inspectors*, A. Madden, G. W. Richardson, A. E. Hudson, A. H. Miller, W. H. West, J. MacLean, P. Findlay, E. D. Theunissen, 200*l.* by 10*l.* to 250*l.*
*Assistant Inspectors*, E. G. Smith, R. A. Viney, F. C. C. Smyth, F. J. Macken, M. A. Stewart, J. W. Carter, A. T. Robinson, A. Finch, 150*l.* by 10*l.* to 200*l.*
*Sergeant Instructors*, G. Wood, W. Brent.
*Chief Clerk*, T. H. Jolley.

*Prisons.*

*Commissioner of Prisons*, R. Donald, 500*l.* by 25*l.* to 600*l.*, with 50*l.* duty allowance and 100*l.* personal allowance.
*Assistant Commissioner of Prisons*, T. A. Gray, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Superintendent, Mombasa*, S. R. Hill, 250*l.* by 15*l.* to 400*l.* with 25*l.* duty allowance.
*Gaolers*, J. Finch, H. A. Stanton, H. S. Robertson, M. Dards, 180*l.* to 240*l.* with 20*l.* duty allowance.

*Medical (East Africa and Uganda).*

*Principal Medical Officer*, A. D. Milne, C.M.G., 700*l.* by 50*l.* to 900*l.* and 70*l.* duty allowance.
*Deputy Principal Medical Officer*, J. A. Haran, C.M.G., 600*l.* by 25*l.* to 700*l.* with 60*l.* duty allowance.
*Senior Medical Officers*, C. L. Chevallier, W. Owen-Prichard, 500*l.* by 25*l.* to 600*l.* with 50*l.* duty allowance.
*Medical Officers*, F. L. Henderson, J. O. Shircore, G. R. H. Chell, T. F. Lumb, J. L. Gilks, J. Pugh, C. J. Wilson, A. D. J. B. Williams, T. H. Massey, P. F. Nunan, J. H. Thomson, R. W. Spence, N. P. Jewell, J. M. Clark, P.A. Clearkin, H. F. Hamilton, J. M. O'Connell, 400*l.* by 20*l.* to 500*l.*
*Dental Sergeon*, V. G. L. Van Someren, 500*l.* by 20*l.* to 600*l.*
*Principal Sanitation Officer*, W. J. Radford, 600*l.* by 25*l.* to 700*l.* with 60*l.* duty allowance.
*Medical Officer of Health, Mombasa*, R. Small, 500*l.* by 25*l.* to 600*l.* with 40*l.* duty allowance.
*Medical Officer of Health, Kisumu* (vacant), 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Medical Officer of Health, Nairobi*, B. W. Cherrett, 400*l.* by 20*l.* to 500*l.* with 40*l.* duty allowance.
*Dispensers*, F. Knott, H. Ogden, 200*l.*, and Miss F. L. Neave, 120*l.*
*Storekeeper*, J. S. Robertson, 250*l.* by 15*l.* to 400*l.*
*Office Superintendent*, R. Stanley, 250*l.* by 15*l.* to 400*l.*
*Matron*, Miss E. R. Brown, 190*l.* and 10*l.* uniform allowance.
*Nurses*, Miss H. M. Whitburn, Miss L. Merryweather, Miss R. Paul, Miss I. L. Majendie, Miss I. Wilson, Mrs. S. J. Harrison, Miss A. E. Hobson, Miss A. E. Drewe, Miss R. S. Blyth, 165*l.*, 10*l.* uniform allowance.

## FALKLAND ISLANDS.

*Situation and Area.*

The Falkland Islands ("Les Iles Malouines" of the French, "Islas Malvinas" of the Spaniards) are situated in the South Atlantic Ocean, between 51° and 53° S. lat., and between 57° and 62° W. long., about 480 miles N. E. of Cape Horn, and about 1,000 miles due south of Monte Video. They consist of the East Falkland (area 3,000 square miles), the West Falkland (2,300 square miles), and about 100 small islands, with an area of nearly 1,200 square miles (equal to Gloucestershire). Mount Adam, in West Falkland, the highest ground in the Colony, rises 2,315 feet above the level of the sea.

*South Georgia*, a group of islands 54½° S., and 36° to 38° W., is a dependency of the Falkland Islands. It was discovered by Antony La Roche in 1675, and was explored and taken possession of by Captain Cook in 1775. It has an area of about 1,000 square miles, and is at present the headquarters of eight whaling establishments. It is almost perpetually icebound, the snowstorms in the winter being numerous and exceedingly heavy. The island is mountainous (one of more than 5,000 ft. some probably higher) with inconsiderable lowland areas round the coast, divided by high ridges into small valleys, covered with tussac and luxurious vegetation. There are considerable areas of bog. The Swedish Antarctic Expedition visited the Islands in 1902, also the Scottish exploring vessel *Scotia*.

Among other Dependencies are the South Shetlands, Graham's Land, the South Orkneys (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station), and the Sandwich group.

*History.*

The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. In 1764 they were taken possession of by France, and Bougainville planted a small colony of Acadians at Port Louis on E. Falkland. Bougainville was bought out by Spain, ever jealous of interference by other nations in the southern seas, in 1766. In the following year Captain Byron took possession of W. Falkland, and left a small garrison, which was driven out by the Spaniards in 1770. It was restored next year, but abandoned in 1774, and no further formal occupation made till in 1820 the Republic of Buenos Ayres established a settlement in these islands, which was destroyed by the Americans in 1831.

Digitized by Google

In 1832 they were taken possession of by the British Government, for the protection of the whale fishery. Until 1843 they were under the charge of the Naval officers engaged in making the Admiralty surveys. In 1843 a Civil Administration was formed, the headquarters being at Port Louis (or "Anson") until 1844, when it was moved to Port William, now known as Stanley. The Colony received regular grants in aid from 1841 to 1880, and for mail service down to 1884-5, since which date it has been self-supporting.

On the 8th December, 1914, a naval battle was fought off the Falkland Islands, when a British squadron, under the command of Vice-Admiral (now Admiral) Sir F. C. Doveton Sturdee, Bt., K.C.B., K.C.M.G., C.V.O., defeated and sank a German squadron consisting of two armoured cruisers, *Scharnhorst* and *Gneisenau*, two light cruisers, *Leipsig* and *Nurnberg*, and two transports. The light cruiser *Dresden*, of the German squadron, was subsequently sunk on the 5th March, 1915. There was no loss of ships on the British side, the only casualties being seven killed and twelve wounded.

On the 31st May, 1916, Sir Ernest Shackleton, with two members of the Imperial Trans-antarctic Expedition (Captain Worsley and Petty Officer Crean), arrived unexpectedly at Stanley in a whale catcher. The "Endurance" had been crushed by the ice in the Weddell Sea on 27th October, 1915, and the whole of the expedition had managed to reach Elephant Island in April, 1916. Shackleton, leaving there 22 members of the expedition, had made his way with five companions in an open boat to South Georgia, a distance of about 1,000 miles. He himself, with Worsley and Crean had crossed the island on foot to the settlements on the northern coast, this being the first time South Georgia has been crossed.

*General Description.*

The only town is Stanley, in the East Falkland, with a population of about 900. The houses are mostly of wood and iron, built as they are required for occupation. It is difficult to rent a house, but there are several small hotels and boarding houses affording fair accommodation. The general aspect of the town is scarcely in keeping with the substantial prosperity of the inhabitants. Stanley is a port of registry, and had, on the 31st December, 1916, six vessels of a total tonnage of 807 tons. It has a fine inner and outer harbour, and forms a convenient intermediate coaling station for vessels going through the Straits of Magellan.

The climate is severe but healthy, except for those predisposed to pulmonary affections. It is uniformly cold, the mean temperature being 42°. The thermometer ranges between 30° and 50° in winter, and between 40° and 65° in summer. The cold is intensified by constant high winds which prevail, especially in the summer, rising about 10 a.m., and falling away between 4 and 5 p.m, There is not so much rain as might be expected. the annual rainfall seldom exceeding 25 inches. In the summer the atmosphere is remarkably dry, and evaporation is rapid.

The entire country is wild moorland, interspersed with rocks and stone runs. Suitable building stone is found in different parts of the island, which are composed of Devonian and Gondwana formations. The soil is chiefly soft peat, and travelling is difficult. There are no roads except within the limits of Stanley, and communication is by sea or on horseback. The islands are so well adapted for sheep-farming, that the entire acreage has been devoted to that industry. The tussac, which grows to the height of seven feet, and affords fattening food for cattle, has now disappeared from the East and West Falklands, but it still abounds on the smaller islands. Celery, scurvy grass and sorrel are very plentiful, besides a small plant called the tea plant, much used formerly by the sealers and Gauchos. In November and December the ground is covered with a variety of sweet-scented flowers. The cultivation of fruit and vegetables is made difficult by the damp, cold nature of the soil and the prevalence of high winds. Trees are completely absent.

Mutton is bought for 3*d.*, beef for 5*d.* per lb,, fowls, 3*s.* each, eggs, when procurable, for 2½*d.* to 3*d.* Fresh milk is bought for 4*d.* a pint in summer, but cannot be obtained in winter. Apples and oranges of an inferior sort, imported from Chili and Uruguay, fetch 2*d.* each.

*Industry.*

The principal industries are sheep-farming and whaling, and the export of sheep for breeding purposes to Chili and Patagonia. There were, in 1916, about 3,929 horses, 5,761 cattle, and 689,904 sheep.

The chief exports are wool and whale oil. The other exports consist of sheep skins, hides, horns, hoofs, bones, tallow and guano. The imports consist of textiles, alcohol, hardware, general supplies, and ship's stores.

In the Dependencies the Whaling Industry has made great progress in recent years. During the season ended 30th September, 1916, whale produce to the value of 1,774,570*l.* was obtained.

*Education.*

There is a Government school with 156 pupils, and a Roman Catholic school with 80. The attendance averages eighty-nine per cent. of the number on the rolls. At Darwin, East Falkland, there is a small settlement where the Falkland Islands Company have a school with about 15 pupils. Seven travelling teachers are employed to instruct the children at the various sheep stations and at the scattered shepherd's houses; by the Government, two on the East Falkland and three on the West Falkland; by the Falkland Island Company Limited, two in the peninsula of Lafonia, East Falkland. The average number of children thus receiving instruction is, in normal times, nearly one hundred and fifty.

*Currency and Banking.*

The legal tender currency is British sterling, and local 5*l.*, 1*l.*, and 5*s.* notes. There are no private banks in the Colony. On 1st April, 1888, a Government Savings Bank was established, in which, on 30th September, 1916, the deposits were 103,578*l.*, belonging to 662 depositors.

*The Falkland Islands Company, Limited.*

This company was formed in 1851 to take over from Mr. Lafone, of Monte Video, the district in the East Falkland, now called Lafonia; this district abounded with wild cattle, said to be the descendants of the stock introduced by the Acadian settlers, the capture of which was the company's original object. This, however, was not found profitable, and the company have of late years been engaged in sheep farming on an extensive scale, not only on their own freehold at Lafonia, but also on 97,128 acres purchased from the Government, the importation of

Digitized by Google

goods of all sorts, and the repairing of ships, which occasionally call at this port in distress. Its capital is 110,000*l.*, all paid up, and very large dividends have been paid.

The company maintains a doctor and a school at Darwin, and contributes to the provision of a salary for a clergyman of the Church of England.

*Means of Communication.*

† There is mail communication with England every month. The Pacific Steam Navigation Company's Steamers call at Stanley on their voyage out to Callao and on the return voyage, once every month. The voyage between Stanley and London occupies 27 days. Postage to the United Kingdom, British Possessions, and Egypt, 1*d.* per 1 oz.; to elsewhere, 2½*d.* per 1 oz., and 1½*d.* for every additional oz., or fraction of an oz. There is an internal post, 1*d.* the oz. Parcel post to England, 1*s.* for 3 lbs., 2*s.* for 7 lbs., 3*s.* for 11 lbs.; internal parcel post, 4*d.* for 3 lbs., 8*d.* for 7 lbs., and 1*s.* for 11 lbs. A 5 K.W. Marconi wireless station was completed at Stanley in September, 1912; communication viâ Monte Video.. There is a lighthouse at Cape Pembroke maintained by the Board of Trade at an annual cost of from 500*l.* to 600*l.*

*Constitution.*

The Government is administered by a Governor, aided by an Executive and Legislative Council.

The Legislative Council is composed of the Governor, the Colonial Secretary, the Treasurer, and the Colonial Surgeon, and two unofficial members appointed by warrant under the Royal Sign Manual and Signet for five years.

## FIJI.

*Situation and Area.*

The Colony of Fiji comprises all islands, rocks, and reefs lying between latitude 15° and 22° S. and between longitude 177° W. and 175° E. It is distant from Sydney about 1,900 miles, and from Auckland 1,200 miles. The Tongan or Friendly Islands lie 180 miles to the south-east, and Samoa 500 miles to the north-east. The French colony of New Caledonia lies to the westward about 700 miles. The number of islands has been variously stated at from 200 to 250; but this includes mere uninhabited rocks and islets.

The dependency of Rotumah consists of all islands, rocks, reefs between 12° and 15° S., and between 175° and 180° E.

The principal inhabited islands are Viti Levu, 4,053 square miles, Vanua Levu, 2,130 square miles, Taviuni, 217 square miles, Kadavu, 124 square miles Koro, 58 square miles, Gau, 45 square miles, and Ovalau, 43 square miles. The total area of the Colony (including Rotumah, 14 square miles) is 7,083 square miles (nearly equal to Wales).

*Physical Features.*

The more important islands are hilly and mountainous, rising more or less abruptly from the shore to a height of about 4,000 or even 4,500 feet. The hills are generally of a grand and picturesque outline, being composed for the most part of old volcanic lavas. Upon the south-eastern or windward sides the islands are covered with dense forests. The lower lands are more lightly timbered, and apparently have all been under cultivation at a not distant period when the native population was much larger. On these flats the soil is almost everywhere deep, easily worked, and especially rich in humic acid. The northern and north-western sides of the larger island, or leeward sides, are characterised by a comparative absence of forest lands; and here hills or plains are covered with long reeds or grass, and dotted with clumps of Casuarina and Pandanus.

Iron ore is found in considerable quantities, but is not worked. There are also traces of gold, silver (chloride), tin, antimony, manganese, and other metals.

The country is well watered. Frequent rains keep alive the sources of the thousands of small affluents feeding the main rivers. Of these rivers the Rewa stands first. It is navigable for boats, punts, or flat-bottomed steamers, for 40 or 50 miles from its mouth. Several large streams fall into it, the sources of which lie in the high mountains of the interior 3,000 or 4,000 feet above the level of the sea. Besides these, the Sigatoka, the Nadi, and Ba rivers, with many others, drain the principal watersheds of Viti Levu. In Vanua Levu the rivers are not so large, though they are nearly as numerous. The Dreketi river being first in size is navigable for craft of considerable size for a distance of 15 miles from its mouth. Almost every valley in the group has its stream or brook, from which the native occupants irrigate their plantations of "dalo" (*Calocasia esculenta*).

Fiji is as rich in harbours and roadsteads as it is in rivers. Each island is surrounded by a barrier reef, and, with few exceptions, is accessible through passages usually found opposite to the most considerable valley or river. Between this river and the shore ships lie safely at anchor, protected by an indestructible natural breakwater.

### *Rotumah.*

The Island of Rotumah, situated in 12° 30′ S. lat., 177° 10′ E. long., was discovered by the *Pandora*, in 1793, when searching for the mutineers of the *Bounty*. Lying to the north-west from two to four miles from the shore, are three small islets, Hattana, Hoflua and Waya. Of these only the last named is inhabited, and it contains but one small village. In 1879 the three principal Rotumah chiefs offered the islands to Great Britain, and they were annexed 13th May, 1881. The population was found at the census of 1911 to number 2,176, of whom two-thirds are Wesleyans, and the remainder Roman Catholics. The principal island is seven miles long by three miles broad, and contains about 9,000 acres. The staple export is copra.

The distance of Rotumah from the seat of government, the infrequency of intercommunication, and the fact that the natives differ entirely from Fijians in language and in polity, necessitate a government on other lines than that of the colony generally. A European commissioner resides on the island, and is, under the governor, the chief executive and judicial authority in Rotumah. The commissioner's court, except in capital cases, takes the place of the supreme court of Fiji. There are two native stipendiary magistrates, who have jurisdiction in minor cases. The island is divided into seven districts, over each of which a chief, appointed by the governor, rules. The framing of local laws is entrusted to the Rotumah Regulation Board (consisting of the resident commissioner and any number of natives, not exceeding ten). Their enactments are subject to the approval of the legislative council of Fiji. The post of resident commissioner has now been amalgamated with that of provincial medical officer, and a hospital has been established on the island.

### *Population.*

The aboriginal population of Fiji belongs to the darker of the two great Polynesian families, but, living on the confines of the fairer race, its blood has received considerable admixture. It was estimated in 1859 at 200,000; in 1868 at 170,000; and in 1871 at 140,000. By the epidemic of measles which occurred in 1875 it was reduced by more than one-fourth. The population of the colony, as ascertained at the census of 1881, 1891, 1901, and 1911 respectively, is shown in the following table:—

| Class of Population. | Census of 1881. | | | Census of 1891. | | | Census of 1901. | | | Census of 1911. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|

The estimated population on 31 December, 1916, was 163,565, made up as follows:—Europeans, 4,705; Half-Castes, 2,689; Indians, 59,565; Fijians, 90,429; Polynesians, 2,682; Rotumans, 2,050; Chinese, 821; Others, 624.

The total number of East Indians serving under indenture, including children of these

Digitized by Google

immigrants, on the last day of 1916 was 12,069 (male adults, 7,232; female adults, 2,693; and children, 2,144), and of time-expired, indentured immigrants remaining or settling in the Colony there were 47,496.

The enumeration of the Fijian population in 1881 was somewhat incorrect, inasmuch as there was then a tendency on the part of the natives to exaggerate the strength and importance of their various divisions. By the time that the census of 1891 came to be made, that tendency had taken a turn in the opposite direction, under the impression that the assessment of taxes would follow the result of the enumeration. The births among the native population in 1916 totalled 3,122, and the deaths 2,267. The birth rate was 34·52, and the death rate 25·06 per mil.

The Wesleyan and Roman Catholic missions give the following as the number of their adherents at the end of the year 1916:—

| | |
|---|---|
| Wesleyan ... ... ... ... | 84,377 |
| Roman Catholic ... ... ... | 11,097 |
| Total ... | 94,474 |

*History.*

The islands were discovered by Tasman in 1643, and visited by Captain Cook in 1769. Captain Bligh, on his memorable voyage in the launch of the *Bounty*, sighted part of the group in 1789, and was chased by a canoe from the island of Waya, in the Yasawa group. Missionaries settled in Fiji in 1835, and, after a time, met with great success.

In 1859 Thakombau, the most powerful chief of Fiji, offered the sovereignty of the islands to Great Britain. The offer was declined by the Duke of Newcastle in 1862. About that time the demand for cotton, owing to the American civil war, led to an influx of Europeans into Fiji for the purpose of cotton cultivation. In June, 1871, certain Englishmen set up a Fijian Government, with the principal chief, Thakombau, as king. A constitution was agreed upon, and a Parliament elected. The Parliament and the Government before long drifted into mutual hostility, and the Ministry latterly governed without the aid of the Parliament.

The question of annexing Fiji had been agitated both in Australia and England since 1869 on many grounds, and in August, 1873, the Earl of Kimberley commissioned Commodore Goodenough, commanding the squadron on the station, and Mr. E. L. Layard, Her Majesty's Consul in Fiji, to investigate and report on the matter. These Commissioners, on the 21st of March, 1874, reported an offer of the cession of the sovereignty of the islands from the chiefs, with the assent of the Europeans, but on certain terms which were not acceptable, and Sir Hercules Robinson, the Governor of New South Wales, was despatched to Fiji in September, 1874, to negotiate. This mission was completely successful, and the sovereignty of the islands was ceded to Her Majesty by Thakombau, the Chief of Bau, Maafu, who was Chief of the so-called Lau Confederacy, which included not only the Lau Islands, but Taviuni and the greater part of Vanua Levu, and the other principal chiefs, in a deed of cession dated the 10th day of October, 1874. A charter was shortly afterwards issued by Her Majesty, erecting the islands into a separate colony, and providing for their government.

*Climate.*

The climate of Fiji is cool for the tropics, and the country is remarkably free from zymotic and endemic diseases. Dysentery is the only disease to which Europeans are peculiarly liable. Paludal fevers have never been met with.

The highest shade temperature at Suva in 1916 was 91·0° in December, and the lowest 64·2° in July. The total rainfall during the year was, at Suva, 152·345 inches. There is great variety of temperature and climate to be found in the group. The rainfall extends over the whole year, but May to September is usually the driest period. Between December and April hurricanes or heavy gales occasionally occur.

*Constitution.*

The constitution is regulated by Letters Patent of 21st March, 1904, as amended by Letters Patent of 30th August, 1905, 27th July, 1907, 31st October, 1910, 24th August, 1911, 22nd January, 1914, and 20th July, 1916. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Chief Medical Officer, the Receiver-General, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and not more than twelve nominated members, seven elected members and two native members. To the natives a large share of self-government has been conceded. Their system of village and district councils has been recognised and improved, and supplemented by an occasional meeting of the high chiefs and representatives from each province, presided over by the Governor. There is a Native Regulation Board, constituted under "The Native Affairs Ordinance, 1876," which has power to make regulations with regard to the marriage and divorce of natives, succession to property, the jurisdiction and powers of native courts and magistrates in matters of civil and criminal procedure, and also in regard to other matters having reference to the good government and well-being of the native population. All such regulations have to receive the sanction of the Legislative Council before acquiring the force of law.

Levuka, in the island of Ovalau, with a white population of 352* souls, was at first selected as the European capital, but during the year 1882 the seat of government was transferred to Suva, on the south coast of the island of Viti Levu, with a fine harbour. The white population of Suva and suburbs numbered 1,376 at the census of 1911, and had increased to about 1,530 in 1914.

*Shipping.*

Suva and Levuka are ports of registry, and had, on 31st December, 1916, 12 vessels registered of a total tonnage of 1,462 tons.

During the year 1916 seagoing certificates were issued by the Marine Board to 250 vessels, of a total tonnage of 2,921, of which 102 were owned by Europeans (tonnage 1,778), 112 by natives (tonnage 818), 14 by Chinese (tonnage 147), 6 by Half-castes (tonnage 81), 11 by Indians (tonnage 46), and 5 by Japanese (tonnage 51).

A portion of the revenue, varying from 14,000*l.* to 16,000*l.* net, is raised from taxation of the natives, as follows:—

The Colony is divided into seventeen provinces, each under the control of a European Commissioner

* According to the census of 2nd April, 1911.

Digitized by Google

or a Roko Tui (chief native officer) for purposes of native administration. Each province is sub-divided into districts, of which the head officers are termed Bulis. Once every year the provinces are severally assessed by the Legislative Council for a fixed amount of tax, which was till lately delivered in the form of produce, but is now, at the discretion of the Governor, paid entirely in money.

The Provincial Council, consisting of native officials and chiefs, presided over by an European Officer of the Government, distributes the provincial tax among the different districts, and there is then a further sub-division among the different villages by district councils, each presided over by its Buli. The tax assessment for the whole of the provinces was, in 1917, 16,200*l.*

*Local Government.*

A municipality was established in 1877 in Levuka, and in 1882 one was established in Suva, on the transfer of the seat of government. These boards are at present regulated by the Municipal Institutions Ordinance, 1909. The governing body in each town is elected by the ratepayers. Rates are collected on land and house property. General rates are limited to one shilling in the pound on the assessed value of rateable property; but special rates not exceeding two shillings in the pound are further provided for.

A grant-in-aid not exceeding one-fifth of the sum raised by general rate in the preceding year may be paid from general revenue to any town council, and in addition the revenue received from certain licenses issued in respect of businesses carried on in a town may be paid to the council.

The revenue and expenditure in 1916 were:

| | Revenue. | Expenditure. |
|---|---|---|
| | £ | £ |
| Suva municipal council | 7,659 | 8,127 |
| Levuka ,, ... | 2,239 | 2,199 |
| Suva school board ... | 1,200 | 1,137 |
| Levuka ,, ... | 1,269 | 1,093 |
| Total ... ... | £12,367 | £12,556 |

Total receipts of local authorities, 12,367*l.* total expenditure, 12,556*l.* in addition to the revenue and expenditure of the native local districts above referred to.

*Education.*

The Public Education Ordinance, 1890, provided for the creation of school boards in constituted districts. Under this Ordinance school boards were created in Suva and Levuka, and in each of these towns a public school for children of European descent was established, the cost of education being borne by a school rate on the town and a Government grant based on the attendance.

The Education Ordinance, 1916, replacing the 1890 Ordinance aims at the establishment of an education system to meet the needs of the Colony as a whole and of the various races. A Board of Education has been created, of which the Governor is Chairman, and a Superintendent of Schools has been appointed. School Committees in education districts are appointed by the Governor. The Ordinance gives power to the Board to establish Government schools both secondary and primary, and to give assistance to denominational schools. Rules and Regulations for Government and assisted primary schools were made by the Board of Education in May, 1917.

The public school for Europeans in Suva has been replaced by two grammar schools, one for boys and one for girls; and the Levuka Public School is now under Government control. The attendance at the Boys Grammar School, Suva, is 74; at the Girls Grammar School, Suva (where boys under 8 are taken), 104; and at Levuka Public School 194 (boys and girls).

The Queen Victoria Memorial School at Nasinu, near Suva, is intended to provide for the higher education of natives, and is maintained from public revenue. The number of pupils in residence is 72.

Schools for the primary education of Fijians may be conducted by the Methodist and Roman Catholic Missions, by the Provincial Councils, or by Government. At present there are 5 Provincial schools, one of which, at Lau, is in charge of a European headmaster, whose emoluments are paid from general revenue. The Methodist Mission has approximately 1,000 schools in Fijian villages with an attendance of over 17,000 pupils; the Roman Catholic Mission has 118 Fijian schools with 2,253 pupils. It is intended that these schools should be centralised and in time receive assistance from Government under the Primary Schools' Regulations.

The Roman Catholic Mission has also two schools for Europeans in Suva (attendance 135) and one in Levuka (attendance 45), and two schools in Suva for Indian and half-caste boy's (220 on roll).

The Methodist Mission provides education for Indians in 13 schools with about 500 pupils, and there is a considerable number of small private Indian schools under Indian teachers, statistics of which are not available.

Denominational and private schools for Indians may receive assistance from Government under the Assisted Primary Schools' Regulations, and Government schools will be established at necessary centres, where assisted schools do not exist.

*Currency and Banking.*

The legal tender currency, and the only coin in circulation, is British sterling.

The Bank of New South Wales has branches at Suva, Levuka, and Lautoka, and the Bank of New Zealand at the two former places.

Under Ordinance IV., of 1907, a Government Savings Bank was opened during 1908. Arrangements were made during 1914 for the issue of Government Currency Notes.

*Industries.*

The trade and commerce of the Colony depends for its existence on three staple industries, viz., (1) the cultivation, manufacture, and export of sugar; and (2) of copra (the dried kernel of the cocoanut); and (3) the growth and export of fruit, principally bananas.

The principal exports at the date of the annexation of the Colony were copra, cotton (Sea Island), and maize, but the export of maize was soon displaced by that of sugar. Cotton continued to be the third export in point of value until the year 1882, after which it gradually subsided until the year 1888, when only 3½ tons were exported. In the meantime the fruit trade with the neighbouring Australasian colonies had arisen,

Digitized by Google

after the establishment, through Government subsidy, of regular steam communication with Sydney, Auckland and Melbourne.

The export of fruit consists almost entirely of bananas and pineapples and citrous fruits.

The following table will illustrate the course of the trade in the three staple exports of the Colony:—

| Year. | Sugar. | | Fruit. | Copra. | |
|---|---|---|---|---|---|
| | Quantity. | Value. | Value. | Quantity | Value. |
| | tons. | £ | £ | tons. | £ |
| 1875 | 96 | 3,417 | 97 | 3,871 | 40,058 |
| 1890 | 15,291 | 244,655 | 57,563 | 4,657 | 42,901 |
| 1900 | 32,961 | 393,987 | 28,112 | 15,605 | 151,701 |
| 1906 | 38,523 | 347,198 | 97,678 | 9,772 | 144,683 |
| 1907 | 66,597 | 602,820 | 79,871 | 11,290 | 182,788 |
| 1908 | 66,149 | 647,306 | 62,217 | 12,931 | 154,480 |
| 1909 | 60,825 | 607,969 | 98,491 | 15,880 | 226,599 |
| 1910 | 61,700 | 669,432 | 47,301 | 13,082 | 258,914 |
| 1911 | 72,834 | 797,274 | 151,667 | 16,337 | 294,245 |
| 1912 | 61,728 | 671,713 | 120,510 | 13,710 | 242,073 |
| 1913 | 94,710 | 1,041,927 | 164,249 | 7,929 | 176,741 |
| 1914 | 92,112 | 1,005,643 | 201,938 | 9,429 | 149,372 |
| 1915 | 85,563 | 1,065,463 | 120,741 | 15,238 | 233,959 |
| 1916 | 120,528 | 1,729,658 | 205,122 | 13,499 | 255,913 |

The other principal exports in 1916 consisted of:—Trocas shell, 25,470*l.*; molasses, 13,336*l.*; rubber, 8,834*l.*; maize, 3,208*l.*; hides and felts, 2,779*l.*; and Bêche-de-mer, 1,840*l.*

The growth of rice has been commenced, and the cultivation of sugar cane is being considerably extended.

Rubber planting may now be regarded as an established industry. Efforts are being made to encourage the growing of cotton.

Cattle and sheep raising are exciting considerable attention, and many parts of the Colony seem admirably adapted to this pursuit.

The total trade of the Colony in 1916 was £3,132,542, made up as follows:—

| | |
|---|---|
| With United Kingdom .. | 161,281 |
| ,, British Possessions .. | 2,738,097 |
| ,, Foreign Countries .. | 216,379 |
| Parcels Post .. .. .. | 16,785 |
| | £3,132,542 |

There is no direct communication with the United Kingdom, and the bulk of the trade between Fiji and Great Britain consequently passes through the Australian colonies.

*Means of Communication.*

There is regular steam communication with the following places outside the Colony: Sydney (5 to 8 days), three or four times a month; Auckland (4 days), once a month. Many extra steamers run during the sugar season. In addition to this, Suva is a port of call for the Canadian-Australian Royal Mail Line of Steamers which ply between Vancouver and Sydney *viâ* Honolulu, Suva, and Auckland. A steam service with Melbourne has been established, and a direct steamer calling at Sydney on return voyage is now running.

Postage to the United Kingdom, India, the Australian States, New Zealand, and British Colonies* is 1*d.* per oz. To other countries in the Postal Union 2½*d.* per oz. A war tax of 1d. on letters and parcels posted within the Colony, excepting letters on which the minimum rate of postage is 2½d., has been imposed since 1st Dec., 1915.

* See end of Introduction.

Internal postal rates: letters 1*d.* per oz.; newspapers not exceeding 4 ozs., ½d., exceeding 4 ozs., 1d. A Parcels Post with the United Kingdom was established in June, 1890. The rate of postage is 3 lbs. 1s. 8d., 7 lbs. 3s. 4d., and 11 lbs. 5s. There is also a parcels post with the Australian States, New Zealand, Canada, India and Ceylon. The rate of postage is eightpence for the first 1 lb. and sixpence per lb. thereafter to the Australian States and New Zealand, and eightpence per lb. to Canada. In the case of India and Ceylon the rates are 1s. 4d. for the first 1 lb., and 1s. 2d. per lb. thereafter.

The Colony entered the Postal Union on 1st September, 1891.

The Imperial Postal Order system has been adopted by this Colony.

Letters from England sent *viâ* Sydney reach Fiji in about fifty days, letters *viâ* San Francisco, or Vancouver, in about 30 days.

There is a telephone from Suva to Lautoka, a distance of 125 miles, which is maintained by the Colonial Government, the Colonial Sugar Refining Company, and the Union Steamship Company jointly. There is a telegraph line between Suva and Levuka, a distance of 54 miles. A system of wireless telegraphy has been established in the Colony, and there are now stations at Suva in the island of Viti Levu, at Labasa and Savusavu in the island of Vanua Levu, and at Waiyevo, Taviuni. Telephone Exchanges have been established at Suva, Levuka, Nausori, Navua, and Taviuni.

There is no railway in the Colony. The Colonial Sugar Refining Co. own various tramlines connecting their estates, and these tramlines are in certain cases open to public use. Suva is now connected by Pacific Cable with Southport (Queensland) and Auckland, *viâ* Norfolk Island, and with Canada, *viâ* Fanning Island. Intercommunication within the group is maintained by sailing boats and steam launches, and by subsidised inter-insular steamers. A few good roads have been constructed on the larger islands, and more are in process of construction.

*Collector of Customs, Suva*, W. H. Brabant, 400*l.*–450*l.*

*Collector of Customs, Levuka*, E. J. March, 300*l.*–400*l.* and quarters.

*Collector of Customs, Lautoka*, J. M. Wilson, 300*l.*–400*l.*, and quarters.

*2nd Class Clerk*, A. Walker, 250*l.*–300*l.* and overtime.

*3rd Class Clerks* (3), W. W. Savage, R. H. Phillips, H. J. S. Allen, 200*l.*–250*l.* and overtime.

*4th Class Clerks* (7), H. D. Walcot, H. I. Horton, T. I. Stevenson, V. C. R. Carnac, L. J. Ching, H. A. Bently, W. G. Garnett, 150*l.*-200*l.* and overtime.

*5th Class Clerks* (8), W. L. D. Harvie, A. D. B. Parsons, J. D. Mills, E. W. Lewis, J. McLelland, J. F. Rogers, H. E. Houghton, C. S. Mortimore, 100*l.*–150*l.* and overtime.

*6th Class Clerk*, C. O. Wilkinson, 75*l.*-100*l.* and overtime.

*Harbour Master, Suva*, C. Wooley, 300*l.*–400*l.*

*Harbour Master, Levuka*, E. W. G. Twentyman, 300*l.*–350*l.*

*Master S. Y. "Ranadi" and Inspector of Lighthouses*, E. F. Wallack, 270*l.*–320*l.*

### Audit Department.

*Auditor*, E. H. Morris, 500*l.*-600*l.*; receives also 50*l.* from Western Pacific High Commission.

*Assistant Auditor*, R. H. Kirkwood, 400*l.*–500*l.*

*2nd Assistant Auditor*, H. W. Harcourt, 300*l.*–400*l.*

*3rd Class Clerk* (vacant).

*4th Class Clerks*, D. Bannatyne, W. B. Mortimore, S. G. Clarke, and J. Y. Wood (temporary), 150*l.*–200*l.*

*6th Class Clerk*, Miss K. Lambert-Brown, 75*l.*-100*l.*

*Typist* (temporary), Miss P. Lambert-Brown, 60*l.*–75*l.*

### Lands Department.

*Commissioner of Lands (also Crown Surveyor, Conservator of Forests and Chairman Mining Board)*, Dyson Blair, 500*l.*–600*l.*

*2nd Class Clerk (also Secretary Mining Board)*, Nelson Graburn, 250*l.*–300*l.*

*Staff Surveyor*, Charles A. Holmes, 400*l.*–500*l.*

*Surveyors, Senior* (2), Geo. Reilly and Ernest V. Leembruggen, 300*l.*–400*l.*

*Surveyors*, Clarence A. Leembruggen, 250*l.*–300*l.*; T. H. Coster and Henry H. Whittaker, 200*l.*–250*l.*

*Native Land Commission Surveyors*, Peter C. W. Leembruggen, George H. V. Saunders, Eugene L. Leembruggen, 200*l.*–250*l.*; C. L. Sunderland, C. M. Chapman and Inoke Sateki Veikune, 100*l.*–200*l.*

*4th Class Clerk*, Lloyd E. Ambler, 150*l.*–200*l.*

*5th Class Clerk*, Miss Gladys Carr, 100*l.*-150*l.*

*Typist*, Miss Gwendolen Land, 60*l.*-75*l.*

*Chief Draughtsman*, Daniel O. D'Zilva, 250*l.*-300*l.*

*Draughtswomen*, Miss Zena Rennie and Miss Doreen Rennie, 60*l.*-75*l.*

### Registrar-General.

*Registrar-General, Registrar of Titles, Registrar of Companies, Registrar of Supreme Court, Curator of Intestate and Vacant Estates, Public Trustee* (50*l.*), *and Custodian of Enemy Property*, Roger Greene, 400*l.*–500*l.*

*1st Class Clerk*, J. L. Johnston, 300*l.*–400*l.*

*3rd Class Clerk*, G. S. Parker, 200*l.*–250*l.*

*5th Class Clerk* (vacant), 100*l.*–150*l.*

*8th Class Clerk*, T. Uluilakeba, 35*l.*–50*l.*

### Department of Justice.

*Chief Justice and Judicial Commissioner for the Western Pacific*, Sir C. S. Davson, Kt., 1,000*l.*, and 300*l.* from High Commission Funds.

*Attorney-General*, A. K. Young, 800*l.*–900*l.*

*Crown Solicitor*, T. D. H. Bruce, 500*l.*–600*l.*

*3rd Class Clerk*, J. F. Bremner, 200*l.*–250*l.*

*Sheriff* (vacant), E. A. Barnett (acting).

*Chief Police Magistrate*, G. G. Alexander, 500*l.*–600*l.*

*1st Grade District Commissioners*, F. Spence, W. A. Scott, A. B. Edwards, W. E. Russell, R. R. Kane, C. G. B. Francis, 400*l.*–500*l.* and quarters.

*2nd Grade District Commissioners*, J. Stuart, A. E. Bailey, H. C. Monckton, H. G. Pilling, R. C. Higginson, H. E. Snell, E. L. Baker, A. A. Wright, J. S. Neill, A. H. Roberts, 300*l.*–400*l.* and quarters.

*Accountant and Assistant*, Lautoka, A. J. Armstrong, 300*l.*–400*l.*, and quarters.

#### *Medical Officers with Judicial Powers.*

*Lau*, T. R. St. Johnston; *Bua*, A. R. Maclurkin; *Rotuma*, H. Macdonald, 250*l.*, and 250*l.*–350*l.* as *Medical Officer*, each.

#### *Clerks of the Peace.*

J. W. Davidson, V. C. Witham, 200*l.*–250*l.*

#### *Fiji Constabulary.*

*Inspector-General of Constabulary* (vacant), 500–600*l.* with quarters (is also *Sheriff and Inspector General of Prisons*); E. A. Barnett, acting as *Inspector-General of Constabulary and Sheriff.*

*Chief Inspector*, E. A. Barnett, 250*l.*–300*l.*

*Inspectors*, A. Stanlake, R. F. Swinbourne, A. E. S. Howard, G. Kermode, 250*l.*–300*l.*

*Sub-Inspectors*, J. Judd, J. L. McLeod, H. C. Hills, F. Leans, D. P. Cantlon, G. Wright, 200*l.*–250*l.*

*Junior Sub-Inspectors*, M. P. Murphy, A. S. Napier-Johnson, I. E. Lucchinelli, 180*l.*–250*l.*

*Pay and Quartermaster* (vacant), 180*l.*–250*l.*; V. M. Ambler (acting).

*5th Class Clerk*, C. W. Tucker, 100*l.*–150*l.*

#### *Prisons.*

*Inspector-General* (vacant), J. Dalton (acting).

*Superintendent, Suva Gaol*, J. Dalton, 300*l.*–400*l.* and quarters.

*Gaoler, Suva Goal*, W. D. Kenderine, 250*l.*–300*l.* and quarters.

*Overseer, Suva*, N. B. Casey, 200*l.*–250*l.* and quarters.

*Overseer, Suva*, P. Lambe, 150*l.*–200*l.* and quarters.

### Medical Department.

*Chief Medical Officer*, G. W. A. Lynch, 700*l.*–800*l.*, with quarters and horse allowance.

*Senior Medical Officer*, A. Montague, 450*l.*–550*l.* with quarters and horse allowance.

*Medical Officer of Health and Port Officer*, G. C. M. Davies, 450*l.*–550*l.* with quarters and horse allowance.

*District Medical Officers*, E. G. E. Arnold, A. W. Campbell, R. F. de Boisierre, B. M. Wilson, W. M. Ramsay, G. H. Hustler, J. W. Hunt, P. Harper, W. H. Bomford, V. W. T. McGusty, W. N. A. Paley, 300*l.*–500*l.* and quarters, with private practice; C. R. M. Pattison, A. R. Maclurkin, W. H. Vincent, A. J. Borg, 350*l.*–500*l.* and quarters, with private practice.

*Medical Officers with Judicial Powers*, H. Macdonald and T. R. St. Johnston, 250*l.*–350*l.*, and 250*l.* as *District Commissioner.*

*Pharmacist, Analyst, and Medical Storekeeper*, R. E. Wright, 250*l.*-300*l.*
*2nd Class Clerk*, B. St. J. Fisher, 250*l.*-300*l.*
*5th Class Clerk*, Miss H. A. Walker, 100*l.*-150*l.*
*8th Class Clerk*, Savenaca Daucina, 35*l.*-50*l.*
*Native Assistant, Pharmacy*, Amoni Bari, 30*l.*-50*l.*
*Native Assistant, Laboratory*, Savenaca Tamaibeka, 30*l.*-50*l.*
*Veterinary Surgeon*, G. Broom, 500*l.*
*Caretaker, Quarantine Station*, J. Sadlier, 100*l.*-150*l.*
*Sanitary Inspector, Central Board of Health*, J. S. Macnair, 200*l.*-250*l.* and horse allowance.
*Sanitary Inspectors (Rural)*, A. E. S. Howard, G. G. Kermode, G. L. McLeod, F. Leans, D. P. Cantlon, R. F. Swinbourne, 50*l.* each; receive also salary as *Sub-Inspectors of Constabulary*, 200*l.*-250*l.*, and *Inspectors of Constabulary*, 250*l.*-300*l.*

COLONIAL HOSPITAL, SUVA.

*Resident Medical Superintendent*, The Senior Medical Officer.
*Matron*, Miss M. C. Anderson, 75*l.*-125*l.*; receives also 25*l.* as *Matron, Public Lunatic Asylum*, with quarters, board and uniform.
*Senior Staff Nurse*, Miss E. P. Anderson, 60*l.*-85*l.*; receives also 10*l.* as *Staff Nurse, Public Lunatic Asylum*, with quarters, board and uniform.
*Junior Staff Nurse* (vacant), 60*l.*-75*l.*, with quarters, board and uniform.
*Graduate Nurse*, Miss G. Morrison, 60*l.*, with quarters, board and uniform.
*Pupil Nurses*, Miss E. Low, Miss A. Caddow, Miss M. Kaad, Adi V. Q. Madraiwiwi, 36*l.*-48*l.*, with quarters, board and uniform.
*Steward*, C. A. Brabant, 100*l.*-150*l.*, with quarters and uniform; receives also 50*l.* allowance in lieu of board, and 30*l.* as *Clerk*.
*Dispenser*, Matereti Saganatotoka, 30*l.*-50*l.*, with quarters, board and rations.
*Housekeeper*, Mrs. L. Burrows, 72*l.*, with quarters, board and uniform.

LEVUKA BRANCH HOSPITAL.

*Medical Superintendent*, The District Medical Officer, Levuka.
*Nurse*, Miss E. Vickers, 60*l.*-85*l.*, with quarters, board and uniform.
*Dispenser*, Nemani Wakaya, 30*l.*-50*l.*, with quarters and rations.

LEPER ASYLUM.

*Medical Superintendent*, F. Hall, 600*l.*-700*l.* with furnished quarters.
*Assistant Medical Superintendent*, H. K. Marshall, 400*l.*-500*l.*, with furnished quarters.
*European Warder*, F. Chambers, 200*l.*-250*l.*, with furnished quarters.
*European Mechanic*, W. Hayes, 200*l.*-250*l.*, with furnished quarters.
*European Nursing Sisters*, Mary Agnes, Mary Susanna, Mary Clement, Mary Pia, Mary Estelle, Mary Bechman, 40*l.*, with quarters, board and uniform.
*Clerk, Interpreter and Canteen-keeper*, Balwant Singh, 50*l.*-75*l.*, with quarters and ration allowance.

PUBLIC LUNATIC ASYLUM.

*Superintendent*, The Senior Medical Officer.
*Head Attendant*, G. R. Anderson, 100*l.*-150*l.*, receives also 50*l.* allowance in lieu of board, and personal allowance 25*l.*, with quarters.
*Female Resident Attendant*, Mrs. A. Dobell, 50*l.*-75*l.*, receives also 50*l.* allowance in lieu of board, with quarters and uniform.

EDUCATION DEPARTMENT.

*Superintendent of Schools*, G. Mackay, 500*l.*
*Headmaster, Lau School*, D. W. Hoodless, B.Sc., 300*l.* and quarters.
*Headmaster, Boys' Grammar School, Suva*, G. E. Johns, B.A., B.Sc., 500*l.*
*Assistant Masters*, W. S. McNiven, B.A., 350*l.*; J. Wales, B.A., 300*l.*
*Headmistress, Girls' Grammar School, Suva*, M. Maben, M.A., 300*l.*
*Assistant Mistresses*, M. McPherson, 200*l.*; M. Forster, 120*l.*; M. Grieve, 110*l.*
*Headmaster, Levuka Public School*, C. Garner Jones, 400*l.*
*Assistant Mistresses*, K. Hathaway, 165*l.*; M. Clough, 150*l.*; M. Morrison, 145*l.*
*Headmaster, Queen Victoria Memorial School*, E. D. Laborde, B.A., 400*l.*-500*l.* and quarters.
*Assistant Master*, W. T. Harragin, 200*l.*-300*l.* and quarters.
*First Native Assistant* (vacant), 72*l.* and quarters.
*Second Native Assistant*, Opetaia Dreketirua, 48*l.*-60*l.* and quarters.

POSTAL DEPARTMENT.

*Colonial Postmaster*, H. P. St. Julian, 400*l.*-500*l.*
*1st Class Clerk*, A. Gray, 300*l.*-400*l.*
*2nd Class Clerk*, W. Hayward, 250*l.*-300*l.*
*3rd Class Clerk*, E. W. Mathews, 200*l.*-250*l.*
*4th Class Clerk*, J. E. Woodhouse, D. F. McCaig, 150*l.*-200*l.*
*5th Class Clerks* S. L. B. Nicol, C. V. Garnett, W. E. Nelson, A. E. Beddows, Miss G. I. Hayward, 100*l.*-150*l.*
*6th Class Clerks*, C. O. Taylor, D. E. A. Wilkinson, 75*l.*-100*l.*
*8th Class Clerks*, Tevita Gavoula, Levani Matea, Mathura Singh.
*Postmaster, Levuka*, W. M. Caldwell, 250*l.*-300*l.*
*4th Class Clerk*, W. A. Ragg, 150*l.*-200*l.*
*6th Class Clerk*, L. H. L. Osborn, 75*l.*-100*l.*
*Postmaster, Lautoka*, S. Yeates, 200*l.*-250*l.*
*6th Class Clerk*, J. A. Clark, 75*l.*-100*l.*

TELEGRAPH AND TELEPHONE DEPARTMENT.

*Superintendent*, C. C. F. Monckton, 500*l.*-600*l.* and house allowance, 50*l.*
*Assistant Engineer*, W. G. Covell, 300*l.*-400*l.*, and motor cycle allowance, 30*l.*
*1st Class Clerk*, T. J. Davis, 300*l.*-400*l.*
*4th Class Clerk*, F. Thomas, 150*l.*-200*l.*

*Church of England*, Right Rev. T. C. Twitchell, D.D., Bishop of Polynesia, Rev. R. T. Mathews (Suva), Rev. A. A. Sale (Levuka).
*Roman Catholic*, Monseigneur Julian Vidal, Bishop of Abydos (in partibus).
*Presbyterian*, Rev. W. C. Moulton.
*Wesleyan Methodist*, Rev. A. J. Small, Chairman.

## THE GAMBIA.

*Situation and Area.*

The Gambia is a great river of Western Africa, falling into the Atlantic Ocean by a large estuary measuring in some parts nearly 27 miles across, but contracting to 10 miles between Bird Island and Cape St. Mary, and to little more than two between Barra Point and the town of Bathurst on St. Mary's Island. There are 26 feet of water over the bar of the river at low tide, and ocean-going steamers drawing no more than 13 feet can at present proceed without trouble to MacCarthy Island. The town of Bathurst, 13° 27′ N. lat., 16° 34′ W. long., is situated on St. Mary's Island, a sandbank about three and a half miles long and a mile and a quarter broad, separated from the mainland by a narrow channel called Oyster Creek. It is an exceptionally clean town, and this fact was specially commented upon by the Commission sent out by the Liverpool School of Tropical Medicine. Bathurst is the seat of Government. A large portion of the island is a swamp, the level of which is in many parts below that of the river.

The Colony on the river Gambia consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, the territories of Brefet and Bajana, and MacCarthy Island, situated between the Falls of Barraconda and Bathurst, and 158 miles distant from the latter. This island forms the line of demarcation between those portions of the river known as the Upper and Lower River. The total area of the Colony proper is about 69 square miles (equal to Jersey and Guernsey). The Protectorate extends on both banks of the river for 250 miles from its mouth. But by an ordinance No. 7 of 1902 (repealed and replaced by Ordinance No. 30 of 1913) all parts of the Colony, except the Island of St. Mary's, were placed under the Protectorate system of administration. The Island of St. Mary's has an area of about 2,500 acres, the greater part of which is swampy, and a population of 7,700. The territory administered as Protectorate is approxi-

Digitized by Google

mately 4,000 sq. miles, and has an estimated population of 152,000. A survey of the boundaries dividing the Gambia from Senegal was completed by the Anglo-French Boundary Commission in 1905.

*History.*

The Gambia was discovered by the early Portuguese navigators, but they made no settlement.

In 1588 a patent was granted by Queen Elizabeth to some merchants in London and Exeter to trade with the Gambia. This Company did not prosper. Its voyages were not slave trading ventures but were made for legitimate commerce. In 1618 King James I. of England granted a charter to Sir Robert Rich and other London merchants. Their enterprise was entitled "The Company of Adventurers of London trading in Africa," and Fort James was built by them on a small island 17 miles above the island of Banjola (now St. Mary's). Fort James was abandoned after the abolition of the slave trade, but it is a landmark in the history of West Africa. It is being washed away gradually.

About the year 1631 another British chartered company was formed, King Charles I. having granted a charter to Sir B. Young, Sir R. Digby and others. This venture was responsible for supplying British settlements in the West Indies with slaves for working on the estates.

In 1662 King Charles II. granted a charter to a third company, known as the "Royal Adventurers of England trading in Africa." A few years later this company exhausted its capital and surrendered its charter. In 1672 a fourth company was incorporated under the name of the "Royal African Company," and it was not until 1783, after having in its early days reached the highest point of commercial prosperity which had been touched by England in Africa, that it was superseded by the "Company of Merchants." This company was formed with the consent of Parliament, after the right of trade had been abandoned to England by France under the treaty of Versailles, which guaranteed to the English their possession of Fort James and of the River Gambia, with the exception of a French factory established at Albreda on the north bank of the river. The same treaty gave the Senegal river to the French, with the exception of an exclusive right to trade with the Arabs at Portendic for gum, which was retained by England. The year 1807 saw the abolition of the slave trade, and though the "Company of Merchants" lingered on with an annual subsidy, the general commerce between Great Britain and Gambia fell off till 1816, in which year a new settlement was formed on the island of Banjola by the English merchants, who resided at Gorée and in Senegal until those places were given up to the French by the Treaty of Paris (1814). The island was re-named "St. Mary's," and the town which was laid out took its name from Lord Bathurst, Secretary of State at that time. The streets to be inhabited first were named after Lord Wellington and his generals at Waterloo, with one named "Blucher."

The settlement was subject to the Government of Sierra Leone, and was annexed to it by Act of Parliament in 1821. From 1816 to 1829 a Military Commandant, aided by a Board of Merchants, administered the government.

In December, 1829, the Secretary of State appointed Lieut.-Colonel Alex. Findlay, R.A.C. Corps, as Lieutenant-Governor (the first) "of the settlement of Bathurst and its dependencies in the Gambia." The laws of Sierra Leone remained in force, but the Lieutenant-Governor was not accountable to the officer administering the government there.

In 1831 a Liberated African Department was formed, with headquarters at MacCarthy Island.

The Gambia, in the year 1843, was created an independent Colony, with a Governor and Executive and Legislative Councils for the administration of its affairs. Mr. H. P. Seagram was the first Governor of the Colony.

By the charter of 19th February, 1866, it became a portion of the Government of the West African Settlements, and continued to be so under the charter of the 19th December, 1874, until it was made a separate Government in 1888.

MacCarthy Island was purchased in 1823, and named after Maj.-General Sir Charles MacCarthy, K.C.B., Governor-in-Chief of the British West African possessions; the ceded mile was granted by the King of Barra in 1826; and British Kombo was granted by the King of Kombo in various cessions in 1840, 1850, and 1855.

An Infantry Militia Force was raised in 1862 for special service in Kombo. Turbulent times had been experienced in the Gambia, due to tribal warfare between the Marabouts and Sonninkis, caused by religious differences. The term "Marabout" is given to the true followers of the Mohammedan faith; the Sonninkis being so called on account of their belonging to no faith and being addicted to drinking. Heavy fighting took place between these people throughout the country, and it was not until the Protectorate was established in 1894 that peace became possible. The chief Marabout leaders were Mahaba (1861-7), Mahmud Deri Ba (1867-87), Fodi Kabba (1877-92), and Fodi Sila (1873-94).

A system which obtained in the interior was the ancient method of "custom," presents which had to be made to the Chiefs and Headmen before legitimate trade could be carried on by the merchants. This was as far as possible put a stop to by the Government, these "customs" being superseded by "stipends" such as still continue in operation.

In 1894 Chief Fodi Silla, of Foreign Kombo, became so aggressive in stopping and robbing traders that it was decided to send an expedition against him. At this time Brikama, Gunjur, Sukuta and Busumballa were the principal places in the occupation of Fodi Silla and his people. The force, which comprised officers and men from the ships of war present, and from the West India Regiment, proceeded into Kombo. Fodi Silla was defeated and his strongholds destroyed. He fled to French territory, was captured and deported to Saint Louis, where he died.

In 1897 the countries of Foni and Jarra, on the south bank of the river, came under British protection, and it became necessary for the Government to suppress the marauding Chief, Fodi Kabba, who was causing trouble north of the Vintang Creek, 26 miles from Bathurst, and proceeding eastwards worrying the people. An expedition was sent against him, and he fled to French territory, where he formed a stronghold at Medina, his followers on British soil being completely routed.

Foreign Kombo was annexed by the British Government and is now divided into North, South and Central Kombo.

Digitized by Google

The Protectorate system of administration has been established since 1894, and extended from time to time by agreement with the different chiefs concerned, until Ordinance No. 7 of 1902 was passed, providing fully for the Government of the whole Protectorate, which is divided into five Provinces and again into Districts. There is a Travelling Commissioner in each Province, and each District is under a Head Chief, with a native tribunal specially appointed by the Governor.

The Provinces are as follows:—North Bank Province, with the districts of Lower Niumi, Upper Niumi, Jokado, Lower Baddibu, Central Baddibu, Upper Baddibu, 110 miles in length. MacCarthy Province, with the districts of Upper Niani, Sami, Lower Niani, Nianija, Upper Saloum, Lower Saloum, 85 miles in length. Upper River Province, with the districts of Sandu and Wuli on the North bank, and Kantora, Fulladu East, and Fulladu West on the south bank of the river, 150 miles in length. South Bank Province, with the districts of Eastern Niamina, Western Niamina, Niamina (Dunkunku), Central Jarra. Eastern Jarra, Western Jarra, East Kiang and Central Kiang, 70 miles in length. Kombo and Foni Province, with the districts of Western Kiang, Foni Karenai, Foni East Kansala Bondali, Bondali and Ja Wol; Foni West, Bintang, and Brefet; Kombos East, Central, South, North, and Kombo St. Mary, 85 miles in length.

In 1900 further trouble arose between the Marabouts and Sonninkis of the towns of Sankandi and Battelling, over the ownership of some rice fields. Two travelling Commissioners, Mr. Sitwell and Mr. Silva, with an escort of a sergeant of police and ten constables, proceeded to Sankandi with the object of settling the trouble; but unfortunately, owing to the treachery of the Headman, Dari Bana Dabu, both the Commissioners, the sergeant and five constables were killed.

On the arrival of Sir George Denton in 1901, it was decided to send a punitive expedition against these people, and Colonel H. E. Brake was selected to command. After a short resistance the participators in the revolt were crushed and their town destroyed. Certain of the ringleaders of the disturbance fled and joined Fodi Kabba at Medina. Concerted action with the French Government of Senegal was taken however, and on the 23rd March, 1901, Medina was demolished and Fodi Kabba killed. Three other ringleaders were subsequently captured by the French, handed over to the British Government, tried and sentenced to death in the Supreme Court, and executed at Dumbuta, a large village near the scene of the murder of the two Commissioners.

*Inhabitants of the Gambia.*

The inhabitants are mostly of the negro race, the chief tribes being the Jollofs, Mandingos, Sarahulis, Fullas and Jolas. The country of the Jollofs is on the North Bank or Senegal side of the river, and they form a large portion of the community in the town of Bathurst. As a race they are very proud, and claim for themselves a very ancient descent.

The Mandingos are the most numerous people on this portion of the African coast, and derive their name from Manding, a town some 700 miles inland and towards the boundary of the Colony of Sierra Leone. They are mostly Mohammedans.

The Jolas come from Foni, between the southern limit of Kombo and on the north bank of the Cassamance River. Their country runs in a north easterly direction towards the south bank of the Gambia River as far as the mouth of the Vintang Creek. They are pagans and a wild uncivilised tribe.

The Sarahulis are the most recent arrivals in the Gambia having migrated from the interior of Senegal. They are chiefly found in the eastern portion of the Upper River where they have established fairly large villages. They are all Mohammedans.

The Fullas (not the pure race, the nomads of West Africa) are good farmers and herdsmen. Their features are somewhat of the Asiatic type and their skins of a lighter colour than negros. The capital of the Fulla country is Timbo in Futta Jallon, and is situated in north latitude 10° 38′ and west longitude 11° 10′.

*Industry.*

There are no mines in the Colony, but in several places in the Protectorate iron ore is to be found in large quantities, although not worth exportation.

A small quantity of cotton is grown, but only for local consumption, and it is made into narrow strips of rough coloured cloth, common to all West Africa. The strips average 27 yards in length and 9 inches in width.

There is a good deal of boat building and repairing carried out. Most of the cutters used in the ground nut trade have been built in the Colony, and there are a number of expert shipwrights in Bathurst.

Pottery is made in the Upper River Province. A considerable amount of excellent leather is produced from goat skins. It is however not exported but utilised by the people in making bags, slippers, sandals, scabbards, saddles and horse trappings, and the skilful manner in which coloured grasses, silk cotton, etc., are laced through the decorative portion of the leather work is common to most of Mohammadan West Africa. Each town or village usually has a "Koranki" man, or leather worker.

There is an abundance of fish in the lower reaches of the Gambia River, and large quantities are dried and taken each season into the Protectorate for sale. Quantities of oysters are obtained in the creek, and are cooked by the people for food, the shells being made into native lime.

The ground nut is the staple article of cultivation, the people devoting their whole attention to this product, growing, in comparison, but small quantities of rice and corn for their own consumption.

Ground nuts pay the producer on an average £4 to £6 per acre, and, beyond the sowing of the seed and an occasional hoeing, give the farmer very little trouble, and he knows that there will be no difficulty in disposing of his crop, and therefore prefers cultivating this to any other economic product known to him.

There is in Bathurst a fair supply of vegetables such as garden eggs, sweet potatoes, tomatoes, ochras, cassada, peppers, native spinages, etc., and it is possible to procure lettuces, cabbages, carrots, turnips and beans from December to May at a price.

Pawpaws, limes, oranges, bananas and mangoes are obtainable at different times of the year and in a very limited quantity.

Digitized by Google

Maize, guinea-corn, palm kernels, india-rubber and wax are also produced in the Protectorate, and a great number of medicinal roots and herbs are to be found, samples of which can be seen at the Imperial Institute. There is no timber in the country suitable for exportation.

A considerable trade is done with the French settlements and the adjoining coast districts in cotton goods, spirits, tobacco, rice, and hardware.

Large quantities of kola nuts are imported from Sierra Leone.

*Relations with the Interior.*

Since the delimitation of the boundary of the Protectorate by the Anglo-French Commissioners in 1891, steps have been taken to bring the inhabitants of the Protectorate gradually into closer relationship with the Government of the Colony. An Order in Council, issued on the 23rd of November, 1893, provided for the establishment of Her Majesty's jurisdiction within the Protectorate, and since then Ordinances have been passed providing for the establishment of magistrates and also native courts.

Travelling Commissioners regularly, during the eight months of dry weather, travel through the Protectorate on both banks of the river for 250 miles, and in Kombo and Foni. A "yard" or "hut" tax, which averages about 4*s*. per annum for a family, is imposed in the Protectorate.

*Currency and Banking.*

The legal tender and usual currency was till 1913 British sterling, but a great number of French 5 franc pieces are in circulation, the estimated value of which is 150,000*l*. and these are normally received at an exchange value of 3*s*.10½*d*. For trade purposes, however, they realise 4*s*. each. Bank of England notes are not legal tender but are accepted by the Bank of British West Africa—the only Bank in Bathurst. The circulation, however, is very small, amounting probably to only some 750*l*. A new silver coinage was minted for all West African Colonies and Protectorates for local circulation, and introduced into the Gambia towards the end of 1913. British sterling coins remain legal tender. There is also a little French gold in the Colony. Currency notes of the values of 20*s*., 10*s*. and 2*s*. were introduced in 1918.

The average rate of exchange for bills drawn on London during the year was one per cent.

A Government savings bank was established in 1886, and had on 31st Dec., 1916, 5,207*l*., deposited by 630 persons.

*General Land Values.*

The value of land in the important parts of Bathurst has greatly increased of late years, and it is impossible to accurately estimate the value of it in the main thoroughfare. In the adjoining streets 200*l*. per acre would probably be a fair price.

In the back streets, plots of about a quarter of an acre fetch 12*l*., and in the outlying portion of the town, without any filling up, they are worth from 4*l*. to 8*l*.

The Government rights in open spaces which hitherto were sold by Public Auction are being retained.

Land in the Protectorate can be obtained from the Chief of a district for purposes of farming with the sanction of the Governor. Small lots suitable for trading stations may be rented for 3*l*. per annum and upwards. Freehold interests in Crown lands in the Colony are not disposed of except in special circumstances. No leases are issued in the first instance of lands either in the Colony or Protectorate for a longer period than twenty-one years.

*Education.*

The Christian schools, which are wholly in the hands of the several denominations, receive grants-in-aid. Of ordinary elementary schools in Bathurst, there are one Anglican, two Wesleyan and two Roman Catholic, with 1,279 scholars in all. Education is not compulsory, and fees are charged. There is also a Wesleyan High school for boys, under native control, with 25 pupils. In addition, the Wesleyan Society maintain a technical school, with 17 pupils, on undenominational lines, to which the Government contribute 350*l*. a year; and there is also a Mohammedan school with 124 pupils, at which the ordinary rudiments of an English and Arabic education are taught, the upkeep of the premises and the payment of the teachers being borne by the Government, the native Mohammedan community contributing a small fixed annual sum. At MacCarthy Island there is an elementary Wesleyan school with 69 pupils, and also a Roman Catholic school with 45 pupils. The number of pupils on the rolls of all the Government aided schools in 1916 was 1,534, the largest figure on record.

*Means of Communication.*

Communication between the Colony and Europe is effected by the steamers of the African Steamship Co. (Messrs. Elder Dempster & Co.), which nominally run fortnightly between Liverpool and Bathurst. Steamers of the Messageries

Digitized by Google

Maritimes sail to and from Bordeaux and Dakar fortnightly, and Dakar being only 90 miles from Bathurst, passengers often join these steamers there, and get to Europe in eight days.

The cost of the passage by the vessels of Messrs. Elder Dempster & Co., is 35*l.* 4*s.* first class, and 25*l.* 6*s.* second.

Internal communication is comparatively easy for West Africa, most of the important firms having steamers or launches which make frequent trips during the trading season up the river; these vessels are ready to accept any passengers or freight which may offer. The cost of a passage to MacCarthy Island, 158 miles from Bathurst, is 1*l.* 5*s.* first class, and 12*s.* deck.

Telegraph cables place Bathurst in communication with Europe and West Africa. The Admiralty erected a wireless station in the first half of the year 1915, at Cape St. Mary. There are no railways, internal telegraphs, or metalled roads, save one from Bathurst to Cape St. Mary, 7½ miles across the Oyster Creek Bridge, which connects the island of St. Mary with the mainland of British Kombo. Horses will live, and the river forms an unrivalled highway for 300 miles. The roads (unmade) in the Protectorate are kept clear, and light traps or bicycles could pass along in those districts which are free from swamps.

A few motor cars are in use in and around Bathurst.

The rules of the Postal Union have been adopted by the Colony and its Protectorate.

The following are the rates of postage:—

| | Letters. | Newspapers. |
|---|---|---|
| Internal, | 1*d.* per 2 ozs. or fraction thereof. | ½*d.* per 2 ozs. or fraction thereof. |
| United Kingdom, India, Egypt, and all British Dominions, also British Postal Agencies in Morocco and China. | Letters, 1*d.* per oz. or fraction thereof. | Books, ½*d.* per 2 ozs. |

Other Countries—Letters, 2½*d.* for the first 1 oz., and 1½*d.* for each succeeding oz. or fraction thereof.

Books, ½*d.* per 2 ozs. or fraction thereof.

Parcels Post. If posted at places within the Colony and Protectorate for delivery therein.

For every pound or fraction thereof, 3*d.*

If addressed to the United Kingdom or British Colonies in West Africa:—

Not over 3 lbs. in weight, 1*s.*

Over 3 lbs., but not over 7 lbs. 2*s.*

Over 7 lbs., but not over 11 lbs., 3*s.*

There is no direct parcel post scheme at present with foreign countries. All parcels are forwarded through the medium of the General Post Office, London, a small additional charge being made for onward transmission.

The Revenue for the Post Office is derived from the sale of stamps, poundage on Money and Postal Orders and the rent from private boxes, &c.

*Climate.*

The climate of the Gambia during the dry season from the end of November to the middle of May is pleasant and fairly healthy. But during the wet season—June to October—the conditions are much the same as elsewhere on the West Coast of Africa, though the change from excessive dryness to the damp atmosphere so prevalent in the Gulf of Guinea probably makes them more felt. In the interior from March to June it is intensely hot.

The lowest reading of the thermometer in the shade during 1916 was at Bathurst 58° in January, the highest recorded temperature being 98° in April, but at MacCarthy Island the shade maximum was 114° in May.

The rainfall during the year in Bathurst was 38·02 inches. The rainfall varies considerably; the average is 50 inches.

*Portugal*, Hon. J. Howie, *Consul.*
*Spain*, Hon. J. Howie, *Vice-Consul.*
*Norway*, P. Bourquin, *Consul.*

All European officers are provided with furnished quarters.

## GIBRALTAR.

*Situation and Area.*

Gibraltar is a narrow peninsula running southwards from the south-west coast of Spain, in N. lat. 36° 6′ 30″, and W. long. 5° 21′ 12″. It consists of a long high mountain called "The Rock," and a very flat sandy plain to the north of it, raised only a few feet above the level of the sea, and called the North Front. Its greatest elevation is 1,439 feet, its length 2¾ miles, and its greatest breadth ¾ of a mile. Its area is 1⅞ square miles.

*History.*

The rock of Gibraltar, the Mons Calpe of the ancients, remained under the dominion of the Moors until the 15th century, when it was incorporated with the Spanish kingdom of Granada. It was captured by the British forces under Sir George Rooke, 24th July, 1704, and was ceded by the Treaty of Utrecht in 1713. The Treaty of Utrecht was renewed by Article 2 of Treaty of Versailles, 1783. It was successfully defended by Gen. Eliot (afterwards Lord Heathfield) in the great siege of 1779-83.

*General Description.*

The promontory forms one side of a bay, called the Bay of Gibraltar, which is about 4 or 5 miles across, and affords good anchorage for the shipping passing through the Straits. The eastern and northern faces of the Rock are an inaccessible precipice rising abruptly from the sea and the sandy plain known as the North Front, which lies between Gibraltar and the Spanish town of La Linea; from the northern end the Rock runs along southward like a knife edge to the ancient site of O'Hara's Tower, from which it slopes gradually till it terminates in a perpendicular cliff about 100 feet high at the water's edge at Europa; these cliffs are continued along the western face to the New Mole, beyond which the fortress is protected by artificial ramparts. Behind these latter lies the larger portion of the town, covering an area of only ¾ by ¼ mile. It is one of the most thickly inhabited places in the world, but it is not unhealthy. Between this part of the town and the southern portion is a picturesque public garden, called the Alameda. The civil population in the southern part of the town is confined to the east and south-east of the New

Digitized by Google

Mole, the remainder of the southern portion of the Rock being entirely taken up with barracks, hospitals, &c., for the Military and the Navy.

Gibraltar is extensively used as a port of call and coaling station by shipping, and it is also an *entrepôt* of the trade between England and the Arabian states of Northern Africa, for which it has many advantages, having been ever since its occupation by the British a free port, or practically so.

The naval harbour is on the West side of the Rock. It has been completed recently, and is formed by three separate Moles known as the "North," "Detached" and "South" Moles. The North Mole runs westward from Devil's Tongue for about 2,900 feet, and then southward, giving a total length of over a mile. The South Mole projects into the sea for a distance of 3,660 feet in a north-westerly direction. The Detached Mole, 2,717 feet long, is so situated between these two Moles as to form a breakwater and leave two means of entrance and exit. The harbour contains a water area of 440 acres. There are three large graving docks for naval purposes, and a small dock which is available for merchant vessels of light draught.

The old wharf at Waterport has now been extended and improved by the addition of a new mole, which has been provided with electrical cranes and other equipment which will facilitate the handling of cargo.

About 450 persons are employed in tobacco manufactories, and about 1,200 in the coal depôts. It is a port of registry, having, on 31st December, 1916, 78 vessels, of together 12,020 tons (gross). No statistics of imports or exports are taken, except of wine, spirits, beer and tobacco.

The revenue is derived from port dues, the rent of the Crown estate in the town, duties upon wine, spirits, beer, and tobacco, and licence duties and fees.

There is no executive council nor any legislative body. The Governor, who is also the General commanding the garrison, exercises by himself all the functions of government and legislation. The management of the drainage, water supply, &c., is in the hands of a nominated body, called the Sanitary Commissioners. Their receipts for 1916 were 71,645*l.*, their expenditure 72,072*l.*, and their debt, on the 31st of Dec., 1916, 193,827*l.* and pesetas 1,107,500.

There is a branch of the Anglo-Egyptian Bank, and several private bankers.

A Government savings bank was founded in 1882, and had on 31st Dec., 1916, 186,909*l.*, and pesetas 208,973., deposited by 4,643 depositors. Since the 1st Oct., 1898, the legal tender currency has been that of the United Kingdom, and the public accounts are now kept in it, but Spanish money is still freely current. The change from Spanish currency, which had previously been the legal tender, was effected under the provisions of the Orders in Council of the 9th of August, 1898. By the Bank Note Ordinance, 1914, the currency includes bank notes issued by the Government of Gibraltar. These notes are of the value of 50*l.*, 5*l.*, 1*l.*, 10*s.* and 2*s.*

There is daily postal communication with England by way of Spain and France. Rates of postage: Letters, 1*d.* per oz.; newspapers, ½*d.* The internal postage rate is ½*d.* per ½ oz. Also direct telegraphic communication with Spain, and by cables to Tangier, Malta, Lisbon, and Cadiz.

Education is compulsory since the 1st of June, 1917. There are fifteen elementary schools, subsidised by Government, and several private schools, the number of scholars in average attendance being 2,289 for the school year ending 31st March, 1917. The Government-aided schools are for the most part managed by boards of the different denominations, and small fees are charged.

# THE GOLD COAST.

## THE GOLD COAST COLONY.

### *Situation and Native Tribes.*

The Gold Coast Colony, with Ashanti and the Protected Northern Territories, is situated on the Gulf of Guinea, between 3° 7′ W. long. and 1° 14′ E. long., and is bounded on the west by the French colony of the Ivory Coast, on the east by Togoland, on the north by the French Soudan, and on the south by the sea.

The area of the Colony is 24,200 square miles, of Ashanti, 20,000, and of the Northern Territories, 35,800.

The country is inhabited by a large number of native tribes more or less independent of each other, but with similar customs and forms of government. Each tribe has its own head chief and every town or village of the tribe a chief.

The chiefs and sub-chiefs form the council of the tribe, and assist in dealing with matters affecting its general welfare. The succession both to the king's and chiefs' stools is for the most part hereditary by the female side, the heir to the stool being the son of the occupant's eldest sister, or failing male offspring by his sisters, his brothers according to seniority, and back from them to the male offspring of his aunts on the father's side.

The principal coast tribes are the following:—Appolonia, Ahanta, Chamah, Commendah, Elmina, Cape Coast or Fanti, Winnebah, Assin Gomoa, Accra, Adangme, Awuna, Agbosome and Aflao. Some of these, on account of tribal differences, are split up into divisions more or less independent of each other, and as education and civilisation spread, a tendency to further disintegration develops itself.

In the interior the principal tribes are:—Aowin, upper and lower Wassaw, Sefwi, upper and lower Denkera, Tufel, Assen, Esikuma, Ajumako, Akim Abuakwa, and Akim Kotoku, Akwapim, eastern and western Krobo, Akwamu, Krepi, Shai, Ningo, Kriko.

For the purposes of administration the Colony is divided into three provinces, each presided over by a Provincial Commissioner. These Provinces are further divided into districts, presided over by District Commissioners. All these Officers not only perform judicial duties as magistrates, but also are in administrative charge of their district. The districts are as follows:—

1. Western province:—Districts—Axim, Ankobra, Tarquah, Seccondee, Dixcove, Sefwi and Aowin.
2. Central province:—Districts—Cape Coast, Saltpond, Winnebah.
3. Eastern province:—Districts—Accra, Birrim, Akwapim, Volta River, Addah, Quittah.

### *History.*

The Gold Coast, with the adjacent territories bordering on the Gulf of Guinea, first became known to Europeans by the enterprise of Portuguese and French navigators in the 14th century. The first European Settlement on the Gold Coast was in 1482, when the fort San Jorge da Mina (Elmina) was built and garrisoned by the Portuguese, who subsequently made several other settlements, and obtained Papal authority for their occupation of the country. During the reign of Elizabeth of England, the Dutch established themselves on the coast, and their rivalry was so successful that they eventually terminated the Portuguese occupation by the capture of Elmina in 1637, and of Fort Anthony at Axim in 1642. The first English Expeditions to the Coast were made in the reign of Edward I., but were all of the nature of private ventures. The "Company of Adventurers of London trading into Africa" incorporated in 1618, led to the establishment of the first British Settlement at Cormantyne. A second company was formed in 1626, and a third in 1662, and settlements were made at Cape Corso (Cape Coast), Anamabu, and Accra, the main object of these companies, as well as those of the other European nations, being traffic in slaves. Three other European nations succeeded in acquiring territories on the Gold Coast, viz.:—The Swedes, the Brandenburghers, and the Danes. The first-mentioned built the fort of Christiansborg, near Accra about 1645, but were driven out by the Danes in 1657, and retired from the Coast. The Brandenburghers established "Fort Great Fredericksburg" at Princes River in 1682, and "Fort Dorothea" at Akwada in 1685, but their enterprise does not seem to have been prosecuted with much vigour, and was finally abandoned in 1720, their possessions falling into the hands of the Dutch. The Danes, however, after first selling the Fort at Christiansborg to the Portuguese, and re-buying it three years later, rapidly improved their position, building forts at several stations to the East of Accra, as far as Addah and Quittah, and exercising a kind of Protectorate over Akwapim, and the Volta River district.

The third English Company was not successful. The Dutch traders spared no efforts to get rid of their rivals, and in consequence of their aggression, an expedition was sent by Charles II. in 1663, under the command of Captain Holmes, which recaptured Cape Coast, taken a few years previously by the Dutch, and all the other Dutch forts, with the exception of Elmina and Axim. In the following year, however, the Dutch Commander de Ruyter recaptured all the lost Dutch forts, with the exception of Cape Coast; and the treaty of Breda, 1667, left affairs in the Gold Coast in this condition. The fourth English Company was incorporated in the year 1672 under the name of the "Royal African Company of England." Under its influence English interests steadily advanced, and forts were established at Dixcove, Seccondee, Commendah, Anamabu, Tantumquerry, Winnebah, Accra. The abolition of the exclusive privileges which the Royal African Company enjoyed, led to its decline and eventual dissolution in 1752. By the Acts of Parliament 23 George II., c. 31, and 25 George II., c. 40, a fifth trading Corporation, called the "African Company of Merchants" was formed, the membership of which was open to all British traders on payment of a fee of 40/-, compensation being paid for its charter, and property to the Royal African Company. An annual subsidy was granted by Parliament to the newly-formed Company, until 1821, when by the Act 1 & 2 George IV., c. 28, the Company was dissolved and its possessions vested in the Crown, and placed under the Government of the West African Settlement, the seat of government being at Sierra Leone.

In 1824, the Governor of Sierra Leone, Sir Charles Macarthy, on visiting Cape Coast Castle, found the neighbouring country of the Fantis in possession of the Ashantis. He formed the resolution of inciting the Fantis against their oppressors, and led an army of them, with a few

Digitized by Google

disciplined soldiers, against the Ashantis at Ensimankao, where, on the 24th of January, 1824, he was killed, and his force totally routed.

The war which ensued was ended by the victory of the English at Dodowa, near Accra, in 1827. Peace was formally concluded by a tripartite Treaty in 1831, between the English, the Fantis, and the Ashantis.

In the meantime, Her Majesty's Government had inclined to the policy of retiring from the coast altogether, and after the peace they actually transferred the government of the forts to the local and London merchants interested, who secured as their Governor Mr. George Maclean, a man of marked energy and capacity. This gentleman, with a force of no more than 100 men at command, and with a Government subsidy of only 4,000*l.* a year, contrived to extend and maintain the influence of his Government over the whole tract of country now known as the Gold Coast. In 1843, it having been suspected that the Merchant Government connived at the slave trade, the forts were resumed by the Crown, and a Lieutenant-Governor appointed. Mr. Maclean was continued in the direction of native affairs, under the title of Judicial Assessor to the Native Chiefs, which post he held until his death in 1847.

Hitherto the forts of the various nations were intermixed with each other, and there was no defined limit as to where the influence of one or the other began or ended. The imposition of Customs duties was rendered difficult, if not impossible, by the existence of the free ports of a rival nation within a stone's throw, as it were, of the duty ports. On the 24th of January, 1850, by Letters Patent, the Settlements on the Gold Coast ceased to be dependencies of Sierra Leone, and in the same year, by the purchase of the forts and protectorate of the Danes, the Coast line from Christiansborg to Quittah and the districts of Shai, eastern and western Krobo, Akwapim, Akwamu, and Krepi, were acquired by England. By a Commission dated the 19th February, 1866, the Gold Coast Settlements were reunited to the Colony of Sierra Leone under one Governor-in-Chief. In 1867, a convention was made with the Dutch by which the portion of the Coast lying to the west of the Sweet River, which flows into the sea between Cape Coast and Elmina, was allotted to Holland, England taking all the territory to the east of the river, and a customs union between the two nations was established. The Dutch, however, found many difficulties in the way of their occupation of the forts and possessions received from the English in exchange for those of their own lying to the East of the boundary line. The native tribes refused to recognise their authority, and the prospect before them was that of a long series of petty wars with no reasonable hope of profit to be gained in the future. The result was the convention made between England and Holland in 1871, by which the Dutch transferred all their forts and possessions on the Coast to the English, and Great Britain obtained at last the sole sovereignty and control of the territory from Axim to the Volta. The forts were transferred on the 6th of April, 1872. The present extent and limits of the colony are defined in the Order in Council of 1906.

On the outbreak of war between Great Britain and Germany in August, 1914, the adjoining German Protectorate of Togoland was invaded by a force of the Gold Coast Regiment under temporary Lt.-Col. F. C. Bryant. After engagements at Agbelon on Aug. 16, and Chru River on Aug. 24, the Acting-Governor of Togoland surrendered with his forces to an allied force of British and French troops at Kamina on Aug. 26. The country is now being provisionally administered, under martial law, by military and political officers, seconded from the Gold Coast, and by French officers from Dahomey.

### *Constitution.*

At the conclusion of peace in 1874, measures were taken for placing the government of the Gold Coast upon a footing of efficiency and security.

A new charter was issued, dated the 24th of July, 1874, separating the settlements of the Gold Coast and Lagos from the government of the West Africa Settlements, and erecting them into one colony under the style of the Gold Coast Colony, under a Governor-in-Chief, with an Administrator at Lagos. There was one Executive Council and one nominated Legislative Council for the two settlements, and one Supreme Court. The charter of 1874 was superseded by Letters Patent dated the 23rd of January, 1883, and 13th January, 1886, respectively. By the latter instrument Lagos was separated from the Gold Coast and formed into a distinct colony. Provision was made for an Executive and Legislative Council, the members of both being nominated by the Crown. Four unofficial members were appointed to the Legislative Council.

By instructions dated 20th September, 1916, under Letters Patent of the same date, all previous instructions were revoked and the Executive and Legislative Councils were re-constituted. The Executive Council now consists of the Colonial Secretary, the Attorney General, the Treasurer, the Principal Medical Officer, and the Secretary for Native Affairs, with the Governor as President. The Legislative Council consists of the members of the Executive Council and, in addition, the Comptroller of Customs, the Director of Public Works, the General Manager of Railways, and the Commissioners of the Eastern, Central and Western Provinces, as *ex officio* members, and such unofficial members as may be appointed by the Crown. At present there are nine unofficial members, viz., three European, three Paramount Chiefs, and three other members of the native community.

The Supreme Court of the Colony was a Court of Appeal for Lagos, and also under the West African Order in Council, 1884, but legislation providing for the establishment of separate courts of appeal in each colony was passed in 1888.

### *Law and Justice.*

The Law of the Colony is the Common law, the doctrines of equity, and the statutes of general application in force in England, on the 24th July, 1874, modified by a large number of Local Ordinances passed at various periods since that date. The Criminal Law was codified in 1892, and civil and criminal procedure are regulated by the Supreme Court Ordinance passed in 1876.

Justice is administered by the Supreme Court presided over by the Chief Justice, Divisional Courts held in different parts of the colony by four puisne judges, and twenty inferior Courts with limited criminal and civil jurisdiction presided over by District Commissioners. The Supreme Court has an original civil and criminal jurisdiction, and decides appeals from the inferior courts in civil matters, while the Chief Justice has a power

Digitized by Google

of revision of the decisions of the Commissioners in criminal cases. Appeals from Divisional Courts are heard by a full court.

Native law is administered in all the Courts, in as far as it is not incompatible with any Statute or Ordinance, and not repugnant to natural justice.

The Forts of St. James at Accra, St. Jago at Elmina, and Cape Coast Castle are utilised as prisons, and a central prison has been constructed at Seccondee.

At Accra and Seccondee convicts are taught trades, remunerative industries are carried on, and the English penal system is carried out in a modified form.

*Climate.*

The climate, though hot and damp, is cooler than that of most tropical countries situated in similar latitudes. It is not in itself unhealthy; but an evil reputation has been earned for it in the past by the prevalence of mosquito-borne diseases, against which all possible precautions have constantly to be taken. The exact death rate among the non-official European population is difficult to ascertain, but the rate per 1,000 is believed to have been 7·0 in 1916. Among the European officials the death rate per 1,000 was 6·7 in 1916. No data are at hand for estimating the death rate among the natives. Infant mortality is great. The mean temperature in the shade at Accra averages 70·8 F., and was 74·17 F. in 1916. The average annual rainfall at the same place is about 30 inches, and was 41 inches in 1916. The rainfall varies with the physical configuration of the country, and is very great in Axim and the mining districts of Tarquah, Upper and Lower Wassaw, etc. The "first rains," or rainy season proper, begin in March and end in July; the "latter rains" are spread over the months of September and October. The rainy season is marked by a considerable fall in the temperature, which is found to be refreshing to many Europeans, but proves trying to some. The Harmattan season begins in December and ends in February.

*Domestic Slavery.*

Domestic slavery existed from time immemorial on the Gold Coast, as in other parts of Africa, the slave population consisting partly of native-born slaves, and partly of Donkos, slaves purchased from Ashanti importers. Slavery was mainly an emanation of parental authority, every man being saleable either by his father or mother, according to the character of the union subsisting between his parents, and the consequent *status* of the mother; but there was also a species of slavery called pawning, founded on contract, which arose when a debtor gave to his creditor, as a security, either himself, or a child or slave, to be a temporary slave in the hands of the creditor until debt and interest were paid.

Within the British possessions on the Gold Coast slavery was abolished by force of the statute 3 & 4 Will. IV., c.73, but no attempt had been made to deal with it in the Protectorate, which was not affected by that statute. The harsher usages of slavery were, however, appreciably mitigated by the action of the court of the "Judicial Assessor to the Native Chiefs" and other magistrates. At the conclusion of the war of 1873-4 the question was taken in hand anew by the newly-established Legislative Council at its first meeting, and settled by two ordinances. One of these prohibits under penalties, the introduction of slaves into the Protectorate, and the buying and selling, and pawning of slaves and other persons within the Protectorate; and the second declares, that henceforth no court native or British, shall take notice of, so as to give effect to, the relations between master and slave, except in so far as those relations may be in accordance with the law of England relating to master and servant.

MAIL AND STEAMSHIP SERVICES.

*The British and African Steam Navigation Co. (1900), Ltd., and African Steamship Company.*

Mail steamers of these companies leave Liverpool every Wednesday calling at Axim, Seccondee, Cape Coast and Accra, the length of the voyage being 14 to 15 days.

These companies also despatch cargo steamers every Saturday and fourth Thursday from Liverpool, the Saturday steamers calling at the principal Gold Coast ports and the Thursday steamers at Accra, outwards and homewards. Length of the voyage, Liverpool to Accra, varies from 21 to 35 days.

Homewards, the mail steamers of these companies call at Accra every Friday, also calling at Cape Coast, Seccondee and Axim, except that the homeward call at Cape Coast is every alternate Saturday. The length of the voyage, Accra to Plymouth, by these steamers is 17 days.

The steamers of these companies call at the Canary Islands or Madeira homewards.

*French Lines.*

A mail steamer of the French Steamship Company of the Chargeurs Réunis calls at Accra and Seccondee homewards for passengers on the 26th of each month, if sufficient inducement offers.

Cargo steamers of one or two French Companies sailing from Marseilles call irregularly outwards and homewards at Gold Coast ports.

NOTE: The above steamship services are liable to frequent changes.

*Internal Communication.*

The construction of a railway from Seccondee to Tarquah, a distance of about 40 miles, was commenced in February, 1898. The rails reached Tarquah on the 17th April, 1901, and in July of that year an extension was started from that point, the lines reaching Obuasi (124 miles) by the end of 1902, and Coomassie on 1st October, 1903. In 1916, the revenue was 489,912*l.* and the expenditure 197,065*l.* Branch lines, Broomassie-Prestea and Inchaban Junction have been constructed and the 2′ 6″ gauge line Accra-Weshiang taken over. The construction of a railway between Accra and Akwapim has been commenced, and the line has been opened as far as Tafo, a distance of about 65 miles.

Work is proceeding on the Northern extension which is to join Coomassie with the Accra-Akwapim Railway.

The roads in the Colony that are maintained by the Department of Public Works are as follows:—

*In the Western Province:*—Axim to Ancobra River, 3 miles; Tamsu to Cinnamon Bippo, 11½ miles; Broomasse to Insu, 20 miles; Ashieme to Chama, 9 miles.—Total, 43½ miles.

*In the Central Province:*—Winnebah through Swedru to Road Head, 43¾ miles; Swedru to Kwanyako, 8½ miles; Cape Coast through Mansu (on

Cape Coast-Prahsu Road) to 43 miles; Saltpond to Asikuma (on the Saltpond-Insuaim Road), 34½ miles; Dominase to Mankesim, 8¾ miles; Cape Coast to Jukwa, 14½ miles; Cape Coast to Elmina, 8 miles; Asebu to Abakrampa, 3 miles; Yamoransa to Saltpond (Cape Coast-Saltpond Road), 12 miles.—Total, 176 miles.

*In the Eastern Province:*—Accra to Aburi, 23½ miles—with a branch road to Dodowa, 13½ miles—37 miles; Nsawam to Road Head or Asamangkese Road, 21 miles; Accra to Nsawam, 23 miles; Dodowa to Somanya, 20½ miles; Nsawam to Apedwa 28 miles; Danoe to Keve, 24 miles; Mangoase to Adawso, 7½ miles; Adawso towards Mamfe, 7 miles; Somanya to Akuse, 10 miles; Akuse to Kpong, 6 miles; Koforidua to Ahunya on the Krobo Plantations Road, 8¼ miles; Ahunya to Bokusu, 8½ miles; Dobala to Agodome, 4¼ miles; Christiansborg to Labadi, 2 miles.—Total, 207¼ miles.

In addition to these there are numerous native roads, which are kept clear of bush and passable for traders and travellers by the local chiefs, who are paid by the Government for this purpose amounts varying from 5*s.* to 1*l.* a quarter per mile, according to the amount of labour involved and the manner in which the work is performed. Of these the most worthy of mention are the road from Aburi through Apasare and Koforidua to Osino, the Western frontier road, running through Aowin and Sefwi to Wam and British Gaman; the road from Cape Coast to Asafo and Debiso, *viâ* Mampong; the roads from Saltpond, Appam and Winnebah to Nsuam in Western Akim; the roads from Aburi, through Akwapim and Krobo, to Akuse and Kpong. The road from Koforidua to Tafo (16 miles), has recently been widened sufficiently to take light motor traffic. A road has also been constructed from Accra to Kibbi by the Eastern Akim Gold Fields Co., with assistance from the Government. Coomassie is the centre for the various routes to the Northern Territories. From it roads lead to Gambaga, *viâ* Kintampo, to Yeji and Prang, *viâ* Atabubu, to Wam and British Gaman, *viâ* Odumase and Berekum, and to Ahafo. It is also connected with the districts of the Colony by roads running into Sefwi and Akim, as well as by the Cape Coast road mentioned above. Where rivers and swamps have to be crossed, ferries have been instituted, which are controlled for the most part by the Chiefs, who are empowered to levy a small fee. In some cases, where this arrangement has not given satisfaction, ferries are worked under direct Government supervision.

The principal waterway is the Volta River, which rises in the Kong Mountains, and flows into the sea at Addah, after a course of 200 miles. It is navigable for light draught launches as far as Akuse, and, with the exception of the Krachi rapids, can be used for canoe traffic during certain seasons of the year as far as Yeji. The Ankobra River has been largely used for transport purposes to the mines in the Prestea and Himan Districts, and is navigable for many months of the year by surf-boats and light draught launches for a distance of 50 miles. The Tano, connected with Half Assinie, by the main lagoon, and by a tramway, three miles in length, is navigable for light draught launches and canoes as far as Tanoso, a distance of about 60 miles. Rapids at Atakwabo prevent this river being further utilised.

There is no harbour along the whole coast of the Colony, and passengers and goods are landed in surf-boats. Breakwaters at Accra and Seccondee are under construction.

The best landings are at Dixoove, Axim and Seccondee while the surf is most dangerous at Addah, Saltpond, and the Apollonia Coast.

A Transport Department is established at Seccondee and Coomassie, under the direction of the Government. Arrangements can be made for the conveyance of goods and mining material to any part of the Colony by this Department at a fixed tariff.

### *Posts and Telegraphs.*

The mails normally exchanged weekly between the Colony and other British Colonies on the West Coast and the United Kingdom are carried by the steamers of the British and African Steam Navigation Company and of the African Steamship Company. Mails are exchanged overland with Togoland and with the French Ivory Coast.

There are 88 post and telegraph offices and postal agencies. The number of articles passed through the post in 1916 was 7,698,500. The number of parcels exported and imported in 1916 was 115,780. The distribution of mails to towns on the coast at which steamers do not call and to towns which are not situate on the railway lines is effected by runners.

The rates of postage are as follows:—

| | Letters per 1 oz. | Post Cards. | Newspapers, Books, &c., per 2 oz. |
|---|---|---|---|
| Within the Colony ... | 1*d.* | ½*d.* | ½*d.* |
| To the United Kingdom and certain British Colonies | 1*d.* | 1*d.* | ½*d.* |
| To other Countries | 2½*d.* | 1*d.* | ½*d.* |
| | 1½*d.* per oz. above | | |

Parcel post despatches are exchanged direct with the United Kingdom and with the other British Colonies in West Africa. The postage rates are:—3 lbs., 1*s.*; 7 lbs., 2*s.*; 11 lbs., 3*s.*

Parcels for other countries are forwarded through the United Kingdom.

British Imperial postal orders are issued and paid in the Colony, and both an Inland and a Foreign Money Order system is in operation.

A telegraph line extends along the Coast from Togoland to the Ivory Coast, establishing communication between the eighteen principal towns on the Coast.

Inland a line runs north-easterly from Accra to Akuse and another runs along the Accra-Akwapim Railway to Tafo.

From Seccondee a line runs to Coomassie, thence to Nkoranza, where it branches, one branch going *viâ* Tamale to Gambaga and the other to Bole and Wa.

In all there are 1,613 miles of telegraph line, exclusive of the lines used for railway purposes.

The rate charged for inland telegrams is 1*s.* for 12 words and 1*d.* per word in excess of 12.

The number of messages dealt with in 1916 was 257,569. Accra and Seccondee are in telegraphic communication with Europe *viâ* Sierra Leone and Madeira, and to the South with Lagos, Bonny, the Cameroons and the Cape.

Digitized by Google

A coastal radiotelegraph station was erected at Accra in 1912. The rate for the transmission of radiotelegrams is 9*d*. per word.

There are telephone exchanges at Accra, Seccondee and Tarquah.

### *Education.*

Education in the Colony is chiefly in the hands of four Missionary Societies, viz., the Basel, Church of England (S.P.G.), Roman Catholic and Wesleyan Missions with their headquarters respectively at Akropong, Seccondee, and Cape Coast. In addition to the schools under the management of these societies the Government has established sixteen primary schools, three at Accra (senior boys, junior boys and girls), one at Kibbi and another at Obo in the Eastern Province: the two latter being opened in 1917. Two at Cape Coast (boys and girls), one at Nsuaem, the capital of Western Akim, in the Central Province; one at Enchi and one at Wioso in the Western Province; three in Ashanti, viz., two (boys and girls) at Coomassie and a mixed school at Sunyani, three in the Northern Territories, viz., at Tamale, the capital, Gambaga, and Wa. There is also a military school at Coomassie and a police school at Accra, which is not directly under the Education Department.

The sixteen Government primary schools contain approximately 3,300 children, and are entirely supported and equipped from Government funds. They are controlled directly by the Education Department.

The staff is entirely native, with the exception of the three headmasters at Accra, Cape Coast and Coomassie, the head-mistress at Accra, two teachers from the West Indies and one from Sierra Leone.

Since July, 1916, when the German Missionaries were deported, the schools, twenty-four in number, formerly in the hands of the Bremen Mission Society have been administered by Government, the salaries of the teachers and the cost of upkeep being defrayed out of Government funds.

The schools under mission management are of two kinds, assisted and non-assisted. The former receive grants from the Government, and the latter have not yet qualified for inspection, owing mainly to an insufficient average attendance, and are entirely supported by the missionary societies.

In the Church of England (S.P.G.), Government, Roman Catholic, and Wesleyan Schools, English is the medium of instruction, while in the Basel mission schools, the vernacular is used mainly during the first two years, and English and vernacular afterwards.

Industrial instruction is given in most schools. This instruction is chiefly of an agricultural character, plantations being attached to most of the Mission Schools, where various economic plants and food crops are cultivated. Prizes are offered annually by the Government to the children in attendance for the best gardens or plantations.

A technical department is attached to the Government schools at Accra, Cape Coast and Coomassie, and at a few mission schools instruction is given in bookbinding, printing, woodwork and weaving.

The number of Government and assisted schools inspected for the year 1916 was 177. Altogether, 157 mission schools succeeded in earning Government grants in aid.

In the year 1916 there were in the Government and assisted schools 22,456 children on the roll, with an average attendance of 17,611. The corresponding figures for the previous year were 20,681 and 15,918 respectively. The number on the roll of the non-assisted schools cannot be given with accuracy.

The following statement shows the number of schools under inspection, with the numbers on the roll, average attendance, and amount of grant earned for 1916:—

| Denomination. | No. of Schools. | On Roll. | Average. Attendance. | Grant in Aid. £ s. d. | |
|---|---|---|---|---|---|
| A.M.E. Zionist Mission ... ... | 4 | 716 | 559 | 364 3 0 | |
| Basel Mission ... ... ... | 67 | 6,856 | 5,784 | 4,070 14 3 | |
| Bremen Mission ... ... ... | 15 | 1,325 | 1,142 | — | Expenses defrayed by Government. |
| Church of England (S.P.G.) Mission ... ... ... ... | 4 | 615 | 391 | 243 11 1 | |
| Government ... ... ... ... | 14 | 3,237 | 2,481 | — | Expenses defrayed by Government. |
| Roman Catholic Mission ... ... | 30 | 2,900 | 2,218 | 1,570 9 11 | |
| Wesleyan Mission ... ... ... | 36 | 6,764 | 4,997 | 2,832 0 0 | |
| Secondary ... ... ... ... | 1 | 43 | 39 | 69 17 10 | |
| Total ... ... ... | 171 | 22,456 | 17,611 | 9,155 16 1 | |

There are at present only two mission training institutions for teachers, both under the Basel Mission, viz., one at Akropong in Akwapim and one at Abetifi in the Kwahu district. A Government undenominational training college at Accra was opened in August, 1909, and students for this college are received from Government and assisted schools. The staff consists of a principal, four assistant masters, all of whom are Europeans, a West Indian teacher and two native teachers.

A technical and industrial school in Accra was established by the Government in August, 1909; three Europeans and two natives form the staff of the school. The school is equipped for the teaching of:—

(*a*) Metal-work (theoretical and practical), comprising fitting, blacksmith's work, and mechanical drawing;

(*b*) Wood-work (theoretical and practical), comprising carpentry, joinery, cabinet-making, painting, polishing and mechanical drawing.

The course in the school extends over a period of from two-and-a-half to three years, after which

Digitized by Google

the pupils are transferred to a Government workshop to complete their training.

*Currency and Banking.*

The British gold sovereign is the standard coin and in 1913 a special silver currency, common for all the British West African Colonies and Protectorates, was introduced, but British silver coins remain legal tender. British copper coins are also in circulation. Subsidiary nickel-bronze coins (1*d.*, ½*d.* and $\frac{1}{10}$*d.* pieces) were introduced into the Colony, Ashanti and the Northern Territories in June, 1912, and are gradually taking the place of cowries which are still used as a medium of exchange in the Northern Territories. Gold dust was demonetised by Ordinance No. 9 of 1889. German gold and silver coins circulate in the Trans-Volta districts since the Customs Union. Accounts are kept in sterling. Imperial Treasury Notes, of the denomination of 20*s.* and 10*s.* were made legal tender by Ordnance No. 27 of 15th December, 1915. The issue of these notes, as a temporary measure, was necessitated by a shortage of silver; but they are at present being withdrawn gradually from circulation. In 1916, West African Currency Notes of the value of 20*s.*, 10*s.* and 2*s.* were introduced experimentally but have not yet been made legal tender. The Bank of British West Africa, Limited, opened for business at Accra. on the 1st January, 1897, and now has branches at Cape Coast, Winnebah, Saltpond, Seccondee, Tarquah, Axim, Coomassie, Koforidua, and Nsawam. The Bank is now issuing steel money boxes, called "Home Savings Banks," to encourage saving of small sums in the homes of the people.

The Colonial Bank has branches at Accra and Seccondee where it first commenced business on the 24th February and 18th June, 1917, respectively. This Bank also has a savings department.

In March, 1888, a Government savings bank was established, and had, on 31st December, 1901, a credit of 3,936*l.* in the names of 341 depositors. It was transferred to the Post Office in 1905. On the 31st December, 1916, there were 5,834 depositors. The deposits during 1916 amounted to 43,492*l.* and the amount to the credit of the depositors on the 31st December, 1916, was 61,420*l.*

Penny Banks in connection with the Post Office have also been established in the principal Government schools. The rate of exchange is at par.

*Population.*

The census returns for 1911 give the population of the Colony as 853,766; but the actual population is considered to be in excess of these figures. There are about 1,700 Europeans. The returns for Ashanti give 287,814, and for the Northern Territories, 361,806. The populations of the chief towns are Accra, 19,585; Cape Coast Castle, 11,364; Seccondee, 7,725; Coomassie, 18,853.

*Trade and Industries.*

1. The chief products of the Colony are cocoa and gold. Palm oil, palm kernels, lumber, and kola are also shipped.

2. The cultivation of cocoa was started in Akwapim in 1879, and exports in 1891 realised 4*l.* Coffee at that time fetched a fair price, and it was not until 1898, when the price for the latter article fell so low as to make its cultivation at any distance from the coast unremunerative, that attention was paid to cocoa. Since that year the cocoa industry has made rapid strides. In 1900 the value exported was 27,280*l.*, and in 1916, 3,847,720*l.*

3. Gold has been exported from the Gold Coast more or less continuously since the discovery of the country by Europeans in the fifteenth century. Up to 1874, however, the industry was almost entirely in the hands of the natives. The first company for gold mining in West Africa was founded in 1874, but did little beyond exploration. A second company, formed in 1879, engaged in mining operations in the neighbourhood of Tarquah, and from that year the progress of mining enterprise is indicated by the rapid increase in the exports of gold bars, the result of European operations, as compared with those of gold dust, the produce of native mining. In 1899 there was a very remarkable development of the mining industry, which, though checked for a while by the disturbances in Ashanti, received a fresh impetus from the passing of the Concessions Ordinance in 1900, the progress of the railway, and general improvement in means of transport. The amount of gold exported in 1916 was 1,242,130*l.* The number of companies holding concessions is 61.

4. Gold is widely diffused throughout the Colony, Ashanti, and some parts of the Northern Territories, in quartz deposits and alluvial deposits, while in Wassaw there is good conglomerate or banket formation which is now reported to extend to the Birrim District in the Eastern Province. The rivers are said to be rich in alluvial deposits. Bitumen is found along the banks of the river Bonni, in Apollonia and the stream Akyikyiri, flowing into the Ewiano lagoon near Half Assinie. Manganese ore has been found near the railway line, 33 miles from Seccondee, and this important ore is now being exported to England in considerable quantities.

5. Palm oil is used chiefly in the manufacture of soap and candles, and though for this reason its value fluctuates to some extent with the tallow market, the average value of the exports of this article is consistently high. The Volta River District is the most important centre for palm oil, on account of the facilities afforded by the river for transport to the coast. The oil is packed in casks, rolled to the river, towed by canoes to Akuse, and thence by launches to Addah for shipment to Europe. In other parts of the country the casks are rolled along the road to the nearest sea-port. The value of the palm oil exported in 1916 was 38,299*l.* The average value for the previous ten years was 102,724*l.*

6. The trade in kola nuts, which suffered greatly during the Ashanti disturbances, has since showed a steady increase. The tree is found principally in Ashanti and Akim, and the largest markets are at Bontuku (in French Territory), Kintampo, Salaga, and Kpong, whence the kola nut is conveyed by caravans to the Hausa States in the Hinterland. Returns are not available for the amount of kola exported by these routes. Good trees have been planted by the Botanical Department, and increased attention is paid to its cultivation by the natives. The value of this product, exported by sea, amounted to 93,850*l.* in 1909, and 139,566*l.* in 1916.

7. The value of the kernels exported in 1916 was 85,899*l.*

8. The value of rubber exports has fluctuated in the last few years. There are several reasons to account for this—viz., the low prices ruling in

the European markets, the destruction of trees by unskilful tapping, the fact that rubber from the adjoining French and German Colonies no longer comes to Gold Coast ports, and the fact that a more profitable field for labour is offered by the cultivation of cocoa, and by the numerous mining enterprises, causes which have affected all staple poducts. In 1908 the value of rubber exported fell to 168,144*l.*, but rose again in 1910 to 358,876*l.* In 1916 it was 78,865*l.* 1,500 trees have been planted by the Botanical Department in forest land recently acquired by Government, and efforts are being made to instruct the natives in more scientific methods of tapping the trees and preparing the rubber for the market.

9. The values of the principal exports for 1916 were :—

| | Value. |
|---|---|
| Cocoa ... ... ... ... ... | £3,847,720 |
| Gold and Gold Dust ... ... ... | 1,242,130 |
| Kola Nuts ... ... ... ... | 130,566 |
| Lumber ... ... ... ... | 93,980 |
| Palm Kernels ... ... ... ... | 85,899 |
| Palm Oil ... ... ... ... | 38,299 |
| Rubber ... ... ... ... ... | 78,865 |
| British, Foreign and other Colonial Produce and Manufactures and Specie ... ... ... ... | 299,068 |
| | £5,816,527 |

10. The first in value of the imports are cotton goods, with provisions second, and wines and spirits third. The imports of machinery have improved in the last few years with the advance of the mining enterprise. The majority of the imports are subject to an *ad valorem* duty of 12½%. Specific duties are imposed on a few articles, such as spirits, tobacco, gunpowder, etc. From October 1st, 1916, an export duty of one farthing a lb. is being levied on cocoa. The Customs receipts come to more than one-half the total revenue of the Colony.

11. Native manufactures are insignificant. Cloths are woven in many parts of the country, for the most part of English spun yarn, but in the northern districts occasionally of thread manufactured from the indigenous cotton plant. Narrow strips of four to six inches are woven on a rough hand loom, and stitched together to make clothes of various sizes. Gold and brass are worked by native smiths ; canoes are made on the coast rivers ; pottery for domestic purposes is made by hand, and wood-carving is done chiefly in Ashanti and Kwahu. Salt is roughly prepared from the lagoons between Accra and Quittah, and sent up country to the markets of the Northern Territories. Fishing is extensively carried on along the coast, and large quantities of sun-dried fish are sent to the villages and markets of the interior.

---

## ASHANTI.

Ashanti is inhabited by a large number of confederated tribes, the principal of which are the Bekwais, Adamsis, Kokofus, Nkwantas, Coomassies, Agunas, Mampons, Nsutas, Kumawus, Bompatas, Juabins and Jisus. Each tribe has its own king, but from time immemorial the King of Coomassie was recognised as the King paramount of the Confederation. As King paramount, he succeeded to what was known as the "golden stool," the ceremony of enstoolment lasting several weeks, and being observed by the performance of native customs, which in times past consisted largely in the sacrifice of slaves.

In 1873 the King of Ashanti invaded the British Protectorate with a large army, and reached Elmina, where he was entirely defeated by the British forces under Colonel (afterwards Sir) Francis Festing. Later in the year Captain (afterwards Sir) John Glover was sent to the eastern districts of the Protectorate to organise the tribes in that quarter, for a flank movement against the Ashanti territory. At the same time Sir Garnet, now Viscount, Wolseley was despatched to the Gold Coast, with British and West Indian troops, native levies, and some seamen and marines, to operate against the Ashantis, starting from Cape Coast. On the 31st of January, 1874, he came into general engagement with the enemy at Amoaful, where, after desperate resistance, he drove them from their position. The next four days were employed continuously in fighting, until, on the evening of the 4th of February, the British force entered Coomassie. The King had fled to the bush. A few days later Sir John Glover also reached Coomassie. On the 13th, messengers sent by the King concluded a peace with Sir Garnet Wolseley at Fommanah, which was afterwards signed with a pencil cross by King Kofi. By the Treaty of Fommanah, the King of Ashanti renounced all claims on the Protectorate, promised to protect traders, to abandon human sacrifices, and to pay an indemnity of 50,000 ozs. of gold.

In 1894 Prempeh, who was then King of Coomassie, and had successfully fought against the Nkoranzas, who had revolted against his rule, threatened to attack the Atabubus. This attack was averted by the despatch of a force under Sir Francis Scott, and an ultimatum was then sent to Prempeh warning him not to enter British territory, and suggesting that he should acquiesce in the establishment of a Residency at Coomassie. No definite reply to this suggestion could be obtained, and a military expedition accordingly proceeded to Coomassie, to compel compliance with the demands of Her Majesty's Government. The expedition, under the command of Sir Francis Scott, entered Coomassie without resistance, January, 1896. Prempeh made submission, but, failing to comply with the terms dictated, was brought to the coast as a political prisoner and lodged in Elmina Castle. A Resident was at the same time installed at Coomassie, and thus commenced an entirely new departure in the relations of the Gold Coast Colony with Ashanti.

In 1900 the Governor visited Coomassie, and was there besieged by the Ashantis, the town being closely invested. Provisions ran short, and a part of the garrison, with the Governor, cut their way out ; the rest were relieved by Colonel (afterwards Sir J.) Willcocks, commanding the Ashanti Field Force, on 15th July, after severe fighting. The Ashantis were subsequently thoroughly routed at Obassa.

An Order of the King in Council, dated September 26th, 1901, defined the boundaries of Ashanti, annexed it to His Majesty's Dominions, and provided for its administration under the Government of the Gold Coast. Ashanti is under a Chief Commissioner, with Commissioners of Provinces and Districts under him. By a subsequent Order in Council of the 22nd of October, 1906, the boundaries between the Colony and Ashanti and between Ashanti and the Northern

Digitized by Google

Territories, were re-adjusted and defined, with due regard to tribal lands and natural features. The provinces of Ashanti are called Central, Southern, Western and Northern, and have head-quarters at Coomassie, Obuasi, Sunyani and Kintampo. Courts of Justice were established at each of these stations, with appeal to the Court of the Chief Commissioner.

---

## THE NORTHERN TERRITORIES.

In 1897 the territories to the north of Ashanti were constituted a separate district with the title of "The Northern Territories," and placed in charge of a Commissioner, and a grant-in-aid of the expenditure in the Northern Territories was voted by Parliament.

Major H. P. Northcott was appointed Commissioner and Commandant of these territories, with the rank of Lieutenant-Colonel. The negotiations between the British and French Governments for the settlement of territorial questions in West Africa, which had been suspended in 1896, were resumed in October, 1897; and on 14th June, 1898, after a period of considerable tension in consequence of the proximity of the British and French forces in the disputed territories, a Convention was signed at Paris with a proviso that it should be ratified within six (subsequently extended to twelve) months. By this Convention the boundary between the Gold Coast and the French Colony of the Ivory Coast, which had only been settled in 1889, as far as the 9th parallel of north latitude, was continued northwards along the course of the Black Volta River to the 11th parallel, and it was then drawn along the 11th parallel with a deflection to the north in the neighbourhood of Mamprusi, until it met the Franco-German boundary of 1897. The effect of the Anglo-French Convention of 14th June, 1898, was to leave Bona, Lobi, and Moshi to France, while Dagati, Wa, Mamprusi, and the southern portion of Gurunshi were included in the British sphere.

On 14th November, 1899, an agreement was concluded with Germany for the partition of the "neutral zone." This partition assigned Salaga to Great Britain, and Yendi to Germany, and to the north of the zone gave Mamprusi to the former and Chakosi to the latter.

Survey operations were undertaken by Anglo-French and Anglo-German Commissions during 1901-2, for the delimitation of those portions of the boundaries which had not yet been settled.

By the demarcation on the ground of the Anglo-German boundary between the Trans-Volta District and the adjoining Colony of Togo; of the Anglo-German boundary north of the 9th parallel of north latitude; and of the Anglo-French boundary along the 11th parallel of north latitude, all the frontiers of the Colony, Ashanti and the Northern Territories have now been exactly defined with the exception of a small portion of the Anglo-German boundary lying between 6° 10′ and 6° 20′.

Provision was made for the administration of the Northern Territories under the Gold Coast Government by an Order of the King in Council of 26th September, 1901, and by an Administrative Ordinance of January 1st, 1902, the Northern Territories were placed under a Chief Commissioner, and divided into the White Volta, Black Volta, Kintampo and Gonga Districts with headquarters at Gambaga, Wa, Kintampo and Salaga. These Districts are presided over by Commissioners, who are responsible to the Chief Commissioner and have Courts of Justice, with appeal to the Chief Commissioner at Gambaga.

By Order in Council, of the 22nd of October, 1906, the boundaries between the Northern Territories and Ashanti were re-adjusted and defined.

An important step was taken with regard to the Government of this Protectorate by replacing, with effect from the 1st of January, 1907, the former semi-military administration by a staff of Civil District and Assistant District Commissioners, and by establishing new stations. Simultaneously, the 2nd Battalion of the Gold Coast Regiment has been disbanded and a force of armed constabulary substituted therefor.

*Transport Department.*

*Chief Transport Officer*, F. W. H. Migeod, 500*l.* to 600*l.*, and 100*l.* duty allowance.
*Assistant Transport Officers*, C. J. Watt, and two vacancies, 350*l.* to 400*l.*
*Motor Mechanic* (vacant), 250*l.* to 300*l.*

*Printing Department.*

*Government Printer*, C. Fairweather, 400*l.* to 500*l.*, and 80*l.* duty allowance.
*Assistant Government Printer*, H. A. Hillier, 300*l.* to 400*l.*
*Assistant Printer*, C. H. Heath, 300*l.* to 350*l.*
*Native Subordinate Service:—Special Class Appointment, Assistant Printer*, Titus Glover, 220*l.* to 300*l.*

*Prisons Department.*

*Inspector General of Police and Prisons*, D. R. A. Bettington.
*Deputy Inspector General of Police and Prisons*, E. W. de T. Prevost.
*European Gaolers*, H. R. Biltcliffe, John Concannon, B. A. Francis, and R. V. Garland, 250*l.* to 300*l.*, and 60*l.* allowance as *Storekeeper*, when in *Accra* or *Seccondee*.

*Education Department.*

*Director of Education*, D. J. Oman, 600*l.* to 700*l.*, duty allowance 120*l.*
*Senior Inspector of Schools*, R. P. W. Mayall, 400*l.* to 500*l.*, duty allowance 80*l.*
*Provincial Inspectors of Schools*, J. P. Robertson, A. Gardner, and one vacant, 400*l.* to 500*l.*, duty allowance 80*l.*
*Inspector of Schools*, H. Blackmore, 300*l.* to 400*l.*
*Accra Training College for Teachers:—*
*Principal*, H. A. Harman, 400*l.* to 500*l.*, duty allowance 80*l.*
*Assistant Masters*, H. McLaren, E. A. Pearson, T. D. Cranston, J. Dewhurst, 300*l.* to 400*l.*
*House Master*, D. S. Payne, 220*l.* to 300*l.*
*Accra Technical School:—*
*Principal*, H. A. Wright, 400*l.* to 500*l.*, duty allowance 80*l.*
*European Instructors*, G. A. Pickles and J. S. McDermid, 300*l.* to 400*l.*
*Government Primary Schools, Boys:—*
*Head Masters*, H. Evans, A. Aitken, and one vacancy, 300*l.* to 400*l.*
*Assistant Master*, A. T. George, 220*l.* to 300*l.*
*Government Primary Schools, Girls:—*
*European Head Mistress*, Miss C. H. Ruscoe, 200*l.* to 250*l.*

*Audit Department.*

*Auditor*, W. Bowerley, 600*l.* to 700*l.*, and 120*l.* duty allowance.
*Senior Assistant Auditor*, 400*l.* to 500*l.*, and 80*l.* duty allowance (vacant).
*Assistant Auditors*, L. G. Corney, W. L. MacKinnon, J. B. Hewlett (one vacancy), 300*l.* to 400*l.* each.
*First Class Clerks*, R. R. Ardayfio and W. Quartey Bampa, 100*l.* to 210*l.*

*Agricultural Department.*

*Director of Agriculture*, W. S. D. Tudhope, 600*l.* to 700*l.*, with duty allowance of 120*l.*
*Assistant Director of Agriculture and Government Mycologist*, R. H. Bunting, 400*l.* to 500*l.*, with 80*l.* duty allowance.
*Travelling Inspector*, A. E. Evans, 300*l.* to 400*l.*
*Entomologist*, W. H. Patterson, 350*l.* to 400*l.*
*Agriculturist*, *H. G. S. Branch, 300*l.* to 350*l.*
*Senior Curators*, A. C. Miles, C. Saunders, A. B. Culham, T. Hunter, 300*l.* to 350*l.*
*Curators*, M. D. Reece, G. H. Eady, one vacancy, 250*l.* to 300*l.*

*Forestry Department.*

*Conservator of Forests*, N. C. McLeod, 800*l.*, duty pay 160*l.*
*Deputy Conservator of Forests* (vacant), 500*l.* to 600*l.*, duty pay 100*l.*
*Assistant Conservators of Forests*, R. W. Brent, N. T. Garnett, and one vacancy, 300*l.* to 400*l.*

*Railway Department.*

*General Manager*, E. M. Bland, 1,000*l.* to 1,200*l.*, and 200*l.* duty allowance.
*Office Assistant*, J. W. Heaton, 400*l.*, and 80*l.* duty allowance.
*Chief Engineer*, E. W. Cozens-Hardy, 600*l.* to 800*l.*, and 120*l.* duty allowance.
*Superintending Engineer*, R. J. Church, 600*l.* to 800*l.*, and 120*l.* duty allowance.
*District Engineer, 2nd Grade*, W. V. Petrie, 500*l.*, and 100*l.* duty allowance.
*Assistant Engineers*, J. E. Nichols, W. H. Hawtayne, D. W. Ridsdale, C. G. Campbell and A. Thexton, 400*l.*, and 80*l.* duty allowance.
*Assistant Engineers*, J. B. Scholefield, and R. J. B. Pearson, 300*l.* to 350*l.*
*Draughtsman and Chief Clerk*, A. C. Roberts, 350*l.*
*Locomotive Superintendent*, S. H. Youthed, 600*l.* to 800*l.*, and 120*l.* duty allowance.
*District Locomotive Superintendent, 2nd Grade*, M. N. Foster, 500*l.* to 600*l.*, and 100*l.* duty allowance.
*Assistant Locomotive Superintendents, 2nd Grade*, H. G. E. Harris, R. T. Kerr, F. F. O'Sullivan and R. A. Buchanan, 350*l.* to 400*l.*
*Draughtsman and Technical Instructor*, vacant, 350*l.* to 400*l.*
*Chief Electrical Engineer*, W. D. Frost, 400*l.* to 500*l.*, and 80*l.* duty allowance.
*Assistant Electrical Engineers*, C. T. Kreiser, 350*l.* to 400*l.*, and one (vacant) at 300*l.* to 350*l.*
*Chief Traffic Officer*, R. Higham, 500*l.* to 600*l.*, and 100*l.* duty allowance.
*Traffic Assistants*,
*1st Grade*, T. R. Seddon, 400*l.* to 500*l.*, and 80*l.* duty allowance.
*2nd Grade*, W. E. Lewis, 350*l.* to 400*l.*
*3rd Grade*, T. B. Burns, G. P. Finchett, L. G. Tancock, J. T. Tillotson, W. Woods, J. R. Thomas, and W. A. Griffiths, 300*l.* to 350*l.*

* Seconded for Military Service.

*Accountant*, A. Angus, 420*l.*

## HONG KONG.

*Situation and Area.*

Hong Kong is one of a number of Islands situated off the south-eastern coast of China, at the mouth of the Canton River, and lies about 40 miles east of Macao, 91 miles south of Canton, between 22° 9′ and 22° 17′ N. lat., and 114° 5′ and 114° 18′ E. long. The island is an irregular ridge, stretching nearly east and west; its broken and abrupt peaks rising to the height of nearly 2,000 feet above the sea level. Its length is about 11 miles, its breadth from 2 to 5 miles, its area about 32 square miles. It is separated from the mainland of China by a narrow strait, known as the Lyeemun Pass, which does not exceed half a mile in width. The opposite peninsula of Kowloon (2⅔ square miles) was ceded to Great Britain by a Treaty entered into by Lord Elgin in 1860 with the Government of China, and now forms part of the Colony; which also includes Stonecutter's, Green, Apleechow, Middle, Round, and other islets.

In 1898 an agreement was concluded with the Chinese Government for the extension of Hong Kong territory by an area adjacent to British Kowloon, in the province of Kwang-tung, including Mirs Bay and Deep Bay, this area to be leased for 99 years; a stipulation was included that within the walled city of Kowloon (which lies outside of British Kowloon) the Chinese officials then stationed there should continue to exercise jurisdiction except so far as might be inconsistent with the military requirements for the defence of Hong Kong, but that within th remainder of the newly-leased territory Great Britain should have sole jurisdiction. In 1899 the Chinese officials ceased to exercise jurisdiction within Kowloon City, which thereafter, by Her late Majesty's Order in Council, was incorporated in the leased territory and became subject to British rule. The area of the mainland and Islands leased is about 359 square miles. A careful survey of the territory was completed in 1904. This new territory has its headquarters at Tai Pó on an arm of Mirs Bay. A District Officer, who performs police and magisterial duties, resides there. The Southern district is in the charge of an Assistant District Officer.

*General Description.*

The waterways of the Colony form one of the most magnificent harbours in the world, having an area of ten square miles. The granite hills which surround it rise between 2,000 and 3,000 feet high, the whole offering a *coup d'œil* which blends the wild scenery of Scotland with the classic beauty of Italy. The city of Victoria extends for four miles at the base of the hills which protect the south side of the harbour. Being built on the slope of the hills facing the sea, the general aspect of the town is perhaps more striking and picturesque from the water than that of any other city in the east, whilst many of the streets are shaded with well-grown and handsome trees. On the Praya West Reclamation, completed in 1903, some new and handsome buildings stand, and others are in course of erection.

The rainfall for 1913 was 83·73 inches as compared with 63·93 in 1912, and 90·55 in 1911. The average for the period 1884-1908 was 84·44 inches. In 1910 the mean maximum temperature ranged from 87·2° in June to 63·1° in January, and the mean minimum temperature from 79·7° in June to 55·9° in January. Typhoons are prevalent during the months July to October.

*History.*

The Colony, then a desolate island, sparsely inhabited by fishermen, was ceded to Great Britain in January, 1841; the cession was confirmed by the Treaty of Nankin, in August, 1842; and the charter bears date 5th April, 1843. The additions subsequently obtained on the mainland have been noted above.

Hong Kong did not become of much commercial importance until the discovery of gold in Australia, in 1851, and the consequent Chinese emigration. Its trade has gradually increased with the opening up of China to foreign trade.

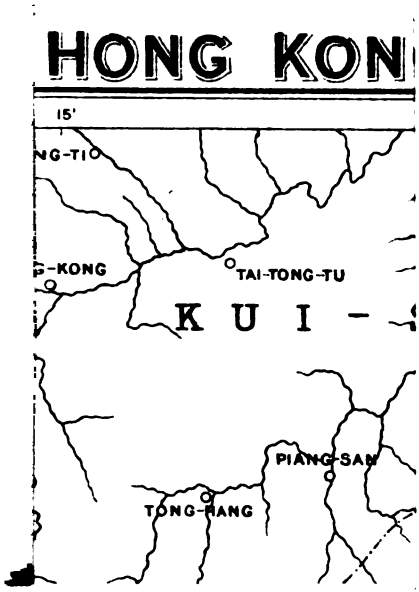
Large local banking, dock, steamboat, and insurance companies were established between 1865 and 1872, and the trade was greatly increased by the opening of the Suez Canal.

The city is the depôt for an incessant flow of Chinese emigration and immigration, the number in 1913 being 309,680 (principally to and from the Straits); emigrants, 142,759; immigrants, 166,921, excluding to and from China ports.

*Industry.*

The position of the island has made it a centre of trade in many kinds of goods. Amongst the principal are opium, sugar, flour, salt, earthenware, oil, amber, cotton, and cotton goods, sandalwood, ivory, betel, vegetables, live stock, granite, &c. &c. The transactions of the tea and silk trade are largely controlled by Hong Kong firms. There are many manufactories, which are rapidly

Digitized by Google



Digitized by Google

Digitized by Google

increasing in number and importance, producing rope, sugar, rum, beer, paper, vermilion, sauce, bricks, tiles and cement, bamboo work, and stores of every description for the supply of shipping. There is a considerable boat-building industry chiefly in the hands of Chinese.

The natural products of Hong Kong are few and unimportant. There is little land suitable for tillage, and nothing is grown but a little rice and some vegetables near the outlying villages. There are large granite quarries, both on the island and in Kowloon. A bed of fire clay exists at Deep Water Bay, and bricks and earthenware pipes are manufactured from it. A dairy farm supplies fresh meat, poultry, eggs, and milk. The fishing in the waters of the Colony is good and is a source of livelihood to a vast number of Chinese.

The new Territories have extensive cultivable land, on which are grown sugar, rice, vegetables, lychees, pineapples, &c. The cultivation is entirely in the hands of the Chinese villagers and it is doubtful whether European enterprise would be successful. A very rich deposit of iron has been found in the hills, and promises to be very remunerative.

*Shipping.*

Hong Kong is a free port except as regards importation of intoxicating liquors and tobacco, and no details of the trade of previous years are available, but the control of trade rendered necessary by the war has given an opportunity of collecting some statistics. Figures of a tentative kind should be available in 1918, but the enormous extent of the trade with which it is connected may be approximately estimated from the amount of shipping which has steadily grown, with one or two slight fluctuations, for over twenty years.

The total tonnage entering and clearing during the year 1916 amounted to 36,381,457 tons, an increase of 2,496,538 tons compared with 1915.

There were 24,201 arrivals of 11,062,288 tons, and 24,151 departures of 11,246,173 tons.

Of British ocean-going tonnage 3,424,457 tons entered, and 3,444,286 tons cleared.

Of British river steamers 2,063,525 tons entered, and 2,063,526 tons cleared.

Of foreign ocean-going tonnage 3,430,632 tons entered, and 3,428,717 tons cleared.

Of foreign river steamers 519,704 tons entered, and 519,493 tons cleared.

Of steamships under 60 tons trading to ports outside the colony, 105,820 tons entered, and 106,530 tons cleared.

Of junks in foreign trade 1,518,075 tons entered, and 1,683,546 tons cleared.

Of steamships under 60 tons plying within the waters of the Colony 6,316,388 tons entered and 6,316,388 tons cleared.

Of junks in local trade 712,310 tons entered, and 728,062 tons cleared.

Thus in Foreign Trade :—

| | Per cent. |
|---|---|
| British ocean-going vessels represented | 30·8 |
| Foreign ,, ,, ,, | 30·7 |
| British river steamers represented | 18·5 |
| Foreign ,, ,, ,, | 4·7 |
| Steamships not exceeding 60 tons represented | 1·0 |
| Junks represented | 14·3 |
| Total | 100·0 |

While in Local Trade :—

| | Per cent. |
|---|---|
| Steamships not exceeding 60 tons represented | 89·8 |
| Junks represented | 10·2 |
| Total | 100·0 |

A comparison between the years 1915 and 1916 is given in the following table :—

| Class of Vessels. | 1915. | | 1916. | | Increase. | | Decrease. | |
|---|---|---|---|---|---|---|---|---|
| | No. | Tonnage. | No. | Tonnage. | No. | Tonnage. | No. | Tonnage. |

*Docks.*

Hong Kong is well provided with dock accommodation. The Hong Kong and Whampoa Dock Company, who were aided by two loans from the British Government in 1864 and 1885, under the Colonial Docks Act, have three dry docks and two slips at their Kowloon establishment, one dry dock at Mong Kok Tsui, on the western side of the Kowloon Peninsula, and two at Aberdeen, on the south side of the island of Hong Kong. The Admiralty have built a large dock in the Naval establishment in the middle of the City of Victoria, and Messrs. Butterfield & Swire a still larger one at Quarry Bay, just inside the Lyeemun Pass.

Digitized by Google

Besides these there are several building slips and repairing shops owned by Europeans and Chinese in various parts of the Colony.

*Currency and Banking.*

The currency of Hong Kong consists of the following coins (*vide* Order in Council, 2nd Feb., 1895):—

1. The silver dollar of Mexico.
2. British dollar.
3. The Hong Kong dollar, half-dollar, and 20-cent, 10-cent, and 5-cent pieces, issued from the Hong Kong Mint (1866-68).
4. Half-dollars, 20-, 10-, and 5-cent pieces, imported from England, and coined at the Royal Mint and Birmingham Mint.
5. Copper coins representing one-hundredth part of the dollar (called one cent), and one-thousandth part of the dollar (mil or cash), imported from England.

There were issued from the Hong Kong Mint 2,108,054 dollars and 58,587 half-dollars; and 20-, 10-, and 5-cent pieces to the nominal value of $402,671. There were obtained from England, and put into circulation up to 31st Dec., 1916, subsidiary coins (which now include half dollars) to the nominal value of $31,264.371, but of these, coins to the value of $22,735,459 have since been withdrawn.

The coins issued from the Hong Kong Mint are never met with in the Colony now, and of the coins imported from England it is estimated that not more than 10 per cent. remain in the Colony.

The principal Banks are the Hong Kong and Shanghai Banking Corporation, Ltd., the Chartered Bank of India, Australia and China, the Mercantile Bank of India, the International Banking Corporation, the Russo-Asiatic Bank, the Yokohama Specie Bank, the Bank of Taiwan, the Netherlands-India Commercial Bank, the Netherlands Trading Society, the Banque de l'Indo-Chine, and the Crédit-Foncier d'Extrême Orient. The first named bank conducts a Savings Bank. There are also a large number of Chinese banks.

The Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Mercantile Bank of India are authorised to issue notes in the Colony, the total circulation amounting to $33,741,049 at the close of 1916.

Local weights and measures are the following: 1 tael = 1⅓ oz.; 1 picul = 133⅓ lbs. (avoirdupois); 7½ catties = 1 imperial gallon; 1,000 Chinese cash = 1 dollar.

*Means of Communication.*

Hong Kong is extremely well situated as regards telegraphic communication, in all directions, with all parts of the world. The Eastern Extension Telegraph Company (British) by means of two cables to Singapore, *vid* Labuan and Cape St. James respectively, provide good connections with Europe, *vid* India, with Australasia and with the other British Colonies and possessions. By their cable to Manilla connection is made with the direct American cable, thence to San Francisco. Two cables to Shanghai, belonging respectively to the Eastern Extension and to the Great Northern (Danish) Companies, *vid* Foochow and Amoy respectively, give a good connection with Shanghai (North China), Japan and Russia; and the system of the Great Northern Telegraph Company gives a good service to Europe, *vid* Asiatic Russia.

A radio-telegraph station established at Cape d'Aguilar provides communication with vessels.

Hong Kong possesses unrivalled steam communication. The P. & O. S. N. Co.* and the M. M. Co.* convey the European mail weekly, the Norddeutscher Lloyd Co.* maintain a regular fortnightly mail service between Bremen and Hong Kong, the P. M. S. S. Co., and the Toyo Kisen Kaisha maintain a mail service with San Francisco, the Canadian Pacific Railway Co. a regular mail service with Vancouver, B.C., a regular line has been established by the Northern Pacific S. S. Co. to Tacoma, and Portland, Oregon, and the Portland and Asiatic S. N. Co. also run a line of steamers to Portland, the Great Northern Steamship Co. maintain a monthly service to Seattle with ships of over 20,000 tons gross register, the Eastern and Australian S. S. Co., the China Navigation Co. and the Norddeutscher Lloyd* keep up a frequent but rather irregular service with the Australian Colonies, and Nippon Yusen Kaisha maintains service to Europe, India, Australia, and the United States (Seattle). In addition to these several great lines of merchant steamers run between ports in Great Britain and Hong Kong, of which the China Mutual S. S. Co., Ocean S. S. Co., and the Glen, Warrack, Mogul, Ben Union, and Shell lines are the most conspicuous. The Austrian Lloyd's* steamers also ply from Trieste to Hong Kong, those of the Hamburg-Amerika* line from Hamburg, and the Navigazione Generale Italiana Company's steamers run monthly from Genoa. Regular steam communication between Java and Hong Kong has been established by the Indo-China S. N. Co.'s and the Java-China-Japan Line. Between the ports on the east coast of China, Formosa and Hong Kong the steamers of the Douglas S. S. Co. ply regularly twice a week, and those of the Osaka Shosen Kaisha weekly, and there is constant steam communication with Hoihow, Manila, Saigon, Haiphong, Tourane, Bangkok, Borneo, etc. With Shanghai, Tientsin, and the ports of Japan there is frequent communication by steamers of the Indo-China S. N. Co., China Navigation, and other lines, in addition to the English, French and German* mail steamers, which leave weekly. With Calcutta there are services by the Indo-China S. N. Co. and the Apcar Line, about once a fortnight by each line. Between Hong Kong, Macao, and Canton there is a daily steam service, and tri-weekly steamers as far as Wuchow on the West River.

A cable tramway connects the city with the higher levels. An electric tramway from Shaukiwan to Kennedy Town, along the whole extent of the city, was completed and opened in July, 1904. The island possesses few roads available for vehicular traffic except in the town of Victoria, but admirable roads, from which exquisite views may be obtained, wind in every direction among the hills, and a good and practically level road runs round a great part of the island. The usual means of conveyance is by boat, chair, and 'ricksha. There are good roads in Kowloon, and a road from Kowloon ferry runs to Tai Po on an arm of Mirs Bay. A road has been constructed from Castle Peak to Sha Tau

* This information refers to the period before the outbreak of war.

Digitized by Google

Kok connecting the South-eastern and North-western extremities of the New Territories; the length is about 23¼ miles. A railway was completed in the year 1910 from Kowloon to the Chinese frontier, where it joins the line from Canton. Telephonic communication is available to all parts of the Colony.

Direct Money Orders are exchanged with the United Kingdom, Germany and German* Colonies in the South Seas, Canada, United States of America, Union of South Africa, India, Ceylon, the Australian Commonwealth, the Dominion of New Zealand, Straits Settlements, Federated Malay States, State of North Borneo, Sarawak, Siam, Macao, Japan, Kiaoutschou, French Indo-China and the Philippine Islands. British Postal Orders are issued and paid in Hong Kong. Telegraphic Money Orders are exchanged with the United Kingdom only.

*Education.*

In previous years the Government control over education has been confined to the Government and grant schools, of which details are given below; but in 1913 an Ordinance was passed, the effect of which has been to bring more than 500 private schools under Government supervision.

The number of Government schools and schools which receive grants from Government is 53, of which 21 are English schools, *i.e.* schools in which the English language is the medium of instruction, and 32 are vernacular schools. There are three schools which are reserved for children of European-British parentage.

The total number of pupils in average attendance at Government and grant schools was 5,933 in 1916. Of these 2,433 were in Government, and 3,500 in grant schools; 3,955 pupils received instruction in English, and 1,978 in the vernacular.

A technical institute supplies instruction in commercial and technical subjects. The total enrolment in 1916 was 535.

The University of Hong Kong has an enrolment of over 180 students. There are at present three faculties, of medicine, engineering and arts. The standard aimed at is that of the University of London.

*Revenue.*

About one-third of the revenue is derived from the Opium Monopoly and one-seventh from municipal rates for police, lighting, water and other purposes: 13 per cent. on the annual value in Victoria, the Hill District, Kowloon Point, Yaumati and Hung Hom; and rates varying from 7 to 12½ per cent. in the outlying villages. The annual rates payable on the valuation for 1916-17 are $1,832,326, an increase of $1,006 on the previous valuation. The remainder is derived from licences, land revenue, stamps, duties, and fees. The duties on intoxicating liquors are expected to realize $790,000 in 1917, Duties on Tobacco (imposed July, 1916), $400,000, Land Sales to reach $200,000, Stamp Revenue to reach $1,000,000, and Postal Revenue $406,000. The total Revenue for 1917 is estimated at $13,242,000.

*Constitution.*

The Government is administered under Letters Patent of 19th January, 1888, by a Governor, aided by an Executive Council, composed of six official and two unofficial members, besides the Governor. The Legislative Council is presided over by the Governor, and is composed of seven official and six unofficial members, three of whom are nominated by the Crown on the recommendation of the Governor (two being usually Chinese), one is nominated by the Justices of the Peace from their body, and one by the Chamber of Commerce. The unofficial members vacate their seats after six years from date of appointment. The "Colonial Courts of Admiralty Act, 1890," regulates the jurisdiction of the Supreme Court in Admiralty cases. The English Common Law forms the basis of the legal system, modified by Colonial Ordinances, of which a revised edition to 1912 has been issued. The law as to civil procedure was codified by Ordinance No. 3 of 1901.

*Governors.**

1887 Sir G. W. Des Voeux, K.C.M.G.
1891 Sir W. Robinson, K.C.M.G.
1898 Sir H. A. Blake, G.C.M.G.
1904 Major Sir M. Nathan, K.C.M.G., R.E.
1907 Sir F. J. D. Lugard, K.C.M.G., C.B., D.S.O.
1912 Sir F. H. May, K.C.M.G.

| | Finance. | | Shipping Cleared and Entered. | |

## JAMAICA.

*Situation and Area.*

Jamaica is an island in the Caribbean Sea, to the southward of the eastern extremity of the Island of Cuba, within N. lat. 17° 42′ 20″ and 18° 32′ 30″, and W. long. 76° 11′ 55″ and 78° 23′ 35″. It is the largest of the British West Indies, being 144 miles in length, and 50 in extreme breadth, and containing about 4,450¼ square miles, about half the size of Wales. The island is very mountainous, the main ridge running east and west, with numerous subsidiary ridges, some parallel to the main ridge, others spreading out in a N.W. and S.E. direction from it, terminating in the famous Blue Mountains in the east, the highest peak being 7,388 ft. high. There are numerous rivers and streams, with a rapid fall for the most part, and not navigable. The largest are the Black River in the south-west, and the Rio Grande in the north-east. Kingston, the capital, with a population of 57,379 in 1911, is situated on the south coast of the Island, and has a fine harbour. In St. Ann's Parish, in the middle part of the island, on the north of the main ridge, is the Roaring River, so called on account of its many picturesque waterfalls.

The Cayman Islands, lying between 19° 16′ and 19° 45′ N. lat., and 79° 38′ and 81° 30′ W. long, are dependencies of Jamaica.* Pedro and Morant Cays are also dependencies, being two guano islands in 17° N. lat., as well as the Turks and Caicos Islands.†

It is estimated that Jamaica contains 2,692,480 acres, from which may be deducted 80,000 acres as useless for agriculture, consisting chiefly of swamps, rocks, and inaccessible lands, leaving 2,612,480 acres available for cultivation. Of this 979,745 acres are returned as under cultivation in 1916-17. The dependencies have an area of 89 miles.

*History.*

The island was discovered by Columbus on the 3rd May, 1494. He called it St. Jago, after the patron saint of Spain, but the new name was soon dropped in favour of the native one of Jamaica (Xaymaca—well watered). The first settlement on it was effected on the shores of St. Ann's Bay, by Esquivel in 1509, under the direction of Diego, the son of Columbus, while Governor of Hispaniola. It was raided by Sir Anthony Shirley in 1596-7, and by Colonel Jackson in 1643, but it remained in the possession of the Spaniards for 161 years, when it was attacked by a force, sent by Cromwell, under Admiral Penn and General Venables against Hispaniola, and capitulated, after a trifling resistance, on the 11th May, 1655. Until the Restoration, Jamaica remained under military jurisdiction, but in 1660 a regular civil government was established by Charles II., who appointed General Edward Doyley Governor-in-Chief, with an Elective Council. In 1670 peace was made with Spain, and the title of England to Jamaica was recognised by the Treaty of Madrid. The colony grew fast, stimulated by the wealth brought into it by the buccaneers, who made Port Royal their headquarters and storehouse. This town was engulfed in the great earthquake of 1692. Kingston which then consisted of a few sheds, soon rose into a place of importance. During the 18th century the island suffered from hurricanes, earthquakes, numerous slave insurrections, as well as wars with the maroons, or mountaineers, the descendants of African slaves left by the Spaniards, who inhabited mainly the east of the island, among the Blue Mountains. When the Slave Trade was abolished, in 1807, there were 323,827 slaves in Jamaica. During the last eight years of the trade, 86,821 slaves were imported. On the abolition of slavery in 1833, Jamaica received 6,161,927*l.* of the 20,000,000*l.* granted by the Imperial Government as compensation to the slave-owners. A serious rebellion among the black population in 1865 was suppressed by Governor Eyre with unnecessary violence, and he was recalled. In January, 1907, Kingston was devastated by a terrible earthquake, which caused great loss of life and immense destruction of property. A Mansion House Fund was opened, and contributions poured in from all parts of the Empire for the relief of distress. A free grant of 150,000*l.* was voted by Parliament, and a loan of 800,000*l.*, chiefly in aid of re-building, was authorised from the Home Exchequer. The King's House, the official residence of the Governor, was completed in 1910. Two blocks of public buildings were erected in King Street, and with the exception of part of Harbour Street the town of Kingston is now practically rebuilt.

*Climate and Inhabitants.*

There is great variety of climate; the mean temperature of Kingston is 78·8°, rising to 87·5° in the day time, and falling to 70·8° at night. As the temperature falls about 1° for every 300 feet of ascent, it is possible, in a few hours, to reach, in the central range of mountains, a cool and delightful climate. From Kingston, the capital, a change of 10° or 15° in temperature can be attained by a ride of three hours.

The rainy seasons occur generally over the whole island in May and June and again in September, October and November; but besides these heavy and periodical rainfalls, the ground is refreshed by continual showers; and in the N.E. portion of the island there is usually a rainy season at the end of the year, and light rains generally during the month of August. The mean annual rainfall varies throughout the island from about 34 inches to as much as 196 inches at Fellowship and 227 inches at Moore Town, both on the northern slope of the Blue Mountain Range.

Under two per cent. of the inhabitants are white; the remainder are chiefly of African descent, three-fourths being pure negroes. There are about 18,000 imported coolies, and about 2,111 Chinese (in 1911). English is universally spoken.

*Constitution.*

The original Constitution, granted by Charles II. in 1662, which, after existing for nearly 200 years, was surrendered in 1866, was a representative

* See account below.

† See under heading Turks and Caicos Islands.

Digitized by Google

one, consisting of a Governor, a Privy Council, a Legislative Council, and an Assembly of 47 elected members. The depression caused by the abolition of slavery led to a grave constitutional crisis, the Assembly refusing to vote supplies, and endeavouring to enforce sweeping reductions in establishments, without compensation to the displaced officers. Lord Melbourne's Government, in 1839, actually introduced a Bill into Parliament for the suspension of the constitution, but was defeated, and it was not till 1854 that, by a change in the constitution of the Council, harmony was temporarily restored.

After the suppression of the rebellion in 1865, Governor Eyre, at the meeting of the Legislature, urged the unsuitability of the then existing form of Government to meet the circumstances of the community, and the necessity of making some sweeping change, by which a strong Government might be created. The Legislature willingly responded, abrogated all the existing machinery of legislation, and left it to Her Majesty's Government to substitute any other form of Government which might be better suited to the altered circumstances of the Colony.

A Legislative Council was, by Orders in Council of the 11th June, 1866, and 11th November, 1869, established, consisting of such numbers of official and unofficial members as Her Majesty might think fit. The numbers of each were six until 1878, when they were enlarged to eight, and a ninth was added in 1881.

By Order in Council dated 19th May, 1884, and Amending Order of 3rd October, 1895, the constitution was fixed in the following manner:—

The Council to consist of the Governor (with only a casting vote) and five *ex-officio* members, viz.: the Senior Military Officer, the Colonial Secretary, Attorney-General, Director of Public Works and Collector-General, and such other persons, not exceeding ten in number, as Her Majesty may from time to time appoint, or as the Governor may from time to time provisionally appoint, and fourteen persons to be elected as therein provided. The Council shall be dissolved at the end of five years from the last preceding general election, if it shall not have been previously dissolved.

There is also a Privy Council, with the usual powers and functions of an executive council. It consists of the Lieutenant-Governor, if any, the Senior Military Officer in command, the Colonial Secretary, and Attorney-General and such other persons as may be named by the King, or provisionally appointed by the Governor subject to the approval of His Majesty, but the number of members is not to exceed eight. The Governor is to preside at each meeting, and the Governor and two members form a quorum.

### *Local Adminstration.*

There are elective Parochial Boards in the town of Kingston and 14 other parishes, under Laws 13 of 1900 and 17 of 1901, with jurisdiction over roads, markets, sanitation, poor relief, waterworks, and pounds. The chief towns are Kingston (population, in 1911, 57,379), Port Royal (population 1,268), Spanish Town (population 7,119), Port Antonio (population 7,074), Montego Bay (population 6,616), Falmouth (population 2,288), Port Maria (population 2,833), and Savanna la Mar (population 3,400).

The parish is the unit of local government, and each parish has its own parochial institutions, viz., poorhouses, &c., &c., managed by the Parochial Board of the parish, the members of which are elected by the persons entitled to vote for the election of members of the Legislative Council. The administration of poor relief by the Parochial Boards is controlled by a Board of Supervision. The several direct taxes received on property, horses, carriages, &c., &c., are devoted mainly to the parish in which they are collected, with the exception of a few minor items, and a tax of 8*d.* in every 10*l.* in Kingston and 1*s.* in every 10*l.* in the other parishes of the gross value of the property, which go to the credit of the general revenue of the colony.

The total revenue of all the local bodies in 1916-17 was 170,203*l.*; their expenditure 176,103*l.*, and their debt at the end of the year 39,312*l.* These figures form part of the general revenue and expenditure, as given below.

There is a Supreme Court of Judicature together with Resident Magistrate Courts and Petty Sessions of Justices of the Peace throughout the island. The Resident Magistrates, besides holding courts of their own, preside in the courts of Petty Sessions.

An "Island medical service," under the control of a superintending medical officer, was established in 1870. The several medical practitioners, who receive a retaining fee or salary from the Government, are designated "district medical officers." They are located throughout the island, and for the fixed salary paid by Government they have to attend sick paupers, parochial hospitals and almshouses, the constabulary officers and men, and prisons.

The Colonial revenue is derived mainly from import duties on food stuffs, alcohol, and an *ad valorem* duty; the excise on rum (100,602*l.* in 1916-17) and stamps and licences. Direct taxation is levied on properties principally for parochial purposes, but a uniform rate of 1*s.* in every 10*l.* value collected for General Revenue in all the parishes except Kingston, in which it was 8*d.*, yielded 56,776*l.* in 1916-17.

### *Police.*

The Constabulary was placed on its present footing in 1867, and is modelled on the system of the Royal Irish Constabulary, and "partially under military organisation and discipline." There are on the authorised strength 20 officers (a staff officer, inspectors and sub-inspectors), under an Inspector-General, and 947 sub-officers and men, and 988 district constables distributed throughout the island.

### *Currency and Banking.*

British currency and United States gold are legal tender. Accounts are kept in sterling, and the coin in circulation is almost exclusively British silver and Jamaica nickel pence. Total estimated coin 300,000*l.* The Colonial Bank, the Bank of Nova Scotia, and the Royal Bank of Canada, are the only private banking establishments in the Colony. The Colonial Bank has one branch, 6 sub-branches and 1 agency; it had an average note circulation in 1916-17 of 65,191*l.* The Bank of Nova Scotia has 1 branch and 9 sub-branches and had an average note circulation in 1916-17 of 101;589*l.* The Royal Bank of Canada has one branch and had an average note circulation in 1916-17 of 19,276*l.* British silver coins above 6*d.* are legal tender to any extent; coins of 6*d.* and less amount to the extent of 40*s.* in any one payment.

Government savings banks were instituted in all the principal towns in 1871, the rate of interest allowed being at first 4 per cent., but this was reduced in 1881 to 3 per cent., and in 1897 to 2½

Digitized by Google

per cent. In 1917 the rate of interest was again increased to 3 per cent. The total deposits on 31st March, 1917, was 260,081*l.*

*Education.*

Elementary education is provided for from public funds and, during recent years, 107 Government (undenominational) elementary schools have been established. The number of schools is 696, with 62,467 scholars in average attendance, and the grant-in-aid for 1916-17 was 65,987*l.*; no fees are charged. The Government maintains a system of inspection, and provides a training college for women teachers which is mainly supported from public funds, besides largely assisting the Mico undenominational training college for men, and two denominational colleges for women teachers. 25 students are with the colours. By a law passed in 1892 a Board of Education was constituted. Parish and District School Boards have taken up duties delegated to them; the District School Boards manage the Government schools, some of which are held in Government buildings, others in rented buildings.

Provision was made in 1892 for the opening of Government secondary schools where required; there are two secondary schools receiving aid from public funds. Secondary education is also provided for by ten other endowed schools, under local governing bodies controlled by the Jamaica Schools Commission, and a number of private schools. A beginning has been made in providing from public funds for technical education; there are three scholarships (one for girls) tenable at English universities or elsewhere within the British Empire. One Rhodes Scholarship is annually awarded in Jamaica (temporarily suspended in 1917 owing to war conditions). The following examinations are held:—London University, Cambridge Locals, Oxford and Cambridge Joint Board, Associated Board of the Royal Academy of Music and the Royal College of Music, Royal Drawing Society.

In the Institute of Jamaica (in Kingston) is a Public Library with 18,500 books, of which 4,700 form a West India Reference Library; a Natural History Museum; and a Jamaica History Gallery.

*Industry.*

Fruit, consisting of bananas, oranges, &c., is now one of the largest exports, the output of oranges in 1916 being 13,850,650, with a value of 16,488*l.*, and that of bananas being 3,499,565 stems, with a value of 222,496*l.*

| 1916. | | £ |
|---|---|---|
| Sugar | 566,620 cwt. | 502,875 |
| Coffee | 65,950 ,, | 145,110 |
| Ginger | 16,582 ,, | 53,065 |
| Pimento | 63,722 ,, | 43,839 |
| Rum | 1,797,913 glls. | 352,091 |
| Dyewoods | 75,538 tons | 407,608 |
| Cocoa | 64,360 cwt. | 167,337 |
| Logwood Extract | 28,477 pkgs. | 396,128 |

The area under sugar cane in 1916-17 was 33,499 acres, and under coffee 20,427. There are 150 acres of Government cinchona plantations. Area under banana cultivation, 78,890 acres.

The large coffee plantations are mainly on the Blue Mountain Range. Comparatively few of the large plantations remain however, and the great bulk of the coffee exported is grown by small landowners on the limestone formation, which is the principal geological area. The great fruit growing districts are in St. Mary, with Port Maria, Annotto Bay, and St. Catherine, with Kingston for its outlet. Sugar is largely grown in Westmoreland and in the district of Vere Clarendon parish, and in the seaward parts of St. James and Trelawney, where the best rum in the world is produced. The cattle-raising districts are in St. Ann's, and in Hanover and Westmoreland and the western part of St. James. The uplands of Manchester parish are rich in coffee and fruit. St. Elizabeth parish grows a large quantity of logwood and other dye woods, as well as maize and fine pasture for horses.

The cultivation of cotton has recently been undertaken. There are 45 acres now under cultivation. The exports for 1916 reached 16,891 lbs.

The chief imports are food stuffs, clothing, hardware, potable spirits and beer, and building materials. Of the total trade of the island by far the greater portion is with the United States and the United Kingdom, Canada being next in importance.

The following are the figures for 1916:—

| | Imports. £ | Exports. £ |
|---|---|---|
| United Kingdom ... | 1,008,702 | 1,225,721 |
| United States ... ... | 1,783,058 | 920,705 |
| Canada ... ... ... | 232,709 | 386,965 |

*Means of Communication.*

There is a daily postal service throughout the island.

The rates of postage are as follows:—

| | Letters. | Newspapers. |
|---|---|---|
| Within the Colony | For the first oz. 1½*d.*, and 1*d.* for each additional oz. or fractional part of an oz. | ½*d.* each. |
| To places* in Imperial Penny Postage | do. | ½*d.* per 2 oz. |
| To other Postal Union countries, per 1 oz. | 2½*d.* and 1½*d.* for each oz. after. | ½*d.* per 2 oz. |

†Parcels post with England and British W. I. Colonies.‡ Triple scale of postage, up to 3 lbs. 1*s.*, up to 7 lbs. 2*s.*, up to 11 lbs. 3*s.*; with United States, Canal Zone, and Canada, 6*d.* per lb., maximum 11 lbs.

The estimated number of letters and Post Cards handled is as follows:

| | Internal | External. | | Total. |
|---|---|---|---|---|
| | | Outwards. | Inwards. | |
| Letters | 4,696,024 | 998,242 | 1,552,093 | 7,246,359 |
| Post Cards | 629,518 | 56,877 | 49,350 | 735,745 |

There is regular and frequent communication between Europe and Jamaica *via* the United States. Messrs. Elder's and Fyffe's steamers sail frequently from Liverpool. The voyage takes

* See end of Introduction.

† Every parcel post packet addressed to the United Kingdom or any of His Majesty's Colonies or Dominions bears an extra tax of 3d., except those which are addressed to members of His Majesty's Navy and Army. Every incoming parcel post packet containing dutiable matter bears a tax of 3d., which is collected from the addressee.

‡ Jamaica has joined the arrangement for exchange of parcels with the U.K. and British W. I. Colonies. (See Introduction *ad fin.*)

Digitized by Google

13 to 14 days. The Leyland Line Steamers (West India and Pacific Branch) leave Liverpool on the 10th of each month, their average passage being 21 days. There is also frequent steam communication between the United States and Jamaica.

Telegraphic communication with Europe is complete. Jamaica is the first British possession in the West Indies which the two cables from Cuba touch at, whence they branch away *via* St. Thomas, to Demerara, and in the opposite direction to the Isthmus of Panama. On 31st January, 1898, the Direct West India Cable Company established communication between Jamaica and Halifax *via* Bermuda and Turks Island.

A line of inland telegraph, connecting all the principal towns, and having 109 telegraph and telephone stations, is now in operation. The total mileage open is 1,040¼, 695¾ miles along roads, 160 miles P.O. lines on railway, and 184½ along railway lines. The receipts in 1916-17 were 8,615.

The railway extends from Kingston to Montego Bay, in the parish of Saint James, a distance of 112·69 miles, and to Ewarton, in the parish of St. Catherine, in the other direction, by a branch line from Spanish Town of 17·16 miles; and to Port Antonio by a branch line from Bogwalk, on the Ewarton branch, of 54·18 miles, and by a branch line from May Pen to Chapelton, 13·05 miles. The total length of line open is 197·08 miles. The railway was purchased by an American syndicate, who, under agreement, extended it to Port Antonio on the north-east, and to Montego Bay on the north-west, but the company having failed, the Government resumed possession of the line on 16th August, 1900. The total railway debt charge, providing for interest and repayment, is 121,967*l.* The receipts in 1916-17 exceeded the expenditure by 9,116*l.*, leaving a deficiency, after providing for the above charge, of 112,851*l.* There is also a line of telegraph and telephone along the railway from Kingston to Montego Bay, 112¾ miles; Spanish Town to Ewarton, 17¼ miles; from Bogwalk to Port Antonio, 54¼ miles; and from May Pen to Chapelton, 13 miles.

The island is intersected by a system of main roads, the condition of which will bear favourable comparison with those in many European countries. There are 2,218 miles of main roads, and about 4,246 miles of parochial roads.

The United Fruit Co. at present run a fortnightly coasting service by steamship, calling at the principal out-ports.

Kingston, Montego Bay, Falmouth, Sav-la-Mar, Port Antonio, and St. Ann's Bay are ports of registry. During the year ended 31st March, 1917, 3 ships were built.

## CAYMAN ISLANDS.

The Cayman Islands (a dependency of Jamaica consist of three islands, Grand Cayman, Little Cayman, and Cayman Brac, lying between 79° 83′ and 81° 30′ W. longitude, and 19°16′, and 19° 45′ N. latitude. They were discovered by Columbus, on his return voyage from Porto Bello to Hispaniola, but were never occupied by the Spaniards. The English took possession of them soon after the conquest of Jamaica, and they were mainly colonised from that island.

Grand Cayman is distant about 178 miles from the nearest point of Jamaica. It is 17 miles in length, and varies from 4 to 7 miles in breadth. The coasts are for the most part rock-bound, protected by coral reefs and enclosing some fair-sized harbours. One on the north side of the island, called the Great Sound, measures over six miles across.

The principal industry of the inhabitants is catching turtle. These turtle are brought to the island and placed in "kraals," to recover and fatten before being sent to their next stage, Jamaica, from whence they are exported. Over 5,000 turtles a year are thus disposed of at an average price of 1*l.* each.

The Island of Grand Cayman is in some parts fruitful, and the usual tropical products are grown, but a considerable average is traversed by cliffs, and unfit for cultivation. Mahogany, cedar and other valuable timber and some dye-woods are found in quantities. Phosphate deposits of some value exist, and were worked, but have lately been neglected.

There are two towns, Georgetown and Boddentown, and several villages. The population of Grand Cayman numbered 4,128 at the census of 1911.

The smaller Cayman Islands, viz., Little Cayman and Cayman Brac, are about 70 miles distant from Grand Cayman; they are almost entirely given up to the growth of cocoanuts. Their inhabitants numbered at the last reckoning 136 and 1,300 persons respectively.

The proportion of white inhabitants in the Cayman Islands is much larger than in most parts of the West Indies.

Fine schooners of native woods are continually being constructed at these islands for sale and for local use, the people being first-rate ship-wrights.

The Legislative Assembly of the Cayman Islands consists of the Justices of the Peace and elected Vestrymen, and the laws passed by this body are subject to the assent of the Governor of Jamaica before becoming operative.

The government of the Dependency is administered by a Commissioner.

### *Civil Establishment.*

*Commissioner* (vacant), 300*l.*, furnished house and fees.

*Clerk to Commissioner*, A. L. Bodden, 40*l.*

*Government Medical Officer*, Dr. G. N. Overton, partially furnished residence, 25*l.* each for drug and travelling allowances.

*Clerk of the Courts, Clerk of the Vestry, and Assistant Collector of Customs*, A. E. Panton, 100*l.*

*Collector of Customs* (Georgetown), *Postmaster and Treasury Clerk*, Arthur Bodden, 140*l.*

*Government Medical Officer, Lesser Cayman Islands* (vacant). Drug allowance, 10*l.*

*Collector of Customs, Collector of Taxes, Postmaster, Inspector of Roads, Health Officer, Receiver of Wrecks, Registrar of Births and Deaths, Lower Cayman Islands*, H. W. Rutty, 70*l.* and fees.

## THE LEEWARD ISLANDS.

### *Situation and Area.*

The Leeward Islands, so called in contrast to the Windward Islands, which are most exposed to the N.E. Trade, the prevailing wind in the West Indies, form the most northerly group of the Lesser Antilles, the whole of which were included among the Windward Islands as the term was used by the Spaniards. Some of them belong to Denmark (part of Virgin Islands), Holland (St. Eustatius, Saba, a part of St. Martin), France (Guadeloupe, Martinique, St. Bartholomew, and part of St. Martin) and the United States (Bieques and Culebra). The English Leeward Islands comprising the Presidencies of Antigua (with its dependencies, Barbuda and Redonda), Montserrat, St. Kitts, and Nevis (including Anguilla), Dominica, and the Virgin Islands, were constituted a single Federal Colony by an Act passed in the Imperial Parliament in the Session of 1871, 34 & 35 Vict., cap. 107. The total area of the Colony is 704 square miles, about the size of the county of Surrey, and its population about 131,964.

The island of Sombrero was added to the colony by Order in Council under the Colonial Boundaries Act, on August 10th, 1904.

### *History.*

The islands were discovered by Columbus on his second voyage, in 1493, and became British during the 17th century. Particulars of their subsequent history will be found in the separate articles, but it may here be mentioned, that with the exception of Dominica, they have been from the first associated politically as well as geographically. They were all colonised from St. Kitts as centre, all included in the Carlisle grant, and possessed a common Legislature as far back as the reign of William and Mary. Some Acts passed by that Legislature are still in force in the several islands, notably one "to provide for the want of fines and common recoveries," under which entails and settlements of real property are effected, and which is considered creditable to the sagacity of the Colonists of the day as having anticipated by nearly a century and a half a very beneficial reform only effected in this country in the year 1833, by the Act 3 & 4 Will. IV., c. 74. The General Legislature met for the last time in 1798, when it passed a highly humane slave amelioration Act, which was allowed; a Catholic Emancipation Act, and an Act repealing the duty on exports of 4½ per cent. for the benefit of the English exchequer—both which were disallowed. An attempt was made by Sir William Colebrook in 1837 to revive the General Legislature, and though the attempt was regarded unfavourably in some quarters, and the Legislature never actually met, yet the right to revive it was clear, and there is no doubt that the Act of 1871, the passing of which was largely due to the energy and activity of Sir Benjamin Pine, is no more than a revival of the ancient constitution of the islands. The Colonies of St. Kitts and Nevis, with Anguilla and their respective dependencies, were united into one Presidency by the Federal Act No. 2 of 1882.

### *Climate.*

The climate of the islands varies, but is usually dry and fairly healthy. Antigua is subject to drought, and has an average rainfall of about

Digitized by Google

40 inches; St. Kitts, Nevis and Montserrat have average rainfalls of from 50 to 60 inches; the rainfall of Dominica averages about 120 inches. The mean temperature is about 80°, with but a slight range. The Virgin Islands are cooler. The hot season is from May to October; the rainy season from August to December.

*Constitution.*

By "The Leeward Islands Act, 1871," one Executive and one Legislative Council, under one Governor, were constituted for the six (now five) presidencies. As reconstituted by the Federal Act No. 1 of 1899, the Legislative Council now consists of eight official and eight elective members. Three elective members are chosen by the unofficial members of the Legislative Council of Antigua, two by those of the Legislative Council of Dominica, and three by those of the Legislative Council of St. Kitts and Nevis. They must be and continue members of their respective island councils. The official members are the Governor, the Colonial Secretary, the Attorney-General, the Auditor-General, the Administrators of St. Kitts-Nevis, and Dominica, and the Commissioners of Montserrat and the Virgin Islands.

The Legislative Council has concurrent legislative powers with the local legislatures on certain subjects specified in the Act, such as matters of property, mercantile and criminal law, the law relating to status, the maintenance of a general police force and a common convict establishment, quarantine, postal and telegraph affairs, currency, audit, weights and measures, education and the care of lunatics, all matters relating to immigration, copyright and patents, and its own constitution and procedure. Any island legislature is, in addition, competent to declare other matters to be within the competency of the general legislature. Any island enactment on such subjects is void if repugnant to an enactment of the general legislature, or may at any time be repealed or altered by one.

The Council meets at least once a year, at a place notified by proclamation, and no Council lasts more than three years. The session usually lasts for about one week.

The expenses of the federal establishments are voted by the Council, and apportioned among the Presidencies.

The Council has power to alter its constitution by an ordinary Act, to be reserved for the King's pleasure, and the King has power, by Order in Council, at any time to include any other West Indian Island in the federation, upon joint addresses from the Leglislative Body of such island, and from the Council, on such terms and conditions in each case as are in the addresses expressed. This power has not actually been exercised, and the inclusion in the Colony of Sombrero, which had no legislative body, was effected as above mentioned under a different Act.

*Currency and Banking.*

The usual currency is British silver, a few British and United States gold coins being occasionally met with. The Colonial Bank and the Royal Bank of Canada have branches in Antigua, St. Kitts, and Dominica. In the Virgin Islands, Montserrat and Nevis, there are no banks. The notes of the Colonial Bank circulate in Antigua (3,500*l.*), and St. Kitts (14,000*l.*), and those of the Danish Bank of St. Thomas in the Virgin Islands.

There is no limit to silver as a legal tender.

Government savings banks have been established in all the Presidencies.

| | Total deposits on 31st March, 1917. | No. of Depositors on 31st March, 1917. |

*Means of Communication.*

Mail communication exists with England and also with the other West Indian Islands (including Jamaica) and Demerara, once a fortnight, by the steamers of the Royal Mail Steam Packet Company. Also to the southern islands, and to the United States of America, about once a fortnight, by the steamers of the Quebec and Gulf Ports Line, and to Demerara, the other West Indian Islands (except Jamaica), Bermuda and the Dominion of Canada by steamers of the Royal Mail Line every fortnight. Intermediate mails are also made up for the above places by the steamers of Messrs. Scrutton's Direct Line and others. The usual time occupied by the voyage from England to Antigua is about 16 days.

Two telegraph cables connect Dominica with St. Lucia (*vid* Martinique) and Guadeloupe, and two cables connect St. Kitts with Antigua and St. Thomas. Antigua is also connected with Guadeloupe, and thence with the United States, Bermuda, Canada and Europe. The other islands are not in telegraphic communication by cable, the nearest cable stations to the Virgin Islands being St. Thomas and St. Croix, and the nearest to Montserrat, Barbuda, and Redonda being Antigua and St. Kitts. There are no railways or internal telegraphs.

*Postage.*

The rates for external postage are those of the Postal Union, but in the case of the U.K., India and British Colonies, letter postage is 1*d.* per oz. Inland postal arrangements exist in Antigua, St. Kitts, Nevis and Dominica, the rates being 1*d.* for the first oz., and ½*d.* for every additional oz. within each of the islands.

*General Statistics of the Leeward Islands.*

Total population, census 1911, 127,189, being a decrease of 245 on that of 1901.

| Year. | Imports. | Exports. | Revenue. | Expenditure. |

*Education.*

The system of elementary education is denominational in Montserrat and the Virgin Islands, the various denominations being Anglicans, Moravians, Wesleyans and Roman Catholics. Up to 31st March, 1915, there were 111 aided and Government schools. In St. Kitts-Nevis the State-aided denominational schools were closed at the end of the financial year, and by amalgamating certain schools in proximity one to another the number of schools was reduced to 33, which are under the sole control of the Government and are entirely supported from public funds. The clergy of the various denominations are granted facilities for giving religious instruction during school hours to the children of their respective churches. During the financial year 1915-16 the Government grants to all the elementary schools in the Colony amounted to 8,472*l.* 5*s.* 9*d.*

School fees have now been abolished in all public elementary schools throughout the colony for all scholars from the Sixth Standard downwards, children in the Seventh Standard alone paying fees. The schools are required to receive all children applying for admission. Grants-in-aid are refused to superfluous or inefficient schools. In the 111 aided and Government schools there were enrolled on 31st March, 1916, 23,944 children, with a daily average attendance of 11,019. Grants of varying amounts are also made to grammar or high schools established in each Presidency, except Montserrat and the Virgin Islands. Provision is also made for agricultural and technical instruction. The amount of Government Grant to secondary schools in the Colony exceeds 1,000*l.* for over 300 scholars.

*List of Governors of the Leeward Islands from 1885.*

1885 Lord Gormanston, K.C.M.G.
1888 Sir W. F. Haynes Smith, K.C.M.G.
1895 Sir F. Fleming, K.C.M.G.
1901 Sir H. M. Jackson, K.C.M.G.
1902 Sir Gerald Strickland, K.C.M.G.
1904 Sir C. C. Knollys, K.C.M.G.
1906 Sir Bickham Sweet-Escott, K.C.M.G.
1912 Sir H. Hesketh Bell, K.C.M.G.
1916 Sir E. M. Merewether, K.C.M.G., K.C.V.O.

## ANTIGUA.

Antigua is situated in W. long. 61° 45′, and N. lat. 17° 6′. It is about 54 miles in circumference, and its area is 108 square miles, about half the size of Middlesex.

The islands of Barbuda (population 871) and Redonda (population 120) are dependencies of Antigua. They have a total area of 62½ square miles. Barbuda lies about 25 miles due north of the main island, with an area of 62 miles, is very flat, with a large lagoon on the west side, separated from the sea by a spit of sand. It was long owned by the Codrington family. It produces some salt and phosphates of lime, and is well adapted for cattle grazing and horse rearing. Cotton is being grown with favourable results. It is one of the few islands where wild deer are still found. Redonda, lying between Montserrat and Nevis, 25 miles S.W. of Antigua, in 25° 6′ N. lat., 61° 35′ W. long., 1 mile by ⅓ mile, 1,000 feet high, is valuable for its phosphate of alumina mines, discovered in 1865, now worked by the Redonda Phosphate Company under license and subject to an annual rental of 50*l.* On an average, 7,000 tons are annually exported to the United States, 90 men being employed.

Antigua was discovered by Columbus in 1493, who named it after a church in Seville, called Santa Maria La Antigua. It was first inhabited by a few English from St. Kitts in 1632. In 1663 Charles II. made a formal grant of the island to Lord Willoughby, who sent out a large number of colonists. After an interval of French occupation, it was declared a British possession by the Treaty of Breda, 1666. There are no rivers, and few springs in the island, and consequently it is exposed to frequent droughts. The island is in the main low-lying and has no forests. Rainfall :—

On the 22nd March, 1898, the Legislative Council, which was previously partly elected and partly nominated by the Governor, passed an Act abrogating itself and substituting the Crown Colony system. The new Council consists of sixteen members, eight official and eight non-official, all nominated by the Governor under Royal Letters Patent. The Governor presides. By Ordinance No. 7, of 1910, the duration of the Council is limited to three years.

The chief productions are sugar, cotton and pineapples, but much of the land has been allowed to become ruinate in the hands of the old planting families. There are 127 estates in cultivation, comprising approximately 52,000 acres. St. John, the chief town, has a population of 7,910, and is a port of registry, having on 31st December, 1912, 47 sailing vessels registered, with a total tonnage of 630. The other towns are Falmouth, Parham and English Harbour.

## ST. CHRISTOPHER AND NEVIS.

This Presidency consists of the Islands of St. Christopher (St. Kitts), Nevis and Anguilla, with their several dependencies. These were united to form one Presidency by the Federal Act No. 2 of 1882.

The total population was 43,303 by the census of 1911, and the total area is about 150 square miles.

### *Constitution and Government.*

In 1625 Sir Thomas Warner landed in St. Christopher, bearing a Royal Commission to the Earl of Carlisle, by which the islands of St. Christopher (or Merwar's Hope), Nevis, Barbados and Montserrat were taken under royal protection, and given over to his custody as the King's Lieutenant.

In 1672 St. Christopher, Nevis, Montserrat, Antigua, Barbuda, Anguilla "and all other the Leeward Islands" were separated from Barbados and created the "Leeward Caribbee Islands Government," and Sir William Stapleton, Bart., was appointed "Captain-General" of the same. The chief seat of government was then at Nevis, but afterwards transferred to Antigua, and the government of each island, in the absence of the Captain-General, was administered by a Lieutenant-Governor, or, when none such was appointed, by the President of the Council.

In 1689 Colonel Christopher Codrington was appointed Governor-in-Chief, and his Commission, granted by William III., and dated 20th October, 1689, authorised him to call assemblies of freeholders and planters within any of the islands "jointly and severally to make laws for the public peace, welfare and good government of the said islands," thus providing for separate and federal legislatures. The Legislature in St. Christopher and in Nevis, as in the other islands of the government, consisted of two houses, a nominated Council and an elected Assembly, and had secured to it its own peculiar laws and local jurisdiction.

By Letters Patent, dated 26th April, 1816, the Commission originally granted to Sir William Stapleton was revoked, and the Leeward Caribbee Islands formed into two distinct governments, the first comprising Antigua, Montserrat and Barbuda, and the other St. Christopher, Nevis, Anguilla and the Virgin Islands.

By Letters Patent, dated 23rd November, 1832, the General Government was restored, Dominica being for the first time included, and a Governor and Commander-in-Chief, with two Lieutenant-Governors for St. Christopher, Nevis and Anguilla, and for Dominica respectively, were appointed, each island possessing a Legislative Council and House of Assembly, which continued, under the supervision of the Governor-in-Chief, to legislate for local interests.

In 1866 measures were introduced in each island to alter the constitution, and the two houses then existing were replaced by a single Legislative Assembly, consisting of *ex-officio* members, nominees of the Crown, and representatives of the people elected under a limited franchise.

In 1877 the single chamber constitution was repealed in St. Kitts and in Nevis, and the Crown Colony form of government adopted in its stead, and in 1882 these two islands, with Anguilla, were united into one Presidency.

The office of Lieutenant-Governor, which existed until 1870, has been abolished, and the Presidency, in the absence therefrom of the Governor, is under the immediate supervision of an Administrator, acting under his instructions.

There is one Executive Council for the Presidency, consisting of the Governor, the Administrator, certain *ex-officio* members, and such other persons as His Majesty may from time to time appoint. The Legislative Council consists of six official and six nominated unofficial members, besides the Governor and the Administrator. Of the unofficial members not more than five shall be from among the people of St. Kitts and Anguilla, and one at least from among the people of Nevis. The Governor, or, in his absence, the Administrator, or, in the absence of both of them, a member of the Council appointed in writing, presides, and the President of the Council enjoys an original and a casting vote. The Council meets at the town of Basseterre in St. Kitts.

### *Industry.*

Tobacco was at first the principal crop grown, but it soon lost its pre-eminence, and the main industry of the two larger islands is now the production of sugar, molasses and rum, and the growth of Sea Island cotton. About 17,000 acres are in sugar-cane cultivation, and 2,600 in cotton. The crop exported from the Presidency during 1916 amounted to 16,106 tons of sugar, 3,816 puncheons of molasses, 4,732 gallons of rum, and 307,624 lbs. of Sea Island cotton. Arrowroot, coffee, peanuts and vegetables are also grown in small quantities for local consumption. Successful experiments have been carried on in the growing of coco-nuts, tobacco, cocoa and vanilla, and the prospects are encouraging. Cattle, horses and small mules are raised. Salt is produced in Anguilla, of which 2,349 barrels were exported in 1916.

### *St. Kitts.*

The island lies in latitude 17° 18′ N., and longitude 62° 48′ W. The area of the main body of it presents a long oval, from the south-eastern end of which runs a narrow neck, gradually expanding into a small knob of land, within which are the salt ponds.

The total length of the island is about 23 miles. The total area is 68 square miles.

The central part of the main body consists of a range of lofty rugged mountains, which traverses it from south-east to north-west, attaining its greatest height at Mount Misery, which is about 3,711 feet above the sea. This range of hills describes nearly a semicircle, forming the spacious and fertile valley or plain, on the seaboard of which lies Basseterre, the principal town, with a population of about 10,000. On the south-west side of the island, between the mountains and the sea, but nearer the latter, is Brimstone Hill, formerly the seat of the garrison. It is quite isolated, and about 750 feet in height.

The circle of land formed by the skirts and lower slopes of the mountain-range of the main body of the island, and the valley of Basseterre, constitute nearly the whole of the arable and cultivated portion of the island. The higher slopes of the mountains are covered with short grass, affording excellent pasturage, while their summits are crowned with dense wood.

The climate, for a tropical one, is decidedly healthy. The highest temperature in the shade is about 88°, the lowest 66°, and the mean average about 76°.

Digitized by Google

The average rainfall for the year 1915 was 69·51 inches.

St. Christopher or St. Kitts, the Carib name of which was Llamuiga, "The Fertile Isle," was the first settled of the British West Indies. Mr. Thomas Warner was despatched thither in 1623 by Mr. Ralph Merriefield, and commenced tobacco cultivation. His first crop, however, was destroyed by a hurricane, and the Colony was for some time in a precarious condition until the arrival of the ship *Hopewell* with supplies for the settlement.

In 1625, Warner, at the instance of the Earl of Carlisle, to whom Charles I. had granted Letters Patent over the islands of St. Christopher, Nevis, Antigua, Montserrat and Barbados, was appointed Governor-General of these Islands and Governor of St. Kitts.

Upon the same day in the year that Warner returned from a recruiting visit to England M. D'Esnambuc, with a few Frenchmen, reached the island, and was permitted to form a settlement beside the English, a treaty of partition being afterwards made, the French obtaining the two ends of the island and the English the middle portion. From thence the greater number of the Lesser Antilles were colonised, thus earning for St. Kitts the name "Mother of the Antilles."

In October, 1628, a Spanish squadron devastated the island and ordered its abandonment, an order that had quite a contrary effect, and the two settlements rapidly increased. Warner was knighted in 1629.

War between the mother countries led to war between "the two nations" at St. Kitts, with the result that in April, 1666, the English were expelled from the island. Repelling an attempt at its recapture, the French remained in possession until the next year, when, by the Treaty of Breda, England recovered her share of it. Again, in 1689, the English suffered expulsion under cruel and barbarous circumstances, but a year later Sir Timothy Thornhill, after three weeks' fighting, recovered the island for the British arms, the whole of it remaining in England's possession for seven years, when, by the treaty of Ryswick in 1697, the French were restored to their former portions of it.

Once again did England become sole mistress when, in 1702, the French capitulated without resistance to General Hamilton, supported by a fleet of twenty ships. A French invasion four years later proved futile, and in 1712 the whole island was ceded to Great Britain by the Treaty of Utrecht.

For seventy years there was peace, and then, in 1782, after a memorable siege and two naval encounters, France enjoyed possession of the Fertile Isle. It was restored to England by the Treaty of Versailles on 28th January, 1783, and two French raids in 1805 and 1806 mark the close of the remarkable history of this island's warfares.

### *Nevis.*

The island of Nevis is situated in 17° 40′ N. lat., and 62° 33′ W. long. It was discovered in 1498 by Columbus, and was colonised by the English from St. Kitts in 1628. Charlestown, the principal town, has a population of about 1,500. The population of Nevis largely consists of peasant proprietors.

The island, which is divided into five parishes, is nearly of a circular form; its area is about 50 square miles, or about 32,000 acres, of which about 16,000 acres are fit for cultivation; its greatest elevation 3,596 feet above the sea.

The climate is very similar to that of St. Kitts, from which place it is separated by a strait of about two miles in breadth at its narrowest part, which, however, lies out of the direct course for boats plying between the two islands. The distance between Basseterre (St. Kitts) and Charlestown (Nevis) is about twelve miles. The roughness of the sea occasionally prevents communication, but, as a rule, the boats which ply between the two ports have the wind abeam.

### *Anguilla.*

Anguilla is situated in 18° 12′ N. lat., and 63° 5′ W. long., about 60 miles N.W. of St. Kitts, and is sixteen miles in length, and varies in breadth from three to one and a half miles, containing an area of thirty-five square miles. The "Dogs" and neighbouring islands are dependencies of Anguilla.

The revenue of Anguilla may be estimated at about 1,000*l*. The local courts for the administration of justice are the Magistrate's Court and the Civil Jurisdiction Court. The island is also within the jurisdiction of the Supreme Court of the Leeward Islands, and is visited periodically by a Judge of the Summary Jurisdiction Court.

The island is healthy, but suffers from want of an adequate water supply. The population is 4,075.

Besides cattle, ponies and small stock, the chief product is salt. The cultivation of Sea Island cotton has been extensively taken up, and is now, under the able administration of Mr. Rey, a resident planter, a settled industry.

## DOMINICA.

Dominica is situated between 15° 10′ and 15° 40′ N. lat., and 61° 14′ and 61° 30′ W. long.; 29 miles long and 16 broad. It lies between the French Islands of Guadeloupe and Martinique, being distant from each about thirty miles, and has an area of 291 square miles.

The island is very mountainous and picturesque, rising on Mount Diablotin to almost 5,000 feet. It was discovered by Christopher Columbus on Sunday (hence its name), the 3rd of November, 1493, in the course of his second voyage. It was included in the grant made of sundry islands in the Caribbean Sea to the Earl of Carlisle, by a patent, dated 2nd June, 1627; but several attempts to bring the place under subjection to the English proved abortive. By the treaty signed at Aix-la-Chapelle, in 1748, it was stipulated between the English and French that Dominica and some other islands should remain neutral, and that the original proprietors, the Caribs, should be left in possession. During the time that Dominica was thus professedly regarded by the English and by the French as a "neutral" island, many French planters settled on it and established plantations.

Dominica was captured by the English in 1756, and by the ninth article of the peace of Paris, in 1763, was assigned to Great Britain. Commissioners were sent out for the purpose of surveying and selling lands capable of cultivation, which yielded to the British Crown the sum of

312,092*l.* 11*s.* 1*d.* sterling. The French settlers were generously secured in their possessions, on condition of taking the oath of allegiance and paying a small quit rent. Dominica at this time formed a unit of a General Government, which comprised Grenada and the Grenadines, St. Vincent, and Tobago.

In 1771, the island was constituted a separate Government, under the administration of Sir Wm. Young, Bart. On the 21st June, 1775, a Royal Proclamation was issued, establishing a House of Representatives, fixing a new qualification for candidates and electors, and regulating proceedings at elections.

In 1778, the French, attracted by the fertility of the place, and invited over from Martinique by some of their countrymen, prepared a military and naval expedition against the island, under the Marquis de Bouillé, Governor of Martinique, and became masters of it on the 7th of September, after an obstinate resistance. Marquis Duchilleau, a cruel and tyrannical officer, was appointed Governor. Trade failed, and great distress followed.

In 1783 the island was again restored to the English, and Sir John Ord, Bart., was appointed Governor.

In 1795 another invasion of the island was attempted by Victor Hugues, the French Republican leader, who had previously forced the British troops to evacuate Guadeloupe. The brave and well-directed resistance of the inhabitants, under the command of Governor Hamilton, forced part of the enemy to fly, and the rest to surrender.

In 1805, now referred to in the island for marking the time of events, by the name of *La Grange* (the name of the invading General), the French again landed at each flank of Roseau. The regular troops and the militia fought gallantly, but unfortunately Roseau, the capital, was set on fire accidentally, and was obliged to capitulate, paying the enemy 12,000*l.* to quit; whilst the Governor, Sir George Prévost, and the troops (regular and militia) proceeded across the island to the superior position of Prince Ruperts, now known as Portsmouth.

In 1833 the island was, with Antigua and the other Leeward Islands, formed into a General Government, under a Governor-in-Chief, resident at Antigua.

Riots occurred in 1893, in the district of La Plaine on the Windward Coast of the island, in connection with the collection of taxes. The police and a party of marines and blue jackets, landed from H.M.S. *Mohawk*, were stoned, and compelled to fire on the rioters, with fatal results. An inquiry into the administration was ordered by the Secretary of State, and entrusted to Sir R. Hamilton, formerly Governor of Tasmania, who visited the island, and made a report (*vide* H. L. 280, 1893, and C—7447, 1894).

Dominica, in common with other West Indian islands, was visited in 1897 by the Royal Commission appointed to inquire into the condition of the West Indian colonies; and an important outcome of their recommendations was the grant, in 1898, of 15,000*l.* by the Imperial Parliament for road construction in the Island. The Imperial Road has been constructed out of this grant as a bridle road for a distance of 15 miles from the coast at Canefield to Bassinville in the interior, and a length of 5 miles of a surveyed line of road, 14 miles long, intended to connect Bassinville with Layou on the western coast, has also been constructed from the Layou end.

This road has been greatly improved recently, and it is possible to motor for a distance of 10 miles. A bridle track has been made through the bush from Stone Hill and Bassinville to Concord on the Windward coast at Pegona Bay; thus a new means of communication has now been established between the Leeward and Windward coasts by land.

It is estimated that about 130,000 acres in the island are at present uncultivated. Much of this was at one time under coffee, but "blight" and the marauding of the maroons led to the abandonment of many estates, while the depreciation of sugar still further reduced the area of cultivation. The soil is rich and the climate healthy, and the island is well adapted to the cultivation of coffee, especially Arabian, and, on the higher slopes in the centre of the island, cocoa, tea, limes, nutmegs, spices, and tropical fruits of all kinds.

There are many thermal, chalybeate, sulphur, and other medicinal springs in the island, which is volcanic, and on the Grand Soufrière Hills there is a geyser or boiling lake at an elevation of 2,300 feet.

An eruption in the great crater took place on 4th January, 1880, ash and scoria covering the roofs of the houses in Roseau to a depth of two or three inches.

The island abounds in rivers, with fish in some, and there is a plentiful supply of water power.

Cocoa, lime-juice, citrate of lime, cocoanuts, and fruit (including green limes) are the chief products; sugar, formerly the staple industry, has now ceased to be made. A considerable trade is carried on also in spice, oils, and timber. The principal exports in 1915 were: Cocoa, 39,301*l.*; limes and lime juice, 157,295*l.*; citrate of lime, 3,749*l.*; cocoanuts, 1,582*l.*; essential oils, 12,928*l.*; fruit and vegetables, 946*l.*

The rainfall in Roseau for 1915 was 100·01 inches; the average for the whole island was 137·11 inches; the mean temperature 79·9 Fahr.

The chief town is Roseau, population of 6,577 according to the census of April, 1911, it is a port of registry, and had registered on 31st December, 1915, 13 vessels, of a total tonnage of 114 tons. The other town is Portsmouth, to the north-west of the island, in Prince Rupert's Bay. There is a branch of the Colonial Bank at Roseau, and one of the Royal Bank of Canada, established in April, 1915.

There is a Government telephone system of 432 miles, with 7 exchanges, and a Government electric light service for the town of Roseau.

The Local Government is administered by an Administrator, aided by an Executive Council of 5 members. In July, 1898, the Legislative Assembly, which was previously partly elected and partly nominated, passed an Act abrogating itself, and substituting the Crown Colony system. The new council consists of twelve members, six officials and six non-officials, all nominated by the Governor under Royal Letters Patent. The Administrator presides in the absence of the Governor from the Presidency.

A majority of the inhabitants speak a French *patois*, but the use of English is becoming more general.

A remnant of the original Carib inhabitants of the Island is still in existence (*vide* Cd. 1228, 1902).

According to the Census of 1911 there are about 420 Caribs in the Island, of whom about 170 are estimated as of pure blood.

*Foreign Consuls.*

*France*, J. F. Giraud, Consular Agent.
*United States of America*, H. A. Frampton, Consular Agent.

---

## MONTSERRAT.

This Island, discovered by Columbus in 1493, was named by him after a famous mountain in Spain, where is situated the monastery in which Ignatius Loyola conceived the project of founding the Society of Jesus.

It is situated 27 miles from Antigua in 16°45′ N. lat., and 61° W. long., and is about 11 miles in length, and 7 in the broadest part. Its total area is 32½ square miles. It is of volcanic formation and very rugged and mountainous. The hills are covered with forest, the highest elevation being Soufrière Hill (3,000 feet) in the southern part of the island. Plymouth, the chief town, with a population of 1,534, is on an open roadstead on the south-west coast. It is a port of registry, and had, on 31st December, 1916, 5 sailing vessels, total tonnage 126 tons net.

Montserrat was colonised by the English in 1632; the French took it in 1664, and levied heavy imposts on the inhabitants; it was restored to England in 1668. It capitulated to the French in 1782, but was restored to the English in 1784.

Montserrat possessed a Legislative Council and Assembly as early as 1668. After undergoing various modifications they became merged in a Legislative Assembly, which lasted down to 1867.

By an Act of the Legislative Assembly, dated 24th Dec., 1866, and confirmed by Order in Council 26th Feb., 1867, instead of a Legislative Assembly, a Legislative Council was established, having all the powers, authorities, and rights hitherto possessed by the Assembly. By Act No. 2, of 1902, which rescinded these Acts, His Majesty may, from time to time, appoint such persons, not exceeding four in all, as he may think fit, every Councillor holding office during His Majesty's pleasure. Ordinance No. 4 of 1909 repeals No. 2 of 1902 and limits the duration of the Council to three years. Ordinance No. 2 of 1911 amends No. 4 of 1909 and increases the number of members to six.

The cultivation of sugar, once the staple industry of the island, has almost disappeared, and lime-juice and cotton are now the principal products, the exports of lime products in 1916 amounting to 116,447 gallons of raw, 17,186*l.*; 3,188 gallons of concentrated juice, 740*l.*; and 12 tons of citrate of lime, 352*l.*; of a total value of 18,372*l.* There are about 1,200 acres

Digitized by Google

planted in lime trees, and the cultivation is being yearly extended. The industry is principally in the hands of the Montserrat Company, Limited. A trade in fresh limes, which are shipped to London, has also sprung up, valued at 94*l.* were exported in 1916.

The cultivation of Sea Island cotton (which was once grown during the American Civil War), was re-introduced in 1901, and, where the lands are suitable, has superseded the sugar industry, the exports in 1916 amounting to 394,049 lbs. of lint, valued at 33,080*l.*, while the sugar shipped amounted to 417 tons only, of the value of 7,827*l.* The industry is being further expanded, all suitable lands being cultivated.

Owing to the war in Europe, and the consequent increased demand for cane sugar, the cultivation was considerably enlarged in 1916.

A certain amount of fresh pineapples are exported annually to the English and Canadian markets. Among the other exports may be mentioned a drug known as "papain," exported to the value of 1,560*l.* (2,476 lbs.) in 1916, essential oils, 14 gallons, valued at 42*l.*, and corn (853 bushels), valued at 108*l.*

The cultivation of coffee and cocoa, which had declined to such an extent that enough for home consumption was not grown, is being revived, and 70 cwts. of cocoa, of the value of 189*l.*, was exported in 1916.

There are eight Anglican schools with 1,423 scholars, three Wesleyan with 820, one Roman Catholic with 213, and one undenominational with 250 scholars.

The roads of the island have of late years been much improved, macadamised, and drained by masonry culverts and surface drains; and every year progress is made in these respects, as far as the small revenue of the island will permit.

On 7th August, 1899, the island was devastated by a fearful hurricane.

The island is considered to be the most healthy of the Antilles. Death-rate 1916, 17·63 per 1,000.

The rainfall in 1916, was 69·69 inches (mean of 22 stations); and the mean temperature is about dry bulb 81·4°, wet bulb 74·6°.

## VIRGIN ISLANDS.

The Virgin Islands were discovered by Columbus in 1493; they consist of a cluster of islands to eastward of and adjacent to Porto Rico; the largest in the group belonging to Great Britain is Tortola, which is situated in 18° 27′ N. lat., and 64° 39′ W. long. These islands, so far as they are British, became so in 1666.

The British islands (about 32 in number) include Tortola, Virgin Gorda, Anegada, Jost van Dykes, Peter Island, Salt Island, and all others not now actually in possession of Denmark, with the exception of Bieques, or Crab Island, and Culebra, which are now in the possession of the United States of America. The total area of the British colony is about 58 square miles. A lighthouse is maintained by the Board of Trade on Sombrero, which was first included in the Colony in 1904.

The Danes possess St. Thomas, St. John, and St. Croix.

A civil government and courts of justice were established in the Virgin Islands in 1773.

In April, 1867, an Ordinance was passed to amend the Constitution of the Virgin Islands. It was enacted that a Legislative Council should be constituted, to consist of the Colonial Secretary and the Colonial Treasurer, and not more than three unofficial members, to be nominated by the Administrator of the Government. This Ordinance was repealed May 1st, 1902, under which the Governor of the Leeward Islands ordains the laws. There is also an Executive Council.

The chief town is Road Town, Tortola, population (1911) 410, which is a port of registry, having, on 31st December, 1911, 10 vessels, total tonnage, 81.

A small quantity of sugar is made in the Virgin Islands, and during the American Civil War the landed proprietors planted cotton, which grows luxuriantly. The cultivation of Sea Island cotton was commenced in 1904, and a cotton ginnery has been erected by the Imperial Agricultural Department. The peasants own and cultivate most of the land in small plots for subsistence. They also raise a few cattle, and catch fish. They take their produce in small boats to St. Thomas, and this constant sailing among the reefs and currents which surround the Virgin Islands, makes them the finest seamen in the West Indies. They are a hardy, intelligent race, remarkably distinct from the inhabitants of the neighbouring islands. Their trade and intercourse is with the Danish Islands, and to a smaller extent with Hayti and San Domingo.

During the years 1914 and 1915, the planting of coconuts by the Government Experiment Station and by proprietors of land in the Virgin

Digitized by Google

Islands received much attention, and approximately 60 acres have been established. A large area of land in the Virgin Islands is well adapted to coconut cultivation, and the existing trees are quite free from any serious insect or fungoid pests.

The currency consists almost entirely of foreign money, which circulates at the following rates of exchange: Danish money at 25 francs to 1*l.*, American money at $5 to 1*l.*

The climate is more healthy than that of the other West Indies, and the heat not so great. The average annual rainfall at Road Town is about 54 inches.

Large quantities of fibrous plants (agaves and bromelias) grow wild everywhere in Tortola.

The mail communication is by small sailing craft to St. Thomas. Mails are despatched to St. Thomas nearly every day, letters for Europe being usually sent *via* Havre about eight times a month.

## MALTA.

### *Situation and Area.*

The Maltese Islands form a group in the Mediterranean Sea, about 58 miles from the nearest point of Sicily, 80 miles from Syracuse, and 142 from Reggio, and about 180 from the nearest point of the mainland of Africa. The length of Malta is about 17 miles, by 9 miles in breadth; its area is 91·557 square miles; that of Gozo, 25·804 square miles, and that of Comino about one square mile. Filfla and Cominotto are mere islets. The whole group is about half the area of the Isle of Man.

### *History.*

The earliest known inhabitants of the Maltese islands were the Phœnicians, who have left traces of their presence in the famous temples of Hagiar Kim in Malta, and Torre dei Giganti, in Gozo, and Diodorus Siculus states that Malta (Melita) and Gozo (Gaulus) were regarded as being among the most important and prosperous Phœnician colonies. Greeks also appear to have settled in the island at a very early date, and during the period of the struggles between the Greeks and the Carthaginians for the possession of Sicily, Malta probably shared the varying fortunes of its neighbour, but practically nothing is known of its history in these years. At the beginning of the Punic wars the islands were held by Carthage. In the course of the first Punic war they changed hands more than once, but at its conclusion they were still in the possession of the Carthaginians. In 218 B.C., they passed finally to Rome. Under the Romans Malta appears to have enjoyed great prosperity. Diodorus Siculus speaks of the excellence of its harbours, the wealth of its inhabitants, and its many skilful artificers, and refers to its fertility, and Cicero, in the Verrine orations, speaks of it as abounding in riches and famous for its textile manufactures. Inscriptions show that it enjoyed municipal rights in the time of Hadrian, but the most striking fact in its history which is known to us is that it was the scene of St. Paul's shipwreck (Acts xxviii.). On the final division of the Empire in 395 A.D., Malta fell to the share of the Byzantine Emperor, and for the next four centuries its history is almost a blank. In the 9th century it was three times invaded by the Arabs, who finally conquered it in 870, the Byzantine garrison being massacred in an insurrection of the inhabitants. The Arabs held the islands until 1090, when they were conquered by Count Roger de Hauteville. From that date until 1530, the history of Malta is that of Sicily. In 1530, the Emperor Charles V. granted the islands to the Order of St. John, who had been driven from Rhodes by the Turks, and for 268 years it remained under the dominion of the Knights. The most famous incident of this period is the great siege of 1565, when the Order under the leadership of the Grand Master La Valette, successfully resisted the attacks of the apparently overwhelming force which Solyman the Magnificent sent against them. By the end of the 18th century the Order had fallen into decay, and on the 12th July, 1798, the Grand Master Hompesch capitulated without any attempt at resistance to Napoleon Bonaparte, who dispersed the Order. The Maltese, however, rose against the French, and drove them to take refuge in the towns, where they were closely blockaded by the British fleet, aided by the Maltese, for two years. The French, reduced to extremities, surrendered to the British, and in 1800 the government was placed in the hands of Great Britain. The Treaty of Amiens provided that the islands should be restored to the Knights, but this was prevented by the re-commencement of the war, and they were finally annexed to the British Crown by the Treaty of Paris in 1814.

### *Climate.*

The climate of Malta is equable and very healthy in winter. In August the heat at the sea level approaches that experienced in the tropics. The nights, however, are pleasant and cool, except during the prevalence of the sciroccо wind. The mean maximum temperature during the three coldest months (December, January, February) is 58·8° Fahr., and the mean minimum 50·6°; but during the four hottest months (June, July, August, and September) the mean maximum is 81·6° Fahr., and the mean minimum 70·6°. The mean temperature is 64·6°, and the mean annual rainfall is 20 inches. There is no river or rivulet in the island, the water drainage becoming absorbed in the porous sandstone beds and finding its way through underground channels and aqueducts.

### *Industry.*

The island is highly cultivated. Besides products for home consumption, early potatoes, onions, cummin seed and oranges are exported. A large number of the inhabitants are employed in connection with the trade of Valletta as a coaling station and an *entrepôt* and port of call. It is a port of registry, having, on 1st January, 1917, 43 vessels, 6,636 gross tonnage. There is a large trade with Tunis, Tripoli, Algeria, Italy, and the Levant.

### *Chief Towns.*

The chief town and capital is Valletta, having, with its suburbs of Floriana, Sliema, and St. Julian's, a population which, on 2nd April, 1911, when the census was taken, was 44,143. The "Three Cities" (Senglea, Cospicua, and Vittoriosa) have a population of 26,551. Citta Vecchia, the old capital, is in the interior of the island, and, with its suburbs, had a population of 8,896 on 2nd April, 1911. The chief town of Gozo is Victoria (formerly called Rabat), with a population of about 5,655.

### *Inhabitants.*

The inhabitants of the country districts resemble the southern Italians in appearance, and in some districts show distinct traces of their Punic descent. In the towns and among the upper classes are to be found representatives of families who have settled in Malta from many different countries. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held to be derived from the Carthaginian and Arabic tongues. The educated and commercial classes also speak Italian and English. The Maltese are remarkably thrifty, hard-working, and industrious. They are excellent seamen and mechanics; large numbers of them are to be found in Algeria, Gibraltar, the Regency of Tunis, Egypt, the United States, Canada and Australia.

### *Currency and Banking.*

The legal tender currency is, under Order in Council of September 24th, 1886, exclusively British. There are two local banks (Banco di Malta

Digitized by Google

and Anglo-Maltese Bank), and branches of the Anglo-Egyptian Bank and the Banco di Roma. The first two banks have a small note circulation, the amount of which cannot be ascertained, inasmuch as those banks are not subject to any statutory laws and do not publish their accounts. The Government savings bank was established in 1833. On 31st March, 1917, the deposits amounted to 684,972*l.*

*Means of Communication.*

The railway, which is of the metre gauge, is 7¾ miles long; it was originally built by the Malta Railway Company at the cost of about 100,000*l.* The railway became the property of the Local Government in 1890, under a clause of the concession which provided that if the service was suspended for a certain period, the railway would be forfeited to the Government. An electric tramway service was started in 1905, connecting the principal towns and some of the villages with Valletta. There is a telephone exchange with 785 miles of wires. Malta is a station of the Eastern Telegraph Company, with direct cables to Alexandria (3), Gibraltar (3), Bone (2), Messina (1), Tripoli (1), Sicily (1), and Zante (1).

Malta is a port of call for nearly all the Mediterranean lines of steamers, and is an important coaling station, facilities being given for coaling at any hour, day and night, and for ensuring full weight of bunker coals. There is direct mail communication with several Mediterranean ports and with England. The rates of postage are as follows:—

| | Letters. per oz. net. | Newspapers. |
|---|---|---|
| Local | ½*d.* | ¼d. per 2 oz. |
| To United Kingdom and British Possessions generally, Egypt (including the Soudan), British Postal Agencies in Morocco, and British Ships of War serving abroad. | 1*d.* | ½*d.* do. |
| To all other places. | 2½*d.* 1st oz. 1½*d.* every additional oz. | ½*d.* do. |

The total correspondence received and despatched in 1916-17 was as follows:—

*Inland Correspondence.*

| | Received. | Despatched. |
|---|---|---|
| Letters | 1,158,664 | 1,625,632 |
| Postcards | 26,560 | 86,424 |

| Other Printed Matter | 351,964 | 318,334 |
| Parcels | 79,935 | 21,624 |

*Public Works.*

The drainage of the fortified towns, which was commenced in 1876 at the joint charge of the Colonial and Imperial Treasuries, was completed in 1885, and has greatly improved their sanitary condition. New drainage works, were commenced in 1899, and Sliema, St. Julians, Misida, Pietà, Calcara, Zabar, Hamrun, Curmi, Rabato Tarxien, Paula, Zeitun and Zabbar, and other places have been drained, while several works have been carried out under a scheme for flushing the whole drainage system of Malta with sea water. The waterworks have also been much improved, and have now been extended to all the large villages and to Gozo. Considerable progress has been made in public lighting, and in improving the roads and streets. Electric lighting has been installed, and current is supplied to Valletta, Floriana, Sliema, Birchircara, and the Three Cities, including the two harbours.

*Constitution.*

The Government is administered by a Governor, advised and assisted by an Executive Council, established in 1881, re-constituted in 1887, and again in 1903 and 1909. It now consists of ten official and two unofficial members besides the President. Legislation is carried on by means of a partly-elective Council of Government originally constituted by Letters Patent of 11th May, 1849; re-constituted by Letters Patent of 12th Dec., 1887 (amended in 1898); and again by Letters Patent of 3rd June, 1903. It now consists of nine official members and eight elected, besides the President and a Vice-President. Public officers are ineligible for election, and no ecclesiastical person is capable of being elected a member of the Council. The islands are divided into eight electoral districts, returning one member each. The total number of electors is at present about 7,500. The qualifications for a member of Council are, his qualification to be registered as an elector, and the possession of immovable property of the clear value of 100*l.* for twelve calendar months previous to election; or the payment of rent for immovable property to the annual value of 10*l.* for twelve calendar months previous to election; or the payment of 40*l.* a year for board and lodging; or 10*l.* a year for his lodging only for the same period previous to election. The qualifications for an elector are the age of twenty-one years, British nationality, and either an income from immovable property of 6*l.* per annum, or the payment of rent to the amount of 6*l.* per annum for six calendar months before registration, or qualification to serve as a common juror. The Council of Government, unless sooner dissolved, lasts three years. The Governor is *ex-officio* President, but neither he, nor the Vice-President or other presiding member has either an original or a casting vote. A Vice-President was first appointed by Letters Patent, dated 6th February, 1893. The Governor, or the Vice-President, if present, may depute an official member to preside. There are no municipalities or other forms of local government.

*Education and Religion.*

Elementary education is carried on principally in Government schools, which are Roman Catholic and free. There are two secondary schools with 263 scholars, and 139 elementary and infants' schools, including 84 elementary schools, 16 infant schools and 39 night schools, with an average enrolment of 22,079 pupils, and an average attendance of 18,036 in both day and night schools. There is a public Lyceum with nearly 509 scholars, and a university (founded in 1769) with an average attendance of about 244 students. At these two latter institutions the fees are comparatively low, ranging from 30*s.* to 50*s.* per annum in the Lyceum, and not exceeding 6*l.*, exclusive of laboratory fees, per annum for all lectures in the University.

Digitized by Google

There are numerous private elementary and secondary schools. The total number of these schools is 71, with an approximate attendance of 4,660 pupils. Education is not compulsory. The Roman Catholic religion is universal amongst the Maltese.

*Revenue.*

There is no direct taxation of any kind.

The most important sources of revenue are the Customs duties, stamp duty, port dues, and land revenue.

*Weights and Measures.*

Malta barrel is equal to 9½ imperial gallons.
,, salm ,, 1 ,, quarter.
,, cantar ,, 175 lbs. English.
,, caffiso ,, 4½ imperial gallons.

## MAURITIUS.

*Situation and Area.*

Mauritius is an island in the Indian Ocean, between 57° 18′ and 57° 48′ E. long., and 19° 50′ and 20° 31′ S. lat., distant 115 miles from Réunion, 934 miles from Seychelles, 1,300 miles from Natal, 2,000 miles from Cape Comorin, 11,000 miles from England, 2,300 from the Cape of Good Hope, and 500 from Madagascar. It comprises an area of about 720 square miles (nearly equal to Surrey), having an extreme length of 39 miles from north to south, and an extreme breadth of 29 miles from east to west.

The formation of the island is supposed to be volcanic, and it is surrounded by reefs of coral. The mountain chains average 2,000 feet in altitude. The highest peak, the Piton de la Rivière-Noire, is 2,711 English feet, and Pieter Both and the Pouce are only a few feet lower. The island is watered by numerous streams, commonly flowing in deep ravines, with several fine cascades; none of these rivers are navigable for any distance from the sea.

*History.*

The island was discovered by the Portuguese between 1506 and 1528. Although neither the date of the event nor the name of the discoverer can be ascertained with accuracy, tradition has attributed its discovery to Pedro Mascarenhas. The island at that time went under the name of Santa Appolonia, which was later changed to Cirné. The Portuguese merely used the island as a port of call, without making any settlement. The first settlers were the Dutch. In 1598 a Dutch fleet landed in the South-Eastern harbour of the island, to which its commander, Admiral Wybrandt Van Warwyk, gave the name of Mauritius, in honour of the Statholder, Prince Maurice of Nassau. For many years no attempt was made at colonisation, but from 1638 downwards petty settlements were established at various points, the seat of government being at Port South East, at the place known as Old Grand Port. The colony did not prosper, and finally was abandoned by the Dutch in 1710.

In 1715 the island was formally taken possession of by the French, but was not actually occupied till 1721, when a small party of colonists were sent out on behalf of the French East India Company. The island was then named Isle de France. This name was retained until the landing of the English in 1810, when the former name of Mauritius was restored. Of all the Governors of the island, the most celebrated was Mahé de Labourdonnais (1735-1746), "a man of eminent talents" (in the words of Lord Macaulay), who encouraged the cultivation of sugar-cane and introduced many other valuable plants. He was the real founder of the prosperity of the Isle de France.

In 1767, the French East India Company, having gone into liquidation, handed over the island to the Crown, Jean Daniel Dumas being appointed Governor General for the King, and Pierre Poivre, Intendant. Poivre was a man of great ability; he introduced into the colony cloves and nutmegs secretly obtained from the Dutch Sunda Archipelago. Having purchased the ancient residence of the Company's Governors, at Monplaisir, he converted the grounds into a nursery where many useful plants introduced by him were cultivated. On his departure this property was sold to Government, the garden being entrusted to Poivre's friend, Nicolas Céré, under whose able management it became famous under the name of King's Gardens. It is now the Royal Botanical Gardens, Pamplemousses.

In 1771 an epidemic of small pox caused many deaths among the slave population.

In 1790, at the outbreak of the French Revolution, a Colonial Assembly was elected, which for 13 years governed the island *de facto*.

In 1792 another very popular Governor was sent out from France, Comte de Malartic, who during this troubled period managed to gain the affection of the whole community. In 1803, the Isle de France was taken charge of by General Decaen, appointed Captain General by Napoleon Bonaparte, then First Consul, with instructions to suspend the Colonial Assembly and the Isle de France's constitution for a period of ten years.

During the long war between England and France, the Isle de France was a source of great mischief to our merchant vessels, owing to the facility with which sorties were made from its harbour by French men-of-war and privateers; and in 1809 the British Government determined on its capture. The neighbouring islands of Rodrigues and Reunion were taken possession of and several naval engagements were fought to the credit of both navies. The most famous of these was the battle of the Isle de la Passe, fought in the bay of Grand Port on the 23rd and 24th August, 1810, between four English frigates and two French frigates, a corvette and a captured East Indiaman. The English were defeated, two of their ships having gone on shoals early in the engagement, but the great gallantry shown by both sides has rendered the fight memorable in the annals of the two navies.

A strong expeditionary force was then sent out from the three presidencies of India and the Cape. Twelve thousand troops under General Abercrombie were landed, and the island finally

Digitized by Google

surrendered to Great Britain December 3rd, 1810, the laws, religion, and customs of the inhabitants being guaranteed in the instrument of capitulation.

The possession of the island was confirmed to England by the Treaty of Paris, 1814.

The first English Governor, Mr. (later Sir) R. T. Farquhar (1810-1823) gained a well-deserved popularity. During his tenure of office, on 25th September, 1816, the fourth part of the town of Port Louis was destroyed by a conflagration. On 28th February, 1818, the island was laid waste by a terrific cyclone, causing immense destruction to property.

In 1826-27, owing to the abolition of the 10*s.* extra duty on every hundredweight of Mauritius sugar imported into the United Kingdom, the output of this article, which was a little short of 500 tons in 1812 and had gradually increased to 12,000 tons in 1823, suddenly rose to 20,000 tons.

In the year 1832, the Council of Government which was established on the 19th August, 1825, was abolished, and a Legislative Council, with half the members official, created. The oaths of office were taken by the new members on the 23rd January, 1832.

On the 1st April, 1835, the emancipation of slaves took place without disorder; but as this new class of free men refused employment as labourers the planters were obliged to resort to the introduction of labour from India which was finally authorised in 1842, under the supervision of an agent residing in India, and which continued, with temporary interruptions, until 1910.

In 1849, the Legislative Council voted the law constituting a municipal corporation for the town of Port Louis.

During the years 1854, 1856, 1861-62, epidemics of cholera prevailed, of which that of 1854 was the most severe, causing 7,650 deaths.

The year 1864 saw the opening of the North Railway Line from Port Louis to Pamplemousses, the Midland Line being inaugurated two years after.

In December, 1866, malaria broke out with great severity. During the year 1867, 31,758 persons died from fever, including 18,308 in Port Louis.

In 1868 and 1874, Mauritius was visited by severe hurricanes. During the former two spans of the Grand River Railway Viaduct were brought down by the force of the wind. On the 29th April, 1892, one of the most violent cyclones ever recorded ruined a considerable portion of Port Louis, besides causing infinite havoc to buildings and crops. The death roll amounted to 1,232. In order to assist the planters and other owners of immovable property affected by the calamity, a loan of £600,000 was guaranteed by the Imperial Government.

On the 23rd of July, 1893, part of Port Louis was again destroyed by fire. At the end of the same year ocean telegraphic communication was opened.

In 1902, an outbreak of Surra caused great loss of draught animals, and mechanical means of transport had to be resorted to for the sugar plantations. A number of locomotives and traction engines were introduced, and a loan was raised to enable the planters to lay down tramways, and take other steps to provide for transport. New machinery and improved processes in the sugar manufacture are being constantly adopted.

In 1909, a Royal Commission visited the Island to enquire into the administration and finances of the Colony.

*General Description.*

The permanent settled population of European race is greater in Mauritius than in any other tropical colony. Many of the inhabitants are descendants of the ancient French nobles. The higher and middle classes possess much intellectual culture. The natives are proud of their country, and of the designation of Creoles.

Nine daily newspapers and five other periodicals are published in the capital. The French language is spoken all over the island, English being used in the courts of justice. Debates in the Council of Government may take place in either language.

Mauritius is divided into nine districts, Port Louis, Pamplemousses, Rivière du Rempart, Flacq, Grand Port, Savanne, Moka, Plaines Wilhems, and Black River.

The City of Port Louis is the capital, and seat of Government, and contains, with its suburbs, a population of 50,060 souls (census 1911). The harbour is one of the best in the East, and is sufficiently spacious to receive more than a hundred vessels. It possesses three graving docks. It is defended by Fort Adelaide (the citadel) and by Fort George. There are large barracks and military stores. The trade of the island passes almost entirely through Port Louis. The city has an elected municipal corporation, and raised in 1916 a revenue of Rs. 518,567, against an expenditure of Rs. 529,721. Its debts amount to 112,240*l.* and Rs. 13,232.

The principal public edifices of Port Louis are the Government House, the Institute, the Roman Catholic and Protestant cathedrals, the Civil Hospital, the Town Hall, the theatre, and the public offices.

After Port Louis, the largest town is Curepipe, incorporated in 1890 (population 17,173, census of 1911), situated on the uplands in the Plaines Wilhems. Its climate is temperate.

In the district of Grand Port is the small town of Mahebourg (population 3,505, census of 1911), so called in honour of Mahé de Labourdonnais.

*Population.*

At the Census of 1911 the population of Mauritius (exclusive of the Dependencies, but including Military) was found to consist of:—

| | |
|---|---|
| Persons of European, African, or mixed descent ... ... ... ... ... | 108,844 |
| Indo-Mauritians, *i.e.*, persons of Indian descent, born in Mauritius ... ... | 222,361 |
| Other Indians ... ... ... ... | 35,526* |
| Chinese ... ... ... ... ... | 3,662 |
| | 370,393 |

The total number of Indians was thus 257,887, or 69·6 per cent. of the total population.

The descendants of the immigrants from India—the Indo-Mauritians—now form the largest section of the population; they are steadily increasing in numbers. They are predominant in the domestic, commercial, and still more in the agricultural callings, and the amount of land held by them as small planters is rapidly growing.

*Constitution.*

The constitution of Mauritius was altered in 1884-85. It now consists of a Governor, with an Executive Council of four *ex-officio* members, and a Legislative Council of twenty-seven members,

* There is reason to believe that a number of old Indian immigrants (*i.e.* those whose contract has expired) have returned themselves as Indo-Mauritians.

Digitized by Google

eight being *ex-officio*, nine nominated by the Governor, and ten elected—two for the town of Port Louis, and one for each of the eight rural districts. At least one-third of the nominated members must be persons not holding any public office. Members are not paid; they may speak either in French or English. The number of registered electors on 31st December, 1916, was 5,963; the franchise qualification is ownership of immovables of annual value of Rs. 300, or movables worth Rs. 3,000, or payment of rent of Rs. 25 monthly, or of license duty of Rs. 200 annually, or receipt of salary of Rs. 50 monthly. The session usually lasts from *April* to *December*.

The law is based on the Code Napoléon, and other French laws modified by Colonial Ordinances.

*Climate, &c.*

From December to April is the hottest season in Mauritius, but it is comparatively cool during the remainder of the year. The temperature on the high lands in the interior of the island is always lower by several degrees than in the city of Port Louis and in the coast districts. The climate at Curepipe, from 1,700 to 1,900 feet above the sea, resembles that of the South of France or Italy. The hurricane season extends officially from December to the end of April, but cyclones occur in the Indian Ocean eastward of Mauritius, from the equator down to 30° S. latitude, in every month of the year, except August and September.

No cyclone had been recorded within 100 miles of Mauritius after the 29th April until, on May 26th, 1916, a centre passed about 80 miles eastward, giving rise to a strong gale, and causing some damage to crops in the east, south-east and south.

*Mean Annual Rainfall.*

The mean rainfall in 1916 from 32 stations was 1937·22 mm., as compared with 58·20 inches in 1915, and an average of 1927·07 mm.

*Water Supply.*

The Town of Port Louis is supplied by the Grand River N.W. and a reservoir was built at the end of the Champ de Mars by the Municipality. This source is not altogether satisfactory.

The *Mare aux Vacoas* works were started by the Government in 1895, they were extended in 1893-95 by the addition of a filtering establishment. The whole of the district of Plaines Wilhems and a part of Moka are now supplied with pure water from these works and a small main was also laid to supply the Barracks and Fort in Port Louis and also the Government Establishments and soda water factories. These works have cost about 2,000,000 rupees and the revenue derived Rs. 50,000 now exceeds the cost of the upkeep.

The water supply of other districts is under the control of other Local Boards and with the co-operation of the Government, works have been undertaken to distribute water from upland springs to the villages in the country districts; these works are now completed for some districts and in course of execution in others.

*Scenery.*

The famous tale of *Paul and Virginia*, by Bernardin de St. Pierre, an engineer officer in the service of France, who was stationed in the island towards the close of the 18th century, scarcely exaggerates the picturesque beauty of large portions of Mauritius. Many of the forests have, however, been felled to make room for the cultivation of the sugar-cane, the staple industry of the colony. In the remaining woods deer abound, and afford good sport; there are also partridges, quails, hares, and wild ducks in several parts of the island. The far-famed Botanical Gardens of Pamplemousses contain many rare and valuable plants and flowers.

*Railways.*

There are seven lines of railway, all owned and worked by Government, viz.: (1) The North line, from Port Louis to the sea coast village of Grand River South-east. Its length is 31 miles, and its course is approximately parallel to the northern coast line of the island. (2) The Montagne Longue branch from Terre Rouge station on the North Line to the village of Montagne Longue; its length is 3½ miles. (3) The Midland line, beginning at Port Louis and running across the island to the sea coast town of Mahebourg on the other side; its length is 35·3 miles, with a summit level of 1,822 feet at Curepipe; the gradient in many places is 1 in 27. (4) The Moka-Flacq line from the Rose Hill station on the Midland line to Rivière Séche station on the North line; length 26·2 miles. (5) Savanne branch from Rosebelle station on the Midland line to the sea coast town of Souillac at the southern extremity of the island; its length is 10·90 miles. (6) Black River branch, from Richelieu on the Midland line to Tamarin, distance 12·75 miles. (7) Rivière du Poste to Mexico, length 10 miles. All the above are of standard gauge, 4′ 8½″, except the 7th which is 75 centimetres (2′ 6″). The total number of miles of railway now open is 119·65 of standard gauge and 15 of 2′ 6″ gauge, the total cost up to date being about 2,164,669*l*. The receipts in 1916 were Rs. 3,344,913 (including traffic done for other Government departments), and expenditure, Rs. 2,876,631, not including the charge on account of Railway Loans.

*Religion.*

The Christian Churches are assisted by State grants. According to the census of 1911, the Roman Catholics numbered 122,424, and the Protestants about 7,000, including Dependencies and Military. The Roman Catholics received in 1915-16 Government aid amounting to Rs. 111,520 and the Protestants Rs. 41,116.

*Education.*

The system of education was remodelled by Ordinance No. 33 of 1899 (brought into force on 21st August, 1900), and all former enactments on the subject were repealed. This Ordinance was amended in some important respects by Ordinance No. 35 of 1913.

Under the Education Ordinance of 1899, a Department of Public Instruction was created which is under the charge of an officer styled "The Director of Public Instruction."

The Department provides for Primary, Secondary and Technical Education: (1) Primary Education is carried on through a system of Government schools and of grant-in-aid Denominational Schools, the latter under the immediate control of local managers. (2) Secondary Education is done by the Government Royal College for boys, under the immediate control of a Rector, and a system of grant-in-aid schools for boys and girls. (3) Under Technical Education, provision has been made for the training of Students in Engineering, Mechanical and Civil, and in Horticulture, and for the training of teachers.

Digitized by Google

An Advisory Committee, styled the Committee of Public Instruction, is annually appointed, primarily for the purpose of framing regulations for the administration of the Department. It may also be consulted, and has the power to advise *proprio motu*, on any question connected with the education of youth in the Colony. The Committee consists of 11 members. The Director of Public Instruction and the Rector of the Royal College are members *ex-officio*; the primary and secondary grant-in-aid schools nominate 5 members; and 5 members are chosen by the Governor. The Director is Chairman of the Committee.

The Director is responsible for carrying out all regulations dealing with the education of youth in the colony, but the exercise of the powers conferred upon him is subject to an appeal to the Governor in Executive Council.

*Higher Education.*

On the books of the Royal College on the 31st December, 1916, there were 209 pupils.

*Primary Education.*

There were in 1916—

| | Number. | Pupils. |
|---|---|---|
| Government schools . . . | 49 | 10,185 |
| Grant schools . . . . . | 91 | 13,028 |
| Total . . | 140 | 23,213 |

*Total Number of Pupils.*

The relative numbers according to religion are shown by the following percentages:

| | pupils. |
|---|---|
| Church of England . . . . . | 2 % |
| Roman Catholic . . . . . | 59 ,, |
| Other Christian denominations . . . | 1 ,, |
| Mohammedan . . . . . | 11 ,, |
| Hindoos and others . . . . . | 27 ,, |

The total expenditure on education in 1916 amounted to Rs. 586,235. There are 689 masters, mistresses, assistants, and monitors and monitresses employed in Government and Grant Schools. Of the pupils in the aided schools 73·7 per cent. are Roman Catholics, 20·7 per cent. belong to the Church of England, and 11·3 per cent. to other Christian denominations. One Hindoo and two Mohammedan schools are also assisted.

*Communications.*

The mail steamers of the Messageries Maritimes leave Marseilles every fortnight (on Thursdays), arriving in Mauritius at intervals of 19 and 9 days, and leaving Mauritius at intervals of 18 and 10 days, each steamer staying 3 or 4 days in Mauritius. There is a four-weekly service with England, *viâ* the Cape of Good Hope, by the steamers of the Union-Castle line. The British India Steam Navigation Company provides a direct four-weekly service between Colombo and Mauritius. There is frequent communication by both sailing and steam vessels with India, Australia, Madagascar, Natal, Réunion, &c.

Telegraphic and telephonic communication is established along and beyond the railway, the total length of line being 621 miles of telegraph* and 139¾ of telephone; and cable communication through a branch office of the Eastern and South African Telegraph Company with Europe, *viâ* Seychelles, Zanzibar, and Aden, was opened in November, 1893. Through rate: United Kingdom to Mauritius, 3s. per word; and from Mauritius to United Kingdom, Rs. 1·90. The laying of the Mauritius section of the Cape-Australian cable, *viâ* Rodrigues, was completed on May 16, 1902.

There are in Mauritius the General Post Office in the city of Port Louis, and 62 branch post offices in the rural districts, 62 money order offices, 56 telegraph and 41 telephone offices. In the island of Rodrigues there is one post office at Port Mathurin. There is no post office on any other of the Dependencies. The rates of postage are:—

| | Letters per 28 grs. | Newspapers per 50 grs. |
|---|---|---|
| United Kingdom, and British Possessions, &c., which have adopted the Imperial Penny Postage . . | 6 cents | 3 cents |
| Dependencies of Mauritius . . | 4 ,, per 15 grs. | 2 ,, |
| Other countries of the Postal Union or non-Union Countries . | 15 cents for letters of 20 grs. | 3 cents |

*Parcels Post Rates.*—For parcels addressed to the United Kingdom.

| *Viâ* France. | | *Viâ* Colombo. | |
|---|---|---|---|
| | Rs. c. | | Rs. c. |
| Not over 1 kilo 361 grs. ... ... | 2 25 | Not over 3 lbs.... | 0 75 |
| Over 1·361 kilos and not over 3 kilos 175 grs. | 2 40 | Over 3 lbs. but not over 7 lbs. | 1 50 |
| Over 3·175 kilos and not over 5 kilos ... ... | 2 70 | Over 7 lbs. but not over 11 lbs. | 2 25 |

*Commerce.*

The island produces hardly anything for its own consumption, but its foreign commerce extends to every quarter of the globe.

The chief exports are sugar, rum, molasses, spice, vanilla, aloe-fibre, oil, copra, &c. Oxen are imported from Madagascar, frozen meat from Australia, and food-stuffs from India.

The imports consist mainly of grain (rice, wheat, &c.), cotton manufactures, wine, coals, hardware, and manure. There is a small tobacco plantation, but sugar production is the greatest industry. About 95 per cent. of the value of the exports is due to shipments of sugar. In 1916 the weight of sugar exported was 230,559,715 kilos., with an estimated value of Rs. 69,309,970. The value of the rum exported was Rs. 127,580; that of vanilla, Rs. 23,184; that of aloe-fibre, Rs. 422,050; that of cocoa-nut oil, Rs. 139,054.

The number of vessels registered at Port Louis is now 31, of a total tonnage of 5,520.

*Currency and Banking.*

The Mauritius Commercial Bank has establishments in the Colony, the total amount of deposits on 31st Dec., 1916, being Rs. 11,190,980.

The Bank of Mauritius (Limited) was established in October, 1894, with paid up capital of 125,550*l.*, and opened in Mauritius in Dec., 1894. Total deposits up to end of 1916. Rs. 6,402,000. The business of that bank was taken over by the Mercantile Bank of India Limited (subscribed capital 1,125,000*l.*) on the 3rd May, 1916.

* Including Block Telegraph for the Railway.

Digitized by Google

A Government savings bank was established in 1837. The total deposits during the year ended 30th June, 1916, amounted to Rs. 1,478,660. The sum standing to the credit of depositors at the end of June, 1916, was Rs. 3,612,390.

All accounts are now kept in rupees and cents of a rupee, which is the currency of the island. There are about Rs. 17,465,000 (in coin) in circulation. A Government note issue was re-established in 1876, the notes being legal tender except at the office of issue. The average circulation for the year 1915-16 was Rs. 6,304,442.

*Weights and Measures.*—The Metric System, as regards weights and measures, came into force on the 1st May, 1878.

### Dependencies.

The dependencies of Mauritius comprise a large number of islands scattered over the Indian Ocean.

*Rodrigues*, the most important, is situated in latitude S. 19° 44′ and longitude E. 63° 34′, and is 344 nautical miles from Mauritius. The island is 18 miles long by 7 miles broad, and is surrounded by coral reefs, extending in some places 5 or 6 miles from the shore. It is under the administration of a magistrate, who takes his instructions from the Governor of Mauritius. Laws for the island are made in the form of regulations framed by the Governor of Mauritius in executive council. The population (census 1911) is 4,829. Cable communication, through a branch of the Eastern and South African Telegraph Company, was opened on 16th May, 1902.

The island, which is volcanic, mountainous, and in some parts well wooded, is beautiful and picturesque in the extreme. The highest land is 1,760 feet above the level of the sea, and may be seen in clear weather at a distance of 10 or 12 leagues. The temperature differs little from that of Mauritius, although the breezes are stronger and hurricanes more frequent and severe. The climate is healthy. The principal industries are fishing and the rearing of cattle and goats, for which latter the pasturage is excellent. The soil is good: sugar-cane, cotton, coffee, rice, maize, beans, and vanilla grow luxuriantly.

During the time of slavery fortunes were made in this island by agricultural pursuits; but of late years cultivation has been neglected, owing to want of regular communication and insufficient labour. There is an abundance of fresh water springs in the island, and wild guinea fowls and partridges are plentiful. There are also deer and wild pigs. Fruit abounds, such as mangoes, bananas, guavas, pineapples, avocas, custard apples, wild raspberries, and tamarinds, while the island is famous for oranges, citrons, and limes. The palmiste and vacoa trees are to be found all over the island.

The principal exports at present are beans, maize, salt-fish, cattle, goats, pigs, poultry, tobacco and fruit.

*Diego Garcia* (population, 517), the most important of the Oil Islands group, consists of four islands, at four days' steaming from Mauritius, the chief one being about 30 miles in length, extending in an irregular horse-shoe shape, and embracing between its extremities three minor islets. It is a coral atoll, fifteen miles by six and a half, nowhere over ten feet high, but forming a spacious bay, roomy enough for large vessels to enter, being fifteen miles in length from end to end, and from two to five miles in breadth.

Diego Garcia is situated at 7° 20′ latitude S. and 72° 26′ longitude E., on the straight line between the entrance to the Red Sea and Cape Leeuwin. In 1885 it was placed under the jurisdiction of a magistrate, with a small force of police from Mauritius, which was, however, withdrawn in 1888.

*Spain*, J. S. L. Antelme (Vice-Consul).
*Sweden*, E. C. Fraser, C.M.G.
*Russia*, Louis V. Goupille (Vice-Consul).

## NEWFOUNDLAND.

*Situation and Area.*

Newfoundland is an island situated between 46° 37′ and 51° 39′ N. lat., and 52° 35′ and 59° 25′ W. long., on the north-east side of the Gulf of St. Lawrence; the greatest length from north to south is 350 miles, and average breadth about 130; its estimated area is 42,000 square miles, or one-third of that of the United Kingdom. Population, 252,836.

*Labrador.*

Labrador, from Hudson's Strait to Blanc Sablon (Strait of Belle Isle), including the basin of the Hamilton, is, under Letters Patent of 28th March, 1876, included in the Colony, the remainder of the Labrador peninsula forming part of Canada. The area is about 120,000 square miles (equal to that of the United Kingdom), with a coast line of some 600 miles. The outside coast line is bleak, but the shores of the bays and rivers are well wooded, and in some cases densely so, the timber being high and sound, the temperature of the interior being, as a rule, like that of northern Canada. There are about 4,000 permanent inhabitants (some 1,300 Eskimo, the remainder of British descent), occupied in the fisheries and in trapping. The population is greatly increased in summer by fishermen and sportsmen, over 1,000 vessels being employed. Battle Harbour (Strait of Belle Isle) is the chief port, the other villages being the Moravian Mission stations (commenced 1770) at Hopedale, Nain, Okkak, Hebron, Ramah, and Killinek. The Customs duties are those of Newfoundland.

Labrador, discovered by the Norseman Lief, son of Eric the Red, in A.D. 1,000, and (in 1497) by Cabot, was early frequented by Basque, and subsequently by Breton, fishermen. It became British on the conquest of Canada (1759). In 1763 the Atlantic coast was annexed to Newfoundland, but was temporarily re-annexed to Quebec from 1773 to 1809. The first judicial court was established in 1824; it was revived in 1863 and again in 1909. During the summer months several Justices of the Peace are upon the coast.

*History.*

The island was discovered by John Cabot in 1497; it was as early as 1500 frequented by the Portuguese, Spanish, and French, for its fisheries. Sir Walter Raleigh and others, in the reign of Queen Elizabeth, attempted to colonise this island, but were not successful. In 1623, Sir G. Calvert, afterwards Lord Baltimore, established himself in the Peninsula of Avalon, the south-east part of the island, and appointed his son Governor. In 1634 a party of colonists were sent over from Ireland, and twenty years after, some English colonists arrived, having emigrated by means of a Parliamentary grant.

The French, about 1620, established a station at Placentia; and for many years the French and English settlers were constantly annoying each other. At the Peace of Utrecht in 1713, subsequently ratified by the Treaty of Paris, the exclusive sovereignty of Newfoundland was acknowledged to belong to Great Britain, certain rights being granted to French fishermen, the extent of which long remained in question between the two nations. The French possess the small islands of St. Pierre and Miquelon, and the district is resorted to annually by a French fishing fleet

from St. Malo, Granville, St. Brieuc, Bordeaux, Quimper, St. Nazaire, &c. They claimed the exclusive right to fish along the coast from Cape John on the east coast round the north to Cape Ray on the west coast, upon which they were allowed temporary structures for drying the fish. That this right was an exclusive one was never admitted by Great Britain, which also contended that it did not include a right to the lobster fishery. By the declaration attached to the Treaty of Versailles in 1783, the King of Great Britain undertook to remove the fixed fishery settlements on the part of the coast to which the French rights extend. A proposal for the settlement of all the questions was agreed to in 1885 by commissioners representing France and England, but was rejected by Newfoundland. An agreement for the reference to arbitration of the lobster fishery question was signed in 1891, but the law approving it did not pass the French Chamber. Pending the arbitration, the *modus vivendi*, which had been adopted in 1890, limiting the erection of new factories, was renewed. The Colony reluctantly passed legislation in 1891 for enforcing it for three years, but rejected the draft permanent Bill for giving effect to the treaty obligations in the session of 1892. The Act was first continued to 31st December, 1895, then to 31st December, 1897, and in 1897 it was further continued to 31st December, 1898. By legislation passed in each subsequent session the Act of 1891 was continued until the 31st day of December.

The dispute was finally settled by the Anglo-French Convention of the 8th April, 1904, in connection with other outstanding questions between the two countries. Under that Convention, France renounced the privileges under Art. xiii. of the Treaty of Utrecht (*see* Cd. 1952). The arrangement will be of great benefit to the Colony, since it removes an obstruction to local development, to mining and other industrial enterprises, over some two-fifths of the whole coast line.

*Industries.*

The industries of the island—fishing, agricultural, mining and lumbering—are mainly confined to the sea coast. Dried cod is the largest export (1,421,237 qtls. in 1916); other large exports are herrings, lobsters, salmon, iron, fish oils, seal skins, and timber. Copper is worked for export at Tilt Cove and Little Bay, iron pyrites at Pilley's Island, on the N.E. coast, and asbestos in the interior from Port-au-Port, west coast, and lead, silver, coal, and gold are also found. Immense beds of hematite iron ore have been laid bare at Bell Island, Conception Bay, and large quantities are being exported.

The establishment of large and well-equipped paper mills at Grand Falls, in the interior, by the Anglo-Newfoundland Development Company, has opened up a very large industry. The paper and paper pulp is shipped to the United Kingdom and used in the principal London printing offices, while, during 1917, some of the publishing houses in the United States have been supplied. Mr. Mayson M. Beeton, the president of the company, has been instrumental in laying out a model town, which is well lighted, watered, and drained. It is very picturesquely situated, and is on the line of the Reid Newfoundland Company's railway through the interior, while a private line of rail connects the works with Botwood, the principal port on the Exploits for summer shipments.

The Albert Reed Company, of London, have completed a large pulp mill at Bishop's Falls, about nine miles from Grand Falls, where pulp is being manufactured for English mills. This company have also installed machinery for the manufacture of paper.

The cod-fishery is the staple industry, and after this in importance rank the fisheries for seal, lobster, herring, and salmon. Haddock and mackerel are now only taken occasionally. The cod appears off the coast early in May, and the fishery extends north for over 1,000 miles, including the coast of Labrador, the grounds varying in depth from 50 to 360 feet. The home consumption is about 300,000 quintals, and the export in 1915-16 was 1,421,327 quintals, value $10,394,041; 30 bank cod go, on an average, to one quintal. A fair average of fish (general run) per quintal would be 125. The export is mainly to Portugal, Spain, Brazil, Italy, Greece, and the United Kingdom. The chief imports are flour, textiles, woollens and cottons, hardware, cutlery, salt pork, molasses, butter, and salt. These are obtained mainly from Canada, the United Kingdom, and the United States.

*Currency and Banking.*

Branch banks of the Bank of Montreal, Bank of Nova Scotia, Royal Bank of Canada and Bank of Commerce have been opened in St. John's, branches of the Bank of Nova Scotia in Harbour Grace and in eleven other towns; branches of the Bank of Montreal at Bay of Islands and Grand Falls; and a branch of the Royal Bank of Canada at Trinity.

The legal tender currency (*see* Act IV. of 1895) is British sterling, United States gold and Colonial coins. Silver is legal tender to the extent of $10, and copper to the amount of 25 cents. Accounts are kept in dollars and cents. Exchange $4·86⅔ to the pound sterling.

In the Savings Bank deposits in 1916 were $2,410,929.

*Means of Communication.*

There is a railway from St. John's to Harbour Grace, 84 miles in length, the property of the Government. The total approximate cost of construction was $2,500,000. A branch line has been constructed by the Government, connecting with Placentia. Its length is 27 miles, and it was built at a cost of $525,000. The railway to the Exploits River, a distance of 200 miles, was built at a cost of $3,120,000. The line from Exploits, *viâ* Bay of Islands and Bay St. George, to Port-aux-Basques (a distance of 285 miles approximately) is completed, the cost being $4,446,000. Branch lines to Brigus, Tilton, Carbonear, and Burnt Bay are also completed. The total length of these lines, with branches, is about 638 miles. Other branch lines have been constructed to Trinity, Bonavista, Hearts' Content, Grate's Cove and Trepassey, in all about 189 miles. Contracts have been entered into for the construction of branch lines to Fortune Bay and Bonne Bay. By the transinsular railway regular connection is made with the continent daily, the intervening strait being crossed in the first-class passenger steamers "Bruce" and "Lintrose," which make the passage in six hours. About 750 miles of postal and 1,700 miles of district roads are maintained. There are 4,897 miles of telegraph open and 922 miles of telephones. The Government cable, laid in 1905 between Port-aux-Basques and Canso in Nova Scotia, gives quick communication with both America and Europe. The Anglo-American cables start for Europe (at Hearts' Content) and America (at Placentia). The Commercial cable is

Digitized by Google

landed at St. John's, the Direct cable at Harbour Grace, and the Western Union at Bay Roberts, and all connect with both Europe and America. There is a fortnightly mail service (except in February, March and April) with Liverpool by the Allan line, and at irregular intervals by other steamers, but this service has been practically discontinued during 1917 because of war conditions. Constant connection by water with Montreal, Halifax, and New York is made by private lines of steamers. The south and west coast has a weekly steamer service from Placentia, and also a fortnightly service per steamer from St. John's. Two steamers make trips from St. John's to the Labrador Coast with mails and passengers during the summer at intervals of eight to ten days, and another makes fortnightly trips between St. John's and Griguet in the north of the island, calling at all the important intermediate settlements. Smaller steamers ply on the five great bays, while another steamer visits each week the ports in the Strait of Belle Isle. All these steamers make close connection with the railway. The rates of postage are as follows:—

| | Letters, per 1 oz. | Newspapers. |
|---|---|---|
| In St. John's . . . | 1 cent | Free if under 4 oz. |
| Within Colony . . | 2 cents | ,, |
| To United Kingdom and certain Colonies* | 2 ,, | 1 cent for 2 oz. |
| Other Colonies. . . | 5 ,, | 1 ,, ditto. |
| Europe and St. Pierre, Miquelon | 5 cents for 1st oz. 3 cents per succeeding oz. | 1 ,, ditto. |
| South America . . | | |
| To United States . . | 2 cents. | |

*Climate.*

The climate is milder than that of Canada; the mean temperature at St. John's is about 42°, the extreme range being from 0° to 81°. There is an almost total absence of spring, the summer setting in very suddenly in May. The rainfall in 1906 was 64 inches. Two-thirds of the inhabitants are descended from the British settlers, English being everywhere spoken, but about one-third belong to the Roman Catholic religion, and a small number of these are of French extraction. The last of the aboriginal inhabitants died out about 1829; they were of the Bethuk tribe.

*Education.*

The Government system of primary education rests upon the Act of 1916. The central administration is vested in three superintendents, belonging respectively to the Roman Catholic, the Anglican, and the Methodist denominations. The local management is in the hands of appointed boards. There were, in 1916, 1,191 schools, with 51,818 scholars. The schools are denominational, and fees are charged. Grants are also made in aid of secondary schools, and a small vote of $4,767 was passed for technical education. In 1910 a special grant of $100,000 was made for the erection, re-modelling and equipment of school buildings in places outside the city of St. John's.

In 1893 an Act was passed appointing a council of higher education, and empowering them to adopt certain rules and regulations with the object of fostering higher education in the Colony. A sum of money in aid of the council is annually granted by the Legislature.

*Chief Towns.*

The capital is St. John's, with 33,779 inhabitants. The next port in importance is Harbour Grace, with a population of 4,279; Twillingate has 3,348; Bonavista 3,911; and Carbonear 3,540 inhabitants. St. John's, which had similarly suffered in 1846, was almost completely destroyed by fire in 1892, the Cathedral and many Government buildings being burnt, with the public records which they contained. The town has been rebuilt in an improved manner.

*Constitution.*

Newfoundland has had a Legislature since 1832, but it was the last of the North American Colonies to which responsible Government was conceded; it was established in 1855. The Government is at present administered by a Governor, aided by a responsible Executive Council in which the Governor presides, a Legislative Council, and a House of Assembly of 36 members, elected by ballot under manhood suffrage. There are—registration 1913—61,451 electors registered on the electoral roll, and 18 districts, or subdivisions of districts, of which 7 return three members, 4 return two members, and 7 return one. There is a property qualification for members, viz., property exceeding 500*l.* in amount or value, or a net annual income of 100*l.* The ordinary duration of the restricted session is about three months, and the Legislature generally meets about the middle of February.

Members of the Council receive $120 each (President $240) per session. Members of the Assembly receive the following pay per session:—(1) Those living in St. John's, $200; (2) those living in the outports, $300. The Speaker receives $750. This pay to the Legislature is provided for annually in a local Act. The town of St. John's is governed by a Mayor and 6 Councillors elected under the provisions of the Municipal Act, 1902.

| | Finances. | | Shipping Entered and Cleared. | |

*Population according to Census taken in* Newfoundland.

| | Males. | Females. | Labrador.* | Total. |
|---|---|---|---|---|
| 1911 | 122,578 | 116,092 | 3,949† | 242,619 |
| 1914 | 126,239 | 121,471 | 4,016 | 251,726 |
| 1915 | 127,472 | 123,235 | 4,043 | 254,750 |
| 1916 | 128,436 | 124,400 | 4,073 | 256,909 |

In 1763 the population was 13,122, and in 1837, 75,000.

* See end of Introduction. A new rate for postage on magazines, etc., from U.K. to Newfoundland came into effect, December 1st, 1909—a reduction from 4d. to 1d.

* No record of sexes.

† Population of Labrador, 1916, consisted of 2,122 males and 1,951 females.

## NEW ZEALAND.

*Situation and Area.*

By a Proclamation of His Majesty the King, published in the *London Gazette*, the Colony of New Zealand is to be styled "the Dominion of New Zealand" on and from the 26th September, 1907.

The Dominion of New Zealand consists of three principal islands, called respectively the North, the South, and Stewart Islands. There are several small islets (mostly uninhabited) dependent on the Dominion: the chief of these are the Chatham Isles, 536 miles eastward of Lyttelton, in 43-45° S. lat., 176-177° W. long. (Chatham and Pitt are the principal islets); and the Auckland Isles. The main group lies between 33° and 53° S. lat., and 162° E. long. and 173° W. long. The three principal islands extend in length 1,100 miles, but their breadth is extremely variable, ranging from 46 miles to 250 miles, the average being about 140 miles. The area of the North Island and adjacent islets is 44,130 square miles, of the South Island 58,120 square miles, of Stewart Island 662 square miles, of Chatham Islands 372 square miles, and other islands, including the Cook Islands, 577 square miles, a total area of 103,861 square miles (twice the size of England).

In April, 1842, by Royal Letters Patent, and again by the Act 26 & 27 Vict., cap. 23, all islands between 162° E. and 173° W. long., and 33° and 53° S. lat., were annexed to New Zealand.

By letters patent, dated 18th January, 1887, the group called the Kermadec Islands, situated about 614 miles N.E. of the Bay of Islands, was annexed to New Zealand. These are a chain of widely separated islets, lying between 29° and 32° S. lat., and 177° and 180° W. long. The principal are Raoul or Sunday, and Macaulay, the next in size being Curtis and Esperance. Raoul comprises 12 square miles, is covered with forest, and rises to a height of 1,720 feet.

The Protectorate over the Cook Islands was administered through the Governor of New Zealand until 1900; in October of that year the group was annexed to Her Majesty's Dominions, and resolutions were passed by the New Zealand Parliament for the extension of the boundary of the Dominion to include the group as well as Savage (Niue) Island and other small islands. By proclamation finally fixing the date from which the boundaries of New Zealand are deemed to be extended, from the 11th June, 1901, the following islands are included:—Rarotonga, Mangaia, Atiu, Aitutaki, Mitiaro, Maukè, Hervey (Manuae), Palmerston (Avarau), Savage (Niue), Pukapuka (Danger), Rakaanga, Manahiki, Penrhyn (Tongareva), and Suwarrow. An account of the Cook Islands is given below.

*Climate.*

The climate is temperate and very healthy, the average death rate being less than 10 per 1,000. The temperature is more equable than in the British Isles. While the summers are as cool as those of England, the winters are as warm as those of Italy. The mean annual temperature at Auckland (59°) is nearly the same as at Rome; at Wellington (56°) nearly the same as at Milan; at Dunedin (51°) nearly the same as at London. The extreme range of temperature at Wellington is 50°, from 82° in summer to 32° in winter. The rainfall varies from a mean for the year of 25 inches on the east coast, to 116 inches on the west coast of the

Digitized by Google

South Island, and from 37 inches on the east coast, to 59 inches on the west coast of the North Island

The average birth rate for the 10 years 1907–1916 was 26·42 per 1,000 living, and the average death rate for the same period 9·52. The birth rate in 1916 was 25·94 per 1,000; the death rate in that year was 9·64.

*History.*

New Zealand was discovered in 1642 by the Dutch navigator, Tasman, who, however, did not land upon its shores. In 1769 it was visited by Captain Cook, who in that year, and during subsequent voyages, explored its coasts. The country subsequently became a resort for whalers and traders, chiefly from Australia, as well as a field for the labours of the Missionary Societies from 1814. In 1840 the native chiefs ceded the sovereignty of New Zealand to the British Crown by the Treaty of Waitangi, concluded by the British Consul, Captain Hobson, and the islands became a British colony.

The aborigines, called Maoris, are a remarkable people—a branch of the Polynesian race. According to their own traditions, their forefathers came about 600 years, or twenty generations ago, from Hawaiki, which was probably Hawaii in the Sandwich Islands, or Savaii, in the Navigator, or Samoa, group. They are divided into about twenty different clans, analogous to those of the Highlands of Scotland. There have been two Maori wars; the first lasted from 1845 until 1848; the second lasted from 1860, with little intermission, until 1870. But fully half the clans have always been friendly to the English; and many of them fought on the side of the Colonial Government against their own countrymen. Permanent tranquillity was established in 1871 throughout the country. An agitation amongst certain tribes in 1881, which threatened for a time to create a disturbance, was promptly quelled by the Colonial Government. At the census taken in 1916, the Maoris (including half-castes) amounted to 49,776, almost all of whom dwelt in the North Island.

*Constitution.*

The country was at first a dependency of New South Wales, but was separated by letters patent in 1842. Its settlement was largely effected by the New Zealand Company, with a royal charter, which was surrendered in 1850.

Down to 1847 the Executive and Legislative Councils were both nominated by the Governor, and constitutional form of Government was established by the Imperial Statute 15 & 16 Vict., cap. 72. By that Act New Zealand was divided into six provinces, afterwards increased to ten, but subsequently reduced to nine—viz., Auckland, Taranaki, Wellington, Nelson, Canterbury, Otago, Hawke's Bay, Westland, and Marlborough—each governed by a Superintendent and Provincial Council, elected by the inhabitants under a franchise which practically amounted to household suffrage.

By an Act of the General Assembly, 39 Vict., No. XXI., passed in 1876, the provincial system of government was abolished. The powers previously exercised by superintendents and provincial officers were now exercised by the Governor or by local boards. The provincial system being abolished, provision was made for the division of the Dominion into counties and boroughs, and the necessary machinery for their self-government was provided.

A Central Legislature, called the General Assembly was also established by the Imperial Statute of 1852, consisting of the Governor (now Governor-General), a Legislative Council, and House of Representatives. The Governor-General is assisted by an Executive Council, composed of the Responsible Ministers of the Dominion for the time being, according to the usual practice of Parliamentary Government. The Legislative Councillors are appointed by the Governor-General, and up to 1891 held their seats for life. Under the Act passed in that year, future appointments were made tenable for seven years only. Provision has now been made for an elective Legislative Council to consist of 40 European members and not more than 3 Maori members, the latter to be appointed by the Governor-General. The members of the House of Representatives are chosen by electors possessing a liberal franchise. Every male elector is qualified to become a member. The House of Representatives now consists of 80, including 4 Maori members, elected by the natives. The session is usually from June to October.

Payment of Members of the Legislative Council is at the rate of 200*l.* a year, payable monthly.

Members of the House of Representatives receive 25*l.* a month, amounting to 300*l.* per annum.

The Electoral Act, 1893, extended to women (of both races) the right to register as electors, and to vote at the elections for members of the House of Representatives.

The franchise for European representation is as follows:—Every adult person, if resident one year in the Dominion and one month in an electoral district, can be registered as an elector.

The property qualification was abolished by "The Electoral Act Amendment Act, 1896," and residence alone now entitles a man or woman to have his or her name placed upon an electoral roll.

For Maori representation every adult Maori resident in the district can vote, and no registration is required. There are four Maori electoral districts.

For local bodies the qualification is a property or residential one. Women can vote as well as men.

The control of native affairs, and the entire responsibility of dealing with questions of native government were transferred in 1863 from the Imperial to the New Zealand Government. In 1865 the seat of Government was removed from Auckland to Wellington, on account of the central position of the latter city.

*Local Government.*

For the purposes of local government the Dominion is divided into 115 municipalities and 125 counties; the latter being subdivided into 126 road districts and 64 town districts, besides River, Drainage and Water Supply Boards. For the year ended 31st March, 1916, the total receipts of the above local authorities amounted to 6,014,794*l.*, and their expenditure to 5,365,308*l.* Their outstanding loans of the same date amounted to 14,146,387*l.* For the year ended 31st December, 1915, the receipts, expenditure and debt of Harbour Boards amounted to 1,385,201*l.*, 1,246,790*l.*, and 7,135,895*l.* respectively, and of the Christchurch Drainage Board, for the year ended 31st March, 1916, to 33,452*l.*, 36,527*l.*, and 359,500*l.* respectively. The Dunedin Drainage and Sewer-

age Board receipts, 75,720*l.*; expenditure, 73,708*l.*; debt, 575,000*l.* The Christchurch Tramway Board receipts, 147,180*l.*; expenditure, 143,549*l.*; debt, 568,200*l.* for year ending 31st March, 1916. Auckland and Suburban Drainage Board receipts, 119,678*l.*; expenditure, 37,223*l.*; debt, 455,500*l.*

*Education.*

A Government system of primary education was established in 1877. The central administration is vested in a Minister of Education, and the local control is in the hands of Education Boards, and of School Committees with functions subordinate to those of the Boards. Number of primary schools (called "public schools"), 2,355; scholars on roll, 185,884. Primary education is free, secular, and compulsory. In addition for native (Maori) education there are 118 village schools maintained by the Government and under the control of the Minister, and ten denominational boarding schools. Scholars on roll of village schools, 5,132 (including 572 Europeans); on the roll of mission schools, 120; and on roll of boarding schools, 457, of whom 101 hold free places. Net cost of native school education in 1916-17 was 41,792*l.* In the outlying Chatham Islands four schools are maintained by the Government, and three schools, under the control of the Cook Islands Administration, have been opened in the Cook Islands. 197 private primary schools with a roll number of over 17,000 were registered under the Education Act. A school journal providing suitable reading matter is provided by the Department and issued free to all children in Government schools. A comprehensive system of physical education and a scheme of medical inspection are in operation in the primary schools. Four training colleges make provision for the training of over 400 teachers annually. There is also provision for training classes at smaller centres. Cost of training teachers, 50,027*l.* The total expenditure by the Government under the head of primary education was for 1916-17, 1,318,000*l.* There is a system of superannuation for teachers giving an annuity of one-sixtieth of the average of the final three years' salary for each year of service.

Secondary education is provided at secondary schools, district high schools, and technical high schools, the numbers of schools under each heading in 1916 being 33, 60, and 8 respectively, and the roll numbers being—secondary schools, 7,052; district high schools (secondary departments), 2,386; technical high schools, 2,105. In addition seventeen private secondary schools were registered under the Education Act, the roll number being 1,004. In scholarships and free places at secondary schools, district high schools, and technical high schools about 10,132 pupils received free secondary education. Provision is made for manual instruction in both primary and secondary schools, cookery, dressmaking, woodwork, elementary agriculture, dairywork, and the various branches of elementary science being included in the subjects taken. Instruction of a technical or vocational character is provided at a large number of technical schools and classes, the courses of instruction followed being commercial and general, industrial, domestic, and art. The total number of students attending such classes in 1916 was 17,586, of whom 5,917 took group courses occupying not less than 80 hours a year, and also of whom 4,060 received free education. In addition there were 2,105 pupils at technical high schools, where the instruction is of secondary grade with a vocational bias.

For higher education there are four endowed colleges affiliated to the University of New Zealand, and each specializes in one or more directions. At Dunedin the special subjects are mining, medicine, dental and veterinary science, and domestic science; at Christchurch, engineering and technical science; at Wellington, law and science; at Auckland, commerce and mining. There is an agricultural college possessing a large endowment and an experimental farm of a very complete character. The number of students on the books of the University Colleges was, in 1916, 1,985, of which number 857 were receiving free education. The total expenditure by the Government on university education was 54,453*l.*

The care of neglected and delinquent children is managed by the Education Department, which adopts the boarding-out system, combined with various residential institutions serving for the classification of those that have to be kept under discipline. Of the 3,284 children on the Department's books 1,009 were in residence in Government or private industrial schools or reformatories, and 1,082 were boarded out with foster parents. The rest were at service, with friends, etc., under licence. On the grounds of moral degeneracy or unfitness in the public interest to be free from oversight detention beyond the age of 21 may be extended by a magistrate from time to time, thus securing life-long control where necessary. Expenditure for 1916-17, 41,409*l.*

Maintained or subsidized by the Government are special schools for the blind, the deaf, and the feeble-minded. Blind: Government subsidy, 2,087*l.* for 33 pupils; deaf: 98 pupils cost the Government 4,277*l.*; feeble-minded: 69 pupils cost 6,255*l.*, and 7,492*l.* was expended on buildings for further accommodation and on opening a new institution for girls. The education of blind, deaf, feeble-minded and epileptic children is compulsory from six to twenty-one years of age, subject to exemption by the Minister. The feeble-minded can be kept permanently under restraint, each case being judicially reviewed at intervals of not more than four years.

The infant life protection system which provides for the supervision of infants under six years who are maintained apart from their parents for monetary consideration is also administered by the Education Department. There are 1,250 infants under supervision in 1,054 licensed homes. The death rate is under 1 per cent.

The statistics given above relate mainly to the year 1916. The total cost to the Government for the financial year 1915-16 under the head of education was 1,689,707*l.*

*Population.*

The population of New Zealand on 15th October, 1916, was found by the census to be 1,099,449 persons, excluding the Maoris, who numbered 49,776, and Cook and other Pacific Islands (12,797). The estimated population of New Zealand (excluding Maoris and residents of Cook and other Pacific Islands), on 30th June, 1917, was 1,096,240.

The population of the chief towns on the 28th March, 1886; 5th April, 1891; 12th April, 1896; 31st March, 1901; 29th April, 1906; 2nd April, 1911; and 15th October, 1916, was as follows:—

*Industry.*

All the productions of the temperate climates of Europe and Asia can be cultivated with great success in New Zealand. There are extensive coal mines and rich gold fields. The gold entered for exportation from the Dominion up to 31st December, 1916, was valued at 85,847,675*l.* The wool exported in 1916 amounted to 185,506,859 lbs., valued at 12,386,074*l.* In 1856 it amounted to 2,559,618 lbs., valued at 146,070*l.* The trade in frozen meat, which began in 1882 with an export of 15,244 cwt., valued at 19,339*l.*, had developed an export for 1889 of 656,822 cwt., valued at 783,374*l.*, in 1893 to 903,836 cwt., valued at 1,085,167*l.*, and in 1898, 1,551,773 cwt., valued at 1,698,750*l.*, in 1903, 2,378,650 cwt., valued at 3,197,043*l.*, in 1908, 2,120,303 cwt., valued at 3,188,515*l.*, in 1910, 2,654,196 cwt., valued at 3,859,777*l.*, in 1911, 2,250,565 cwt., valued at 3,503,406*l.*, in 1912, 2,573,238 cwt., valued at 3,909,569*l.*, in 1913, 2,578,693 cwt., valued at 4,449,933*l.*, in 1914, 3,229,973 cwt., valued at 5,863,062*l.*, in 1915, 3,591,260 cwt., valued at 7,794,395*l.*, and in 1916, 3,326,045 cwt., valued at 7,271,318*l.* The live stock in New Zealand, as returned in 1917,* was: horses, 367,167, against 99,859 in 1874; cattle, 2,502,700, against 494,917 in 1874; sheep, 25,270,386, against 11,704,853 in 1874. The total area of occupied holdings in 1917 (preliminary figures) was 42,709,337 acres; 219,121 acres were in wheat (for threshing only), having a total yield of 5,055,457 bushels. The area under oats for all purposes was 553,513 acres, of which 178,397 acres were threshed, giving a total yield of 5,470,405 bushels.

Auckland, Dunedin, Invercargill, Lyttelton, Napier, Nelson, Wellington and Timaru are ports of registry, and had, on 31st Dec., 1916, 580 vessels registered, of 92,295 (net) tons in the aggregate. Many of the larger vessels formerly on the register were transferred to the London register to take advantage of the Imperial War rates.

The imports consist chiefly of textiles, hardware and machinery, sugar, tea, alcohol, books, and stationery; and they are obtained almost entirely from England, Australia, the United States, Canada, Ceylon, Japan and China.

*Banking and Currency.*

The following banks have branches in the Dominion:—Bank of New Zealand, National Bank of New Zealand (Limited), Union Bank of Australia (Limited), Bank of New South Wales, Bank of Australasia, and Commercial Bank of Australia (Limited). The total amount of their deposits in New Zealand for the year 1916 (average of four quarters), was 37,757,917*l.*, and of their note circulation 4,049,527*l.* There is also a Post Office Savings Bank established in the Dominion, having now 786 branches; the amount deposited therein on 31st December, 1916, was 25,603,209*l.* The private savings banks number five, and the total amount to credit of depositors at March 31st, 1917, was 2,412,465*l.*

The currency and legal tender is exclusively British sterling.

*Government Insurance Department.*
*Life Branch.*

This department commenced to transact business in March, 1870. By an Act of 1886 an official board to control and manage the investment of a portion of the department's funds in mortgages on land was constituted. This board consists of the Minister of Finance, the Solicitor-General, the Surveyor-General, the Superintendent N.Z. State Advances Office, the Public Trustee, and the Government Insurance Commissioner. Loans on mortgage not exceeding 10,000*l.* to any one person or company are empowered. All policies are guaranteed by the State.

The conditions under which policies are issued are very liberal, whilst the premium rates are extremely low. Insurances are effected on individual first-class lives to the amount of 5,000*l.*, and in the case of the Accident Branch to the amount of 1,000*l.* All profits belong absolutely and entirely to the policy holders themselves.

*Accident Branch.*

The Accident Branch of the Government Insurance Department was opened in 1901, for the purpose of transacting Personal Accident Insurance and Employers' Liability Insurance. General accident business is undertaken, but the branch was opened more especially with a view to relieve employers of labour of the liability imposed upon them by "The Workers' Compensation for Accidents Act, 1900." This Act greatly extended the liability of employers, and gave to a workman the right of compensation for all injuries arising out of, and in the course of, his employment, not attributable to his own serious and wilful misconduct.

This liability has been more or less extended by subsequent Acts, and under "The Workers' Compensation Act, 1908," which came into operation on the 1st January, 1909, and its amendments, the scale of compensation is as follows:—

(*a.*) Where death results from the injury and the workman leaves dependants wholly dependent upon his earnings, the compensation is one hundred and fifty-six times his average weekly earnings, but not to be less than 200*l.*, nor to exceed 500*l.*

* Figures subject to revision.

† In each case the Metropolitan Areas include a greater area than the former "City and Suburbs." These figures are therefore to that extent incomparable with those for previous censuses.

Digitized by Google

(*b.*) If the dependants are only partially dependent upon the workman's earnings, the compensation is to be such sum as is reasonable and proportionate to the injury to such dependants, but not exceeding the amount payable under paragraph (*a*).

(*c*) In either of the above cases the employer is also liable for medical and burial expenses not exceeding 50*l.*, and an amount not exceeding this sum can be claimed where there are no dependants.

(*d*) Where a workman is totally incapacitated for work, he is entitled to a weekly payment of one-half his average weekly earnings, but the weekly compensation is not to be less than 1*l.* in cases where the worker's earnings at the time of the accident are not less than 30*s.* per week. Persons employed otherwise than by way of manual labour, whose earnings exceed 5*l.* per week, are excluded from the benefits of the Act and the maximum weekly payment is limited to 2*l.* 10*s.*

(*e*) Where the workman is partially incapacitated only, the compensation is one-half the loss of wages.

(*f*) In addition to the compensation for incapacity medical or surgical expenses are allowed, not exceeding 1*l.*

Weekly payments are not to extend over a longer period than six years, and the aggregate amount is not to exceed 500*l.*

The Department's policies cover the full liability of an employer to his workmen under the Workers' Compensation Act, and the liability under common law to the extent of 500*l.* per man.

The premiums are assessed on the wages, and vary from 4*s.* and 6*s.* per 100*l.* of wages for the lightest occupations to 20*s.* per cent. for building trades, 60*s.* per cent. for coal mines to cover accidents only, and 100*s.* per cent. for bush felling.

Policies protecting mortgages from loss through the charge of an injured workman taking precedence of a mortgage are issued at premiums varying from 1*s.* per cent. of the mortgage for small mortgages to 6*d.* per cent. for large mortgages.

Personal accident policies are also issued securing amounts for accidental death and permanent total or partial disablement, and weekly allowances during temporary disablement.

The premium income and claims of the Accident Branch since the commencement of business have been as follows :—

| Year. | Premium Income. | Claims. |
|---|---|---|
| | £ | £ |
| 7th June to 31st December, 1901 | 11,856 | 2,428 |
| Year ending 31st December, 1902 | 14,100 | 7,364 |
| ,, ,, ,, 1903 | 24,381 | 13,230 |

*State Fire Insurance.*

In the year 1903 was passed an Act "to establish a State Fire Insurance Office and to make other provisions for the insurance and protection of insurable property in New Zealand against loss or damage by fire."

The statute provided for the establishment of an office to be administered by a General Manager appointed by the Governor-General, and for the necessary staff—not subject to the laws regulating the Civil Service.

Provision is made for the constitution of a Board, to consist of the General Manager, the Minister of Finance, the Government Insurance Commissioner, and two other persons (not being in the Civil Service) appointed by the Governor-General. The latter hold office for two years, with eligibility for re-appointment.

The Department opened for business with branches and agencies throughout the Dominion in January, 1905. The opening of the office resulted in a reduction in the rates then current of 33⅓ per cent. on dwellings and the less hazardous risks, and of 10 per cent. on all others. The profit made to the end of December, 1916, was 121,915*l.*, and the net income and net losses for each of the twelve years to that date have been as follows :—

| | Net Income, less Re-insurances. | Net Losses. |
|---|---|---|
| | £ | £ |
| 1905 | 13,135 | 2,417 |
| 1906 | 20,991 | 10,312 |
| 1907 | 23,302 | 12,701 |
| 1908 | 26,908 | 18,903 |
| 1909 | 34,038 | 18,534 |
| 1910 | 41,788 | 18,914 |
| 1911 | 48,931 | 27,536 |
| 1912 | 56,315 | 25,111 |
| 1913 | 61,281 | 27,975 |
| 1914 | 67,693 | 28,110 |
| 1915 | 76,300 | 27,477 |
| 1916 | 82,695 | 21,898 |

*Public Works.*

All the more important public works of New Zealand are in the hands of the Government and other public bodies, comparatively few having been undertaken by companies. The initiation of public works in New Zealand is coeval with the founding of the Colony. In the early days they simply kept pace with the spread of settlement, but in 1870 a great impetus was given to the progress of the country by the inauguration of the "Public Works Policy," which provided for carrying out works in advance of settlement, and for immigration.

The first public works initiated were roads, many thousands of miles having been constructed in all directions. Some of the main roads through sparsely settled districts were made, and are still maintained by the Government, but the ordinary main roads are under the control of the counties, and the district roads under road boards. Nearly all the larger rivers on the main roads in both islands are bridged. A few, however, have ferries worked by the current.

At the end of the last financial year, 31st March, 1917, there were 2,970 miles of Government and 29 miles of private railways in operation in New Zealand, and 243 miles of Government under construction. The construction of new lines and the extension of existing ones has proceeded steadily in recent years but has necessarily been held up during the last year or so on account of the war.

Digitized by Google

The expenditure on the 2,970 miles of Government railways has been 35,378,664*l.*, or an average of 11,912*l.* a mile. This includes all charges connected with the construction and equipment of the lines.

The revenue from the Government railways for the year 1916–1917 was 4,800,810*l.*, and the working expenses 2,926,864*l.* The balance of 1,873,946*l.* is equal to a return of 5*l.* 5*s.* 11*d.** per cent. on the capital invested. The gauge throughout is 3ft. 6in.

Of telegraph and inter-urban telephone circuits there are 13,896 miles of line and 50,320 miles of wire. There are 337 morse telegraph offices, 2,072 telephone offices, and 259 telephone exchanges, the latter having 62,523 connections with 3,897 miles of line and 142,469 miles of wire. 237 coin-in-the-slot telephones are in use.

The duct underground system of telephone cable distribution, and the automatic telephone switching system is being extended to the principal exchanges. There are seven submarine cables connecting the two islands of New Zealand; two, Wellington-Sydney, one Auckland-Sydney, and one Auckland-Brisbane, *viâ* Norfolk Island, connecting the Dominion with Australia.

The Pacific cable, which was opened for traffic to Australia and Fiji in April, 1902, was completed to Bamfield, Vancouver Island, on the 31st October following, and opened for international traffic on the 8th December, 1902.

On the opening of the Pacific cable for through traffic the ordinary rate to Great Britain was 3*s.* a word, Government messages 1*s.* 6½*d.*, and Press 1*s.* a word. This rate has now been reduced by 4d. per word for ordinary messages, and 2d. per word for deferred and Government messages. The charge for press messages has since been reduced to 7½*d.* per word and a deferred rate for press instituted at 4½*d.* per word.

An ordinary deferred telegram system has been instituted with a maximum delay of 24 hours at half the charge for ordinary cable messages, also a system of "Week-end letter" cable messages at the following rates:—To the United Kingdom, 8*d.* per word, with a minimum charge of 13*s.* 4*d.*; to Canada, 6*d.* per word, with a minimum of 10*s.*

The average number of messages transmitted to and from New Zealand prior to the opening of the Pacific cable was about 425 per day. The present average is about 1,200 a day by both routes.

In the year ending 31st March, 1917, excluding the value of Government messages, the revenue was 844,524*l.* (including telephone exchange and other telegraph receipts); number of messages 10,875,120 (of which number 10,734,168 were private or press messages). The minimum rate on ordinary telegrams is 8d. for 12 words; additional words ½d. each.

There are five New Zealand coast stations, two of which are medium power, for the transmission of telegrams by radio-telegraphy. These provide for the needs of shipping around the coasts. The Awanui station communicates with Samoa.

In addition there are twenty-three wireless ship-stations registered in New Zealand.

Tramways have been established in all the principal towns in New Zealand, and Dunedin has, in addition, three cable lines leading to high-lying suburbs, and Wellington an incline line. The ordinary tramways are in some few cases worked by steam motors, but electric power is more generally employed.

Auckland, Dunedin, Christchurch, Wellington, New Plymouth, Invercargill, Napier and Wanganui have electric tramway systems on the overhead principle, while a system in Gisborne is worked with storage battery cars.

The total expenditure by the General Government on the construction of roads and bridges from the inauguration of the Public Works policy in 1870, till the end of March, 1917, amounted to 11,261,098*l.*

The Government has also expended 631,602*l.* on the construction of reservoirs, water-races, and sludge-channels, also 214,412*l.* in aiding works on mineral lands, etc.

All the cities and principal towns are supplied with water at the cost of the corporations.

All the principal towns in the Dominion have gasworks, some of them belonging to private companies, but the majority to the corporations. The native coal from Greymouth is stated to be one of the best in the world for making gas. In Wellington the streets are illuminated by the electric light, as also are the parliamentary buildings and many private houses and business establishments.

The Government has designed and carried out an important scheme for the development of electrical energy from water power at Lake Coleridge in Canterbury. The powerhouse is designed to generate 12,000 kilowatt, the present plant capacity being 6,000 kilowatt, and the present output about 5,000 kilowatt, which is rapidly increasing. The bulk of the current is carried at high voltage over two separate transmission lines to Christchurch, seventy miles distant, where it is utilised to operate the tramways, and for public and private lighting, manufacturing and general industrial purposes. Future developments will probably include the operation of suitable sections of the Government railways, the manufacture of fertilisers, and possibly of munitions of war. The scheme is under the direct control of the Government, and has been in successful operation since February, 1915. There are many other natural sources of power available in different parts of the Dominion, and the development of one or other of the most promising in the North Island is in contemplation. The Lake Coleridge scheme has cost up to the present 366,984*l.* and is within easy measurable distance of a point where the revenue will more than cover interest on expenditure, cost of operation and maintenance.

Dunedin is lighted by electricity generated by water power from the Waipori stream, under the control of the City Corporation, which also supplies electrical energy from the same sources for industrial and manufacturing purposes.

Other towns with electrical installations for street and private lighting are Auckland, Whangauei, Rotorua, Napier, Hastings, New Plymouth, Stratford, Inglewood, Hawera, Patea, Reefton, Ross, Christchurch, Timaru, Gore, Mataura, Frankton, Te Aroha, Waitara, Eketahuna, Feilding, Tauranga, Gisborne, Winton, Ashburton and Bluff.

The coasts of the Dominion are well marked with lighthouses and beacons, and all the ports are provided with wharves and jetties in proportion to the trade. Important works to afford shelter and increase the depth of water have been executed or are in course of construction at Dunedin, Oamaru, Timaru, Lyttelton, Greymouth, Westport, New

* The rate of interest earned has been computed on cost proportionately to the time during which the lines taken over by the Working Railways Department within the financial year were earning revenue.

Digitized by Google

Plymouth, and Napier. There are graving docks at Port Chalmers, Lyttelton, and Auckland. At Wellington there is a patent slip capable of taking up a two thousand ton ship

Road and railway formation works are carried out under small contracts and by the co-operative system, under which the Government provides all materials and lets the work of construction to parties of labourers and artizans at rates fixed by Government officers on the ground. These rates are calculated so that an average workman will be able to earn the current rate of wages ruling in his trade in the district where the work is situated. The ruling rates of wages are from 9*s.* to 12*s.* per day for artisans, and from 9*s.* to 10*s.* for labourers. Eight hours constitutes a working day. Buildings and large bridges are built by contract, let after inviting tenders through the press.

*Mail Communication.*

There is regular mail communication with England and Europe and with Australian ports, the South Sea Islands, United States and Canada.

*Postage Rates.*

Up to 23rd September, 1915, the postage on letters inland was 1*d.* for the first 4 ounces, or fraction thereof, and ½*d.* for each succeeding 2 ounces or fraction thereof, and to such places as accept matter at the reduced rate, 1*d.* for each ounce or fraction thereof. The reduction (to 1*d.* per ounce) applies in any case to British possessions, and to a number of foreign countries. The letter postage to other places beyond New Zealand is 2½*d.* for the first ounce, and 1½*d.* for each succeeding ounce, or fraction thereof. The minimum rate for newspapers printed and published in New Zealand, for the United Kingdom, is 1d. for each newspaper, irrespective of weight, but subject to certain conditions as to despatch. The ordinary rate for Australia and New Guinea (except Dutch New Guinea) and certain other British possessions is 1*d.* for each newspaper. The rate for newspapers for other places, and for newspapers not printed and published in New Zealand addressed to the United Kingdom, is for each newspaper:—1*d.* for the first 4 ounces, and ½d. for each additional 2 ounces or fraction thereof. The inland rate for newspapers remains at ½*d.* each. The inland parcel post rates are:—4*d.* for the first lb. and 2*d.* for each additional lb. up to 6 lbs., and 1*d.* for each additional lb. up to 28 lbs. A special fee of 6d. is also charged on all inland parcels which the senders desire forwarded to destination in hampers.

From the 23rd September, 1915, an additional ½*d.* has been imposed on all postal packets (except newspapers) posted in the Dominion. The additional ½*d.* however is not charged on articles to places beyond New Zealand to which the maximum Postal Union rates previously applied.

---

## DEPENDENCIES OF NEW ZEALAND.*

### Cook Islands.

The Cook Islands were declared to be under British protection in October, 1888, by Captain Bourke, of H.M.S. "Hyacinth," and the Hervey Islands, Manuae, Te Au-o-Tu and Takutea by Commander Nicolls, of H.M.S. "Cormorant," in June. 1889.

Until 1901 British authority was represented by a Resident who was paid by the Government of New Zealand, and reported direct to the Governor of that Dominion. The first British Resident, Mr. F. J. Moss, who was appointed in 1890, succeeded in 1891 in arranging for the establishment of an Elective Federal Parliament to make laws for the whole group. Each island, however, continued to enjoy self-government in such purely local affairs as it could properly manage for itself. The Federal Executive Council or Government was composed of the Arikis, or Kings and Queens, who are also the principal landowners. The chief of these, Queen Makea, Ariki of Avarua, was the nominal head of the Government. A Supreme Court was established, and a law was passed regulating the sale of intoxicants, and imposing a general *ad valorem* duty of 10 per cent. on imports. All laws and administrative acts were subject to the approval of the Resident, who was also a Deputy and Judicial Commissioner for the Western Pacific, and Chief Justice of the High Court of the Cook Islands.

The Islands became part of the Dominion of New Zealand from the 11th June, 1901. The administration and laws were continued in force subject to the provisions of the Cook Islands Government Act, passed in that year.

In 1915 an Act was passed by the New Zealand Parliament consolidating the laws relating to the Cook Islands and Niue Island, and providing for the appointment of a member of the Executive Council of New Zealand as the Minister for the Cook Islands, who is charged with the administration of the government of the Islands.

The Act also makes provision for the constitution of Island Councils; for the establishment of public schools, Courts of Justice, Native Land Court, etc.

*Minister for the Cook Islands.* Hon. Dr. M. Pomare.

*Secretary of Cook Islands,* G. C. B. Jordan.

*Resident Commissioner at Rarotonga,* F. W. Platts.

#### Rarotonga.

Distant from Auckland, 1,638 miles; circumference, 20 miles; height, 2,100 ft.; area, 26 square miles; population, 3,064, census, 1916.

Rarotonga is the most fertile and valuable of the Cook group, and it has the largest population. The island has been exceptionally favoured by nature, not only with delightful scenic attractions, but also with a remarkably rich and productive soil.

The aborigines are very closely akin to the Maoris of New Zealand.

The seat and centre of the government of the Cook Islands—the double township of Avarua and Avatiu—is situated on the north or lee side of the island of Rarotonga, opposite two small openings in the coral reef. The former has the advantage of a boat harbour, where small craft can be moored in safety when the wind is not blowing in from the sea. The residence of the Commissioner is situated here.

The dwellings of the natives are built of coral concrete, as are also the Government offices.

Goods received from the Cook and other annexed islands are now treated as New Zealand produce, and not as imports. The total value of exports from the Cook islands for 1916 was 68,146*l.*, of which 38,647*l.* represented trade with New Zealand. The principal items were: fresh fruit, 35,612*l.*; copra, 28,328*l.*; coffee, 1,280*l.*; coconuts, 1,280*l.*

* A full account of these Dependencies will be found in the "New Zealand Official Year Book," 1913, to which the Editors desire to express their acknowledgments.

Digitized by Google

Revenue and expenditure of the Cook and Northern Islands for the year 1916-17 : Revenue, 9,710*l.* ; expenditure, 8,585*l.*

### Mangaia.

Distant from Rarotonga, 110 miles; circumference, 30 miles ; height, 656 ft. ; area, 30 square miles ; population, 1,245.

*Physical Features.*

Mangaia is the most southerly island of the Cook group, and is second in importance to Rarotonga.

Coconuts, bananas, oranges, limes, citrons and other fruits grow plentifully.

*Resident Agent*, J. C. Cameron.

### Atiu.

Distant from Rarotonga, 120 miles; circumference, 20 miles ; height, 374 ft. ; area, 22 square miles ; population, 759.

*Resident Agent*, J. Dyer.

*The Island.*

Atiu resembles Mangaia in formation, being a raised mass of coral with high jagged cliffs facing the sea.

On the highest point of the central ridge cocoanuts, bananas, oranges, and coffee grow with the utmost luxuriance; and the kumera, one of the most valuable of South Sea vegetables, yields large crops. The coconut-palm grows well everywhere, but especially so on the coral rock formation.

### Mauke.

Distant from Rarotonga, 151 miles ; circumference, 10 miles; height, about 60 ft. ; area, 5½ square miles ; population, 490.

Mauke is a low circular island about two miles across, lying to the north-east of Rarotonga. Like Mangaia and Atiu, it is surrounded by an unbroken fringing reef. It is marvellously fertile, and produce of considerable value and quantity is exported.

*Resident Agent*, W. S. Cooper.

### Mitiaro.

Distant from Rarotonga, 142 miles; circumference, 5 miles; height, about 50 ft. ; area, 6 square miles ; population, 237.

This island is a good instance of an elevated coral reef, thinly coated with sand and gravel of the same material. The surface is not more than six feet above high-water mark.

*Resident Agent*, Tou Ariki.

### Takutea.

Distant from Rarotonga, 120 miles; area, ½ square mile.

This island was presented to the Crown by the Ariki of Atiu to whom it belonged. It is a coral island, moderately fertile, and will be utilised as a Government plantation.

### Aitutaki.

Distance from Rarotonga, 140 miles; circumference, 14½ miles; height, 450 ft. ; area, 7 square miles ; population, 1,302.

The name includes the island anciently known as "Ara-ura," and some seven or eight smaller islands on the vast barrier reef. Some of these are volcanic, and would seem to have been small peaks on the lip of an extinct volcano, now submerged.

The island itself is pear-shaped, about four miles by two ; its highest part being 450 feet high.

Copra is the chief production, and some of the best oranges and pineapples on the market are grown here.

The Aitutakians are naturally a hardy race, and industrious when away from their own homes. They are said to be the best sailors in the Cook group, and their services are much in demand for working the cargo on vessels at Tahiti. They make fans and mats, and are expert at plaiting various fibres for hatmaking.

*Resident Agent*, T. Duncan, J.P.

### Manuae and Te Au-o-Tu.

Distant from Rarotonga, 120 miles; area of Manuae, 2½ square miles ; population 29.

These two small islands are better known as the Hervey Group. They are situated about midway between Atiu and Aitutaki, and are owned by the people of the latter place.

The islands have been leased to Messrs. Bates and Gruning.

### Niue.

Distant from Rarotonga, 590 miles; circumference, 40 miles; height, 200 ft. ; area, 100 square miles ; population, 3,880, not including 414 natives absent ; census, 1916.

Niue, or Savage Island, was placed under a separate administration by an Amending Act of 1903. Is a long, low island, fringed with a misty cloud of fine spray. The shores being too deep and steep to support a barrier reef, the coastline is deprived of its protection. It is fertile, but fresh water is very scarce.

Much of the land is encumbered with a dense scrub of guava bush.

The orange, the coconut, the banana, and other tropical products grow well, and the lemon flourishes on the rocky shores. Recent experiments in cotton growing have been most successful and the product highly reported upon by the British Cotton Growing Association.

The natives of Niue are somewhat different in character from other Polynesians. They are very industrious, and the men are often engaged at Tonga and elsewhere as labourers. The girls and women plait hats, which are exported to New Zealand and Australia. They are keen traders, but are much averse to strangers obtaining a foothold in the island itself.

The exports for 1916 amounted to 3,379*l.*, and the imports to 9,512*l.* The revenue for 1916-17 was 2,067*l.*, and the expenditure 1,747*l.* The principal exports were copra, 1,196*l.*, fungus, 1,297*l.* ; and hats, 600*l.*

*Resident Commissioner* (vacant).

### Palmerston Atoll.

Distant from Rarotonga, 277 miles; area, 1 square mile ; population, 90 ; census, 1916.

The Palmerstons are situated upon an irregular ring of coral reef, measuring outside about four miles and a half by two miles and a half, just awash with the tide. The narrow ring is about half a mile in width, and it supports eight little islets, nearly all covered with coconut palms. The largest of these is little more than half a mile in length and about a quarter of a mile wide.

Copra is the only article of export.

*Resident Agent*, J. Marsters.

### Penrhyn.

Distant 740 miles from Rarotonga ; area, 3 square miles ; population 326.

Digitized by Google

This atoll is known to the Polynesians as Tongareva or Ma-ngaro-ngaro and is valuable only by reason of the existence of pearlshell beds in the extensive lagoon. The lagoon has now been proclaimed a reserve for public pearlshell fishing, and regulations controlling pearlshell diving have been made.

The coconut crop is considerable. Fresh water is very scarce, and large concrete tanks have been built by the Administration in the various villages for storage of rain water.

*Resident Agent*, W. Wilson.

### Suwarrow.

Distant from Rarotonga, 525 miles; area, ½ square mile.

Suwarrow is an atoll with a splendid lagoon, which produces a very good class of pearlshell. Leased to Capt. Harries, of Rarotonga.

At the time of the census, in October, 1916, there were six native and half-caste labourers employed on the island in addition to one person of British descent.

### Manihiki and Rakahanga.

Distant from Rarotonga, 650 and 670 miles respectively; area, each 2 square miles; population, Manihiki, 493; Rakahanga, 295.

Manihiki, or Humphrey, is nearly circular. Bêche-de-mer is obtained from the lagoon. The island occasionally suffers from drought and similar tanks to those at Penrhyn have been erected.

Rakahanga, or Rierson, is also an atoll.

The former has until lately produced a limited amount of pearlshell, but about the end of 1900 it was found that the beds were exhausted by overfishing. The Manihiki lagoon has now been proclaimed a reserve for public pearlshell fishing, and regulations controlling diving made as in the case at Penrhyn.

The only industry is now that of copra-making.

*Resident Agent*, H. Williams.

### Pukapuka, or Danger Island.

Pukapuka is a small solitary atoll about three miles in diameter, which produces pearlshell. It is 720 miles from Rarotonga, and has an area of two square miles. The population is 474 persons.

#### *Education.*

The control of education in the Cook Islands has, by the Cook Islands Act, 1915, been placed under the Minister for the Cook Islands. Two schools have been established in Rarotonga, and a third will be opened at the beginning of 1918. A school has also been established at Aitutaki and another at Palmerston. The instruction given is similar to that of the New Zealand State Schools. Technical instruction is being made a special feature.

At Niue Island there is a large school conducted on the same lines.

#### *Trade of Cook Islands.*

Oranges and bananas have heretofore been the chief exports, and the latter are being extensively planted. The fruit trade is developing satisfactorily, but it is on the export of copra that dependence must chiefly be placed. Tomatoes are being grown with success and being sent to New Zealand in Winter and Spring.

### Finance, Shipping and Trade of New Zealand.

*Uruguay*, Vice-Consul, William John Prouse (Wellington).

## NIGERIA.

### *Situation, Area and Population.*

The British Colony and Protectorate of Nigeria is situated on the north-eastern shore of that deep indentation in the western coast of the African continent known as the Gulf of Guinea, and is enclosed roughly by parallels of latitude 4° and 14° N. and by meridians of longitude 3° and 14° E.

It is bounded on the north and north-west by the military territories of the French Sudan, on the east and south-east by the Cameroons*, on the south and south-west by the waters of the Gulf of Guinea, and on the west by the French colony of Dahomey. Its greatest length from east to west is 700 miles and greatest breadth from north to south 650 miles.

By the most recent calculations the area of Nigeria is approximately 335,700 square miles, and is therefore a little less than that of the United Kingdom, France and Belgium together, or about one-third that of British India. The coloured population is estimated at 16,258,000, while the number of Europeans of all classes, on an average, in the country is 2,600.

### *Physiography.*

Topographically speaking, Nigeria consists of *four* main zones or areas, each possessing characteristics peculiar to itself, as follows:—

(1) An area of swamp and mangrove forest with almost impenetrable undergrowth, running parallel to the coast-line and varying in depth from 20 to 60 miles. This area, which includes the deltaic region of the River Niger, is covered by a network of creeks and traversed by numerous rivers, the most important of which are the Rivers Benin, Forcados (branch of the River Niger), Nun (branch of the River Niger), Sombreiro, Bonny, Imo, Kwa-Ibo, and Cross.

(2) A belt of dense forest with thick undergrowth extending from the western to the eastern boundary and from 50 to 100 miles in width. The southern border of this area is some 20 miles from the coast-line in the west and thence follows the northern limit of the swamp and mangrove area. Its northern edge is difficult to determine exactly, as the belt gradually changes to patches of forest alternating with thick scrub and grass plains running approximately along a line drawn in a general east-south-easterly direction from about 7° 30′ N. on the western border to 6° N. on the extreme east. The country is generally undulating with scattered hills, and seldom can an extensive view be obtained; there are, however, hills rising to over 3,000 feet, and the region becomes mountainous as the Cameroons frontier is approached. The zone is well watered by numerous rivers, which with few exceptions run from north to south, and contains extremely rich palm-tree areas. There are no open spaces, except around villages and clearings for farms.

(3) A zone of comparatively open country gradually developing into park-like land and thence into open expanses covered with high grass as the watershed of the River Benue and that of the Niger (above its confluence with the Benue) are neared. The zone is generally hilly

* The German Colony of the Cameroons, or Kamerun, has been captured and is now being administered by the French and British Governments. The British sphere is being administered by the Government of Nigeria.

Digitized by Google

and mountainous on the Cameroons frontier, where heights above 6,000 feet are to be found.

(4) A plateau occupying the greater portion of Nigeria north of the Rivers Niger and Benue. East of longitude 7° the southern limits of this plateau are determined by a zone of hills which succeeds the undulating grass country to the south. The features of the plateau are generally similar, and although many rivers take their rise in this tableland, it is broken to no great extent by their valleys, except in the cases of those of the Rivers Niger and Benue on the south and west. In elevation it does not exceed an altitude of much over 2,000 feet except in the mountainous parts of Bauchi, where heights of 6,000 feet and more occur, and in the south-west of Yola, a part of the Cameroon mountain system. The surface is generally undulating, marked here and there by hills of granite and sandstone, which rise abruptly from the surrounding land. The country is clothed to a large extent with thin forests which become more and more scanty as the Western Sudan is entered and the arid "steppes" of the Sahara Desert are approached.

*Climate.*

West Africa formerly had the reputation of being so unhealthy that almost certain death would be the fate of the white man who endeavoured to make it his permanent home. And in this general condemnation Nigeria has been included. Though it cannot be claimed, even at the present day, that the country is a healthy one for the European except to a moderate extent on the plateau, the conditions of living have been so greatly improved during recent years that the possibilities of good health during temporary residence have been enormously increased. Medical and sanitary efforts have effected much in this way, especially by anti-malaria precautions, the use of quinine, and, around Lagos, by the reclamation of considerable areas of swamp lands by the Government at great expense. In spite, however, of this undoubted improvement in the conditions of life, it cannot be said that Nigeria is a land which can be colonised in the proper sense of the term by Europeans.

The "dry season," characterised by the "Harmattan," a dry north-easterly wind accompanied by a thick haze composed chiefly of dust, and the "rainy season" are the predominating features in the climate of Nigeria. The former begins in the north in October, extending its influence gradually southward until it is perceptible at Lagos early in November. There it appears intermittently up to the beginning of March, but in the north the dust and haze are more continuous and last until April. During this period the maximum diurnal variations of temperature occur, the minimum thermometer at Nafada (Lat. 11° 6′ N.; Long. 11° 20′ E.) during the year 1914 recorded a reading of 48° while during the day readings of 110° are not uncommon. The wind blows generally from the north-east, and both diurnal variation and humidity vary with the severity of the Harmattan. Even in Lagos, where hourly observations are taken, during December and January the humidity has been known to fall to 28 per cent. This season is ushered in and out by short periods of tornados and the rainy season fills the remainder of the year. A prevailing south-west wind supplies on the coast a copious precipitation which decreases rapidly as it travels inland. At Bonny, on the coast, the rainfall recorded in 1916 was 127·20 inches; at Kaduna, in the middle of the country, 51·39 inches; while the lowest was 24·46 inches at Sokoto.

*History.*

As far back as the 17th century British traders have had mercantile depôts on the mouths of the Niger and adjacent rivers and creeks, known as the Oil rivers, and in those early times the trade was mainly confined to the traffic in slaves. At this epoch the French attempted a settlement at the mouth of the Niger, but were unsuccessful, and during the 18th century British interests preponderated.

At the beginning of the 19th century the exploration of the upper river, which had hitherto been supposed to be identical with the Nile or Congo, began, and Mungo Park traced its course from Bamako to Bussa, where he lost his life in the rapids. Lander in 1830 demonstrated the identity of Mungo Park's river at Bussa with the lower Niger, and followed its course to the sea.

In the next two decades, 1840-60, efforts were made, both by the British Government and private individuals, as well as by French and German merchants, to develop the trade of the Niger, while our knowledge of the interior was greatly enlarged by the travels of Barth, Clapperton, Allen and others, all British or under British initiation. A consulate was founded at Lokoja, and, at the cost of much money and many lives, some progress seemed to have been made, only to result in failure and fiasco. The pioneer of these efforts was McGregor Laird, who in 1852 began to establish stations and to endeavour to secure the country for England, but the stations were destroyed by natives, or removed after Laird's death in 1861. The good results of his work were not, however, entirely lost.

The situation in the early seventies was that there were numerous trading firms—English, French, and German—on the Oil rivers, where the trade in palm oil had begun to assume importance, the imports being chiefly confined to spirits, guns and powder. The expeditions sent by the British Government to the higher river, and the subsidies voted by Parliament, had been withdrawn, and European intercourse with the Niger would have ceased had it not been for the perseverance of a few British firms, who during the four months of high water each sent a trading steamer up the river, and soon established a few primitive stations, where the white population of Nigeria lived. These bold pioneers were at the mercy of powerful chiefs, and gross outrages were from time to time avenged by the despatch of a light draught gunboat.

At the close of 1877, Mr. Goldie-Taubman—now Sir G. Taubman Goldie—visited the Niger and recognised that amalgamation of interests and a settled government must replace the chaotic rivalry of traders. With this object in view he determined to secure a charter for a British Company. After much negotiation the small British interests, which were the only ones existent on the Niger at that date, were amalgamated in the United African Company in 1879, and in 1881 a charter was applied for. The objection was raised that the capital of the Company was too small, and hence the National African Company was formed with a capital of a million sterling, with the object of opening up direct relations with the great chiefs of the interior.

Digitized by Google

With great energy the new company founded stations, sent out a river flotilla, and pushed up the Niger and Benue, but meanwhile the foresight of Gambetta had prompted the establishment of two French Companies, which, being backed by the French Government, acquired a great influence on the lower Niger. Of these the Compagnie du Senegal had a capital of 600,000*l.*, and some thirty French stations were formed, and while the French flag remained the charter could not, of course, be granted. The energy of Sir George Goldie, however, secured the disappearance of the French flag just in time to announce at the Berlin Conference in 1885 that the British flag alone flew on the Niger, and to secure to Great Britain the guardianship of the international navigation rights on the Niger while the French companies and rival British interests which had meantime grown up were absorbed in the National African Company.

In April, 1885, a new danger arose from the mission of Herr Flegel to secure treaties with Sokoto and Gando on behalf of Germany, but he was anticipated by the British Company, who concluded treaties with those powerful emirs. Great Britain was, therefore, able to conclude the Agreement of 1886 with Germany, which settled the frontiers between Nigeria and the Kameruns as far north as Yola, and in July, 1886, the long-delayed charter was granted, and the Company changed its title to that of the Royal Niger Company. Meanwhile, the territories adjacent to the river had been placed under British protection.

The first decade was spent in founding a number of commercial and quasi-administrative stations on the Niger and Benue Rivers, and in making treaties with the native tribes, and consolidating the commercial organisation on which the Company was dependent for its revenue. The expeditions of Monteil to Lake Chad from the west, of Crampnel from the south-east, and of Mizon by way of the Niger and Benue, were checkmated, and finally, in 1890, an agreement was arrived at with France by which the line dividing the French Sudan on the north from Nigeria was drawn with certain deflections from Say, on the Niger, to Barua, on Lake Chad, and in 1893 the Kamerun boundary was extended from Yola to the south of the same lake.

In 1897 the growing hostility of the great Fulah Power culminated in a plan to drive the white men out of the country. The Company were not unprepared, and they took the field with some 500 or 600 soldiers, led by about 30 British officers, against many thousands of the enemy, of whom a large proportion were mounted. Nupe, a dependency of Sokoto, which had thus challenged the Company's existence, was divided by the Niger into two nearly equal portions. The southern portion was first conquered, and then northern Nupe after a two days' fight before the capital at Bida. Ilorin, a smaller dependency, was next subdued. Prior to this southern Nupe had been partially cleared of the Fulah slave raiders, and on the 20th June, 1897, the legal status of slavery in the Niger Territories was declared abolished by the Company.

Simultaneously with this crisis another, which was to have far-reaching effects, arose. The only indeterminate frontier remaining was that to the west. The Company perceiving, in 1894, that French enterprise contemplated the annexation to Senegal and Dahomey of the Borgu country, sent out Captain Lugard (now Sir F. D. Lugard) to negotiate treaties with the king or chiefs of that country. Anticipating the powerful French expeditions by only a few days, he succeeded in making treaties at the capital of Nikki, and with other semi-independent chiefs of districts. Disregarding these prior British treaties, a swarm of French expeditions spread over Borgu, and having obtained a pledge from our Government that Sir George Goldie's powerful expedition, then in the field against the Fulani, should not advance north of latitude 9°, they invaded Bussa, with which we had a specific treaty of many years' standing, and established themselves on the Niger at several points.

At the end of 1897, in view of this situation, the British Government decided to raise an Imperial local force, and the task was confided to Colonel Lugard, who left England in March, 1898. After a period of great tension, during which the British and French troops faced each other, and a conflict was daily imminent, a convention was signed laying down a boundary line from the intersection of the 9th parallel with the frontier of Dahomey to Illo on the Niger, and thence to the northern frontier, which was more accurately defined, to Lake Chad, and to its junction with the German Kameruns frontier. Meanwhile, the Emir installed at Bido by the Company was ousted, and the Nupes were again in arms, while the army of Rabeh, which had penetrated from the Nile Valley to Lake Chad, conquered and laid waste the territory of Bornu, but eventually returned to the south of Lake Chad.

The Imperial force, called the West African Frontier Force, with a "Commissioner and Commandant" at its head, and independent of the Company, was rapidly being formed, with its headquarters at Jebba, and with numerous detachments holding the posts evacuated by the French throughout Borgu, and a strong garrison at Lokoja.

The Imperial Government having decided that the charter of the Royal Niger Company should be revoked, and that its administrative rights and powers should be transferred to the Crown, steps to this end were taken at the end of 1898, when the convention with the French Government had been signed. The actual transfer of the Company's rights and possessions to the Crown took place on the 1st of January, 1900, when the territories north of a line extending, with deflections, from approximately latitude 9° on the Dahomey frontier to Idah on the River Niger, thence to Takum on the Cameroon border, were formed into the Protectorate of Northern Nigeria under Col. Lugard as High Commissioner.

During the first years of the protectorate of Northern Nigeria, the Government was engaged in bringing under control the powerful Emirates of the Hausa States and the Kanuri Kingdom of Bornu. These Emirs, who maintained large standing armies, a large proportion of which was mounted, annually took the field and devastated vast tracts of country in slave-raiding expeditions. Despite the treaty with Sokoto, under which the Royal Niger Company paid him an annual subsidy, the Fulani Emirates now defied the Government. The Emirs of Nupe and Kontagora were brought under control in 1901; Yola, Bauchi and Bornu in 1902; and the work of pacification was practically completed in 1903 with the taking of Kano and Sokoto, and the action at Birmi. Since that date the Hausa

Digitized by Google

States have maintained a record of peaceful progress, with the exception of a rising by a so-called "Mahdi" in 1906 at Satiru in the Sokoto Province, which was, however, quickly suppressed with the loyal assistance of the Emir of Sokoto. The minor Emirate of Hadeija in the extreme north, which had not previously been brought under control, assumed an aggressive attitude in 1906 which, however, was suppressed. It was necessary also to send minor expeditions against various unruly and truculent pagan tribes, of which the more important were the Munshis on both banks of the Benue, the Okpotos in the Bassa Province, and various hill-tribes in the Bauchi and Nassarawa Provinces.

In addition to the pacification of these vast areas—hitherto largely unexplored—the early years of the Protectorate were devoted to creating a Civil Government in all its departments, and to the housing of the civil and military officials, and the erection of public offices; the building of the first light railway from Barijuko (on the navigable Kaduna) to Zungeru (22 miles), to which place the seat of Government was transferred in 1902 from the temporary capital at Jebba; and the opening up of communications both by land and by the navigable waterways of the Niger, Benue, Kaduna and Gongola Rivers. In 1907 the construction of the main trunk line from the navigable Niger at Baro to Kano (356 miles), the great market of the Hausa States, was commenced and completed, as a pioneer line, in 1912. During the 14 years from the inception of the Government of Northern Nigeria on 1st January, 1900, to its amalgamation with Southern Nigeria on 1st January, 1914, there were constructed in the Protectorate 700 miles of railways and 5,500 wire miles of telegraphs, while the Marine Department worked 1,000 miles of river.

In the political and administrative sphere a complete Civil Service was created, which increased from half a dozen officers in 1900 to an establishment of 132 residents and assistants in 1913. The guiding principle of the Administration was indirect rule through the native chiefs, the powers delegated to whom varied with their degree of enlightenment. A form of direct taxation was evolved, based on the elaborate system which obtained in the Hausa States prior to the British occupation, but shorn of its abuses. The collection of these taxes was made through the chiefs, a fixed proportion of them being retained in "Native Treasuries," from which the salaries of the native officials were paid.

As an indication of the progress achieved, the Durbar held at Kano on 1st January, 1913, may be instanced, when practically all the chiefs of the Protectorate—from the great Mohammedan Emirs to the petty chiefs of pagan hill tribes—assembled with such retinues as they were allowed to bring, estimated at 20,000 horsemen and 40,000 foot.

THE OIL RIVERS PROTECTORATE.—When, in 1885, the British Government at the conference of the European Powers, held at Berlin, was able to obtain acknowledgment of the fact that a British protectorate had been virtually established over the Niger districts, an Order-in-Council defining them was made, and the portion lying on the coast line was designated the Oil Rivers Protectorate, and placed under Consular rule.

In 1891 the rule of the Consul over the Oil Rivers Protectorate was exchanged for that of a Commissioner and Consul-General, stationed at Old Calabar (now Calabar), while Deputy Commissioners and Vice-Consuls were appointed to the Rivers Benin, Bonny, Brass and Forcados, and to the districts of Sapele and Warri.

By an Order-in-Council of 1893 the Oil Rivers Protectorate was extended definitely into the hinterland under the name of the Niger Coast Protectorate, and an administration established under an Imperial Commissioner and Consul-General.

BENIN.—In 1894, Nana, a Jekri chief, who had established himself on the Brohimi Creek a few miles from the entrance to the Benin River, caused the Government considerable trouble. He was nominally a vassal of the King of Benin, but by trade, enterprise and robbery he had acquired wealth, and became virtual ruler of a considerable area of country in lower Benin. Nana habitually raided and dealt in slaves, frequently seized produce without payment, openly defied Consular authority, and finally endeavoured to stop all trading on the river. After a blockade and severe fighting, in which Her Majesty's ships took part, Nana escaped overland to Lagos, where he surrendered to the British authorities. He was afterwards tried at Old Calabar, and sentenced to be deported to the Gold Coast. Great benefits accrued to the trade of the district by the removal of this turbulent chief, for merchants were thus enabled to deal direct with producers, who in turn received a fairer price for their produce. Nana was repatriated in 1906.

In 1892 Captain Gallwey (now Sir H. L. Galway) concluded a treaty with the king of Benin. As time passed, however, it became evident that this potentate had no intention of adhering to its provisions and that the fate of his vassal, Chief Nana, had failed to impress him.

At this period Benin held enormous power over the surrounding territory, and it was said that her influence extended even so far as Sierra Leone on one side and the Congo River on the other. The terrible nature of the fetish rites and the wholesale human sacrifices which took place in Benin City, urgently demanded European intervention and the introduction of civilised rule.

Early in 1897 a peaceful mission, organised by the Acting Consul-General to establish friendly relations with Overami, the king of Benin, and to induce him to carry out the terms of the treaty of 1892, was treacherously attacked, and with the exception of two, all the European members of the party were massacred. A powerful expedition was sent against Benin, and in a short time the capital had been captured, but the king made good his escape. The state in which Benin City was found passes all description. In every direction human remains, pits filled with bodies in various stages of decomposition, and altars dripping with fresh human blood were to be seen.

Overami eventually surrendered and was sent into exile at Calabar, where he died in the early part of 1914. In 1899 there was a second expedition into the Benin country, which resulted in the capture and execution of Ologboshere, the leader of the attack on the mission.

THE PROTECTORATE OF SOUTHERN NIGERIA, 1900 1906.—When in 1900 the charter of the Royal Niger Company was revoked by the Crown that portion of its territories lying between Idah and the coast was added to the Niger Coast Protectorate. At the same time by an Order-in-Council the Niger Coast Protectorate was constituted the Protectorate of Southern Nigeria, the

Digitized by Google

administration being transferred from the Foreign Office to the Colonial Office, and placed under Sir R. Moor as High Commissioner. In 1901 the Niger Coast Protectorate troops were organised into a regiment of the West African Frontier Force, and remodelled on the lines of the original corps of that name raised in the Niger Company's territories by Col. F. D. Lugard in 1898.

Towards the close of 1901 preparations for the Aro Expedition were commenced. These operations were directed against the southern Ibo people in general and the Aro, or Inokun tribe in particular. The Aros, who may be described as the dominant section of the great Ibo family, held paramount power over a large extent of country lying between the Niger and Cross Rivers. They had established a powerful fetish, probably derived from Benin, known as the Long Juju which exercised an extremely evil influence on the ignorant and superstitious natives for miles around. After five months of arduous work, the Field Force accomplished the subjugation and disarmament of the Aro tribe, the destruction of the Long Juju and the the bringing under Government control of that portion of the territories as far north as about the 5th parallel.

Between 1905 and 1909 several expeditions were sent into the hinterland with the object of opening to trade and civilisation previously unexplored tracts of country. The principal operations were the Bende-Onitsha Hinterland Expedition, 1905-06, and the Niger-Cross River Expedition, 1908-09. As the troops progressed through the country new administrative districts and stations were formed, broad roads constructed in all directions, and many new markets established.

The eastern frontier from the Cross River rapids to the sea was surveyed by an Anglo-German Commission in 1905-06; and from Cross River rapids to Yola in 1907-09. For some years before these delimitations, there were frequent raids across the border by German native soldiery from the Cameroons, which were invariably accompanied by robbery with violence and seizure; and even after the boundary line had been demarcated this violation of British territory did not cease.

Lagos or Eko.—During the reign of Kosoko, Lagos, or Eko as it is known to the natives, became the chief centre of the slave trade in the Bight of Benin. Akitoye, his cousin, from whom the throne had been usurped, issued a proclamation to the effect that he would make common cause with the British against slavery if he were reinstated. Acting on this statement, the British Government took decisive measures, and in 1851 a party of bluejackets from Her Majesty's warships attacked and reduced the town. Kosoko fled and Akitoye was restored to power. In 1852 Akitoye and his chiefs signed a treaty by the terms of which they agreed to abolish the export of slaves, and to encourage the work of missionaries and the establishment of stations for them. A Consul was appointed to Lagos for the protection of British interests.

About nine months after the signature of this treaty some Portugese slave traders, who had been expelled, returned to Lagos and renewed their old practices. Akitoye was informed of what was going on, and their attempts were promptly suppressed. In consequence of this, the slave trade party, under the leadership of Kosoko, organised a rebellion which broke out in 1853. Indecisive encounters took place between the two factions, and bluejackets were landed to protect the Consulate. Attempts which were made by the Consul and officers to mediate failed, and finally marines were sent to assist Akitoye, when, after a short fight, Kosoko was defeated and fled. Dosumu, who succeeded his father Akitoye, was unable to adhere to the terms of the treaty, and was induced in 1861 to cede the sovereignty of Lagos and dependent territories to the Crown in consideration of a pension, which he continued to draw until his death in 1885.

The Colony of Lagos.—In 1862 these territories were erected into a Colony, and the following year Kosoko, who in 1854 had been acknowledged king of Lekki and Palma, districts lying to the eastward, ceded these places to the Lagos Government. At the same time Protectorate rights were established over Ado and Oke-Odan on the west. In 1866 the Colony became a portion of the West African Settlements, retaining a separate Legislative Council, but being subject to the Governor-in-Chief at Sierra Leone. In 1874 the Colony, which extended from Badagri on the west to Odi on the east with an indefinite inland boundary, was united to the Gold Coast Colony.

In 1883 Appa, lying on the western border of the Colony, was the next district to be brought under British jurisdiction. In 1884, the British Consul concluded a treaty with the Jekris by which their country as far as Mollume, was placed under British protection, and similar treaties were made with the chiefs of Ogbo and Mahin, small tribal areas situated in the creek region to the eastward. In 1886 the Lagos territories were separated from the Gold Coast and erected into a separate Colony and Protectorate. Between the years 1886 and 1895 Mahin, Ijebu-Ro, Itebu, and Aiyesan to the east, and Kotonu, Igbessa, Ado and Ilaro to the west were proclaimed part of the Protectorate. An expedition was sent against the Ijebus in 1892, which resulted in the military occupation of their country, and in the opening of a most important trade route to the interior.

From this time onward British influence gradually spread inland towards the Niger, and in 1899 the Protectorate was extended to the confines of Northern Nigeria and to the border of the Niger Coast Protectorate. The country generally prospered, and Lagos became a great trading port with many large mercantile firms, both European and native, established. Great trade routes were opened into the interior, and a railway was constructed from Lagos to Ibadan, passing through a thickly populated and fertile agricultural country.

The Colony and Protectorate of Southern Nigeria, 1906-1913.—In 1906 the Colony of Lagos and its protected territory were amalgamated with the Protectorate of Southern Nigeria under one administration and designated the Colony and Protectorate of Southern Nigeria. For administrative purposes the country was partitioned into three main divisions—the Western Province, which coincided with the former Colony and Protectorate of Lagos; and the Central and Eastern Provinces, which previously formed the Protectorate of Southern Nigeria.

The next few years were spent in building up an extensive system of communications. The railway from Lagos to Ibadan was extended over the Northern Nigeria border to Jebba; thence across the Niger to Zungeru; and finally linked

Digitized by Google

up with the railway in operation from Baro on the Niger to Kano, the great Mohammedan trade centre of the north; thus there is direct railway connection between Lagos and Kano, a branch line to Baro, and a light railway joining the main line at Zaria with the tin fields of Bauchi. Broad main roads were driven in all directions and telegraph lines constructed between important administrative and trade centres.

In 1901 the great undertaking of making Lagos an open port by the construction of huge moles and by the dredging of the sandbar, which obstructed the entrance to the harbour, was commenced; and by the end of 1913 sufficient progress had been made to permit of large ocean-going steamers entering the harbour and berthing alongside the wharves.

Large areas in the north-eastern portion of the Protectorate, notably the country inhabited by the warlike and hitherto intractable Munshi people, were brought under Government supervision.

THE AMALGAMATION OF NORTHERN AND SOUTHERN NIGERIA, 1914:—By Order-in-Council dated the 22nd of November, 1913, which came into operation on the 1st January, 1914, the Protectorate of Northern Nigeria and the Colony and Protectorate of Southern Nigeria were formed into the Colony and Protectorate of Nigeria. The Protectorate was divided into two portions, each under the immediate administration of a Lieutenant-Governor. By another Order of the same date the boundaries of the Colony of Nigeria were defined, and by a third Order, which applies to the Colony and to the Protectorate, an advisory and deliberative body to be known as the Nigerian Council was established.

By Letters Patent of the 29th of November, 1913, the office of Governor and Commander-in-Chief of the Colony of Nigeria was constituted, and provisions made for an Executive Council and a Legislative Council. The Colony was placed under an Administrator, and the Protectorate, divided into two groups of provinces—Northern and Southern—under two Lieutenant-Governors. Thus the old terms, Northern and Southern Nigeria, disappeared and were replaced by the style of the Colony and Protectorate of Nigeria (*see also* Constitution).

In 1914 the construction of a new railway, known as the Eastern Railway, was commenced. It will run from the head of the Bonny estuary to Kaduna, where the main line from Lagos to Kano crosses the river of that name, some 50 miles south of Zaria. This railway will pass through some of the richest economic areas in Nigeria. It has been completed as far as the Udi Coalfields.

*Political and Administrative Divisions.*

Nigeria is arranged in three main divisions, the "Colony" and two groups of provinces designated the "Northern Provinces" and the "Southern Provinces," which have areas of 1,400, 255,700, and 78,600 square miles respectively. The Colony comprises the former Colony of Southern Nigeria, while the two groups of provinces are formed from the late Protectorates of Northern and Southern Nigeria.

The Northern Provinces are Bornu, Bauchi, Ilorin-Kabba, Kano, Kontagora, Muri, Nassarawa, Bassa, Niger, Sokoto, Yola, and Zaria.

The Southern Provinces are Abeokuta, Benin, Calabar, Oyo, Ogoja, Ondo, Onitsha, Owerri, and Warri.

The Northern Provinces are each partitioned into divisions and districts, and the sub-division of the Southern Provinces in a similar manner is under consideration.

The seat of Government is established at Lagos pending the completion of Kaduna, the Capital which is being built on the main railway line in the Zaria Province. The Administrative Headquarters of the Colony and of the Southern Provinces are at Lagos, while that of the Northern Provinces is at Kaduna.

*Commerce.*

From the following figures it will be seen that very considerable progress has been made in the development of Nigeria during the last twelve years. The set-back in trade owing to this war is believed to be purely temporary. In 1904 the total value of imports and exports (excluding specie) was a little over 5 millions sterling, as compared with over 12 millions in 1914 and over 11 millions in 1916; the purely commercial imports in the last year being of the value of nearly 4¾ millions, and the exports of the produce of the Colony and Protectorate nearly 6 millions (including 859,603*l.* tin).

Imports consist chiefly of the following goods, which are arranged alphabetically, and not in order of value:—Aërated waters, bags and sacks, beads, beef, bicycles, biscuits, chemicals and drugs, cigars and cigarettes, cola-nuts, coopers' stores, cotton and woollen goods, cutlery, earthenware, enamelware, firearms, fish, flour, furniture, galvanized iron, gunpowder, haberdashery, hardware, kerosene, matches, perfumery, rice, rope and twine, salt, silk goods, soap, spirits, stationery, sugar, timber, tobacco, umbrellas, wearing apparel, wines, and a great number of miscellaneous articles. Cotton goods form the principal class in the import table, 1,688,258*l.* worth being received in 1916.

The principal exports are palm-kernels, palm-oil, tin, hides and skins, ground-nuts, cotton, cocoa, mahogany, rubber, shea products, and maize.

As showing the influence of recent railway extensions in the Northern Provinces, attention may be directed towards the largely increased exports of ground-nuts, hides and skins, and shea products. In 1911, the year before the railway to Kano was opened, the total value of these three products shipped overseas was 89,000*l.* only, as compared with 737,000*l.* in 1914, 444,421*l.* in 1915, and 1,045,099*l.* in 1916. There is also a large increase in cotton goods carried to Kano.

Tin, as indicated by the export list is already worked to an appreciable extent in the Bauchi Plateau and elsewhere in the Northern Provinces, and deposits of lignite and coal have been discovered within the last few years near Asaba and Udi in the Southern Provinces. A colliery has been opened by Government at the latter place, the coal won being used by Government Departments and sold to the public. The output at end of 1916 was about 300 tons a day, and this will be increased considerably as new workings are developed.

Amongst minor products exported from the Colony and Protectorate may be mentioned ivory, ebony, copra, coffee, guttapercha, beeswax, silk, gums, benniseed, piassava fibre, copaiba oil, guinea grains, capsicums, ginger and ostrich feathers.

Crops cultivated for home consumption include maize, yams, cassava, sweet potatoes, sugar cane, guinea corn, ground-nuts, rice millet, tobacco,

Digitized by Google

plantains and bananas, beans of various kinds, etc. Wheat is grown to a small extent in some parts of the Northern Provinces.

Large herds of cattle, sheep, and goats are raised in the Northern Provinces, and in the extreme north, ostriches and camels are bred. Horses and donkeys are bred and in common use in the northern part of the Protectorate.

The ports served by ocean steamers are, from west to east, Lagos, Forcados and Burutu, Warri, Sapele, Koko Town, Akassa, Brass, Bonny, Port Harcourt, Degema, Opobo, and Calabar.

Import and export merchants are established at the ports, and also up-country along the main waterways, the Niger, Benue, and Cross Rivers, and at inland railway stations.

The following table gives the value of imports and exports (excluding specie) for the ten years 1907-1915.

| Year. | Imports. | | | Exports. | | | Grand Total. |
|---|---|---|---|---|---|---|---|
| | Commercial. | Government. | Total. | Produce of Nigeria. | Foreign Goods. | Total. | |
| | £ | £ | £ | £ | £ | £ | £ |
| 1907 | 3,540,723 | 298,617 | 3,839,340 | 3,611,567 | 251,764 | 3,863,331 | 7,702,671 |
| 1908 | 3,262,309 | 784,263 | 4,046,572 | 3,102,143 | 233,768 | 3,335,911 | 7,382,483 |
| 1909 | 3,514,011 | 1,015,593 | 4,529,604 | 3,829,315 | 284,922 | 4,114,237 | 8,643,841 |
| 1910 | 4,578,989 | 543,381 | 5,122,370 | 4,963,749 | 294,703 | 5,258,452 | 10,380,822 |
| 1911 | 4,724,772 | 510,102 | 5,234,874 | 5,072,418 | 281,683 | 5,354,101 | 10,588,975 |
| 1912 | 5,470,049 | 481,834 | 5,951,883 | 5,476,743 | 296,745 | 5,773,488 | 11,725,371 |
| 1913 | 5,701,599 | 630,152 | 6,331,751 | 6,779,205 | 318,441 | 7,097,646 | 13,429,397 |

*The Nigerian Tin Fields.*

The principal tin fields are situated on the western boundary of the Central Province and in the Provinces of Nassarawa, Zaria, and Kano adjoining that boundary. Tin is also known to exist in the Provinces of Ilorin, Calabar, and Yola, but as yet has not been found in payable quantities.

The tin is in the form of cassiterite, and is mostly found in the detrital deposits resultant on the vast denudation that has taken place all over the known field; it is therefore more readily discovered in the existing river-beds; and shows a tendency to increase in size and richness of deposit nearer their sources.

It is extremely doubtful if the detrital tin was derived from lode formations, there is far more evidence to show that it came from narrow stringers and stockworks, many of which are still to be found in every part of the field; these stringers frequently are formed of nearly pure cassiterite and vary in width from half-an-inch up to three or four inches.

The pagan town of Bukuru may be taken roughly as the centre of the field (about 6,000 feet above sea level), from which three great waterways of the Northern Provinces take their origin. Flowing westwards we have the N'gel River becoming the Kwall, Danchandon, and eventually the Kaduna, flowing north-east the Delimi River that goes to Lake Chad, and flowing east the numerous tributaries of the Gongola which joins the Benue, such as the Shen, Forum, Ropp and Jarawa Rivers.

Tin ore has been worked and smelted by the natives during the last hundred years, the Seriki (Chief) of Liruein-Delma being a grandson of the native who historically first discovered and worked it. There is, however, strong evidence to show that some former race knew of its existence. Beads may be seen that have been found in the deep detrital deposits that could only have been made by man. These beads bear no resemblance to the modern ornaments made by tin workers, nor are such beads worn by any existing race of natives near the fields, also the depth at which they have been found precludes a modern origin.

The ore won by the existing mines during 1913 amounted to 5,530 tons, and in 1916 7,054 tons were exported

*Banking, Currency, Weights and Measures.*

Banking facilities are afforded by the Bank of British West Africa Ltd., and the Colonial Bank. The former is established at Lagos, Calabar, Forcados, Warri, Onitsha, Port Harcourt, Abeokuta, Ibadan, Zaria, Kaduna, Jos, Kano, and Lokoja, and there are also a number of agencies. The Colonial Bank is established at Lagos, Port Harcourt, Jos, and Kano.

The coins current in Nigeria are:—*U.K.* gold, silver and bronze coins; *West African* silver coins value 2*s.*, 1*s.*, 6*d.* and 3*d.*; *Nigerian* nickel-bronze coins value 1*d.*, ½*d.* and $\frac{1}{10}$*d.* (tenthpence).

All coins, which under the Coinage Acts, 1870 and 1891, are legal tender in the United Kingdom, and all subsidiary coins coined in pursuance of the provisions of His Majesty's Order-in-Council dated 28th July, 1906, as amended by Orders-in-Council dated respectively 9th September, 1907, 19th October, 1908, 2nd August, 1910, and 7th May, 1913, are current in all parts of Nigeria. The United Kingdom coins, however, are being superseded by the West African and Nigerian coins. Gold and silver coins of the United Kingdom and West African silver coins are legal tender to any amount; United Kingdom bronze coins and Nigerian nickel-bronze coins are legal tender to the extent of one shilling.

Digitized by Google

The new West African silver coins, authorised by the Nigerian Coinage Order, 1913, were introduced in May, 1913. The Nigerian nickel-bronze coins were introduced in 1907, 1908 and 1911. Towards the end of 1915 an Ordinance was passed making the Imperial Treasury Notes of 10*s.* and 20*s.* legal tender, and a supply was sent out for temporary purposes. Currency notes of the values of 20*s.*, 10*s.* and 2*s.* were introduced in 1916 under the Currency Note Ordinance of that year.

Native currency in the form of cowries, manillas and brass rods are still used as currency in some parts, but further importation is prohibited, and the abolition of native currency is being gradually effected.

The weights and measures in common use are the same as those in Great Britain.

### *Revenue and Loans.*

The total revenue of Nigeria (Northern and Southern) was 2,843,184*l.* in 1916, as compared with 2¼ millions in 1910, 1¾ millions in 1907, and 1 million in 1904. The above amounts do not include annual grants at varying rates from the Imperial Government (100,000*l.* in 1916).

The total loan liability at the end of 1916 was under 8½ millions sterling. These loans have been mainly employed in the construction of railways, whose net earnings now exceed 4 per cent. on the total capital expenditure. Large sums have also been used for the important Harbour Works at Lagos, which have enabled ocean mail-steamers to enter the port.

### *Chief Towns and Means of Communication.*

The principal towns of the Northern Provinces are :—Bauchi, Bida, Ibi, Ilorin, Jemaa, Kano, Katsina, Keffi, Kontagora, Lokoja, Maidugari, Naraguta, Sokoto, Yola, Zaria, and Zungeru; while those of the Southern Provinces are :—Abeokuta, Benin City, Calabar, Forcados, Ibadan, Ijebu-Ode, Iwo, Lagos (Seat of Government), Ogbomosho, Ogoja, Ondo, Onitsha, Opobo, Oshogbo, Owerri, Oyo, Port Harcourt and Warri.

Steamships maintain a regular service between Nigeria, Europe, other West African Colonies, etc., and there is cable communication with West and South-West African ports, Europe and South Africa, and thus with all parts of the civilised world.

The Nigerian Government Railway runs from Lagos on the coast through the important towns of Abeokuta, Ibadan, Kaduna and Zaria, to Kano, a distance of 712 miles, thus connecting large and populous commercial centres in the interior with each other and with the sea. There are also two branch lines, one running from Zaria to the tin fields of Bauchi, and the other from Minna (near Zungeru) to Baro, an important station on the River Niger. A railway is now under construction which, when completed, will run from a point on the coast at the head of the Bonny estuary, recently named Port Harcourt, in a northerly direction to form a junction with the main line in the neighbourhood of Kaduna, the site of the proposed new capital of Nigeria. This line will pass through some of the richest economic areas of the country. For the present the southern section only, to the Udi Coalfields, has been constructed. Coal of good quality is being steadily produced here.

A system of inland telegraphs, also owned and operated by Government, connects the majority of the principal towns on the coast and in the interior, and the African Direct Telegraph Company controls a wireless station at Lagos. Government has constructed a very large number of broad main roads, many of which are suitable for motor traffic, between the headquarter stations of the Provinces, and there are, in addition, many minor roads running in all directions. The Rivers Niger and Benue are in themselves great natural highways, and there are numerous other navigable waterways, which form most excellent means of communication and transport.

### *Religion and Education.*

The bulk of the population of the Northern Provinces is Mohammedan, the remainder to a large extent being pagan. In the Southern Provinces, however, the greater proportion of the people are pagan with a number of Mohammedan communities, especially in the western districts. Missionary societies of various denominations have established many stations with churches and schools throughout the country.

Education work for the most part is carried on by the several missionary bodies whose schools outnumber those established and maintained entirely by Government. In the Southern Provinces the latest returns show that there are 53 Government Schools; 82 Assisted Schools in receipt of an annual grant-in-aid from Government awarded in accordance with the regulations of the Education Code; and some 587 Non-Assisted Schools which are in no way controlled by the Department of Education. In addition to the above schools, a high-grade secondary school has been established in Lagos by the Government, and is called the King's College. This school was built and equipped at a cost of nearly 10,000*l.* Pupils are prepared for London Matriculation, and a branch for instruction in commercial subjects has been instituted. A new Education Code was introduced in 1916, which will be more suitable to conditions obtaining in this country. Grants are not paid on examination results only, but on the general efficiency of the schools as disclosed by the reports of the Inspectors, account being taken of (1) adequacy and efficiency of staff; (2) tone, discipline, organisation, and moral instruction; (3) results of examinations by Masters and test examinations by Inspectors, and general progress; and (4) buildings, equipment, &c. The Education Boards set up under the Ordinance are in the Northern Provinces confined in their functions to Christian assisted schools.

In the Northern Provinces there are 13 Government Schools, in which elementary and primary instruction are given, and 46 Non-Assisted. The local vernacular language is first employed as the medium for teaching elementary subjects; the course is then repeated in Hausa, and in Hausa only is given primary instruction in all standards except the highest, where the study of English is begun. In addition to the Government Schools there are very many Native Mohammedan Schools in which, however, little is taught except the study of the Koran and of the traditions of Islamic faith. Missionary societies also have opened schools, more especially in the southern pagan parts of the Northern Provinces.

*Constitution.*

The territorial divisions of Nigeria are the "Colony of Nigeria," the "Northern Provinces" and the "Southern Provinces." The Northern Provinces and the Southern Provinces together form the Protectorate.

The Government of the Colony is provided for by Letters Patent of the 29th November, 1913, and the Royal Instructions relating to the Colony of the same date. The boundaries of the Colony are defined by the Colony of Nigeria Boundaries Order in Council, 1913.

The Letters Patent and the Orders in Council constitute the offices of the Governor and the Lieutenant Governors, and also create a Legislative Council for the Colony and an Executive Council common to both Colony and Protectorate. These instruments are amplified by the Royal Instructions referred to as amended by additional Instructions dated 29th April, 1916. The office of Governor is held by a Governor-General of Nigeria.

The Nigerian Council Order in Council, 1913, constitutes a Nigerian Council, and sets out its procedure and the extent of its authority.

GOVERNORS FROM 1907.

*Protectorate of Northern Nigeria.*

1907 Sir E. P. C. Girouard.
1908 Sir W. Wallace, K.C.M.G. (acting).
1908 Sir E. P. C. Girouard.
1909 Sir W. Wallace, K.C.M.G. (acting).
1909 Sir H. Hesketh Bell, K.C.M.G.
1911 C. L. Temple, C.M.G. (acting).
1911 Sir H. Hesketh Bell, K.C.M.G.
1912 H. S. Goldsmith, C.M.G. (acting).
1912 C. L. Temple, C.M.G. (acting).
1912 Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.
1913 Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.

*Governors and Administrators of the Colony and Protectorate of Southern Nigeria.*

1907 Sir Walter Egerton, K.C.M.G.
1907 J. J. Thorburn, C.M.G., Admin.
1907 Sir Walter Egerton, K.C.M.G.
1908 Sir Walter Egerton, K.C.M.G.
1908 J. J. Thorburn, C.M.G., Admin.
1909 J. J. Thorburn, C.M.G., Admin.
1909 Sir Walter Egerton, K.C.M.G.
1910 Sir Walter Egerton, K.C.M.G.
1910 J. J. Thorburn, C.M.G., Admin.
1910 Sir Walter Egerton, K.C.M.G.
1911 A. G. Boyle, C.M.G., Admin.
1911 Sir Walter Egerton, K.C.M.G.
1912 F. S. James, C.M.G., Admin.
1912 Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.

*Governor-General.*

*Colony and Protectorate of Nigeria.*

1914 Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.

*Executive Council.*

*Governor-General*, Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.
*Lieutenant-Governor, Southern Provinces, and Administrator of the Colony*, A. G. Boyle, C.M.G.
*Lieutenant-Governor, Northern Provinces*, H. S. Goldsmith, C.M.G.
*Attorney-General*, R. M. Combe.
*Director of Railways and Works*, Sir J. Eaglesome, K.C.M.G.
*Commandant, Nigeria Regiment*, Brig.-General F. H. G. Cunliffe, C.B., C.M.G.
*Director of the Medical and Sanitary Service*, Dr. T. Hood, C.M.G.
*Treasurer*, D. S. MacGregor.
*Director of Marine*, Lieut.-Commander J. Percival, D.S.O., R.N.R.
*Comptroller of Customs*, T. F. Burrowes, C.B.E.
*Central Secretary*, D. C. Cameron.
H. Bedwell, C.M.G.
Major H. C. Moorhouse, C.M.G., D.S.O.

*Nigerian Council.*

*Official.*

Governor-General.
Members of the Executive Council.
First-class Residents.
Secretary, Southern Provinces.
Secretary, Northern Provinces.

*Unofficial.*

Hon. James R. U. Little.
John Miller, Esq.
N. D. Maidman, Esq.
P. E. Buchan, Esq.,
S. Waring.
A. R. Canning.
G. G. Bruce, Esq.
Oladugbolu Onikepe (Alafin of Oyo).
Mohomadu Abbas, Sarkin Kano, C.M.G. (Emir of Kano).
Dore Numa (Chief, Warri and Benin River).
Richard Henshaw (Chief, Calabar).
Kitoyi Ajasa, Esq.
Mohammodu Maiturare, Sarkin Musulmi (Sultan of Sokoto).

*Legislative Council (Colony).*

*Official.*

*Governor-General*, Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.
*Administrator*, A. G. Boyle, C.M.G.
*Secretary to the Southern Provinces and Colony*, Major H. C. Moorhouse, C.M.G., D.S.O.
*Principal Medical Officer, S.P.*, Major W.H.G.H. Best.
*Legal Adviser*, J. M. M. Dunlop.
*Assistant Treasurer*, The senior Assistant Treasurer in the Colony for the time being.
*Commissioner of Lands*, C. W. Alexander.

*Unofficial.*

R. McNeill, Esq.
S. H. Pearse, Esq.
E. O. Moore, Esq.
P. E. Buchan, Esq.

CIVIL ESTABLISHMENT.

*Governor-General and Staff.*

*Governor-General*, Sir F. J. D. Lugard, G.C.M.G., C.B., D.S.O., 6,000*l.*, duty, 1,500*l.*
*Private Secretary*, Capt. C. T. Lawrence (acting).
*Aide-de-Camp*,
*Confidential Clerk*, W. Nash.

*Lieutenant-Colonels*, G. D. Mann, R. G. Coles, C. C. West.

*Major Commanding M.I.*,

*Majors*, E. C. Feneran, F. J. E. Archer, J. Crookenden, J. W. Chamley, J. P. D. Underwood, M. H. S. Willis.

## NYASALAND PROTECTORATE.

*Situation and Area.*

The Protectorate comprises the western shore of Lake Nyasa, with the high tablelands separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and the Shiré Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruo (an affluent of the Shiré) on the east, including the mountain systems of the Shiré Highlands and Mlanje.

It is bounded on the north by German East Africa, on the west by the British South Africa Company's Territory known as "North Eastern Rhodesia," on the south and east by Portuguese East Africa, and has a total area of about 39,573 square miles, according to the most recent survey.

It is divided into fifteen districts, each in charge of a resident, who is also a district magistrate. An agent of the Government is stationed at Chinde at the mouth of the Zambesi, where a concession has been leased from the Portuguese Government as a landing and forwarding depôt for goods intended for British Territory north of the Zambesi, and where a Postal Agency is also established.

The chief town is Blantyre, in the Shiré Highlands, where there are about 300 Europeans. The headquarters of the Government are at Zomba.

*History.*

In 1859 Dr. Livingstone was placed at the head of a Government Expedition, and reached the southern shore of Lake Nyasa on the 16th of September of that year. His expedition was recalled in 1863, but resulted in the founding, from 1874 to 1881, of various Missionary Societies, notably the Universities Mission, the Livingstonia Mission, and the Church of Scotland Mission.

The Missions were followed by the African Lakes Corporation, and in 1883 Captain Foote, R.N., was appointed first British Consul for the Territories north of the Zambesi, to reside at Blantyre.

Opposition of the new settlers to the slave trade carried on by Arab coastmen and natives alike resulted in a conflict with the Arab traders under Chief Mlozi, settled at the north end of Lake Nyasa, which spread to the Yao chiefs, who were under their influence.

In 1889 public attention was drawn to Nyasaland by the application for a Charter by the British South Africa Company, and the despatch of an imposing expedition under Major Serpa Pinto to the Upper Zambesi and Lower Loangwa. At the same time Mr. D. Rankin announced the discovery of a navigable entrance to the Zambesi by the Chinde mouth.

In the summer of 1889 Mr. Johnston (now Sir H. H. Johnston, K.C.B., K.C.M.G.) arrived at Mozambique as H.B.M. Consul, and proceeded to travel in the interior to inquire into the troubles with the Arabs.

Treaties having been concluded with the remaining Makololo chiefs and with the Yaos round Blantyre, Mr. Johnston proceeded up Lake Nyasa, leaving Mr. John Buchanan, Acting-Consul, in charge, who, after the first encounter between Major Serpa Pinto and Mlauri, a powerful Makololo chief, proclaimed on the 21st September, 1889, a British Protectorate over the Shiré districts.

Digitized by Google

Mr. Johnston, during his progress up the Lake, induced the "Jumbe" or Sultan of Kota-Kota to place his country under British protection, and on arriving at Karonga arranged similar treaties with Mlozi and other Arab and Wahenga chiefs, after which he proceeded to Lake Tanganyika. On his return an agreement was made with Mponda, a Yao chief at the south end of Nyasa.

In 1891, an Anglo-Portuguese convention ratified the work of Mr. Johnston, Mr. Sharpe (now Sir A. Sharpe, K.C.M.G., C.B.), and other pioneers of British Central Africa, and in the following spring a British Protectorate over the countries adjoining Nyasa was proclaimed. The Protectorate of Nyasaland, under the administration of an Imperial Commissioner, was confined to the regions adjoining the Shiré and Lake Nyasa; the remainder of the territory under British influence north of the Zambesi being placed, subject to certain conditions, under the British South Africa Company.

In the autumn of 1891 an expedition was successfully conducted by the Commissioner and Captain Maguire against Mohandanji and Mponda, slave-raiding Yaos at the south end of Nyasa, which resulted in the former being attacked and his followers effectually dispersed, and the latter suing for peace after his town had been shelled. The next few years brought much trouble to the Protectorate in the way of slave-trading and constant raids, but owing to three gun-boats being placed on the Lake for the suppression of the slave trade, further reinforcements of Sikhs arriving from India, and the recruitment of native troops from the Atonga of West Nyasa, the slave trade was abolished and the peaceful development of the Protectorate secured. On the 22nd February, 1893, the name of the Protectorate was changed to "The British Central Africa Protectorate," but the old name "Nyasaland Protectorate" was revived in October, 1907, by the Order in Council which amended the Constitution.

### *Constitution.*

The administration of the Protectorate, which was transferred to the Colonial Office from the Foreign Office in March, 1904, was originally conducted by a Commissioner and Consul-General, assisted by the Deputy and Assistant Deputy Commissioner. On transfer to the Colonial Office the post of Consul-General was abolished, and by an Order in Council which came into force in October, 1907, the Commissioner became a Governor and Commander-in-Chief. By the same Order Executive and Legislative Councils were established.

The Laws consist of local Ordinances duly enacted with such British Acts as are of general application. Justice is administered in the High Court, which has jurisdiction in Civil and Criminal matters, and also as a Court of Admiralty. Subordinate Courts are held by Magistrates and Assistant Magistrates in the various districts. Appeals from decision of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa sitting at Mombasa.

### *Climate and Products.*

There are two distinct climates in the Protectorate, one of the Shiré Valley and Lake Nyasa, the other of the Shiré Highlands and the rest of the country which lies at a high elevation. The first has a rainfall averaging 35 inches yearly, and a temperature which touches 120° in the summer. The second has a pleasant climate, the thermometer ranging from 96° or 97° in the summer to a minimum of about 40° in the winter. The rainfall in the Shiré Highlands varies from about 40 to 100 inches.

### *Industry.*

The chief products of the Protectorate are cotton, tobacco, tea, chillies, rubber, rice, maize, wheat and fibre.

Cotton has rapidly increased and the export reached 3,462,478 lbs. in 1916-17. Tobacco shows a considerable increase, the export in 1916-17 being 4,304,124 lbs. 96 per cent. of the export trade was to the United Kingdom and British Colonies. Further development is greatly dependent on improved transport, as during the dry season the Shiré River is shallow.

The chief imports are, provisions, cotton goods, earthenware, hardware, wines and spirits, salt, silk and woollen goods, agricultural machinery, arms and ammunition. 86 per cent. of the imports in 1916-17 came from the United Kingdom and British Colonies.

### *Population* (31*st March*, 1917).

Europeans, 731; Asiatics, 391; Natives, 1,137,266.

### *Means of Communication.*

A railway from Port Herald (the inland "port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindis on the Zambesi (61 miles) was opened to traffic in 1915, and further extensions to Beira and to Fort Johnston, on Lake Nyasa, are projected. There are eleven British steamers plying on the Zambesi and Shiré between Chinde and the railway terminus. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,425. There are seven steamers on Lake Nyasa.

Mails to and from England, are despatched every week *viâ* Cape Town and Beira.

### *Rates of Postage.*

Parcels to and from United Kingdom (south route), 3 lbs., 3*s.*; 7 lbs., 4*s.*; 11 lbs., 5*s.* Via Aden express, 3 lbs., 4*s.*; 7 lbs., 5*s.*; 11 lbs. 6*s.* Money Orders are issued at a commission of 9*d.* up to £2; 1*s.* 6*d.* for £5; 2*s.* 3*d.* for £7; 3*s.* for £10. Maximum amount single order £40. Local parcels, 2 lbs. 8*d.*; every subsequent lb. up to 11 lbs., 3*d.* per lb. British Postal Orders issued and paid at all Post Offices. Rates of poundage, 6*d.* to 5*s.*, 2*d.*; 5*s.* 6*d.* to 15*s.*, 3*d.*; 15*s.* 6*d.* to 21*s.*, 4*d.*

In 1914-15—Letters, 1,722,894; Postcards, 23,270; Newspapers, Book packets, samples and circulars, 352,876; Registered articles, 32,840; Parcels, 14,601; Official packets, 27,924. Money Orders sent, 9,286*l.*; received, 2,847*l.*; issued in Protectorate for payment in Protectorate, 9,008*l.* British Postal Orders sent, 7,190*l.* :received, 9,052*l.*

### *Telegraphs.*

The African Trans-continental Telegraph Company's line is in use from Ujiji on Lake Tanganyika southwards through the Protectorate, *viâ* Blantyre and Tete, to Umtali in Southern Rhodesia and thence to Cape Town and England.

Digitized by Google

The total mileage through the Protectorate is 824 miles. Telegrams may also be transmitted over the railway line and the Portuguese line between Chinde and Tete.

*Education.*

There are no Government schools, and native education is in the hands of the missionary societies. There are 2,054 schools, at which 129,810 natives receive instruction, which is largely practical. An annual grant of 1,000*l.* is made by Government.

*Currency and Banking.*

By a Proclamation of February, 1894, the legal currency is declared to be English sterling.

Banking operations in the Protectorate are governed by "The Banking Ordinance, 1902."

Two Banks have branches at Blantyre, the principal trading centre of the country, viz., The Standard Bank of South Africa, and The African Lakes Corporation, Limited; the latter have also a branch at Zomba.

A Post Office Savings Bank has also been established in the Protectorate.

*Government—Executive Council.*

The Governor.
The Chief Secretary.
The Treasurer.
The Attorney General.

*Legislative Council.*

*Ex officio members*, as above.
*Unofficial Members*, Rt. Rev. T. C. Fisher, E. P. Roe, T. M. Partridge.
*Clerk of the Council*, G. B. Anderson.

*Civil Establishment.*

*Governor and Commander-in-Chief*, Sir G. Smith, K.C.M.G., 2,000*l.*, 200*l.* duty allowance.
*Private Secretary and A.D.C.* (vacant), 200*l.*

*Secretariat.*

*Chief Secretary*, H. L. Duff, C.M.G., 700*l.* to 800*l.* by 25*l.*; 70*l.* duty allowance.
*Assistant Chief Secretary*, A. M. D. Turnbull, 500*l.* to 600*l.* by 25*l.*, 50*l.* duty allowance.
*Chief Clerk*, G. B. Anderson, 250*l.* to 350*l.* by 15*l.*
*Clerks*, A. J. Stone, E. C. Richards, R. R. Harris, H. Barlow, 200*l.* to 300*l.* by 10*l.*
*Superintendent of Native Affairs*, J. C. Casson, 450*l.* to 600*l.* by 25*l.*
*Clerks*, H. F. McKay, A. W. B. Northern, 200*l.* to 300*l.* by 10*l.*

*Printing and Stationery.*

*Government Printer*, P. W. Fyson, 200*l.* to 300*l.* by 10*l.*; Stationery and Gazette allowance 50*l.* (50*l.* personal).
*Assistant*, A. Campbell, 220*l.* to 240*l.* by 10*l.*; 24*l.* allowance as Repairer of Typewriters.
*Editor of Gazette*, R. R. Harris, 20*l.*

*District Residents.*

*Five 1st Grade*, H. C. McDonald, C.M.G. (100*l.* personal), C. A. Cardew, H. Armbruster, B. T. Milthorp, F. J. T. Storrs, 500*l.* to 700*l.* by 25*l.*, 50*l.* duty allowance.
*Eleven 2nd Grade*, L. T. Moggridge, G. B. Ritchie, F. Webb, E. R. Cosgrove, W. K. Green, H. Silberrad, E. Costley-White, J. S. Wells, C. H. Hughes, E. F. Colvile, 400*l.* to 500*l.* by 20*l.*, 40*l.* duty allowance.
*Twenty-four Assistants*, H. D. Aplin, R. A. McRae, A. H. L. Wyatt, C. E. Aplin, Captain L. E. L. Triscott, A. J. Brackenbury, R. H. Murray, C. G. Kennedy, C. T. Verry, C. H. Wade, H. H. Vassall, J. C. Abraham, P. E. Mitchell, A. G. O. Hodgson, J. I. C. May, A. G. Sherwell, H. C. Foulger, J. K. F. Coutanche, L. H. L. Foster, G. T. Wenham, E. Smith, (three vacancies), 250*l.* to 400*l.* by 15*l.*

* Exclusive of goods and specie in transit through the Protectorate.
† Considerable imports of material for the Shiré Highlands Railway, 184,655, in the four years marked.

*Legal and Judicial.*

*Judge of the High Court*, R. W. Lyall Grant, 700*l.* to 800*l.* by 50*l.*; 70*l.* duty allowance.
*Attorney-General*, A. F. Hogg, 500*l.* to 600*l.*; 50*l.* duty allowance.
*Assistant to the Attorney-General*, W. H. McCullough, 250*l.* to 400*l.* by 15*l.*
*Clerk to Attorney-General*, B. Mason, 200*l.* to 300*l.* by 10*l.*
*Registrar, High Court*, W. A. Wilson, 250*l.* to 400*l.* by 15*l.*; *Clerk*, J. E. Jones, 200*l.* to 300*l.* by 10*l.*
The Residents hold warrants as District Magistrates and Assistant District Magistrates.

*Medical Department.*

*Principal Medical Officer*, H. H. Hearsey, 600*l.* to 700*l.* by 25*l.*
*Clerk*, P. D. H. Piers, 200*l.* to 300*l.* by 10*l.*
*Medical Officers*, A. H. Barclay, J. E. S. Old, J. B. Davey, H. S. Stannus, N. M. Leys, A. G. Eldred, G. M. Sanderson, R. Drummond, R. Bury, (two vacancies), 400*l.* to 500*l.* by 20*l.*
*Nurses*—
*Matron*, R. Paterson, 180*l.*, and 10*l.* uniform allowance.
*Nurses*, A. M. Tadman, A. A. Pallot, M. Gittins, M. Farrow, 165*l.*, and 10*l.* uniform allowance.

*Transport Department.*

*Chief Transport Officer*, V. J. Keyte, 325*l.* to 425*l.* by 20*l.*
*Clerk*, S. S. Murray, 200*l.* to 300*l.* by 10*l.*
*Supt. Engineer*, W. G. Phelps, 175*l.* to 275*l.* by 10*l.*

*Postal Department.*

*Postmaster-General*, G. H. Tuckett, 325*l.* to 425*l.* by 20*l.*; 40*l.* duty allowance.
*Assistant Postmaster-General*, A. H. Jepson, 200*l.* to 300*l.* by 10*l.*
*Postmasters*, L. A. Harcourt, J. Petrie, F. Birkitt, W. M. Oddy (2 vacancies), 200*l.* to 300*l.* by 10*l.*

*Agricultural Department.*

*(a) Agricultural.*

*Director*, J. S. J. McCall, 500*l.* to 700*l.* by 25*l.*; 50*l.* duty allowance.
*Agriculturists*, E. W. Davy, J. Jennings, A. P. Cliff, D. M. Archdale, H. Munro, 250*l.* to 300*l.* by 10*l.*
*Clerk* (vacant), 200*l.* to 300*l.* by 10*l.*

*(b) Forestry Division.*

*Chief Forest Officer*, J. McL. Purves, 400*l.* to 500*l.* by 20*l.*; 40*l.* duty allowance.
*Forest Officer* (vacant), 250*l.*

*(c) Veterinary Division.*

*Senior Veterinary Officer*, G. Garden, 400*l.* to 500*l.* by 20*l.*
*Veterinary Officers*, J. A. Griffiths, 400*l.*; J. de Meza, 400*l.*

*(d) Entomological Division.*

*Entomologist*, C. W. Mason, 350*l.* to 400*l.* by 25*l.*

*Public Works Department.*

*Director of Public Works*, F. G. Pratt, 500*l.* to 700*l.* by 25*l.*; 50*l.* duty allowance.
*Assistant Director*, T. F. Firr, 400*l.* to 500*l.* by 20*l.*; 40*l.* duty allowance.
*Assistant Engineers*, E. J. Evans, 300*l.*; W. Colquhoun, 250*l.* to 300*l.* by 25*l.* every 18 months.
*Clerks*, H. L. Bayles, S. Macrae, R. G. Fentum, 200*l.* to 300*l.* by 10*l.*
*Assistant Superintendents of Buildings*, A. E. Wightman, E. F. Bryan, 250*l.* to 300*l.* by 25*l.* every 18 months.
*Roads Engineer*, G. N. Beaumont, 250*l.* to 350*l.* by 10*l.*
*Foremen of Works*, H. Fairbrother, 200*l.*
*Architectural Draughtsman* (vacant), 200*l.*

*Lands Department.*

*Lands Officer*, C. L. Baker, 400*l.* to 500*l.* by 20*l.*, 40*l.* duty allowance.
*Assistant Surveyor*, D. Wallace, 250*l.* to 350*l.* by 10*l.*
*Clerk*, H. Malpass, 200*l.* to 300*l.* by 10*l.*

*Prisons.*

*Deputy Superintendent, Zomba Central Prison*, (vacant), 200*l.* to 220*l.* by 10*l.*; 10*l.* uniform allowance.

## ST. HELENA.

*Situation, Area, &c.*

St. Helena is an island in the South Atlantic Ocean, 800 miles S.E. of Ascension, and 1,200 miles from the coast of Africa, in 15° 55′ S. lat., and 5° 42′ W. long. It is 10½ miles long and 6½ broad, covering an area of 47 square miles, or about 30,000 acres (a little larger than Jersey). The distance from Southampton is 4,477 miles, and from Capetown 1,695 miles. The usual mail passage is, from England, 17 days, and from Capetown, 6 days.

A census taken in April, 1911, showed a population of 3,520, of whom 34 were members of the E.T.C. Staff, and 43 were sailors of the ships in port.

The capital and only town is Jamestown, on the N.W. of the island, with a population of 1,439. The climate is mild, and varies little, the thermometer in Jamestown ranging in summer between 68° and 84°, and in winter between 57° and 70°. The country is 10° colder. The rainfall in 1916 was 31 inches in the country. The island is very healthy, the average death-rate for the three years ended 1906 having been only 13·7 per 1,000, including seamen landed in the island seriously ill. The death-rate for 1912 was 12·5 per 1,000 inhabitants; 1913, 14·5 per 1,000 inhabitants; 1914, 14·6 per 1,000 inhabitants; 1915, 14·7 per 1,000 inhabitants; and in 1915 was 13·6 per 1,000 inhabitants.

*History.*

St. Helena, then uninhabited and well wooded, was discovered by the Portuguese Commander Juan de Nova Castella, on St. Helena's day, May 21st, 1502. The Portuguese contrived to keep secret the situation of the island from other European nations until 1588, when it was visited by Captain Cavendish, on his return from a voyage round the world. They built a church there, but made no permanent settlement. The Dutch held it from 1645 to 1650, when they abandoned it. It was taken possession of by the East India Company in 1651, and a charter for its administration was granted in 1661. In 1665 it was seized by the Dutch, who were, however, expelled the same year. Again, in January, 1673, they seized it, to be driven out finally in May, by Captain Munden, of the English Navy. A new charter was issued by Charles II. to the East India Company for its possession in December, 1673, and it remained under that Company, with the exception of the period of Napoleon's imprisonment there, till 22nd April, 1834, when it was brought under the direct government of the Crown by an Act of Parliament of 1833.

*Education and Local Government.*

The Government maintain 3 schools, having 316 scholars. There are also 8 endowed and private day schools, two of which are aided by Government, having 329 scholars. School attendance is compulsory under Ordinance No. 11 of 1903, and fees of 1d. a week per child are charged.

The only local authority is the Poor Relief Board, the revenue and expenditure of which for 1916 were 717*l.* and 721*l.*

*Industry.*

St. Helena is well watered by clear springs, which are abundant. It is situated in the heart of the South Atlantic trade wind, blowing from the S.E. for about 330 days in the year, and in the direct track of vessels homeward bound from the East round the Cape of Good Hope. Previous to the opening of the overland route it was a port of call for a vast quantity of shipping and passengers to and from India and other parts of the East, and in consequence of its importance in connection with the Eastern trade, large establishments were maintained, both civil and military. For many years it was also a depôt for liberated Africans landed from slavers captured by the West Coast squadron. As early as 1818 a law was passed that all future children born in the Island should be free.

Beyond the supply of the passing shipping it has never produced any article of export properly so called, except flax fibre (*phormium*). The company which started this industry failed from bad management in transporting the green leaves to town for treatment. For every 100 tons so transported at a heavy cost the yield was only about three tons of fibre, though, under present conditions of working, ten tons of phormium leaves give one ton of fibre and a quarter ton of tow. The industry has now been re-started with the help of a grant from the Home Exchequer, and it is hoped that this will do something to relieve the lack of employment and consequent distress resulting from the recent withdrawal of the Imperial Garrison. The Government Mill opened in 1907, but was closed down in May, 1910, on exhaustion of millable leaf. It was re-opened on 13th November, 1911, and still continues to run. The amount of green leaf milled in 1916 was 1,708 tons, producing 180 tons Fibre and 42½ tons of Tow valued at 10,413*l.*

A second Mill was opened in July, 1913, by a private Firm and produced, in 1915, 153 tons Fibre and 43 tons of Tow, value 5,204*l.*

A third mill, owned by a private firm, was opened in July, 1916, and produced: Leaves milled, 320 tons; produced Fibre, 30 tons; and Tow, 6½ tons; value 1,900*l.* Followed by a fourth on the 3rd March, 1917, which dealt with 815 tons of green leaf, producing 60 tons of Fibre and 14 tons Tow.

The figures in 1915 were:—

| | Govt. | Private Mills. |
|---|---|---|
| Green leaf milled .. | 1,708 tons .. | 1,433 tons |
| Produced Fibre .. | 180 ,, .. | 166 ,, |
| ,, Tow .. | 42½ ,, .. | 47¼ ,, |
| Value .. .. | 10,413*l.* .. | 9,594*l.* |

Land under cultivation of Flax, 800 acres.

There is said to be a field for capital in the preparation of the fibre from the *Furcræa gigantea*, an aloe which grows wild all over the island. Forty tons of aloe leaves yield one ton of fibre.

A lace-making industry was established in August, 1907, with the help of a grant from Imperial funds. It is now controlled by the Colonial Government.

Trade depends upon the visits of the Antarctic whalers and of ships in distress, and has greatly diminished in consequence of the opening of the Suez Canal. The number of ships calling at Jamestown (now a free port) for supplies, including steamers and ships of war was, in 1911, 64; 1912, 60; 1913, 60; 1914, 80; 1915, 45; 1916, 42. It is a port of registry.

The chief industries are phormium fibre and lace-making, fishing and agriculture, the main arable crop being potatoes.

There are no private banks in the Colony, but a Government savings bank was established in 1865
